Dear Bidder,

Heritage's history as Official Auctioneer of the Long Beach Expo stretches across decades and runs hand-in-hand with our growth over the past 42 years into the world's largest numismatic auction company. At last count, we have held more than 90 Signature Auctions for U.S. Coins in conjunction with the Expo, plus many concurrent auctions for currency and specialized collections. This year's Premier Session includes more than 500 lots, supplemented by three additional floor sessions and a robust online session that together provide more than 3,000 additional bidding opportunities, ranging from Colonials to modern issues.

Five gold ingots from the *S.S. Central America* provide a highlight of the sale, and a Mint State 1792 Getz Washington Small Eagle pattern cent is sure to command attention from Colonial specialists. Other top lots include a beautiful Deep Cameo stella ... a Choice About Uncirculated 1881 double eagle ... and a well-pedigreed 1652 Pine Tree shilling, Large Planchet with Pellets, certified MS65 NGC.

Four Featured Collections deserve special mention:

THE SPEECHLESS COLLECTION

While the overall quality and eye appeal may leave bidders at a loss for words, The Speechless Collection speaks volumes about our consignor's preference for quality, as well as his unique collecting perspective. This is a varied collection that represents multiple series, augmented by several outstanding U.S. type coins. In total, The Speechless Collection presents a wide-ranging, high-grade offering of 264 lots. Seated coinage is prominent, as are several Barber series, Buffalo nickels, Shield nickels, classic commemoratives, Indian cents, plus some exceptional early type and gold coins. Likewise, Morgan, Peace, and Trade dollars join Standing Liberty quarters and Walking Liberty halves to share the spotlight. Both proof and circulation strike formats abound, with the average certified grade across the entire collection coming in at an impressive 65.21. Nearly every coin is in Gem or finer grade, including numerous condition rarities. The Premier Session alone features 47 lots from The Speechless Collection, including a stunning 1864 gold dollar certified MS69 NGC, tied for finest-known by date, type, and series, Ex: Akers. An 1829 V-3, LM-2 half dime graded PR65 Cameo PCGS, CAC, is the former Eliasberg specimen, R.7 as a proof.

THE MARCELLO COLLECTION, PART IV

A Very Large Size Harris, Marchand & Co. gold ingot (recovered from the *S.S. Central America*) headlines this installment from the outstanding Marcello Collection, Part IV. The ingot is believed to be unique and weighs 174.04 ounces, stamped with the curved, "eyebrow punch" Harris, Marchand & Co. logotype over a circular MARCHAND ESSAYEUR hallmark. It is the sole Marysville, California branch office ingot recovered from the shipwreck. This exact ingot is discussed in detail in David Bowers' *A California Gold Rush History* anthology. A second lot from The Marcello Collection is a Small-Sized Blake & Co. poured ingot that weighs 14.31 ounces, also recovered from the *S.S. Central America*.

THE DR. JOSEPH A. MURPHY COLLECTION, PART II

Selections from the excellent Morgan dollar collection of Dr. Joseph A. Murphy, Jr. frequent the Premier Session and Floor Session 3. Dr. Murphy was a family man, a Marine, a historian, a pioneer in direct marketing, and an entrepreneur. He was also an avid collector of coins, firearms, and vintage automobiles. His collections have been shown worldwide and honored in books such as *Fine Colts: The Dr. Joseph A. Murphy Collection* and *In Search of Excellence: The Dr. Joseph A. Murphy Collection*. Dr. Murphy found Morgan dollars to be a fascinating look into American history. We note an 1886-O certified MS64 PCGS with exceptional strike and luster, nearly uncollectible any finer. An 1882 Morgan graded MS67 NGC adds its abundant luster and high technical grade to the offering -- fewer than two dozen pieces are certified at the Superb Gem grade, and none are finer at either PCGS or NGC.

FIVE GENERATIONS OF EBY COLLECTION, PART II

We are pleased to offer additional selections from this carefully assembled collection that appear in Floor Sessions 1, 3, 4, and throughout the Internet Signature® Session 5. Classic commemoratives offer many high-grade pieces, with excellent eye appeal. The unmistakable quality crosses over to other series, including Morgan dollars, Peace dollars, Walking Liberty halves, Washington quarters, Mercury dimes, Roosevelt dimes, plus a few Superb Lincoln cents, as well as attractive gold and modern issues. Part I of this fine collection figured prominently in our Orlando January FUN auction, and we anticipate a similar enthusiastic reception at Long Beach.

For those who cannot attend the Long Beach Expo in person, Heritage makes it simple to place bids either before or during the auction. Our live telephone bidding and interactive online bids through HERITAGE Live!® are excellent ways to bid from your computer or mobile device, and provide a bidding platform that is second to none in the auction industry. Real-time mobile or computer bidding is available from anywhere in the world. Our well-trained staff is always happy to accept your bids via e-mail, fax, or regular mail before the auction, and to answer any questions you may have.

Good luck with your bids! Please accept our best wishes for successful New Year and our sincere thanks for your participation at the Long Beach Expo.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Greg'.

HERITAGE
AUCTIONS

SESSION ONE

COLONIALS

- 3001** 1773 Virginia Halfpenny, Period, MS64 Red PCGS. N. 24-K, W-1570, R.1. A plentiful variety showing delicate clash marks on both sides. This near-Gem is fully brilliant with bright orange mint luster and slight brown toning on the design high-points. Population: 40 in 64 Red, 2 finer (12/18). Listed on page 57 of the 2019 *Guide Book*. NGC ID# 2ATK, PCGS# 242
- 3002** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS63 Brown PCGS Gold Shield. N. 8-X, W-6750, R.3. A heavy obverse die break from the border at 6 o'clock, extending up to the sundial, has formed a retained cud, obliterating several letters in the motto. A few planchet flaws are evident on both sides, and are frequently encountered on most varieties of this colonial series. This piece has lustrous brown surfaces with tinges of mint red. Listed on page 99 of the 2019 *Guide Book*. NGC ID# AX5E, PCGS# 883
- 3003** 1791 Washington Large Eagle Cent AU58 PCGS. Baker-15, W-10610, Musante GW-15, R.2. While a trace of rub appears on the high points, this popular colonial issue exhibits glossy chocolate-brown surfaces with splashes of maroon patina on each side. A sharply struck and attractive representative. Listed on page 93 of the 2019 *Guide Book*. NGC ID# 2B6Z, PCGS# 702
- 3004** 1791 Washington Small Eagle Cent MS62 Brown PCGS. Baker-16, W-10630, Musante GW-17, R.3. A pleasing example of this popular colonial issue that was struck in England in 1791. Wispy blue overtones appear on the smooth chocolate-brown surfaces of this piece that retains faded mint red near the borders. Listed on page 93 of the 2019 *Guide Book*. NGC ID# 2B73, PCGS# 705

1791 Washington Cent, MS64 Brown
Small Eagle, Baker-16

- 3005** 1791 Washington Small Eagle Cent MS64 Brown PCGS. Baker-16, W-10630, Musante GW-17, R.3. The 1791 Large and Small Eagle Washington cents were imported to America from England, and inspired the rare 1792 Perkins and Getz varieties. This is a particularly nice Small Eagle cent that boasts a sharp strike and smooth chocolate-brown surfaces. A faint streak in the right obverse field provides the sole imperfection. Listed on page 93 of the 2019 *Guide Book*. Population: 26 in 64 (1 in 64+) Brown, 15 finer (12/18). NGC ID# 2B73, PCGS# 705
- 3006** (1795) Washington Liberty & Security Penny, Plain Rims, MS63 Brown PCGS. Plain Edge, Baker-30A, Musante GW-45, R.2. These popular undated tokens were made and circulated extensively in England. This well-preserved Select specimen offers smooth chocolate-brown surfaces and sharply detailed design elements throughout. Listed on page 96 of the 2019 *Guide Book*. NGC ID# 2B7V, PCGS# 767
- 3007** Undated Washington Success Medal, Large Size, Reeded Edge, AU55 PCGS. Baker-266, DeWitt-GW-1792-2, W-10915, Musante GW-42, R.6. Breen's "Roman Nose" variety, which lacks the prominent obverse die cracks of GW-41 and GW-43. One small spot on the ray below the U in UNITED, but the olive-green and pink-red surfaces are otherwise exemplary. Listed on page 96 of the 2019 *Guide Book*. NGC ID# 2VZ7, PCGS# 780

- 3008** Undated Washington Success Medal, Small Size, Plain Edge, AU50 PCGS. Baker-267A, DeWitt-GW-1792-4, W-10877, Musante GW-44, R.5. Glimpses of luster outline design elements, though Washington displays moderate high point wear. The gunmetal-gray fields are free from detractors. DeWitt believed the success medals were struck for Washington's second inauguration. Musante credits the engraver as Thomas Passmore. Listed on page 96 of the 2019 *Guide Book*. Population: 7 in 50, 14 finer (12/18). NGC ID# 2VZ9, PCGS# 782

HALF CENTS

- 3009** 1793 C-3, B-3, R.3 — Corrosion — NGC Details. Good. Struck during the first year of coinage at the U.S. Mint, this half cent is also a single-year type, facing left instead of right. The coin has full legends and appears sharper than Good, but the deep brown surfaces are evenly granular, and the obverse displays a few hair-thin marks. Our EAC grade Fair 2.

1793 C-4, B-4 Half Cent, VG Details

- 3010** 1793 C-4, B-4, Low R.3 — Obverse Damage — NGC Details. VG. An attempt at punching a hole through this piece has left a noticeable puncture below the Y in LIBERTY on this otherwise smooth, light brown example. Very slight reverse roughness is evident, but the overall appearance remains decent. Our EAC grade AG3.

- 3011** 1797 Plain Edge, Centered Head, C-2, B-2, R.3, Fine 12 NGC. An attractive Liberty Cap half cent, this piece exhibits pleasing chocolate-brown fields and slightly lighter brown devices. A few trivial marks include an old, blended scratch on Liberty's cheek. Overall, an excellent, well-centered example. Our EAC grade VG10. NGC ID# 2228, PCGS# 35104 Base PCGS# 1036

1797 C-2, B-2 Half Cent, VF25
Overstruck

- 3012** 1797 Plain Edge, Centered Head, C-2, B-2, R.3 — Overstruck — VF25 NGC. The NGC holder states that this piece is overstruck, and indeed it is. The most likely candidate for the undertype is that of a Talbot, Allum, and Lee copper, although that identification is tentative. This piece may provide the new owner with several hours of enjoyment. Steel-brown fields frame the chocolate-brown devices of this attractive half cent. Our EAC grade Fine 15. NGC ID# 2228, PCGS# 35104 Base PCGS# 1036

3013 1802/0 Reverse of 1802, C-2, B-2, R.3, Good 6 PCGS. CAC. Manley Die State 4. Both sides are heavily rusted in this state. Although the present coin is well-worn at the Good 6 level, most of the rust lumps are visible with magnification. The reverse rim blends into the field below the fraction and the obverse border is slightly weak along the right-hand rim. However, the central devices are boldly outlined. HALF CENT is weak as always. The deep chocolate-brown surfaces have scattered chatter and light marks, the most significant of which are visible below the TY in LIBERTY and on the crown of her Liberty's head. Our EAC grade Good 4. NGC ID# 222D, PCGS# 35125 Base PCGS# 1057

3014 1804 Plain 4, No Stems, C-13, B-10, R.1, AU58 NGC. CAC. This nicely struck near-Mint Draped Bust half cent is deep brown with occasional hints of lighter golden toning. Luster shimmers from design elements. A faint horizontal hair-thin mark crosses the cheek. Our EAC grade XF45. NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

3015 1804 Plain 4, No Stems, C-13, B-10, R.1, MS62 Brown NGC. This sharply struck olive-brown half cent exhibits traces of faded mint red on the reverse. Both sides have myriad microscopic carbon specks. Our EAC grade AU50. NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

3016 1805 Small 5, Stems, C-2, B-2, FS-301, High R.5 — Environmental Damage — NGC Details. VG. An extremely important half cent variety, much scarcer than the other Small 5, Stems variety. This piece has pleasing olive-brown surfaces with an exceptional obverse. The reverse exhibits microscopic corrosion at the upper right. This example will be a nice addition to any advanced half cent collection. The sharpness grade is VG8, and this is the plate coin for the VG8 grade in the the *Grading Guide for Early American Copper Coins*. Our EAC grade Good 6.

3017 1806 Small 6, No Stems, C-1, B-3, R.1, MS62 Brown PCGS. A boldly struck golden-brown early copper type coin. No marks or spots are conspicuous, and the grade is limited solely by mint-made laminations on the obverse border between 3:30 and 7 o'clock. The laminations are mostly retained, though some flaking is apparent on the rim near the date. Our EAC grade AU50. NGC ID# 222J, PCGS# 35191 Base PCGS# 1093

3018 1806 Small 6, No Stems, C-1, B-3, R.1, MS62 Brown PCGS Gold Shield. A lovely Draped Bust type coin. The well struck and satiny surfaces are predominantly golden-brown, though hints of deeper gray patina appear on the date and wreath. The obverse is remarkably unabraded, and the reverse shows only minor marks beneath CENT. Our EAC grade AU58. NGC ID# 222J, PCGS# 35191 Base PCGS# 1093

**1806 C-2, B-1 Half Cent, AU50
Small 6, Stems, Rare Early Die State**

3019 1806 Small 6, Stems, C-2, B-1, R.4, AU50 PCGS. Breen Die State II. Manley Die State 2.0. Dentil clashing is evident at the RT in LIBERTY on the obverse in this die state. Intermingled tan and steel-brown surfaces show nearly full cartwheel luster. A number of old lines and nicks are evident with a glass. Housed in a green label holder. Our EAC grade VF35. NGC ID# 222J, PCGS# 35194 Base PCGS# 1096

**1806 C-4, B-4 Half Cent, MS63 Brown
Large 6, Stems**

3020 1806 Large 6, Stems, C-4, B-4, R.1, MS63 Brown NGC. Typical for surviving examples of this variety, the drapery is weak at the bust tip, and the top reverse is weak, being the opposite point on this rotated dies coin. Lustrous olive-brown surfaces show mint-green toning, especially on the reverse. Our EAC grade MS60. NGC ID# 222J, PCGS# 35200 Base PCGS# 1099

3021 1834 C-1, B-1, R.1, MS64 Red and Brown PCGS. A sharply struck and satiny near-Gem with considerable original pumpkin-gold color, although the central obverse is primarily gunmetal-blue. Marks are absent except for a single diagonal hairline beneath the shoulder curl. Our EAC grade MS62. NGC ID# 2232, PCGS# 35286 Base PCGS# 1166

3022 1835 C-1, B-1, R.1, MS65 Brown PCGS Gold Shield. Manley Die State 1, lightly clashed on both sides. This Gem Brown coin is lustrous and well-struck with greenish-brown and olive surfaces. No significant abrasions are seen. The reverse is rotated slightly clockwise, as usual. Our EAC grade MS60. NGC ID# 2233, PCGS# 35288 Base PCGS# 1168

3023 1835 C-1, B-1, R.1, MS63 Red PCGS. CAC. Manley Die State 2.0. This intricately struck and virtually unabraded Select representative is predominantly orange-red, although the obverse color has moderately mellowed and a spot is noted at 5 o'clock. Housed in a first generation holder. Our EAC grade MS62. Ex: *Summer FUN Signature (Heritage, 7/2014)*, lot 3021, realized \$1,527.50. NGC ID# 2233, PCGS# 35290 Base PCGS# 1170

**1835 Half Cent, MS65 Red and Brown
C-2, B-2, Late Die State**

3024 1835 C-2, B-2, R.1, MS65 Red and Brown PCGS. Manley Die State 3.0, with an arcing crack through the upper-left reverse quadrant from rim to rim. Another crack travels through the R in AMERICA. This is an absolutely gorgeous Gem half cent with ice-blue at the centers and mixed fire-orange and copper-brown color elsewhere. Glossy and smooth with good detail and no obvious abrasions. Our EAC grade MS63. Population (both Cohen varieties): 33 in 65 Red and Brown, 1 finer (12/18). NGC ID# 2233, PCGS# 35292 Base PCGS# 1169

3025 1849 Large Date, C-1, B-4, R.2, MS65 Brown NGC. Manley Die State 2.0. Die markers visible on the earliest strikes have faded out and are no longer visible, the usual state for these dies. Smooth and sharply struck with lustrous sea-green and mahogany-brown surfaces. This Gem half cent displays original mint red near the wreath and reverse legends. Census: 8 in 65 Brown, 1 finer (12/18). Our EAC grade MS62. NGC ID# 26Y5, PCGS# 35318 Base PCGS# 1218

LARGE CENTS

1793 Wreath Cent, VG10 Large LIBERTY, S-5, B-6

- 3026** 1793 Wreath, Vine and Bars Edge, S-5, B-6, R.4, VG10 PCGS. The copper-brown obverse high points of this 1793 Wreath cent stand out against steel-blue surfaces. Patina is more uniform on the reverse. Central detail is good, but the coin is struck slightly off-center and shows the normal planchet flaws and rim bumps one should expect from this early period. Sheldon-5 has broad leaves that lean slightly right. Our EAC grade VG7. NGC ID# 223H, PCGS# 35447 Base PCGS# 1347

- 3027** 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3, AG3 NGC. Crosby's "Sprung" variety with an obverse bulge near 9 o'clock. This medium brown Wreath cent type coin displays a majority of the date. ONE CENT is faint, but the other reverse legends are mostly present. Lightly and evenly granular with a minor reverse rim nick at 7 o'clock. Our EAC grade Fair 2. NGC ID# 223H, PCGS# 35450 Base PCGS# 1347

- 3028** 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3 — Corroded — ANACS. Fine Details, Net Good 4. The date and LIBERTY are both fully visible on this example that has olive-brown surfaces exhibiting heavy corrosion and multiple rim bruises on both sides. Our EAC grade AG3. NGC ID# 223H, PCGS# 35450 Base PCGS# 1347

1793 S-8, B-13 Wreath Cent, VG Details Vine and Bars Edge

- 3029** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3 — Environmental Damage — NGC Details. VG. Dark steel patina outlines the devices on this attractive light brown Wreath cent that exhibits surface roughness under magnification. Both sides present well with no evidence of serious corrosion or significant defects. In our opinion, the NGC description is overly critical. Our EAC grade Good 6.

- 3030** 1794 Head of 1793, S-18a, B-2a, R.6 — Environmental Damage — PCGS Genuine. Good Details. Ex: House of Davis McKinney. The rare edge subvariety of the scarce S-18, identified by a downward leaf after DOLLAR. The edge leaf is at 12 o'clock and obscured by the top prong of the PCGS holder, and we are relying on the PCGS identification of this subvariety. A granular example with deep gray fields and lighter tan-brown high points. Most of the legends are readable, and no abrasions are apparent. Our EAC grade Fair 2.

- 3031** 1795 Plain Edge, S-77, B-6, R.3, VF30 PCGS. Breen Die State II. A midgrade chocolate-brown Liberty Cap cent. The upper curls display wear consistent with the grade, but the neck curls are well defined. A series of minor flan flaws pass through the portrait, but relevant marks are relegated to the field above the N in ONE. Our EAC grade Fine 15. NGC ID# 223T, PCGS# 35726 Base PCGS# 1380

1795 NC-3, B-7 Cent, Fair 2 A New Discovery

- 3032** 1795 Plain Edge, NC-3, B-7, High R.7, Fair 2 PCGS. In the 2009 Holmes catalog, Bob Grellman recorded six known examples of NC-3 that grade 4-3-2-2-1. The two finest pieces are not recorded in the Noyes photo book that showed a census of 2-2-2-1. This piece, that we grade the same as PCGS, does not match any of those in the Noyes book and is not one of the two finer pieces. So there are now seven known examples, and the Good 4 example is still the finest known. The new Condition Census reads 4-3-2-2-1. Several patches of maroon corrosion appear on the tan and olive-brown surfaces of this important cent. Our EAC grade Fair 2. NGC ID# 2722, PCGS# 35735 Base PCGS# 1380

- 3033** 1796 Liberty Cap, S-89, B-10, R.3 — Environmental Damage — PCGS Genuine Gold Shield. VF Details. Considerable detail remains on both sides of this olive-brown cent that exhibits minor corrosion on the surfaces, mostly only visible with a loupe. This important cent, while not a perfect example, is well centered and displays good overall eye appeal. Our EAC grade Fine 12.

- 3034** 1796 Reverse of 1795, S-97, B-20, R.3, Fine 12 NGC. This is an exceptional 1796 Draped Bust cent for the grade, exhibiting pleasing walnut-brown surfaces that display minimal, entirely trivial handling marks. A flange along the right obverse border folded over, resembling small rim breaks. Our EAC grade Fine 12. NGC ID# 223W, PCGS# 35825 Base PCGS# 1401

1796 S-99, B-22 Cent, VF Details Reverse of 1795

- 3035** 1796 Reverse of 1795, S-99, B-22, R.5 — Environmental Damage — NGC Details. VF. Breen Die State III. A prominent die crack from the rim through the B in LIBERTY, through the cap, and back to the rim at 9 o'clock has created a retained cud above and left of the crack, with that area on a higher plane than the balance of the obverse. The L and I of LIBERTY are weaker than the other letters. This piece has light corrosion on both sides, visible only with a glass, and presents well attractive chocolate-brown surfaces. Our EAC grade Fine 12.

3036 1796 Reverse of 1794, S-107, B-13, R.5 — Damaged — NGC Details. VG. The steel-brown obverse is mostly smooth with only microscopic roughness, while the similarly shaded reverse exhibits light granularity with a few old scratches that are blended into their surroundings. Our EAC grade Good 4.

3037 1798 First Hair Style, S-159, B-18, R.3, VF35 NGC. The prominent vertical die cracks in the left obverse field provide immediate identification of this obverse die that was paired with two reverse dies. The point of the highest leaf in the right branch of the wreath is below the final S in STATES on S-159, and it is right of the final S on the other variety, S-158. The chestnut and steel-brown surfaces of this cent host myriad handling marks, yet retain excellent eye appeal. Our EAC grade VF20. NGC ID# 2244, PCGS# 36041 Base PCGS# 1431

**1800 S-205 Cent, AU Details
Ex: Dan Holmes Collection**

3038 1800 S-205, B-26, R.4 — Surfaces Smoothed — PCGS Genuine Gold Shield. AU Details. Breen Die State III, "rare." The awkwardly recut MER in AMERICA provides an identifier, and the horizontal die crack on the left obverse field locks in the variety. A bold example of this better die marriage. Lavender and sea-green shades visit glossy, unblemished surfaces that show evidence of light burnishing. Described in the first Dan Holmes sale as "sharpness very close to Mint State but lightly cleaned and nicely retoned. ... Great eye appeal. ... Called MS60 and tied for CC#3 in the Bland census. Noyes says AU50 choice and tied for CC#4, his photo #29415." Our EAC grade XF40.

Ex: Thomas L. Elder, 1932; Wayte Raymond, 1933; Dr. William H. Sheldon, 11/1948; Judge Thomas L. Gaskill (New Netherlands Coin Co., 11/1956); Dorothy Paschal; Dr. William H. Sheldon, 1956; C. Douglas Smith, 1971; R.S. Brown, Jr. Collection (Superior, 9/1986), lot 299; Tony Terranova; Stack's; Hain Family Collection (Stack's, 1/2002), lot 742; Chris McCawley, 11/2007; Dan Holmes Collection, Part I (Ira & Larry Goldberg, 9/2009), lot 388, which realized \$9,775.

3039 1800 S-212, B-20, R.3, VF35 NGC. Pale blue toning appears over the medium brown obverse of this pleasing middle-grade 1800 cent. Dr. Sheldon stated that the cents of 1800 were "the hardest to find in fine condition." Slightly blunt details are evident at the lower right side of the reverse, where minor verdigris adheres to the surface. Our EAC grade VF25. NGC ID# 2248, PCGS# 36224 Base PCGS# 1449

3040 1802 No Stems, S-231, B-9, R.1, XF45 PCGS. Breen Die State II. One of only two 1802 No Stems die marriages, further distinguished by prominently clashed dentils across ERICA and the right ribbon end. This richly detailed mahogany-brown representative is pleasing despite a pair of thin field marks near the neck and forehead. Our EAC grade VF35. NGC ID# 224F, PCGS# 36344 Base PCGS# 1476

**1803 Cent, Mint State Sharpness
S-253, Small Date, Small Fraction**

3041 1803 Small Date, Small Fraction, S-253, B-12, R.2 — Altered Surfaces — PCGS Genuine Gold Shield. Unc Details. Breen Die State III-IV. The long, thin die scratch from the right wreath stem is the pick-up point for Sheldon-253, along with a dull die lump east of the denominator. The obverse is less distinctive, though there is a delicate ascending die crack below the bust tip. Moderately triple clashed. S-253 is rare with Mint State sharpness. The smooth surfaces are dusky golden-brown with a blush of deeper medium brown toning on the central reverse. Marks and spots are virtually absent, though we note a faint fingerprint fragment on the obverse at 8 o'clock. Our EAC grade XF40.

3042 1804 S-266a, B-1, R.2, AG3 NGC. Those who collect by major die state know that S-266c is usual, S-266a is scarcer, and S-266b is rarest. S-266a lacks a cud above either RTY or MERIC. This key date cent has evenly microgranular tan-brown fields that contrast with pearl-white high points. UNITED STATES is faint, but the remaining legends are clear. Our EAC grade AG3. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

**1804 S-266c, B-1 Cent, VG8
Obverse and Reverse Breaks**

3043 1804 S-266c, B-1, R.2, VG8 NGC. Rim breaks appear on the obverse and reverse of this late die state 1804 cent. Although myriad handling marks are consistent with the grade, this lovely example has no corrosion or other problems on either side, with smooth appearing dark olive-brown surfaces and excellent eye appeal. Our EAC grade VG8. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

3044 1804 Restrike MS63 Brown PCGS. An exceptional example of the privately made restrike from heavily rusted and cracked obverse and reverse dies. This olive-brown and pale blue piece has quite a bit of red remaining for the brown designation. Our EAC grade MS60. NGC ID# 224J, PCGS# 45344

3045 1806 S-270, B-1, R.1, XF40 NGC. A glossy and attractive medium brown example of this important variety, the only die marriage of 1806, enjoying demand from date and variety collectors alike. A glass reveals myriad surface marks on both sides of this example. Our EAC grade VF20. NGC ID# 224L, PCGS# 36436 Base PCGS# 1513

3046 1809 S-280, B-1, R.2 — Corroded — ANACS. AU55 Details. A single-variety large cent date, the 1809 is a scarce issue, and especially difficult to locate in higher grades. This piece has excellent sharpness with pleasing medium brown surfaces, although the reverse shows considerable ebony corrosion that has been partially removed. Our EAC grade VF20. NGC ID# 224R, PCGS# 36466 Base PCGS# 1546

3047 1814 Plain 4, S-295, B-2, R.1 — Cleaned — PCGS Genuine Gold Shield. AU Details. Breen Die State X, with an arcing crack at the lower obverse, die chips at the lip and throat, and the tops of ATES OF merging with the rim. The 1814 Plain 4 cent was well-saved as a final-year type. Deep brown surfaces have a slightly unnatural appearance from cleaning, but detail is good and evidence of circulation is minimal. Our EAC grade VF20.

3048 1820 Large Date, N-13, R.1, MS65 Brown NGC. A splendid Gem, this sharply struck 1820 N-13 cent exhibits the diagnostic peripheral obverse die cracks seen on all examples of this Randall Hoard variety. Fully lustrous and essentially pristine walnut-brown surfaces display traces of mint red and lovely light blue overtones. Our EAC grade MS62. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

**1820 N-13 Cent, MS66 Brown
Randall Hoard Variety**

3049 1820 Large Date, N-13, R.1, MS66 Brown PCGS Gold Shield. The die cracks that join all the stars on the obverse identify this variety that was part of the famous Randall Hoard of 1816 through 1820 large cents found in the 19th century. The 1820 N-13 is the best made of the several Randall Hoard varieties, and an ideal type collection candidate. This lovely Premium Gem has virtually flawless surfaces with sharp design features, although a few of the stars are flat. Chocolate-brown with a few steel toning splashes. Our EAC grade MS62. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

3050 1820 Large Date, N-13, R.1, MS64 Red and Brown PCGS. CAC. The initial orange-gold color outlines stars and letters, and is especially plentiful on the upper reverse. Virtually void of marks. A splendid Randall Hoard representative. Encapsulated in a green label holder. Our EAC grade MS62.
Ex: Twelve Oaks Collection (Heritage, 9/2016), lot 13003, which realized \$1,880. NGC ID# 2256, PCGS# 36674 Base PCGS# 1616

**1821 N-1 Cent, AU50
Important Semikey Issue**

3051 1821 N-2, R.1, AU50 PCGS. CAC. While the 1823 cent garners attention in high grades as the key to the middle-date large cent series, the 1821 holds its own in the scarcity race, especially in higher grades. Well struck with slight, even wear and rich chocolate-brown coloration over the slightly glossy surfaces. A handful of small marks appear on the obverse; the reverse is nearly blemish-free. Our EAC grade XF40. NGC ID# 2258, PCGS# 36709 Base PCGS# 1621

3052 1826 N-7, R.1, MS63 Brown NGC. Repunching on the R in LIBERTY and the N in CENT is diagnostic for the Newcomb variety. Blended sea-green and chocolate-brown toning embrace this lustrous and well struck Select Matron Head cent. Impressively free from marks or spots. Our EAC grade AU55. NGC ID# 225G, PCGS# 36829 Base PCGS# 1645

3053 1827 N-11, R.1, MS63 Brown PCGS. CAC. This die marriage ranks among the more plentiful varieties in Mint State grades, yet it is hardly a common issue in grades of 60 or finer. Both sides display full cartwheel luster on the chocolate-brown surfaces. Traces of luster remain in the protected areas. An exquisite Select Mint State piece with excellent eye appeal. Our EAC grade MS60. NGC ID# 225H, PCGS# 36868 Base PCGS# 1651

3054 1833 N-5, R.1, MS64 Brown PCGS. The 8 in the date is recut on this die marriage that is often called the Horned 8 variety. Faded mint red is visible on the rich dark chocolate surfaces of this lovely Choice Mint State cent that features full cartwheel luster. Vivid blue overtones appear on the reverse. Our EAC grade MS62. NGC ID# 225P, PCGS# 37030 Base PCGS# 1696

3055 1841 N-7, R.2, MS65 Brown PCGS Gold Shield. The 1841 and 1844 large cents are scarce issues in high grades. This Gem 1841 N-7 cent is an outstanding candidate for a large cent date collection, or for an advanced variety collection. Both sides have pristine olive-brown surfaces with faint blue overtones, retaining considerable mint red. Our EAC grade MS63. NGC ID# 2267, PCGS# 405809 Base PCGS# 1832

**1844 N-3 Cent, MS64 Red and Brown
Only a Few Finer Pieces Exist**

3056 1844 N-3, R.2, MS64 Red and Brown PCGS. Grellman Die State c. S sharp and attractive Red and Brown example of the N-3 die marriage, in an intermediate die state. Repunching is clear on the base of 1 and 8, with the faint beginnings of tiny rim cuds between stars 7 and 9. Delicate die cracks appear among the letters of the reverse legend. A pair of tiny points from the base of N in ONE remains visible in this middle die state. At least 60% of the original mint red glows among the devices, fading to brown at the high points of the design. Sharply struck, with a few light obverse marks and scattered carbons. Our EAC grade MS64. PCGS# 397726 Base PCGS# 1857

3057 1845 N-4, R.1, MS65 Brown NGC. Grellman Die State c. Although designated as Brown, enough brick-red remains in design recesses to suggest Red and Brown status. This sharply struck Gem shows only trivial contact, though we note a fingerprint fragment on the field near the neck curls, and a small spot on the reverse rim at 9 o'clock. Our EAC grade MS63. NGC ID# 226B, PCGS# 397749 Base PCGS# 1862

3058 1848 N-21, R.3, MS65 Brown PCGS Gold Shield. CAC. Grellman Die State b. Die lines on Liberty's neck and the T in CENT are characteristic of this distinctive Newcomb variety. This lovely mahogany-brown Gem is virtually void of carbon and contact. The central reverse has a few minute strike-throughs, as coined. Our EAC grade MS60. For all 1848 varieties, Population: 21 in 65 (1 in 65+) Brown, 2 finer. CAC: 26 in 65, 5 finer (12/18). PCGS# 406491 Base PCGS# 1883

3059 1853 N-25, R.1, MS65+ Red and Brown PCGS. CAC. Grellman Die State b. Radiant orange-red outlines the stars, legends, wreath, and portrait. An essentially unabraded Gem with minimal carbon and exceptional eye appeal. Specialists promptly attribute N-25 by the short horizontal "bar" from the dentils west of star 1. Our EAC grade MS64. NGC ID# 226K, PCGS# 403926 Base PCGS# 1902

3060 1854 N-14, R.2, MS65+ Brown PCGS Gold Shield. CAC. Grellman Die State b. Fire-red outlines the stars and letters of this otherwise chocolate-brown Gem. Only star 5 lacks an intricate strike. Both sides appear pristine, though unimportant mint-made strike-throughs are on Liberty's neck and below the N in CENT. Our EAC grade MS63. PCGS# 406100 Base PCGS# 1904

3061 1855 Upright 55, N-4, R.1, MS65+ Red and Brown PCGS. Grellman Die State a. Orange-red dominates the reverse, as well as the obverse border. The portrait and nearby field are medium brown. Stars 2 through 9 are incompletely impressed, and a mint-made strike-through is present above ONE, but the surfaces are remarkably devoid of contact. Our EAC grade MS64. NGC ID# 226M, PCGS# 46953 Base PCGS# 1908

1857 Braided Hair Cent, MS66+ Brown Small Date, N-2

3062 1857 Small Date, N-2, R.1, MS66+ Brown NGC. This ultra-glossy, high-end Premium Gem maintains substantial mint red around most of the obverse motifs. Overall, each side shows a mix of steel-blue, violet, and deep brown color with added glints of sea-green on the reverse. Softness is limited to the stars on this boldly defined example. Nearly void of carbon or ticks. Among the finest N-2 cents in any color category at NGC (12/18). Our EAC grade MS62. NGC ID# 226P, PCGS# 148732 Base PCGS# 1931

FLYING EAGLE CENTS

3063 1857 MS64 PCGS Gold Shield. A well-made example, this Choice Mint State Flying Eagle cent just misses the Gem grade level due to trivial, microscopic carbon flecks on the reverse. A few scattered marks are evident, and a low area (as struck) is noted near the O in ONE. NGC ID# 226P, PCGS# 2016

3064 1857 MS64 NGC. This softly lustrous, tan-gold cent is sharply struck, with pleasing color and minimally marked surfaces. Numerous examples of the 1857 exist at near-Gem level, which is an optimal collecting grade for many Flying Eagle specialists, given the large price difference between MS64 and MS65 coins. The Choice surfaces of the present example offer especially strong quality and eye appeal for the issue. NGC ID# 226P, PCGS# 2016

3065 1857 MS64 PCGS Gold Shield. CAC. Splashes of dark brown toning appear on the lustrous tan surfaces of this lovely Choice Mint State example from the first obtainable year of the Flying Eagle cent for most collectors. NGC ID# 226P, PCGS# 2016

1857 Flying Eagle Cent, MS65 Lustrous and Well-Preserved

3066 1857 MS65 NGC. A high-grade caramel-gold type coin. Carbon and contact are inconsequential, and booming luster ensures the eye appeal. The strike shows softness on the tip of the tail and the upper leaves of the wreath. The lower obverse lacks dentils, likely because of a minor die misalignment. The NGC insert is signed by *Guide Book* Editor Emeritus Kenneth Bressett. NGC ID# 226P, PCGS# 2016

3067 1858 Large Letters MS64 PCGS. High Leaves Reverse. Close E in ONE. A well struck chestnut-gold Choice cent. Impressively free from marks, and only a trace of carbon is present. A desirable example of the short-lived type, which was coined for commerce for only two years. Encapsulated in a green label holder. NGC ID# 2277, PCGS# 2019

3068 1858 Large Letters MS64 NGC. High Leaves, Closed E in ONE. Rich sea-green and apricot toning adorns this lustrous and essentially carbon-free near-Gem. A good strike with only moderate blending on the tail feathers and right-side cotton leaves. A few subdued marks are noted above the date. NGC ID# 2277, PCGS# 2019

1858 Large Letters Cent, MS65 Fully Struck

3069 1858 Large Letters MS65 PCGS Gold Shield. High Leaves Reverse. Closed E in ONE. This final-year type coin enjoys remarkably smooth and well-frosted surfaces that show mostly tan-gold color but also hints of lavender. The eagle's feathers and the wreath elements, including the bow knot, are fully struck. NGC ID# 2277, PCGS# 2019

3070 1858 Small Letters MS64 NGC. A lustrous and pleasing chestnut-tan near-Gem. Refreshingly unabraded, and intricately struck for a business issue of the type. A small gray spot is beneath the N in CENT. NGC ID# 2279, PCGS# 2020

3071 1858 Small Letters MS64 NGC. This is an exceptional Flying Eagle cent for the Choice Mint State grade, limited only because of a couple spots on the reverse. Lovely gold tones appear on the fully lustrous surfaces of this sharply struck beauty. NGC ID# 2279, PCGS# 2020

**1858 Small Letters Cent, MS65
Exceptional Strike and Color**

- 3072 1858 Small Letters MS65 NGC.** Low Leaves Reverse. Close E in ONE. A well struck and undisturbed pumpkin-gold Gem. Marks are limited to a few tiny ticks beneath STATES. The obverse is moderately strike doubled. Final year of the briefly coined introductory small cent type. The NGC insert is autographed by *Guide Book* Editor Emeritus Ken Bressett. Census: 72 in 65, 15 finer (12/18). NGC ID# 2279, PCGS# 2020

INDIAN CENTS

- 3073 1862 MS66 PCGS Gold Shield. CAC.** This spectacular Premium Gem exhibits sharply detailed design elements in most areas, with just the slightest softness on the tips of the headdress feathers. The impeccably preserved surfaces are lustrous and appealing, with light copper-gold patina. NGC ID# 227H, PCGS# 2064
- 3074 1866 MS65+ Red and Brown PCGS Gold Shield.** This Plus-graded Gem exhibits sharply detailed design elements, with some light clash marks on both sides. The well-preserved original red surfaces have mellowed to light brown in some areas, with vibrant mint luster throughout. Population: 88 in 65 (1 in 65+) Red and Brown, 6 finer (12/18). NGC ID# 227P, PCGS# 2086
- 3075 1866 MS65 Red and Brown PCGS. CAC.** This brilliant Gem has virtually full but faded mint red, showing slight bluish-brown toning and minimal microscopic spots on each side. It is an exceptional example for the grade and color designation. Population: 88 in 65 (1 in 65+) Red and Brown, 6 finer. CAC: 25 in 65, 4 finer (12/18). NGC ID# 227P, PCGS# 2086
- 3076 1867/67 Snow-1, FS-301, MS64 Brown PCGS Gold Shield.** The 6 and 7 in the date are dramatically repunched and visible without magnification. The "naked-eye" varieties are always extremely popular with collectors. This piece has faint blue overtones on its chocolate-brown surfaces that are blended with considerable mint red. Population: 8 in 64 (1 in 64+) Brown, 4 finer (12/18). NGC ID# 227R, PCGS# 37459 Base PCGS# 92088
- 3077 1868 MS65 Red NGC.** The original red surfaces of this attractive Gem radiate vibrant mint luster and show no mentionable distractions. The design elements are well-detailed, with just a touch of the usual softness on the hair and ribbon. Census: 15 in 65 Red, 3 finer (12/18).
From The Speechless Collection. NGC ID# 227S, PCGS# 2093
- 3078 1868 MS65 Red PCGS.** The highly lustrous surfaces are slightly subdued but still showing amazing orange mint color on both sides. This is an important opportunity for the Registry collector. Population: 48 in 65 (1 in 65+) Red, 4 finer (12/18).
From The Speechless Collection. NGC ID# 227S, PCGS# 2093
- 3079 1869 MS65 Brown PCGS.** All date digits appear minutely repunched, most noticeably beneath the flag of the 1 and the upper loop of the 6, but the variety is unlisted in the 2014 Snow standard reference. The reverse is walnut-brown, but the obverse displays interspersed tan-gold and steel-gray toning. A razor-sharp Gem with exemplary surfaces. NGC ID# 227T, PCGS# 2094

- 3080 1869 MS64 Red and Brown PCGS Gold Shield. CAC.** This attractive Choice example exhibits sharply detailed design elements, with light clashing on both sides. The still-lustrous, well-preserved surfaces show a mix of original red, light brown, and crimson patina. NGC ID# 227T, PCGS# 2095

- 3081 1869 MS65 Red and Brown PCGS. CAC.** This delightful Gem exhibits sharply detailed design elements and well-preserved surfaces that show a mix of original red and light brown patina. The surfaces remain lustrous and appealing. PCGS has graded 11 numerically finer examples (12/18). NGC ID# 227T, PCGS# 2095

**1869/69 Indian Cent, Snow-3a
FS-301, MS66 Brown**

- 3082 1869/69 Snow-3a, FS-301, MS66 Brown PCGS.** Recutting is strongest at the second 9 in the date, and visible on the adjacent 6 as well. This popular *Cherry-pickers'* and *Guide Book* variety has been studied extensively since it was discovered by Walter Breen. This Premium Gem example is lustrous with deep Mint red color shining beneath an overlay of cobalt-blue patina. Sharply struck with virtually no marks to report, we are not aware of any finer examples certified in Brown format. The eye appeal is extraordinary. NGC ID# 227T, PCGS# 37474 Base PCGS# 2094
- 3083 1870 MS64 Red and Brown PCGS Gold Shield. CAC.** Bold N in ONE. The design elements of this impressive Choice example are well-detailed and the well-preserved original red surfaces have mellowed to light brown in some areas. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 227U, PCGS# 2098
- 3084 1871 MS64 Red and Brown PCGS Gold Shield. CAC.** Bold N in ONE. An exemplary coin for the grade, without any noticeable abrasions. The CAC endorsement is well-deserved. Satiny mint luster reveals original copper-orange hues in the fields and recesses, with olive and burgundy toning overall. Eye appeal is outstanding for the grade. NGC ID# 227V, PCGS# 2101
- 3085 1872 MS64 Brown PCGS Gold Shield. CAC.** The well-preserved surfaces of this impressive Choice specimen have mellowed to steel-brown and lilac, with occasional traces of original red at the peripheries. The design elements are sharply detailed throughout. Population: 60 in 64 (1 in 64+) Brown, 18 finer. CAC: 17 in 64, 13 finer (12/18). NGC ID# 227W, PCGS# 2103

**1872 Cent, MS65 Red and Brown
CAC-Approved and Rare Any Finer**

3086 1872 MS65 Red and Brown PCGS Gold Shield. CAC. Bold N in ONE. Original red color mellows to chestnut-brown shades throughout this Gem 1872 cent. Satin mint luster glows across the smooth, mark-free surfaces. A few pinpoint flecks of brownish-gray toning merge seamlessly into the attractive coloration of this sharply struck example. The 1872 issue is rare any finer. PCGS reports 12 finer submissions in the Red and Brown category (12/18). NGC ID# 227W, PCGS# 2104

3087 1873 Closed 3 MS64 Red and Brown PCGS Gold Shield. CAC. An elusive variety, the Closed 3 was struck early in the year. This Choice Mint State piece exhibits light olive and blue toning on its brilliant orange mint surfaces with excellent eye appeal. CAC: 26 in 64, 18 finer (12/18). NGC ID# 227X, PCGS# 2110

3088 1878 MS66 Red and Brown NGC. This sharp Premium Gem is mostly Red, although wisps of burgundy toning on each side earn the Red and Brown designation from NGC. No distracting abrasions are present and eye appeal is outstanding. Census: 15 in 66 (1 in 66 ★) Red and Brown, 0 finer; 6 in 66 Red, 0 finer (12/18). NGC ID# 2285, PCGS# 2131

3089 1879 MS65 Red PCGS Gold Shield. This delightful Gem specimen exhibits razor-sharp definition on all design elements and the well-preserved original red surfaces radiate vibrant mint luster throughout. Population: 64 in 65 (3 in 65+) Red, 25 finer (12/18). NGC ID# 2286, PCGS# 2135

3090 1880 MS65 Red PCGS. A condition rarity in Red Gem or finer grades, as are most Indian cents of the 19th century, this piece has an excellent strike with slight weakness only at the diamonds on the obverse. Both sides are brilliant and highly lustrous with bright orange surfaces. Population: 50 in 65 Red, 25 finer (12/18). NGC ID# 2287, PCGS# 2138

3091 1880 Doubled Die Obverse, Clashed Reverse, Snow-1, FS-101, MS65 Brown PCGS. CAC. Snow-1 is a popular die variety showing a heavy, misaligned die clash on the reverse. An impression of a rim and dentils is visible from the right side of the shield down through the E in ONE. On the obverse, minute die doubling is evident on LIBERTY. This Gem Brown coin displays satiny mint luster and well-struck design elements. Copper-orange, burgundy, and sea-green toning covers each side. NGC ID# 2287, PCGS# 37513 Base PCGS# 2136

3092 1880 Doubled Die Obverse, Clashed Reverse, Snow-1, FS-101, MS65 Red and Brown PCGS. Heavily clashed on the reverse from misaligned dies, FS-101 shows the impression of border dentils in an arc from the top right of the shield down through the E in ONE. On the obverse, LIBERTY exhibits slight die doubling. This Red and Brown Gem is mostly copper-orange in color, showing only traces of burgundy toning. It is well-struck and appealing. PCGS# 37514 Base PCGS# 2137

3093 1882 MS66 Red NGC. Orange-gold and lilac-red alternate across this lustrous and nicely struck Premium Gem. The central reverse displays minor carbon. Conditionally rare in the present grade, and certified in a circa-2000 holder. Census: 5 in 66 Red, 0 finer (12/18). NGC ID# 2289, PCGS# 2144

3094 1887 MS65 Red PCGS. CAC. A satiny Gem, this 1887 Indian cent features brilliant orange mint luster with scattered carbon specks visible under a loupe. The lower obverse exhibits incomplete design definition. Population: 63 in 65 (1 in 65+) Red, 30 finer. CAC: 15 in 65, 13 finer (12/18). NGC ID# 228F, PCGS# 2159

3095 1895 MS66 Red NGC. An impressive Premium Gem, this Indian cent exhibits gorgeous orange mint color with satin luster and traces of light gold overtones. An exceptional piece for the advanced collector, and rarely found in finer grades. Census: 35 in 66 Red, 8 finer (12/18). NGC ID# 228P, PCGS# 2192

3096 1906 MS66 Red PCGS. This spectacular Premium Gem Indian cent exhibits well-detailed design elements and impeccably preserved original red surfaces that radiate vibrant mint luster and terrific eye appeal. Population: 49 in 66 (3 in 66+) Red, 3 finer (12/18). NGC ID# 2293, PCGS# 2225

3097 1908 MS66 Red PCGS. The design elements of this delightful Premium Gem are well-detailed and the original red surfaces are impeccably preserved, with vibrant mint luster on both sides. Overall eye appeal is outstanding. PCGS has graded two numerically finer examples (12/18). NGC ID# 2295, PCGS# 2231

3098 1908-S MS64 Red PCGS. Housed in a green-label PCGS holder, this is an amazing Choice Mint State 1908-S Indian cent that exhibits brilliant orange mint luster with trivial toning spots that limit the grade. The first branch-Mint small cent. NGC ID# 2296, PCGS# 2234

3099 1909-S MS64 Brown PCGS Gold Shield. The upper headdress feathers and the reverse wreath bow are weakly struck, as usual for this final-year key. Nonetheless, the chestnut-brown surfaces are attractively luminous with tinges of golden-orange luster shining through the fields. Eye appeal is pleasing. NGC ID# 22B4, PCGS# 2238

3100 1909-S MS63 Red PCGS. CAC. This key date Indian cent has bright straw-gold surfaces that exhibit well struck devices. Lightly scattered marks do not overly detract. Excellent eye appeal. Ex: *Long Beach Signature (Heritage, 2/2005)*, lot 5262. NGC ID# 2298, PCGS# 2240

3101 1909-S MS64 Red NGC. Orange and green-gold accents adorn this lustrous and unabraded near-Gem. A precisely struck key date cent with minimal carbon and good eye appeal. Only the second year that cents were struck at San Francisco, delayed by a 19th century law designed to protect silver interests. NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

**1861 Indian Cent, PR64
Colorful Copper-Nickel Type Coin**

3102 1861 PR64 PCGS. A razor-sharp copper-nickel proof type coin, showing near-Gem surfaces with shades of peach, lilac, and copper-orange toning. Eye appeal is outstanding for the grade. No contact marks are present, and only a few faint flecks on the reverse are seen with magnification. Population: 68 in 64 (1 in 64+), 32 finer (12/18).

From The Speechless Collection. NGC ID# 229B, PCGS# 2256

- 3103 1862 PR64 NGC. CAC.** The 1862 proof cent is the most collectible Type Two issue, with an estimated 1,500 to 2,000 pieces struck. This amber-gold and pumpkin-orange near-Gem displays partial contrast on the reverse and few contact marks for the grade. Great eye appeal. CAC: 21 in 64, 29 finer (12/18). *From The Speechless Collection.* NGC ID# 229C, PCGS# 2259
- 3104 1866 PR65 Red and Brown PCGS.** Razor-sharp definition is evident on all design elements of this attractive Gem proof and the virtually pristine surfaces show a mix of original red and light brown patina, with reflective fields on both sides. Population: 56 in 65 (1 in 65+) Red and Brown, 29 finer (12/18). NGC ID# 229J, PCGS# 2286
- 3105 1870 PR65 Red and Brown PCGS Gold Shield. CAC.** Delicate blue, rose, and iridescent toning appears on the light orange surfaces of this lovely Gem proof. An exceptional example with wonderful eye appeal. Population: 50 in 65 (1 in 65+) Red and Brown, 16 finer. CAC: 14 in 65, 5 finer (12/18). NGC ID# 229N, PCGS# 2298
- 3106 1871 PR64 Red PCGS. CAC.** The original red surfaces of this impressive Choice proof include reflective fields and show only minor signs of contact. The design elements are sharply detailed throughout. Population: 35 in 64 Red, 36 finer. CAC: 2 in 64, 10 finer (12/18). *From The Speechless Collection.* NGC ID# 83VK, PCGS# 2302
- 3107 1875 PR65 Red and Brown PCGS. CAC.** The well-preserved surfaces of this delightful Gem proof Indian cent show a mix of original red and light brown patina. The design elements are sharply detailed and the fields are deeply reflective. Population: 42 in 65 (3 in 65+) Red and Brown, 11 finer. CAC: 13 in 65, 0 finer (12/18). NGC ID# 229U, PCGS# 2313
- 3108 1907 PR66 Red and Brown NGC.** The well-preserved original red surfaces of this delightful Premium Gem proof have mellowed to crimson and brown in some areas, with deeply mirrored fields and sharply detailed design elements on both sides. Census: 14 in 66 (1 in 66 ★) Red and Brown, 2 finer (12/18). NGC ID# 22AW, PCGS# 2409
- 3113 1909-S VDB MS63 Red and Brown PCGS.** The popular key-date from the first year of the design, the 1909-S VDB cent had a mintage of just 484,000 coins. This piece has attractively blended deep orange and olive-brown with delicate blue overtones. NGC ID# 22B2, PCGS# 2427
- 3114 1909-S VDB MS64 Red and Brown NGC.** An impressive Choice example of this sought-after, first-year key, with well-detailed design elements and bold VDB. The well-preserved red surfaces have mellowed to light brown in some areas, with vibrant mint luster on both sides. NGC ID# 22B2, PCGS# 2427
- 3115 1909-S VDB MS64 Red and Brown PCGS. CAC.** The designer's initials are bold on this sought-after, low-mintage key, and the design elements are sharply detailed throughout. The well-preserved, lustrous surfaces show a mix of original red and light brown toning. NGC ID# 22B2, PCGS# 2427
- 3116 1909-S VDB MS65 Red and Brown NGC.** The pleasing steel-brown and violet surfaces of this impressive Gem show no mentionable distractions and the design elements of this celebrated first-year key are sharply detailed throughout. NGC has graded 47 numerically finer Red and Brown specimens (12/18). NGC ID# 22B2, PCGS# 2427
- 3117 1909-S VDB MS65 Red and Brown PCGS.** The important V.D.B. initials are sharply brought up on this attractive, Red and Brown Gem. Mint red color glows prominently throughout the lustrous, minimally marked surfaces. Lincoln's shoulder is mark-free, while the obverse strike complements the other well-struck elements. Any carbon flecks require magnification to view, limited to a only a few random, pinpoint specks on the overwhelmingly smooth and attractive surfaces. NGC ID# 22B2, PCGS# 2427
- 3118 1909-S MS66 Red and Brown PCGS. CAC.** An exceptional Premium Gem that many would call full Red, this piece has stippled bluish-brown toning on each side. Sharply struck and highly attractive. This example is tied for the finest certified with the Red and Brown designation (12/18). CAC: 14 in 66 Red and Brown, 0 finer (12/18). NGC ID# 22B4, PCGS# 2433
- 3119 1909-S MS65 Red PCGS. CAC.** This first-year San Francisco Lincoln cent is stunning, displaying frosty mint luster and fiery orange mint color. A few freckles of toning are visible with a glass. An excellent example of this important issue, and destined for a high quality Registry set. NGC ID# 22B4, PCGS# 2434

LINCOLN CENTS

- 3109 1909 VDB Doubled Die Obverse, FS-1101, MS65 Red PCGS Gold Shield.** Die doubling is evident on LIBERTY and the date, easily seen with a loupe. This Gem Red example of the variety is conditionally scarce. Fire-orange luster is vividly luminous on each side, not marred by any significant abrasions. A few faint pepper specks are noted for accuracy. NGC ID# 4JR9, PCGS# 37633 Base PCGS# 82425
- 3110 1909 VDB Doubled Die Obverse, FS-1101, MS65 Red PCGS Gold Shield.** A circular area of greenish-blue toning hugs the obverse rim at 9 o'clock, and a few flecks of carbon are visible elsewhere on both sides. This Gem Red example of the 1909 VDB Double Die Obverse cent is sharp and lustrous with original copper-orange color. Luster shimmers beneath a light. NGC ID# 4JR9, PCGS# 37633 Base PCGS# 82425
- 3111 1909 VDB Doubled Die Obverse, FS-1101, MS65 Red PCGS Gold Shield.** Frosty fire-orange luster engulfs this Gem Red FS-1101 VDB Lincoln cent. The variety shows considerable die doubling on LIBERTY and the date, as well as Lincoln's bowtie. This piece is sharp and unabraded. A few dark flecks are visible beneath a loupe but do not detract. NGC ID# 4JR9, PCGS# 37633 Base PCGS# 82425
- 3112 1909-S VDB MS64 Brown PCGS Gold Shield. CAC.** An impressive Choice specimen of this low-mintage first-year key, with well-detailed design elements and bold designer's initials. The lightly marked surfaces show mostly light brown patina, with highlights of original red in many areas. NGC ID# BYKW, PCGS# 2426

1909-S Lincoln Cent, MS66 Red
Only 10 Finer at PCGS

- 3120 1909-S MS66 Red PCGS. CAC.** This Premium Gem is an outstanding example with fully brilliant yellow-orange mint luster and precise design details on both sides. Microscopic toning spots are mostly limited to the obverse of this attractive cent. PCGS has only certified 10 finer Red examples (12/18). NGC ID# 22B4, PCGS# 2434
- 3121 1911 MS66+ Red PCGS Gold Shield.** This Plus-graded Premium Gem offers impeccably preserved original red surfaces, with vibrant mint luster on both sides and sharply detailed design elements throughout. Eye appeal is terrific. PCGS has graded 17 numerically finer specimens (12/18). NGC ID# 22B7, PCGS# 2443

3122 1911-D MS66 Red PCGS Gold Shield. An amazing Premium Gem, this fiery orange Denver Mint cent has full orange mint brilliance and sharp design details, although the mintmark is weak. An exceptional example for the connoisseur. Population: 68 in 66 (10 in 66+) Red, 2 finer (12/18). NGC ID# 22B8, PCGS# 2446

3123 1912-D MS65 Red PCGS. his attractive Gem exhibits sharply detailed design elements and well-preserved original red surfaces, with vibrant mint luster and terrific eye appeal. Housed in a green label holder. PCGS has certified 35 numerically finer Red examples (12/18). NGC ID# 22BB, PCGS# 2455

3124 1914-D MS62 Brown PCGS Gold Shield. An impressive MS62 example of this low-mintage key, with sharply detailed design elements and lightly marked surfaces that have mellowed to light brown. There is some slight granularity in the right obverse field. NGC ID# 84BX, PCGS# 2471

1914-D Cent, MS63 Brown Premier Key in the Series

3125 1914-D MS63 Brown PCGS Gold Shield. Denver Lincoln cent production declined significantly to just 1.1 million coins in 1914, making this one of the premier key dates in the series. Smooth chocolate-brown surfaces exhibit sharp strike detail and a few small spots of bluish toning. A single tick below ST in TRUST is noted. NGC ID# 84BX, PCGS# 2471

3126 1920-S MS66 Brown NGC. This piece is tied with one other NGC coin as the finest Brown 1920-S Lincoln cent known (12/18). Luminous chestnut-brown surfaces display accents of lavender and mint-green and are devoid of detracting contact marks. Eye appeal is excellent. NGC ID# 22C5, PCGS# 2528

1922 No D Cent, AU53 Die Pair 2, Strong Reverse

3127 1922 No D, Strong Reverse, FS-401, AU53 PCGS. Genuine No D cents show a weak obverse paired with a Strong Reverse, with both the T in TRUST and the final 2 in the date sharper than the rest of the obverse elements, which are weakly defined. There is no trace of a D mintmark, which was effaced from the die. This About Uncirculated example is sharp on the reverse, with a tiny rim nick at 7 o'clock and a few microscopic gray flecks, but no real distractions. The obverse is a bit glossy with iridescence throughout the light-brown surfaces. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

1927-S Cent, MS65 Red Rare With Full Mint Bloom

3128 1927-S MS65 Red NGC. A conditionally rare San Francisco issue from the Roaring Twenties, this sharply struck Gem is about as nice as can be obtained for a '27-S. Marks are absent and carbon is minimal. Orange-red and olive-green colors compete for territory throughout the glistening, lustrous surfaces. Certified in a circa-2000 holder. Census: 7 in 65 Red, 0 finer (12/18). NGC ID# 22CP, PCGS# 2584

1929 Lincoln Cent, MS67+ Red Outstanding Overall Preservation

3129 1929 MS67+ Red PCGS. CAC. The 1929 had a large mintage of 185 million pieces, and as recently as 1985 original rolls were still available. That is no longer the situation. Numerous examples have been broken out of those original rolls in order to find (maybe) one coin of this quality. The orange-red surfaces are tinged with lilac, and the pristine preservation of this coin is reinforced by the Plus designation as well as CAC endorsement. Population: 74 in 67 (8 in 67+) Red, 0 finer. CAC: 24 in 67, 0 finer (12/18). NGC ID# 22CU, PCGS# 2596

3130 1930 MS67+ Red PCGS. CAC. This delightful Plus-graded Superb Gem exhibits sharply detailed design elements and impeccably preserved original red surfaces. Vibrant mint luster adds to the terrific visual appeal. PCGS has graded only one numerically finer Red example (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# 22CX, PCGS# 2605

3131 1931-D MS65 Red PCGS Gold Shield. CAC. The 1931-D Lincoln cent is an elusive issue in grades above MS65. This attractive Gem offers sharply detailed design elements and well-preserved original red surfaces, with vibrant mint luster and terrific eye appeal. PCGS has graded 51 numerically finer examples (12/18). NGC ID# 22D3, PCGS# 2617

1944-D/S Cent, MS66 Red
Guide Book FS-511 Variety

- 3132** 1944-D/S FS-511 MS66 Red NGC. The top of an S looms over the Denver mintmark. The upper curve and serif are delicate but readily apparent. A portion of the lower curve also appears inside the upper portion of the D. The *Guide Book* FS-511 is not to be confused with the less popular and more available FS-512 overmintmark, which shows the remnant of an S mostly within the loop of the D. This is a lovely fire-red Premium Gem, sharply struck, with minimal contact and a tiny spot concealed on Lincoln's suit. Seldom seen this fine, it is an important *Cherry pickers'* and *Guide Book* variety. NGC ID# 2734, PCGS# 37834 Base PCGS# 2728

- 3133** 1955 Doubled Die Obverse, FS-101, AU50 NGC. CAC. An impressive AU specimen of this sought-after *Guide Book* variety, with strong doubling on the date and all obverse lettering. The pleasing chocolate-brown surfaces are lightly worn and lightly abraded. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3134** 1955 Doubled Die Obverse, FS-101, AU55 NGC. CAC. The lightly worn, well-detailed design elements of this Choice AU specimen show strong doubling on the date and all obverse lettering, identifying this extremely popular *Guide Book* variety. The olive-brown surfaces are lightly abraded. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3135** 1955 Doubled Die Obverse, FS-101, AU58 PCGS Gold Shield. The obverse of this extremely popular *Guide Book* variety is strongly doubled, as seen most easily on the date and the lettering in the legend. The steel-brown surfaces of this pleasing near-Mint example are lightly abraded and the design elements are well-detailed. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3136** 1955 Doubled Die Obverse, FS-101, AU58 PCGS Gold Shield. CAC. This sought-after error coin exhibits strong doubling on the letters in LIBERTY and IN GOD WE TRUST, as well as the numerals in the date. Just a trace of wear is evident on the high points of the design and the light brown surfaces are lightly abraded. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3137** 1955 Doubled Die Obverse, FS-101, MS62 Brown PCGS Gold Shield. Strong doubling is evident on all obverse lettering and the date, identifying this sought-after mint error. The design elements are well-detailed and the glossy, lightly marked surfaces show pleasing steel-brown patina, with a few traces of original red. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3138** 1955 Doubled Die Obverse, FS-101, MS63 Brown PCGS. CAC. Dramatic doubling is evident on the letters in the motto, LIBERTY, and the numerals in the date. The design elements of this incredibly popular error coin are well-detailed and the steel-brown surfaces are lightly marked. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

1955 FS-101 Cent, MS64 Brown
Doubled Die Obverse

- 3139** 1955 Doubled Die Obverse, FS-101, MS64 Brown NGC. Beautiful cobalt-blue and rose-violet patina covers most of this near-Gem. Fire-orange accents remain within the confines of IN GOD WE TRUST, which along with the other obverse motifs, show broad doubling. There are a few small abrasions on each side and a spot in the upper right obverse field. An eye-appealing example of this important Doubled Die Obverse, FS-101 variety. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

1970-S Large Date Cent, MS64 Red and Brown
FS-101, Doubled Die Obverse

- 3140** 1970-S Large Date, Doubled Die Obverse, FS-101, MS64 Red and Brown NGC. The *Cherry pickers'* *Guide* writes: "This very strong doubled die is extremely rare. To this point, fewer examples are known than that of the previous listing, the 1969-S." Broad separation appears on LIBERTY and the motto. Copper-orange and golden-amber surfaces show wisps of violet and blue color. Scattered abrasions are also seen, but they are trivial relative to the rarity of this offering. NGC ID# 22GN, PCGS# 37998 Base PCGS# 2938

1970-S Large Date Cent, MS64 Red
FS-101, Doubled Die Obverse

- 3141** 1970-S Large Date, Doubled Die Obverse, FS-101, MS64 Red NGC. *Cherry pickers'* states "this very strong doubled die is extremely rare. ... fewer examples are known [than] the 1969-S." IN GOD WE TRUST and LIBERTY exhibit an impressive spread. The lustrous and well-struck surfaces are peach-red with rose-red shades on the upper margins. Contact is limited to a few tiny ticks on the lower reverse. Census: 3 in 64 Red, 4 finer (12/18). NGC ID# 22GN, PCGS# 37999 Base PCGS# 2939

1971 Lincoln Cent, MS67+ Red
Original Red Surfaces

- 3142 1971 MS67+ Red PCGS Gold Shield. This Plus-graded Superb Gem Lincoln cent is among the finest certified examples at either of the leading grading services. The impeccably preserved original red surfaces radiate vibrant mint luster on both sides and the design elements are sharply detailed throughout. Overall eye appeal is tremendous. Population: 67 in 67 (4 in 67+) Red, 0 finer (12/18). NGC ID# 22GP, PCGS# 2941

PROOF LINCOLN CENTS

- 3143 1911 PR65 Red and Brown PCGS Gold Shield. Attractively toned on both sides, this Gem proof displays iridescent shades of the rainbow, with the obverse particularly striking in appearance. The obverse also has a few minor contact marks but none that are distracting.
Ex: *FUN Signature (Heritage, 1/2013)*, lot 3229, which realized \$1,410. NGC ID# 22KU, PCGS# 3310
- 3144 1911 PR65 Red PCGS. This matte proof Gem exhibits razor-sharp design elements and well-preserved original red surfaces with terrific eye appeal. Housed in a green label holder. Population: 23 in 65 Red, 13 finer (12/18). NGC ID# 22KU, PCGS# 3311
- 3145 1914 PR65+ Red and Brown PCGS Gold Shield. An incredibly sharp strike is expected but not always achieved on the matte proof Lincoln cents, but the design definition on this Gem Red and Brown proof is full. Both sides exhibit full cartwheel luster. The obverse is light orange with splashes of violet toning, while the reverse has deep orange surfaces with violet and blue toning. NGC ID# 22KX, PCGS# 3319
- 3146 1938 PR67 Red PCGS. A stunning Superb Gem that is tied for the finest certified, this piece exhibits fiery orange mint color on deeply mirrored surfaces with pinpoint design definition on both sides. Population: 57 in 67 (4 in 67+) Red, 0 finer (12/18). NGC ID# 22L5, PCGS# 3341
- 3147 1981-S Type One PR70 Deep Cameo PCGS. Removed from a 1981-S proof set, this Lincoln cent is the very definition of perfection with fiery orange mint color, intense field-to-device contrast, and flawless surfaces. Population: 26 in 70 Deep Cameo (12/18). NGC ID# 22ME, PCGS# 93467

TWO CENT PIECES

- 3148 1864 Small Motto, FS-401, MS64 Brown PCGS Gold Shield. An attractive Choice example of this elusive first-year subtype, with sharply detailed design elements and well-preserved surfaces that show predominately light brown patina, with a significant amount of original red mixed in. Population: 46 in 64 Brown, 24 finer (12/18). NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579
- 3149 1864 Large Motto MS65 Red NGC. CAC. A boldly struck Civil War type coin. Lovely olive and rose accents adorn lustrous and smooth surfaces. An outstanding Gem without consequential detractions. Certified in a prior generation holder. CAC: 62 in 65, 20 finer (12/18). NGC ID# 22N9, PCGS# 3578

- 3150 1865 Fancy 5 MS66 Red NGC. The design elements of this attractive Premium Gem are well-detailed and a few spidery die cracks show through the letters in the reverse legend. The well-preserved original red surfaces radiate vibrant mint luster throughout. Housed in a former generation holder. Census: 23 in 66 (1 in 66 ★) Red, 2 finer (12/18).
From The Speechless Collection. NGC ID# 22NA, PCGS# 38258 Base PCGS# 3584

- 3151 1866 MS65 Red NGC. Apple-green and rose-red accents grace this lustrous and intricately impressed Gem. No marks are evident. The reverse border displays scattered minute flecks. Housed in a former generation holder. Census: 17 in 65 Red, 7 finer (12/18). NGC ID# 274R, PCGS# 3590

1867 Two Cent Piece, MS65 Red
Early NGC Holder

- 3152 1867 MS65 Red NGC. Only a fraction of the 1867 two cent piece survivorship qualifies for a Red designation from the grading services, and Gem examples are rarely offered. This piece is among the finest at NGC. Satiny copper-gold surfaces display a sharp strike and are free of bothersome abrasions. A few microscopic specks are only evident upon close examination. Housed in a prior generation holder. Census: 11 in 65 Red, 0 finer (12/18). NGC ID# 22NB, PCGS# 3593

1868 Two Cent, MS65 Red
Seldom Found This Fine

- 3153 1868 MS65 Red NGC. Gem Red 1868 two cent pieces are rare, and only a handful of finer coins are reported. This piece has satiny golden luster and is free of major abrasions. A few trivial specks are noted with a loupe. Although some lightness of strike is seen on a few wreath leaves, the overall sharpness is pleasing. Housed in a prior generation holder. Census: 9 in 65 Red, 3 finer (12/18). NGC ID# 22NC, PCGS# 3599
- 3154 1869 MS65 Red PCGS. Flynn-KF-3-RPD. The base of the 1 is repunched. A well struck olive-gold and copper-red Gem. We note only minor contact on the obverse at 9 o'clock and a small spot on the A in STATES. Encapsulated in an old green label holder. Population: 33 in 65 (2 in 65+) Red, 5 finer (12/18). NGC ID# 22ND, PCGS# 3605

**1870 Two Cent, MS65 Red
None Certified Finer**

3155 1870 MS65 Red NGC. The 1870 two cent piece is a better date in full Red condition, and Gems such as this are rare. No finer Red coins are known. This piece is sharp and satiny with reddish-gold and peach coloration. A few trivial carbon specks are visible beneath a loupe. Certified in an early generation holder. Census: 9 in 65 Red, 0 finer (12/18). NGC ID# 22NE, PCGS# 3608

3156 1871 MS65 Red and Brown PCGS Gold Shield. CAC. This is a sharp Gem that displays primarily copper-red luster with just a few wisps of brown. Scattered specks are visible under a loupe. The 1871 two cent piece is scarce in this grade and rare finer. Population: 71 in 65 (2 in 65+) Red and Brown, 7 finer. CAC: 37 in 65, 4 finer (12/18). NGC ID# 22NE, PCGS# 3610

**1871 Two Cent, MS65 Red
Early Holder, Rare This Fine**

3157 1871 MS65 Red NGC. The 1871 two cent piece's availability declines sharply at the Gem Red level. Only one coin is finer than the present piece at NGC. This coin is well-struck and satiny with reddish-gold and lemon-yellow hues over each side. Scattered light specks suggest that the luster is original. Housed in a prior generation holder. Census: 12 in 65 Red, 1 finer (12/18). NGC ID# 22NE, PCGS# 3611

PROOF TWO CENT PIECES

3158 1864 Large Motto PR65 Brown NGC. While the proof 1864 Small Motto two cent pieces garner great attention, the proof Large Motto pieces are rarities on their own. This lovely Gem has iridescent toning over its rich chocolate-brown surfaces with fully mirrored fields. Census: 8 in 65 Brown, 4 finer (12/18). NGC ID# 274T, PCGS# 3621

**1865 Two Cent, PR67 Brown
Gorgeous Toning**

3159 1865 PR67 Brown PCGS Gold Shield. At least 500 two cent proofs were struck in 1865, the denomination's second year of issue. Razor-sharp devices stand out against the glassy fields, but the unrivaled highlight of this Superb Gem proof is its color. Each side is gorgeously toned in magenta, ice-blue, violet, and fire-orange patina. Population: 1 in 67 Brown, 0 finer in this category (12/18). NGC ID# 274U, PCGS# 3627

3160 1868 PR65 Red and Brown PCGS Gold Shield. Lovely rose, plum, sea-green, and copper-orange hues adorn this Gem Red and Brown proof 1868 two cent piece. The strike is sharp and eye appeal is outstanding for the grade. Finer pieces are scarce. Population: 52 in 65 (1 in 65+) Red and Brown, 28 finer (12/18). NGC ID# 274X, PCGS# 3637

3161 1869 PR66 Brown PCGS. CAC. Traces of orange mint color and bluish-purple toning are evident over the pleasing medium brown surfaces of this Premium Gem. The fields are fully mirrored around satin devices. Population: 7 in 66 Brown, 0 finer. CAC: 4 in 66, 0 finer (12/18).
Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3104. NGC ID# 274Y, PCGS# 3639

3162 1871 PR65 Red and Brown PCGS. CAC. A sharply struck Gem with a beautiful orange-gold obverse. The reverse is equally undisturbed but displays variegated chestnut and lavender toning. TRUST is die doubled counterclockwise, as seen on all proofs for the date. Housed in a first generation "rattler" holder. NGC ID# 22NH, PCGS# 3646

3163 1873 Closed 3 PR50 PCGS. This is an attractive, lightly circulated proof with pleasing olive-brown surfaces. An important opportunity for the collector working on a high-grade circulated set of two cent pieces. This proof-only issue rarely comes in higher circulated grades. NGC ID# 2753, PCGS# 3651

**1873 Two Cent Piece, PR65 Red
Final-Year, Proof-Only Closed 3 Example**

3164 1873 Closed 3 PR65 Red NGC. Housed in a previous generation NGC holder (no barcode, hologram intact), this Gem Red, Closed 3 original proof displays significant contrast between the reflective fields and frosted devices. A speckling of deep-red and russet freckles covers both sides. Just 600 original proofs were struck with a Closed 3 in the date. Later, another 600 Open 3 proofs were struck, which some researchers consider a restrike. The Closed 3 variant is a popular, proof-only final year representative of the short two cent series. Census: 9 in 65 Red, 6 finer (12/18). NGC ID# 5L57, PCGS# 3653

**1873 Open 3 Two Cent, PR64 Red and Brown
Colorful CAC Coin**

- 3165 1873 Open 3 PR64 Red and Brown PCGS. CAC.** Both sides offer a blend of deep mahogany and pumpkin-orange toning, with violet and golden hues shines through. Overall eye appeal is striking, and the design sharpness is excellent. Only a few stray hairlines are visible in the fields. The Open 3 restrikes are elusive, owing to an estimated production of 500 pieces, and Choice and better survivors are particularly challenging.
Ex: FUN Signature (Heritage, 1/2009), lot 560, which realized \$3,737.50. NGC ID# 2754, PCGS# 3655

THREE CENT SILVER

- 3166 1851 MS66 PCGS.** Frosty luster shimmers without abrasions on this Premium Gem first-year type coin. Slight strike softness is evident in the central shield, but this beautifully preserved three cent silver piece is otherwise well-defined. PCGS lists only 22 Superb Gems finer (12/18).
Ex: New York Signature (Heritage, 3/2012), lot 3140, which realized \$1,725. NGC ID# 22YX, PCGS# 3664
- 3167 1851 MS66 PCGS Gold Shield. CAC.** A delightful Premium Gem from the first year of the denomination, this coin exhibits well-detailed design elements and dramatic clash marks on both sides. The well-preserved, lustrous surfaces display highlights of sea-green, amber, and lavender-gray toning. PCGS has certified 22 numerically finer examples (12/18). NGC ID# 22YX, PCGS# 3664
- 3168 1851-O MS64 PCGS Gold Shield.** Representing the first year of production for the denomination, this piece also represents the only year of three cent silver coinage at a branch mint. Just 720,000 of these diminutive coins were minted, and only a small number survive today. This Choice Mint State piece is fully brilliant with a few faint splashes of gold toning. NGC ID# 22YY, PCGS# 3665

**1853 Three Cent Silver, MS67
None Numerically Finer**

- 3169 1853 MS67 PCGS Gold Shield.** Three cent silver coins were struck en masse during the early 1850s in an effort to get silver coins back into peoples' hands. This is one of the most collectible issues in the series (11.4 million coins), but no survivors are numerically finer than this Superb Gem. Silvery, well-defined surfaces exhibit daubs of gold patina. The obverse shows signs of die fatigue in the fields, and a significant crack travels through the date and UNI. Population: 14 in 67 (3 in 67+), 0 finer (12/18). NGC ID# 22Z2, PCGS# 3667

**1857 Three Cent Silver, MS65
Colorful Toning**

- 3170 1857 MS65 PCGS Gold Shield.** Clashing and peripheral incompleteness are typical for the 1857 three cent silver, which claims a mintage barely in excess of 1 million coins. This toned Gem displays minimal evidence of the former and the usual degree of the latter around the legends. However, the centers are strongly defined. Each side offers blue, green, violet, and gold patina. Population: 32 in 65 (1 in 65+), 17 finer (12/18). NGC ID# 22Z6, PCGS# 3673
- 3171 1862 MS66 PCGS Gold Shield. CAC.** A spectacular Premium Gem, with well-detailed design elements and dramatic clash marks on both sides. The well-preserved brilliant surfaces display vibrant mint luster, with terrific eye appeal. PCGS has graded 23 numerically finer examples (12/18). NGC ID# 22ZB, PCGS# 3680

**1862 Three Cent Silver, MS67
Among the Finest at PCGS and CAC**

- 3172 1862 MS67 PCGS Gold Shield. CAC.** This was the final year that a significant production of three cent silver coins was accomplished (343,000 pieces). The 1862 is actually one of the most collectible issues in the series in high grades. This Superb Gem enjoys lavender-gray interiors with surrounding shades of blue, green, rose, and gold. Lightly clashed and slightly soft at the center. Population: 23 in 67, 0 finer. CAC: 19 in 67, 0 finer (12/18). NGC ID# 22ZB, PCGS# 3680

1865 Three Cent Silver, MS65
Low Mintage of 8,000 Coins

- 3173 1865 MS65 PCGS. CAC.** After millions of three cent silver coins were struck during the early years of the series, the denomination quickly became a nuisance in circulation. These silver coins stopped circulating altogether during and after the Civil War. The 8,000 pieces struck in 1865 were likely produced to pay off odd amounts for silver and gold deposits at the Mint. This dusky golden-gray Gem is well-struck with a heavily clashed obverse. The shield and denomination show a hint of softness. Housed in a green label holder with a matching CAC approval sticker. Population: 11 in 65, 17 finer. CAC: 3 in 65, 15 finer (12/18). NGC ID# 22ZF, PCGS# 3685

PROOF THREE CENT SILVER

1861 Three Cent Silver, PR66
Only Five Finer at PCGS

- 3174 1861 PR66 PCGS Gold Shield.** Attractive gold, russet, and blue toning visit the obverse and reverse of this Premium Gem proof that survives from the 1,000 coin proof mintage of three cent silver pieces in 1861. The fields and devices are nicely contrasted, although the toning prevents a Cameo designation. Population: 8 in 66, 2 in 66 Cameo, 6 finer (12/18). NGC ID# 27C8, PCGS# 3710
- 3175 1867 PR65 PCGS Gold Shield.** Vivid shades of sea-green and magenta toning blanket the well-preserved surfaces of this impressive Gem proof, with sharply detailed design elements and deeply mirrored fields underneath. Population: 61 in 65 (1 in 65+), 38 finer (12/18). NGC ID# 27CD, PCGS# 3717
- 3176 1867 PR65 PCGS Gold Shield. CAC.** Vivid shades of magenta and emerald-green toning blanket the well-preserved surfaces of this attractive Gem proof, with sharply detailed design elements and reflective fields underneath. Population: 61 in 65 (1 in 65+), 38 finer. CAC: 7 in 65, 22 finer (12/18). NGC ID# 27CD, PCGS# 3717
- 3177 1870 PR66 Cameo PCGS Gold Shield.** Rich blue, teal, and gold toning appear on both sides of this lovely Premium Gem Cameo proof three cent silver piece. The 1,000-coin proof mintage accompanied 3,000 circulation strikes of this issue. Few of either format survive in finer than Gem condition. Population: 14 in 66 (2 in 66+) Cameo, 3 finer (12/18). NGC ID# 27CF, PCGS# 83721
- 3178 1873 PR64 PCGS Gold Shield.** The proof-only final issue of the three cent silver series, this example has rich magenta and sky-blue toning with traces of yellowish-gold at the upper obverse. A splendid example for the date or type collector. NGC ID# 27CJ, PCGS# 3724

1873 Three Cent Silver, PR66
Final Year of Issue

- 3179 1873 PR66 PCGS Gold Shield.** The 1873 three cent silver was the final issue of the denomination in this composition, and the only date of the series that was struck only in proof format. This Premium Gem has obvious field-to-device contrast beneath the rich blue and gold toning that prevented a Cameo designation. Population: 17 in 66, 3 finer (12/18). NGC ID# 27CJ, PCGS# 3724
- 3180 1873 PR65 Cameo PCGS.** Just a trace of emerald-green toning visits the well-preserved surfaces of this spectacular Gem. The sharply detailed frosty design elements contrast boldly with the deeply mirrored fields. Population: 24 in 65 (2 in 65+) Cameo, 17 finer (12/18). NGC ID# 27CJ, PCGS# 83724

THREE CENT NICKEL

- 3181 1867 MS66 PCGS.** This is one of the more collectible issues in the series. Nearly 4 million coins were struck. Satiny nickel-gray surfaces exhibit splashes of original golden color primarily on the obverse. Both sides are extensively clashed but well-defined. Population: 19 in 66, 0 finer (12/18).
From The Speechless Collection. NGC ID# 26K7, PCGS# 3733

PROOF THREE CENT NICKELS

- 3182 1875 PR66 PCGS. CAC.** This impressive Premium Gem exhibits sharply detailed central design elements. but some letters in the peripheral legend are weak, possibly due to lapping. Many fine, linear striations are evident on both sides of this well-preserved specimen. Population: 23 in 66, 1 finer. CAC: 14 in 66, 0 finer (12/18). NGC ID# 22NV, PCGS# 3771

1877 Nickel Three Cent, PR66
Appealing for This Proof-Only Issue

- 3183 1877 PR66 PCGS Gold Shield. CAC.** The 1877 is a proof-only issue in the three cent nickel series with a mintage of only 900 pieces. Examples are available today but are in high demand from date collectors. CAC-endorsed Premium Gems are elusive regardless of the degree of cameo contrast. This piece displays a full strike and modestly reflective fields with warm golden color. Population: 62 in 66 (2 in 66+), 4 finer. CAC: 29 in 66, 1 finer (12/18). NGC ID# 275X, PCGS# 3773

**1877 Three Cent Nickel, PR66 Cameo
Subtle Field Iridescence**

3184 1877 PR66 Cameo PCGS Gold Shield. Popular as a proof-only issue, the 1877 three cent nickels had a mintage of 900 pieces. Many of the pieces are certified with the Cameo designation, but few examples exceed the Premium Gem grade seen here. Iridescent colors interplay across the mirrored fields, while the frosted devices are unblemished save for tiny flecks on the cheek and nose. Population: 69 in 66 (4 in 66+) Cameo, 17 finer (12/18). NGC ID# 275X, PCGS# 83773

3185 1879 PR67+ PCGS. CAC. This brilliant nickel-gray Superb Gem proof exhibits traces of blue and violet toning on its nearly flawless surfaces. Both sides are fully mirrored around satin devices, imparting a hint of cameo contrast. Population: 50 in 67 (4 in 67+), 4 finer. CAC: 30 in 67, 0 finer (12/18). NGC ID# 275Z, PCGS# 3775

3186 1881 PR66 Deep Cameo PCGS. CAC. A spectacular Premium Gem proof, with well-detailed design elements and deeply mirrored fields that contrast profoundly with the richly frosted devices. The surfaces are brilliant and impeccably preserved. Population: 7 in 66 (2 in 66+) Deep Cameo, 2 finer. CAC: 4 in 66, 2 finer (12/18). NGC ID# 2763, PCGS# 93777

3187 1885 PR67 Cameo PCGS Gold Shield. An amazing Superb Gem Cameo proof, this 1885 ranks among the finer examples that either PCGS or NGC have graded. Both sides are brilliant and untuned with deeply mirrored fields and sharply defined, lustrous, and satiny light gray devices. Population: 14 in 67 (1 in 67+) Cameo, 1 finer (12/18). NGC ID# 2767, PCGS# 83781

SHIELD NICKELS

3188 1866 Rays MS65 NGC. Lime-green and wheat-gold shades visit both sides. The strike is typical, but potent luster and an unabraded appearance ensure the eye appeal. The borders exhibit several prominent cracks, customary for early Shield nickel dates. Certified in a prior generation holder. NGC ID# 22NX, PCGS# 3790

3189 1866 Rays MS65 PCGS Gold Shield. An exceptionally well-preserved Rays type coin from the first year of Shield nickel production, showing delicate pastel toning and no significant abrasions. Several spindly die cracks are apparent on each side, a typical characteristic of early Shield nickel issues. This piece has considerable strike weakness, but it is not overly bothersome. NGC ID# 22NX, PCGS# 3790

3190 1866 Rays MS65 NGC. The first-year 1866 Rays nickel is a popular two-year type coin that can be acquired in grades as high as MS65. Anything finer is scarce. Die polished fields exhibit a trace of reflectivity. Each side is brilliant with good detail on the shield, leaves, and most stars.
From The Speechless Collection. NGC ID# 22NX, PCGS# 3790

3191 1867 No Rays MS66 NGC. The variety aficionado will delight in the shattered obverse die that has myriad die cracks. Several additional cracks appear on the reverse. This brilliant Premium Gem exhibits frosty gray luster with excellent eye appeal. Census: 31 in 66 (3 in 66+, 1 in 66 ★), 0 finer (12/18). NGC ID# 22NZ, PCGS# 3794

3192 1869 MS65 PCGS. The 1869 Shield nickel is an elusive issue in MS65 condition and finer coins are rare. This attractive Gem offers well-detailed design elements, with an extensive network of die cracks on both sides. The well-preserved surfaces are lustrous and appealing. Population: 76 in 65 (5 in 65+), 19 finer (12/18). NGC ID# 22P3, PCGS# 3796

3193 1882 MS67 NGC. Both sides of this lovely Superb Gem exhibit intriguing peripheral die cracks. The surfaces are virtually flawless with brilliant satin luster that shines through delightful gold and pale blue toning. Census: 6 in 67, 0 finer (12/18). NGC ID# 276Y, PCGS# 3812

**1883/2 FS-304 Shield Nickel, MS67 ★
Conditionally Rare, Finest at Both Firms**

3194 1883/2 FS-304 MS67 ★ NGC. On the FS-304 overdate, a diagonal remnant of the 2 is visible to the left of the 3. Bright luster shows on the untuned surfaces of this Superb Gem, complementing well-defined motifs, including all the shield lines and star centers. Most of the leaf veins of the wreath are also strong. Exquisitely preserved and attractive. Census: 3 in 67 (1 in 67 ★), 0 finer (12/18). NGC ID# 22PD, PCGS# 38415 Base PCGS# 3813

PROOF SHIELD NICKELS

**1867 No Rays Nickel, PR66 Cameo
Dramatic White-on-Black Contrast**

3195 1867 No Rays PR66 Cameo NGC. CAC. This first-year example of the No Rays subtype was one of 600+ proofs believed struck in 1867. Official records for minor proof coins were not kept until 1878. The white-on-black Cameo effect is dramatic on this Premium Gem nickel. A blush of golden color adorns the lower reverse and heightens the eye appeal. Census: 14 in 66 Cameo (1 in 66+, 3 in 66 ★), 2 finer in this category. CAC: 13 in 66, 0 finer (12/18). NGC ID# 5EB6, PCGS# 83821

3196 1878 PR66 PCGS Gold Shield. CAC. The 1878 Shield nickel was only produced in proof format, the mintage totaling 2,350 pieces. This Premium Gem survivor is CAC-approved and modestly reflective. Light golden toning over each side complements sharp design elements. NGC ID# 276V, PCGS# 3832

LIBERTY NICKELS

- 3197 1883 With Cents MS66+ PCGS Gold Shield.** A Plus-graded Premium Gem example of this first-year example, struck later in the year, after the word CENTS was added to the reverse. This well-detailed, well-preserved specimen radiates vibrant mint luster under shades of lavender and champagne-gold toning. PCGS has graded eight numerically finer examples (12/18). NGC ID# 22PH, PCGS# 3844
- 3198 1883 With Cents MS66+ PCGS Gold Shield.** CAC. An exquisite Premium Gem, this splendid nickel has faint blue toning over lustrous light gray surfaces with peripheral amber patina. The 1883 With Cents nickels were the third type coined that year, following the Shield nickel, and the 1883 No Cents nickel. PCGS has certified only eight finer examples. CAC: 40 in 66, 2 finer (12/18). NGC ID# 22PH, PCGS# 3844
- 3199 1912-D MS65 PCGS Gold Shield.** A satiny Gem example of the sole Denver issue in the Liberty nickel series, showing delicate champagne toning with no bothersome abrasions. The usual strike weakness affects the lower wreath, Liberty's temple, and the right-hand stars. Finer 1912-D nickels are elusive. NGC ID# 277P, PCGS# 3874
- 3200 1912-S MS64 NGC.** An exceptionally well-struck example of this key San Francisco issue, showing pastel toning and satiny mint luster. Sharpness is seen throughout the border stars and wreath. High-end for the grade. On the reverse, a faint, intact planchet lamination is present at the tip of the right wreath branch and extends down toward the right inside portion of the V. NGC ID# 277R, PCGS# 3875
- 3201 1912-S MS65 NGC.** The NGC label is hand signed by *Guide Book* editor Ken Bressett. Delicate gold and pale blue toning appear over the satin luster that gives this issue its famously unique appearance. Typical design definition exhibits incomplete hair and wreath details. Census: 93 in 65 (1 in 65+, 1 in 65 ★), 11 finer (12/18). NGC ID# 277R, PCGS# 3875
- 3202 1912-S MS65 PCGS.** The hallmark of this Gem 1912-S Liberty nickel is the sharp strike, which produces full definition both on the stars and on the lower wreath. Luster is satiny as usual, and no bothersome abrasions are seen. Occasionally available in this grade, the San Francisco issue is scarce finer. NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

- 3203 1883 No Cents PR67 Cameo PCGS Gold Shield.** Excellent contrast on both sides is the result of deeply mirrored fields that frame the sharply defined design motifs on this impressive Superb Gem Cameo proof. Population: 28 in 67 Cameo, 0 finer (12/18). NGC ID# 22PU, PCGS# 83878

1884 Liberty Nickel, PR67 Cameo
Tied for the Finest at PCGS

- 3204 1884 PR67 Cameo PCGS Gold Shield.** An amazing Superb Gem Cameo proof, this 1884 Liberty nickel has brilliant surfaces shining through a thin layer of gold toning. The strike is nearly complete, lacking slight detail at the lower left part of the wreath. Both sides have excellent field-to-device contrast. Population: 19 in 67 (6 in 67+) Cameo, 0 finer (12/18). NGC ID# 22PV, PCGS# 83882

- 3205 1885 PR66+ PCGS Gold Shield.** CAC. Lovely pastel shades of pistachio-green, rose, and gold decorate the reflective fields of this high-end Premium Gem proof. The coin is CAC endorsed and fully struck. No distractions are apparent. Finer pieces are seldom available. NGC ID# 277T, PCGS# 3883

1885 Nickel, PR67 Cameo
Popular Date, Conditionally Rare

- 3206 1885 PR67 Cameo PCGS.** CAC. This CAC-approved Superb Gem is among the finest Cameos certified, with no Deep Cameos as fine at PCGS. Fully struck design elements are frosty and offer modest field-motif contrast amid varying shades of champagne toning. There are no distractions or hairlines. Population: 17 in 67 (2 in 67+) Cameo, 0 finer. CAC: 15 in 67, 0 finer (12/18). NGC ID# 277T, PCGS# 83883
- 3207 1886 PR67 PCGS Gold Shield.** The 1886 Liberty nickels are in demand in both proof and Mint State, due to the low mintage of the latter, the second lowest circulation-strike mintage of any Philadelphia Mint Liberty nickel. This Superb Gem proof has lightly mirrored fields and satin devices with full design definition on both sides. A hint of gold toning appears at the lower obverse border. Population: 35 in 67 (2 in 67+), 0 finer (12/18). NGC ID# 277U, PCGS# 3884
- 3208 1886 PR67 NGC.** CAC. This spectacular Superb Gem exhibits sharply detailed design elements throughout. The impeccably preserved surfaces include pristine reflective fields, with subtle hints of pale gold toning. Census: 20 in 67 (1 in 67+, 3 in 67 ★, 1 in 67+★), 0 finer. CAC: 25 in 67, 0 finer (12/18). NGC ID# 277U, PCGS# 3884
- 3209 1902 PR67 PCGS.** CAC. Housed in a green-label PCGS holder, this Superb Gem proof is an impressive example that exhibits faint gold toning on its brilliant and fully mirrored light gray surfaces. Population: 21 in 67 (2 in 67+), 0 finer. CAC: 11 in 67, 0 finer (12/18).

1904 Nickel, PR67
Glassy Fields Beneath Light Toning

- 3210 1904 PR67 PCGS Gold Shield.** CAC. Powder-blue patina dominates this technically unsurpassed Superb Gem nickel. Additional violet, peach-orange, and mint-green hues are seen on each side, contributing to the CAC approval sticker. Glassy, virtually pristine fields show a single as-made lint mark below star 7. Population: 8 in 67, 0 finer. CAC: 6 in 67, 0 finer (12/18). NGC ID# 278E, PCGS# 3902

3211 1907 PR67 PCGS Gold Shield. CAC. Traces of lemon-gold intrude upon ice-blue surfaces on this Superb Gem proof 1907 Liberty nickel. The coin is fully struck and pristine, endorsed by CAC. Eye appeal is outstanding. Population: 47 in 67 (21 in 67+), 0 finer. CAC: 21 in 67, 0 finer (12/18). NGC ID# 278H, PCGS# 3905

3212 1908 PR66+ Cameo PCGS Gold Shield. Cameo proofs from the first decade of the 20th century are seldom encountered. This Premium Gem Cameo proof exhibits brilliant nickel-gray surfaces with fully mirrored fields behind the sharply detailed satin devices. Population: 28 in 66 (3 in 66+) Cameo, 9 finer (12/18). NGC ID# 278J, PCGS# 83906

3213 1911 PR67 ★ NGC. Magnificent peripheral bands of orange-gold, fire-red, and sea-green frame the pale lilac centers. An intricately struck and unabraded Superb Gem. A lamination and lint mark (both as made) near the IT in UNITED. As of (12/18), NGC has certified 3 as PR67 ★, 2 as PR68 ★, and 1 as PR68 ★ Cameo. Ex: *FUN Signature (Heritage, 1/2010), lot 548; Long Beach Signature (Heritage, 6/2010), lot 376, which realized \$1,610.*
From The Five Generations of Eby Collection, Part II. NGC ID# 278M, PCGS# 3909

BUFFALO NICKELS

3214 1913-S Type One MS66 PCGS. Always popular with collectors, the 1913-S is the most challenging of the three Type One issues to locate with only 2.1 million coins struck. Peripheral strike softness is characteristic, affecting the lower part of the date digits and the top of LIBERTY. Preservation, however, is outstanding, and central detail is good.
From The Speechless Collection. NGC ID# 22PY, PCGS# 3917

3215 1913-S Type One MS66+ NGC. Satin surfaces exhibit pleasing ice-blue and pale gold toning on this Premium Gem Type One Buffalo nickel struck in San Francisco. The 1913 Denver and San Francisco Mint coins of both types are scarce issues. Census: 59 in 66 (4 in 66+), 21 finer (12/18). NGC ID# 22PY, PCGS# 3917

3216 1913-S Type One, Two Feathers, FS-401, MS62 PCGS. Several Buffalo nickel issues are known without the tip of a third feather between the large feather and the Indian's neck. This low relief design element was prone to removal from obverse dies when they were lapped to remove clash marks. This cream-gray and chestnut-gold example is satiny and unmarked with a trace of aqua residue below the bison's flank. Population: 3 in 62, 4 finer (12/18). PCGS# 569431 Base PCGS# 3917

3217 1913 Type Two MS66 PCGS Gold Shield. The denomination is recessed on the exergue, identifying the popular Type Two variety. This spectacular Premium Gem is sharply detailed and well-preserved, with highlights of ice-blue and greenish-gold toning. PCGS has graded 38 numerically finer examples (12/18). NGC ID# 22PZ, PCGS# 3921

1913-S Type Two Buffalo Nickel, MS65 Lightly Toned, Attractive

3218 1913-S Type Two MS65 PCGS. CAC. Traditional wisdom says fewer Type Two pieces were saved once novelty of the 1913 Type One nickels wore off, and the population figures in Gem or finer grades support that notion. This coin displays a thin band of iridescent colors that adds extra eye appeal to the lightly toned surfaces. True to most of the first-year S-mint nickels, the strike is a trifle weak at the braid knot. All else is sharp, and the attractive surfaces suggest an even finer grade, as confirmed by the accompanying CAC endorsement. PCGS reports just 56 numerically finer pieces (12/18).
From The Speechless Collection. NGC ID# 22R3, PCGS# 3923

3219 1914-S MS65 PCGS Gold Shield. Anything finer than this Gem would be difficult, if not impossible, for most collectors to obtain. Even in MS65, the 1914-S is scarcely available. This example is razor-sharp, except on the bison's head, though the horn is bold. Wisps of peach-gold color appear throughout the frosty, textured, and well-preserved surfaces. PCGS reports 47 higher grading events (12/18). NGC ID# 22R6, PCGS# 3926

3220 1915-D MS65 PCGS. Intense gold and pale blue toning ensures excellent eye appeal to this lovely Gem that exhibits underlying frosty mint luster on both sides. Slight weakness shows in the central areas with strong peripheral details. PCGS has certified just 49 numerically finer examples (12/18).
From The Speechless Collection. NGC ID# 22R8, PCGS# 3928

1915-S Nickel, MS65 Conditionally Scarce Semikey

3221 1915-S MS65 PCGS. CAC. The highest collectible grade level for the 1915-S Buffalo nickel (1.5 million coins) is MS65. Still, Gems are conditionally scarce and rarely offered with a CAC endorsement. They are also nearly 20 points higher than the typical certified representative for this semikey issue. Delicate gold and powder-blue tones grace softly lustrous, well-defined surfaces. Only LIBERTY and the feathertip are noticeably soft.
From The Speechless Collection. NGC ID# 22R9, PCGS# 3929

1915-S Buffalo Nickel, MS66
Elusive, Low-Mintage Issue

3222 1915-S MS66 NGC. Fully brilliant luster appears on the satin surfaces of this lovely Premium Gem that features attractive light gold, blue, and iridescent toning that accents the sharp design motifs. This low-mintage issue is elusive in Gem or finer grades. Census: 28 in 66 (2 in 66+), 0 finer (12/18). NGC ID# 22R9, PCGS# 3929

3223 1916-D MS65 PCGS. Muted gold and pale blue toning appear on the lustrous light gray surfaces of this lovely Gem that is rarely encountered in finer grades. Just 31 numerically superior pieces are PCGS certified (12/18).

From The Speechless Collection. NGC ID# 22RB, PCGS# 3932

3224 1916-D MS65 PCGS. Delicate gold patina outlines the portrait. Not fully struck in the centers, but the remainder of the devices and the peripheral legends are boldly detailed. Nearly pristine despite a few minuscule carbon flecks.

From The Speechless Collection. NGC ID# 22RB, PCGS# 3932

3225 1917-D MS65 PCGS Gold Shield. The 1917-D Buffalo nickel is seldom encountered in grades above MS65. This attractive Gem offers sharply detailed design elements and well-preserved, lightly toned surfaces, with vibrant mint luster on both sides. PCGS has graded 26 numerically finer examples (12/18). NGC ID# 22RE, PCGS# 3935

3226 1917-D MS65 PCGS. The obverse shows complete detail. Just a bit of softness occurs on the bison's head. Satiny, well-preserved surfaces exhibit traces of gold and powder-blue color and evidence of die erosion on each side. Only 26 submissions are finer at PCGS despite a substantial mintage of nearly 10 million coins (12/18).

From The Speechless Collection. NGC ID# 22RE, PCGS# 3935

3227 1917-D MS65 PCGS. This impressive Gem is sharply detailed in most areas, with just the slightest touch of softness on the bison's shoulder. The well-preserved, textured surfaces are lustrous and appealing, under shades of ice-blue and greenish-gold toning. PCGS has graded 25 numerically finer examples (12/18).

From The Speechless Collection. NGC ID# 22RE, PCGS# 3935

3228 1918/7-D VG10 PCGS. A pleasing natural gray example of this important overdate variety, one of the keys to the complete set of Buffalo nickels. Minor hairlines and circulation marks are visible on each side. The date is complete and the overdate feature is clear. NGC ID# 22RJ, PCGS# 3939

3229 1918/7-D FS-101 Fine 12 PCGS Gold Shield. The 1918/7-D nickel is one of the two keys to the series, along with the 1916 Doubled Date. The present problem-free example is pearl-gray with charcoal toning in protected regions. The all-important underdigit is evident from thickness where the crossbar and downstroke blend into the 8. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

3230 1918/7-D FS-101 Fine 12 PCGS Gold Shield. CAC. The underlying 7 remains visible on this famous hubbing error variety. Considerable time in circulation has worn away much of the finer details of the design. Stone-gray surfaces show speckled steel and olive tones. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1918/7-D Buffalo Nickel, VF25
Elusive Series Key

3231 1918/7-D FS-101 VF25 PCGS. CAC. The remnants of an undertype 7 are visible below the final digit in the date, identifying this sought-after *Guide Book* variety. This impressive VF25 example shows a little wear on the Indian's cheekbone, but much of the bison's horn is still intact. The pleasing lavender-gray surfaces are lightly abraded. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1918-D Nickel, MS65
Scarce Early Issue

3232 1918-D MS65 PCGS. With 8.3 million pieces struck, one would think the 1918-D would be a fairly common issue. While readily obtainable in lower circulated grades, Uncirculated coins are very scarce, especially Gems. This is a bright and satiny example that shows just the faintest trace of color on each side. A bit softly struck over the high points, there are no obvious abrasions to mar the pristine beauty of this piece. Population: 75 in 65 (6 in 65+), 32 finer (12/18).

Ex: FUN Signature (Heritage, 1/2004), lot 5347, where it sold for \$3,565.

From The Speechless Collection. NGC ID# 22RH, PCGS# 3938

1918-S Nickel, MS64
Much Stronger Than Usual

3233 1918-S MS64 PCGS. The 1918-S is regarded as one of the worst-struck issues in the entire series, usually with extreme softness at the centers. This lustrous near-Gem is a delightful exception. The hair braid and bison's shoulder are well-defined, and the peripheral elements are downright strong. Frosted mint luster shines through glowing peach-gold and lavender toning, adding to the appeal. Scarce in higher grades.

From The Speechless Collection. NGC ID# 22RK, PCGS# 3940

3234 1919-S MS64 PCGS. The 1919-S is virtually unknown with a full strike, and the definition in a few areas may be what keeps the present example from an MS65 grade. It is definitely not abrasions, as there are few, and none are outwardly distracting. Nor is it the luster quality, both sides displaying a shimmering, satin textured sheen. While there is some bluntness of detail over a few of the central and peripheral features, the overall detail is acceptable and well above average for the issue. An essentially brilliant, untuned appearance enhances the already noteworthy eye appeal. There are not many '19-S nickels certified finer than MS64 at NGC or PCGS.

From The Speechless Collection. NGC ID# 22RN, PCGS# 3943

1920-D Buffalo Nickel, MS65 Early-Date Strike Rarity

3235 1920-D MS65 PCGS. The 1920-D is a well-known strike and condition rarity from the 1920s and is seldom located in Gem condition. The obverse on this piece is especially well-defined with hair definition complete all the way down to the knot in the braid. The reverse, on the other hand, is somewhat soft on the bison's head but the tail is fully split. Rich cinnamon-rose and lilac toning covers the surfaces of this softly frosted, problem-free Gem.
Ex: Central States Signature (Heritage, 5/2003), lot 5747, where it brought \$5,750.

From The Speechless Collection. NGC ID# 22RR, PCGS# 3945

3236 1923-S MS64 PCGS. CAC. This satiny near-Gem exhibits brilliant luster unencumbered by the vibrant gold and light blue toning on each side. Rather weakly detailed, this piece is typical of the issue in that regard. PCGS has certified 68 numerically finer examples. CAC: 31 in 64, 12 finer (12/18).

From The Speechless Collection. NGC ID# 22RW, PCGS# 3950

1924-D Nickel, Satiny MS65 Lightly Toned

3237 1924-D MS65 PCGS. The 1924-D is one of the most important strike rarities in this "strike challenged" series. There actually may be no fully struck examples. This Gem displays delicate steel-gray patina over satiny surfaces that, while solidly Gem quality, still displays some of the expected mushiness over the high points of the design.

Ex: Central States Signature (Heritage, 5/2003), lot 5754, where it sold for \$4,025.

From The Speechless Collection. NGC ID# 22RY, PCGS# 3952

3238 1925-S MS64 PCGS. Fully lustrous beneath dusky lilac-gray and golden toning, with a typically soft strike overall that is mostly due to die erosion. Metal flowlines are extensive around the margins. Abrasions are nonetheless minimal. The 1925-S Buffalo nickel is often available in MS64, but the tendency of this issue to be weakly struck contributes to a small population of finer coins. PCGS has seen only 34 numerically finer representatives (12/18).

Ex: Long Beach Signature (Heritage, 9/2007), lot 734, which realized \$3,220. NGC ID# 22S4, PCGS# 3956

1927-D Nickel, Lightly Toned MS65

3239 1927-D MS65 PCGS. The 1927-D is virtually unknown with full details, with most coins struck from widely spaced or worn dies (or both). This Gem example is far better than most, but still the strike above the braid knot is soft and the bison's shoulder lacks definition. The fields are remarkably smooth and pristine — lustrous and satiny, with lilac and pale-gold overtones for excellent eye appeal. PCGS reports just nine numerically finer pieces (12/18).

From The Speechless Collection. NGC ID# 22S9, PCGS# 3961

1927-D Nickel, MS65 Conditionally Scarce

3240 1927-D MS65 PCGS Gold Shield. CAC. Attractive light gold toning graces the obverse and reverse of this Gem 1927-D Buffalo nickel that exhibits an above average strike and pristine surfaces. Wisps of light blue appear along the obverse border. PCGS has only certified nine finer examples (12/18). CAC: 26 in 65, 2 finer (12/18). NGC ID# 22S9, PCGS# 3961

1927-S Nickel, MS64
Well-Struck, Attractive Surfaces

- 3241 1927-S MS64 PCGS.** Both obverse and reverse exhibit the attractive, golden-rose toning often seen on Buffalo nickels. The strike, while far better than normal, is not quite full, yet the surfaces are exceptionally clear of any distractions. This example displays shimmering luster that gives a semi-prooflike, somewhat glossy appearance overall. The 1927-S is rare in finer grades, with PCGS showing just 44 numerically finer certifications (12/18).
Ex: Long Beach Signature (Heritage, 9/2006), lot 1060.
From The Speechless Collection. NGC ID# 22SA, PCGS# 3962

- 3242 1928-S MS65 PCGS.** Vivid highlights of ice-blue and pale gold toning enhance the surfaces of this delightful Gem. Sharply detailed and impeccably preserved, this coin exhibits outstanding luster and eye appeal. Population: 96 in 65 (5 in 65+), 14 finer (12/18).
From The Speechless Collection. NGC ID# 22SD, PCGS# 3965

- 3243 1936 MS67 PCGS Gold Shield. CAC.** This boldly defined Superb Gem could easily be mistaken for a satin finish or Type One proof. The essentially flawless surfaces have no spots or marks visible, even with a loupe. Ever-so-slight design weakness is noted at the center of the obverse. A spectacular example exceeded numerically by just two submissions at PCGS. CAC: 42 in 67, 0 finer (12/18). NGC ID# 22SS, PCGS# 3977

PROOF BUFFALO NICKELS

1913 Buffalo Nickel, PR65
Type One Reverse

- 3244 1913 Type One PR65 PCGS. CAC.** The first type has always been described as a buffalo (properly, bison) standing on a mound, although it appears that the bison is standing on a knoll. This impressive Gem matte proof features a complete strike with satiny luster under delicate gold toning. NGC ID# 278R, PCGS# 3988

1913 Type Two Nickel, PR67
Bold Design Details

- 3245 1913 Type Two PR67 NGC.** This impressive Superb Gem matte proof Type Two Buffalo has brilliant cartwheel luster on its satin surfaces with a full strike showing a sharp braid on the obverse and a split tail on the reverse. Both sides have attractive light gold toning. This is an excellent opportunity for a type collector, or for the Buffalo nickel enthusiast. Census: 37 in 67 (1 in 67 ★), 5 finer (12/18). NGC ID# 278S, PCGS# 3990

- 3246 1914 PR65 PCGS. CAC.** The satiny, textured surfaces display full sharpness on the devices, as one expects of proof Buffalo nickels. There are some light champagne-gold overtones here and there, and the noteworthy lack of distracting marks further enhances the eye appeal. Only 22 coins in this grade are CAC endorsed (12/18).
Ex: Central States Signature (Heritage, 5/2003), lot 5800, which realized \$1,851.50 NGC ID# 278T, PCGS# 3991

1915 Buffalo Nickel, PR66+
Sharp Matte Proof

- 3247 1915 PR66+ PCGS Gold Shield.** From a matte proof mintage of 1,050 pieces, this delightful Plus-graded Premium Gem exhibits razor-sharp definition on all design elements and the impeccably preserved textured surfaces radiate vibrant mint luster from both sides. Attractive shades of lavender, pale gold, and ice-blue toning enhance the outstanding eye appeal. NGC ID# 278U, PCGS# 3992

- 3248 1936 Type One — Satin Finish PR67 PCGS. CAC.** An impressive Superb Gem, this satin finish example is characterized by pinpoint design definition, gorgeous rainbow toning, and flawless surfaces. PCGS has certified just 49 numerically finer pieces (12/18). NGC ID# 278X, PCGS# 3994

1936 Type One Nickel, PR68
Satin Finish

- 3249 1936 Type One — Satin Finish PR68 NGC. A stunning Superb Gem, this Satin Finish proof is essentially flawless with brilliant cartwheel luster and nickel-gray surfaces that exhibit faint gold and lavender toning on each side. Census: 29 in 68 (1 in 68+, 2 in 68 ★, 1 in 68+★), 0 finer (12/18). NGC ID# 278X, PCGS# 3994

1936 Buffalo, PR66 Gold CAC
Type Two, Brilliant Finish

- 3250 1936 Type Two — Brilliant Finish PR66 PCGS. Gold CAC. This important proof Buffalo displays fully brilliant features that are sharply defined throughout. Neither side reveals a single blemish of note, and there is a light overlay of original, silver tinged iridescence. The gold CAC label alludes to the exceptional quality and eye appeal of this Premium Gem proof. More than 800 proofs of this issue are graded PR66 or finer, yet only four PR66 examples have earned the gold approval, and no finer pieces have earned this distinction (12/18). NGC ID# 278Y, PCGS# 3995

- 3251 1937 PR67 NGC. The 1937 is the last proof issue in the Buffalo nickel series. Buffalo nickels were struck at Denver in 1938, but no Philadelphia coinage was delivered. This final-year proof displays well-struck motifs and glimmering fields. Each side has a blend of light golden and lilac hues. NGC lists 59 finer submissions (12/18). NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKEL

- 3252 1952 MS65 Full Steps PCGS Gold Shield. This sharply defined 1952 Jefferson nickel exhibits delicate gold toning over its brilliant light gray surfaces. Monticello exhibits five-and-a-half full steps. Population: 14 in 65 Full Steps, 9 finer (12/18). NGC ID# 22UK, PCGS# 84046

PROOF JEFFERSON NICKELS

- 3253 1939 Reverse of 1938 PR68 NGC. Although the steps to Monticello are wavy on the Reverse of 1938, they appear complete on this Superb Gem proof. Both sides have delicate peripheral gold toning around light gray surfaces with nicely mirrored fields and reflective devices. Census: 12 in 68 (2 in 68 ★), 0 finer (12/18). NGC ID# 279X, PCGS# 4176

- 3254 1942 Type One PR68 NGC. This delightful PR68 example was struck early in the year, before the wartime silver composition for the nickel was introduced. The design elements are razor-sharp throughout and the virtually pristine brilliant surfaces include deeply mirrored fields. Census: 12 in 68, 0 finer (12/18). NGC ID# 27A3, PCGS# 4179

- 3255 1953 PR67 Deep Cameo PCGS Gold Shield. Although a few finer examples have been certified, we can't imagine any that have better eye appeal than this brilliant and untuned nickel-gray surfaces with deeply mirrored fields surrounding the lustrous devices. Population: 8 in 67 (1 in 67+) Deep Cameo, 8 finer (12/18). NGC ID# BBV3, PCGS# 94185

BUST HALF DIMES

- 3256 1832 V-1, LM-3, R.1, MS64+ PCGS Gold Shield. Splendid apple-green, cherry-red, and honey-gold toning endow this lustrous and intricately struck near-Gem. The reverse is practically pristine, and the obverse displays only unimportant contact. A desirable addition to an early silver type set. NGC ID# 232E, PCGS# 38665 Base PCGS# 4279

- 3257 1833 V-4, LM-3.5, R.2, MS65 NGC. This late die state has several obverse and reverse die cracks with a reverse die bulge between the scroll and the eagle's head. It has a crack through the base of NITE that eventually forms a rim break. This Gem has frosty luster and untuned silver brilliance. *From The Speechless Collection.* PCGS# 38689 Base PCGS# 4280

- 3258 1836 Small 5C, V-2, LM-4, R.2, MS65 NGC. Stars 1 and 11 are repunched, as are the O in OF and the R in AMERICA. A crisply struck and lustrous Gem with pleasing surfaces and only a hint of butter-gold toning. An ideal purchase for the silver type collector. Housed in a circa-2000 holder. *From The Speechless Collection.* NGC ID# 232J, PCGS# 38727 Base PCGS# 4288

SEATED HALF DIMES

1837 Seated Half Dime, MS66 ★
No Stars, Large Date, V-1

- 3259 1837 No Stars, Large Date (Curl Top 1) MS66 ★ NGC. V-1, Flynn MPD-001 and RPD-001. The bottom of an 8 is misplaced in the dentils, and the base of the 37 is lightly repunched. A middle die state that shows less repunching than early die state examples. This is a magnificent No Stars type coin bathed in rich aquamarine toning, with occasional glimpses of golden-brown and pearl-gray patina. Sharply struck and unblemished with a wire rim on the upper reverse. NGC ID# 232M, PCGS# 4311

- 3260 1838 Large Stars, No Drapery, MS66 PCGS Gold Shield. This stunning Premium Gem is an exceptional piece representing the second design sub-type, and the second year of issue for the Seated Liberty design. An obverse die crack extends through Star 13 toward Liberty's leg. This piece has brilliant and frosty silver luster with delicate peripheral gold toning. Population: 36 in 66 (7 in 66+), 11 finer (12/18). NGC ID# 2TXX, PCGS# 4317

- 3261 1852 MS66 PCGS. The design elements of this spectacular Premium Gem were strongly impressed, but die polishing apparently removed some of the drapery at Liberty's right (facing) arm. The well-preserved, lustrous surfaces exhibit highlights of pale gold toning. Population: 14 in 66 (1 in 66+), 5 finer (12/18). NGC ID# 233K, PCGS# 4349

3262 1853 No Arrows MS66 PCGS Gold Shield. An impressive example of the No Arrows half dime, struck before the weight reduction of 1853 to promote circulation of the denomination. Few of these have survived, especially in high grades. This Premium Gem features a bold struck and frosty mint luster beneath attractive gold and light blue toning. Population: 12 in 66 (1 in 66+), 2 finer (12/18). NGC ID# 233M, PCGS# 4351

3263 1853 Arrows MS66 NGC. The NGC label is hand signed by *Guide Book* editor Ken Bressett. This Premium Gem exhibits characteristics of a late die state including clash marks and die erosion. The surfaces are brilliant and highly lustrous with no toning evident on either side. Census: 45 in 66 (2 in 66+, 1 in 66 ★), 23 finer (12/18). NGC ID# 233Y, PCGS# 4356

3264 1858-O MS66 PCGS Gold Shield. CAC. Although a fairly substantial number of half dimes were coined at New Orleans in 1858, few of those coins survive in high grade. This Premium Gem has frosty silver luster beneath light gold and iridescent toning. Population: 10 in 66 (2 in 66+), 1 finer. CAC: 8 in 66, 2 finer (12/18). NGC ID# 233V, PCGS# 4369

3265 1864 MS65 NGC. This impressive Gem exhibits well-detailed design elements and dramatic clash marks on both sides. The brilliant surfaces radiate vibrant mint luster, with no mentionable distractions. Census: 12 in 65, 8 finer (12/18). NGC ID# 234E, PCGS# 4384

PROOF SEATED HALF DIMES

1858 Half Dime, PR66
Ex: Gardner

3266 1858 PR66 NGC. CAC. Pinkish-rose and ice-blue patina generates terrific eye appeal for this bold Premium Gem. The 1858 half dime represents the first year that the Mint went from striking proof delicacies for the well-connected (and well-to-do, largely) to equitably marketing proof coins to the public. Housed in a former generation holder. Census: 13 in 66 (1 in 66 ★), 2 finer. CAC: 5 in 66, 0 finer (12/18).

Ex: *U.S. Coins and Paper Money (Stack's, 3/1998)*, lot 349; *Eugene H. Gardner Collection, Part I (Heritage, 6/2014)*, lot 30220; *Long Beach Signature (Heritage, 6/2018)*, lot 3867, where it brought \$3,600. NGC ID# 235N, PCGS# 4437

3267 1873 PR66 PCGS. A splendid Premium Gem proof, this example exhibits noticeable field-to-device contrast, although does not carry the Cameo designation from PCGS. The fields are fully mirrored and the devices show frosty mint luster. Both dies have been lapped to remove clash marks and show myriad fine die polishing lines. Population: 27 in 66 (2 in 66+), 7 finer (12/18).

From *The Speechless Collection*. NGC ID# 236A, PCGS# 4456

EARLY DIME

3268 1798/97 16 Stars Reverse, JR-1, R.3, Fine 15 PCGS Gold Shield. Considerable detail remains for the grade beneath variegated gold and blue toning that accompanies areas of light silver-gray on both sides. Evidence of lapping appears on the obverse of this late die state dime. NGC ID# 236F, PCGS# 38750 Base PCGS# 4468

BUST DIMES

3269 1825 JR-5, R.5, AU58 NGC. JR-5 is the rarest 1825 die marriage. This lightly abraded near-mint example was struck from a misaligned obverse die, which gives that side the appearance of being struck slightly off-center toward 10:30. Steel-blue and lavender-red toning fills the borders and left fields. PCGS# 38811 Base PCGS# 4503

3270 1831 JR-2, R.3, MS63 NGC. The D in UNITED is repunched on this plentiful type coin variety. This Select example is sharp through the border stars and central devices, and both sides have a hint of reflectivity in the fields beneath golden-russet toning. Stray light marks determine the grade. PCGS# 38850 Base PCGS# 4520

SEATED DIMES

3271 1837 No Stars, Small Date, F-102, R.3, MS62 PCGS. Attractive blue and iridescent toning appears on the lustrous light gray surfaces of this splendid first-year Seated Liberty dime with the obverse patterned after the Gobrecht dollars, featuring a cameo-like obverse design. Population: 11 in 62, 43 finer (12/18). NGC ID# 237R, PCGS# 537638 Base PCGS# 4562

1838 Small Stars Dime, MS65
FS-801, Doubled Die Reverse

3272 1838 Small Stars, Doubled Die Reverse, F-101, FS-801, MS65 PCGS. Fortin-101 is boldly die doubled on the reverse, evident on the wreath, the border legend, and ONE DIME. On the obverse, a die crack connects stars 1 through 6. This example shows the die crack more advanced, running through the date, which is typical of the later die state Fortin-101a. However, the border dentils are still strong, and they are typically weak on Fortin-101a. This Gem Small Stars dime displays a sharp strike and satiny mint luster. Russet, olive, gold, and sea-green toning covers each side, and the satiny surfaces show no bothersome abrasions. NGC ID# 2TVT, PCGS# 145483 Base PCGS# 4569

1838 Large Stars No Drapery Dime
Richly Toned MS66

3273 1838 No Drapery, Large Stars, F-103, R.4, MS66 PCGS Gold Shield. Sea-green and blue hues are prominent on each side of this Large Stars Premium Gem, though the obverse adds gold and silver in a "wedge" down from the top. Amazing eye appeal for this early Seated dime issue. Population for all Large Stars varieties: 19 in 66, 2 finer (12/18). PCGS# 537646 Base PCGS# 4568

- 3274 1841-O Closed Bud, Large O, F-101, FS-902, R.6 — Cleaning — PCGS Genuine.** VF A Top 100 Variety. Fortin-101 is the only 1841-O variety with a large mintmark. More significantly, it is one of just two Transitional Reverse die varieties with a closed bud and small letters. The other such variety, the Small O F-102, is even rarer than F-101. This is a sharp example with a full LIBERTY and nearly complete star centrils. The surfaces are unmarked but lightly granular, and display peripheral gunmetal and russet patina.

**1843 F-106 Dime, MS66
Single Finest at NGC**

- 3275 1843 Repunched Date, F-106, R.3, MS66 NGC.** The present lot is the single-finest NGC-certified business strike 1843 dime. The virtually unabraded surfaces display rich silver-gray, golden-brown, and stone-white toning. A lustrous and desirable high-grade representative. Fortin-106 displays minor repunching on the crossbar of the 3 in the date. PCGS# 537815 Base PCGS# 4583

- 3276 1845 F-105a, R.4, MS65 NGC.** High date, dual cracks through E in STATES. This nicely struck Gem has a splendidly patinated reverse. The peach-gold center is framed by concentric bands of lavender, ocean-blue, lemon-gold, and fire-red. The obverse displays similar but more subtle shades. The lustrous surfaces are unblemished. Census: 12 in 65, 7 finer (12/18). NGC ID# 238B, PCGS# 537825 Base PCGS# 4586

**1852 Dime, Fully Struck MS66
One Finer Coin at NGC**

- 3277 1852 F-116, R.3, MS66 NGC.** Obverse 1 has a high, downward sloping date with 18 touching the base. Die cracks through UNI and between the ribbon ends identify Reverse P. Fully struck and completely brilliant, this dazzling Premium Gem exhibits a single tick on Liberty's right arm. A remarkably high-grade survivor and virtually unimprovable. Census (all die varieties): 6 in 66, 1 finer (12/18).

From The Speechless Collection. NGC ID# 238N, PCGS# 537935 Base PCGS# 4597

- 3278 1853 Unhubbed Date and Arrows, F-119, R.4, MS65 NGC.** A prominent obverse rim cud resides between 6 and 7 o'clock. Lightly toned and lustrous with exemplary preservation. The strike is sharp except on the dentils opposite the cud. A popular three-year type coin. Housed in a circa-2000 holder.

From The Speechless Collection. PCGS# 537990 Base PCGS# 4603

- 3279 1856 Small Date MS65 PCGS Gold Shield.** Parallel obverse and reverse planchet roller lines, created through the minting procedure, are prominently visible on this example as a result of the lovely intermingled iridescent toning. Population: 24 in 65 (1 in 65+), 7 finer (12/18). NGC ID# 238U, PCGS# 4609

- 3280 1856-S F-101, R.5, AU53 PCGS Gold Shield.** A well-defined stone-white representative of the first San Francisco dime issue. A mere 70,000 pieces were issued, and few if any were saved by collectors until decades later. Luster accompanies design recesses, and marks are limited to a solitary line above the E in STATES. NGC ID# 238W, PCGS# 538089 Base PCGS# 4613

- 3281 1858 F-103, R.3, MS65 NGC.** A practically brilliant Gem that displays dynamic luster and uncommonly clean surfaces. Liberty's head and portions of the wreath are lightly brought up. Fortin-103 has a diagonal die scratch near the lower left end of Liberty's rock. Certified in a circa-2000 holder. Census: 17 in 65 (1 in 65+), 11 finer (12/18).

From The Speechless Collection. PCGS# 538120 Base PCGS# 4616

- 3282 1859-S F-101, R.3, VF30 NGC.** Both sides of this middle grade scarcity have light gray surfaces with hints of delicate gold toning. Just 60,000 were minted, and the typical survivor is a mid-level VF, much like this piece. Census: 2 in 30, 9 finer (12/18).

Ex: Long Beach Signature (Heritage, 2/2012), lot 3337, which realized \$1,150. PCGS# 538145 Base PCGS# 4621

- 3283 1860-O F-101, R.3, VG10 NGC.** An attractive example of this challenging antebellum issue, mintage 40,000 pieces. Varying grays, deepest at the margins and lightest at the worn high points, lend a sense of contrast. All letters of LIBERTY are readable, though the Y is weak. New Orleans struck the legend obverse subtype only during its first and final years, 1860 and 1891. Census: 2 in 10, 38 finer (12/18).

Ex: Long Beach Signature (Heritage, 5/2012), lot 3485, realized \$1,150. PCGS# 538160 Base PCGS# 4632

**1865 Dime, Untoned MS65
Low Mintage, Repunched Date**

- 3284 1865 Repunched Date, F-101a, R.5, MS65 NGC.** The top loop of an errantly punched 6 appears between 86 in the date, making this Gem all the more interesting. Struck from the proof dies, each side retains hints of semireflectivity in the fields. Totally untoned and strongly struck without any mentionable abrasions. Only 10,000 dimes were minted in 1865. Census (all varieties): 5 in 65, 17 finer (12/18).

From The Speechless Collection. NGC ID# 239P, PCGS# 538204 Base PCGS# 4641

- 3285 1866 XF40 NGC. Fortin-101.** F-101 is considered proof-only but is nonetheless the pair for this circulated examples. Faint gold and blue overtones appear on the pewter-gray surfaces of this important key-date Seated Liberty dime. Just 8,000 were minted and most of those were apparently hoarded and melted. NGC ID# 239S, PCGS# 4643

**1867 Dime, Attractively Toned MS66
Low-Mintage Issue, Few Finer**

- 3286 1867 F-102, R.5, MS66 NGC.** Only 6,000 circulation strike dimes were struck of this scarce date. The fields show signs of heavy die polishing, giving the coin a bright, reflective appearance. The centers are near-brilliant, then gradually turning rose and finally deep blue. Sharply defined throughout. Census: 8 in 66, 2 finer (12/18). NGC ID# 239U, PCGS# 538218 Base PCGS# 4645

- 3287 1873 Arrows, F-113, R.3, MS64 PCGS. CAC.** A lustrous near-Gem of the popular two-year subtype. The reverse border displays light olive-green and chestnut-brown toning. Fortin states F-113 "exhibits strong die doubling on the outer portions of the leaves in the lower left wreath" but close study indicates the present coin is strike doubled. Prominently double clashed with a letter E near Liberty's raised elbow.

From The Speechless Collection. PCGS# 538314 Base PCGS# 4665

- 3288 1876-CC MS65 PCGS. CAC.** A khaki-green and gunmetal-gray Gem. Well struck and free from marks. A popular Centennial-year Carson City type coin. The die variety appears to be unlisted in Fortin, though it is similar to F-103 and F-126. ONE DIME is die doubled, and both sides are boldly clashed. A horizontal die crack crosses the tops of the CC mintmark. Population: 40 in 65 (1 in 65+), 25 finer. CAC: 8 in 65, 8 finer (12/18). NGC ID# 23AJ, PCGS# 4680

- 3289 1879 Repunched Date, F-104a, R.4, MS66 PCGS. CAC.** The 18 in the date is repunched. The 1879 has a commercial mintage only 14,000 pieces, since the U.S. Mint concentrated on silver dollar coinage. This is a lightly toned and flashy Premium Gem with minor peripheral incompleteness of strike. For all die pairs, CAC: 20 in 66, 15 finer (12/18).

From The Speechless Collection. NGC ID# 23AS, PCGS# 538642 Base PCGS# 4687

**1888-S Dime, Untoned MS65
Rarely Offered This Fine**

- 3290 1888-S MS65 PCGS Gold Shield. Fortin-Unlisted.** The obverse shows heavy die lines in the lower shield recesses, and the mintmark position does not match any of those listed. This frosty, untoned Gem shows a hint of blending on Liberty's head and the date, but the central obverse and entire reverse are strongly detailed. Full definition appears on the corn kernels. An interesting offering for specialists. Population: 12 in 65, 5 finer (12/18). NGC ID# 23B8, PCGS# 4701

- 3291 1891 F-114, R.2, MS67 NGC.** A fully brilliant and thoroughly lustrous Superb Gem. Virtually unabraded, and the strike is above average. Boldly clashed near Liberty's right (facing) elbow and left hand, but the reverse shows only faint clash marks near the E in DIME. Census: 23 in 67 (3 in 67 ★), 1 finer (12/18).

Ex: Central States Signature (Heritage, 4/2006), lot 1249, which realized \$1,495.

From The Speechless Collection. PCGS# 538892 Base PCGS# 4706

- 3292 1891 F-124, R.3, MS67 NGC.** Richly patinated aquamarine and mahogany-brown. The lustrous surfaces are clashed but free from perceptible contact. A good strike further confirms the quality. A lovely final-year type coin. Census: 23 in 67 (3 in 67 ★), 1 finer (12/18). PCGS# 538903 Base PCGS# 4706

PROOF SEATED DIMES

- 3293 1859 PR65 PCGS Gold Shield.** Surviving from just the second year of large-scale proof coinage and distribution to collectors, this lovely Gem proof exhibits fully mirrored fields and contrasting devices beneath lovely gold and iridescent toning. Population: 34 in 65 (1 in 65+), 17 finer (12/18). NGC ID# 23CD, PCGS# 4748

- 3294 1859 PR64 Cameo PCGS Gold Shield. CAC.** Full design definition appears on both sides of this Choice Cameo proof that survives from a recorded mintage of only 800 proofs. With a combined total population of 442 coins at PCGS and NGC, the 800-coin production figure is likely accurate. This example has fully mirrored fields and lustrous design motifs that are fully visible through a delicate layer of gold toning. Population: 11 in 64 (1 in 64+) Cameo, 23 finer. CAC: 4 in 64, 12 finer (12/18). NGC ID# 23CD, PCGS# 84748

- 3295 1859 F-102, R.5, PR64 PCGS.** An undisturbed Choice dime bathed in steel-blue, cherry-red, and wheat-gold shades. Well struck except for the dentils. Both sides exhibit a partial wire rim. The proof mintage of 800 pieces is deceptive, since a few hundred proof sets failed to sell and were eventually melted by the Mint. NGC ID# 23CD, PCGS# 539006 Base PCGS# 4748

**1860 Dime, PR67
Entirely Brilliant**

- 3296 1860 Doubled Die Reverse, F-101, R.3, PR67 NGC.** Horizontal die lines in the shield are one diagnostic marker for the proof dies used to strike 1,000 dimes in 1860. This all-brilliant Superb Gem is nearly flawless. Close inspection reveals two microscopic ticks, one in the right obverse field and another under the base of the rock. Fully struck, as expected. Probably fewer than 500 pieces were distributed, and even fewer survive. Census: 9 in 67, 5 finer in non-Came (12/18).

From The Speechless Collection. NGC ID# 23CJ, PCGS# 539007 Base PCGS# 4753

- 3297 1880 PR65 Cameo NGC. F-101, R.3.** Strongly contrasted with frost-white against mirror-black. This is a boldly reflective Gem that shows only a few minor surface disturbances. Overall eye appeal is outstanding. Census: 16 in 65 Cameo, 34 finer (12/18).

From The Speechless Collection. NGC ID# 23D5, PCGS# 84777

**1882 Dime, PR67 Cameo
Glassy, Mirrorlike Fields**

- 3298 1882 PR67 Cameo NGC. F-101, R.3.** All proof dimes struck in 1882 (1,100 specimens) exhibit repunching on the base of the 2. Examples tend to be readily collectible, but they are seldom seen in this quality. Both sides maintain their brilliance, with frosty devices and glassy, mirrorlike fields, especially on the reverse. Census: 9 in 67 Cameo (4 in 67 ★), 4 finer in this category (12/18).

From The Speechless Collection. NGC ID# 23D7, PCGS# 84779

- 3299 1885 PR67 Cameo NGC. F-101, R.3.** A magnificent Superb Gem, with sharply detailed design elements and deeply mirrored fields that create intense cameo contrast with the frosty design elements. The surfaces are impeccably preserved and brilliant. Census: 19 in 67 Cameo (1 in 67+, 1 in 67 ★), 8 finer (12/18).

From The Speechless Collection. NGC ID# 23DA, PCGS# 84782

- 3300 1886 PR66 Cameo PCGS. F-104, R.3.** Icy motifs rise in virtually full detail above the darkly reflective fields. This high-grade specimen is brilliant save for a tiny spot on the obverse rim at 5 o'clock. Just 886 proofs were produced. Population: 9 in 66 (1 in 66+) Cameo, 5 finer (12/18).

From The Speechless Collection. NGC ID# 23DB, PCGS# 84783

- 3301 1888 PR66 Cameo NGC. F-101, R.4.** The sharply detailed, frosty design elements of this spectacular Premium Gem proof contrast boldly with the deeply mirrored fields to create a dramatic cameo effect. The brilliant surfaces are well-preserved and eye appeal is outstanding. Census: 9 in 66 Cameo, 7 finer (12/18).

From The Speechless Collection. NGC ID# 23DD, PCGS# 84785

- 3302 1889 PR66 Cameo NGC. F-101, R.4.** Profoundly mirrored in the silver-white fields with intense frost over the sharply struck devices. A remarkable Premium Gem that comes close to Ultra Cameo eye appeal. Census: 5 in 66 Cameo, 6 finer (12/18).

From The Speechless Collection. NGC ID# 23DE, PCGS# 84786

- 3303 1889 F-102, R.4, PR66 PCGS.** A lightly toned specimen with mirrored fields and a good strike. A pair of minuscule ticks above the right ribbon loop provide identifiers. The obverse die was lapped, most apparent near the Y in LIBERTY. Fortin varieties 101 and 102 nearly equally divide survivors from the proof mintage of 711 pieces.

From The Speechless Collection. NGC ID# 23DE, PCGS# 539065 Base PCGS# 4786

- 3304 1890 PR67 ★ Cameo NGC. F-102, R.4.** An untoned Superb Gem with icy legends and motifs. The reflective fields appear devoid of contact. Perfect aside from a trace of a fingerprint near the O in ONE. Just 590 proofs were produced. Census: 4 in 67 Cameo (2 in 67 ★), 1 finer (12/18).

Ex: *Dallas Signature* (Heritage, 10/2008), lot 576; *Dallas Signature* (Heritage, 10/2012), lot 4025, which realized \$2,702.50. NGC ID# 23DF, PCGS# 84787

- 3305 1891 PR65 Deep Cameo PCGS. F-101, R.3.** A diagonal die line below the I LIBERTY is diagnostic for Fortin-101, one of three proof die marriages for this final-year issue. A fully brilliant Gem with icy devices and flashy fields. The grade is limited solely by minor contact between Liberty's head and cap. Population: 2 in 65 Deep Cameo, 4 finer (12/18).

From The Speechless Collection. NGC ID# 23DG, PCGS# 94788

BARBER DIMES

- 3306 1894-O MS62 PCGS Gold Shield.** An important low-mintage issue, the 1894-O is conditionally rare in Mint State grades. This pleasing example has gold, lilac, and emerald toning over its satiny silver luster with generally sharp design definition. Population: 7 in 62, 35 finer (12/18). NGC ID# 23DU, PCGS# 4804

- 3307 1897-S MS64 PCGS Gold Shield.** Dusky violet-gray patina and olive-gold accents grace each side. Frosty mint luster shines softly from the underlying surfaces. This San Francisco near-Gem dime is practically fully struck, including all the wreath elements. Population: 41 in 64 (1 in 64+), 21 finer (12/18). NGC ID# 23E5, PCGS# 4814

- 3308 1902 MS66+ PCGS Gold Shield. CAC.** Although the 1902 Barber dime is considered a common date from a mintage of more than 21 million pieces, few have survived in grades finer than MS65. This frosty Premium Gem displays brilliant silver luster and attractive gold and blue toning along the borders. Population: 49 in 66 (25 in 66+), 3 finer. CAC: 8 in 66, 0 finer (12/18). NGC ID# 23EJ, PCGS# 4827

1905-O Dime, MS66+ Pale Pastel Toning

- 3309 1905-O MS66+ PCGS Gold Shield. CAC.** While the 1905-O is readily available in circulated grades, it is seldom found in the higher grades of Uncirculated, especially with a strong strike. This satiny example has a slight accent of pale pastel toning over each side. As one would expect from the grade, there are no mentionable or even noticeable abrasions. Population: 21 in 66 (2 in 66+), 7 finer. CAC: 7 in 66, 8 finer (12/18). NGC ID# 23EU, PCGS# 4836

- 3310 1909-O MS65 NGC.** This New Orleans Mint dime marks the end of an era, the last production at the Louisiana coinage factory. Both sides of this Gem have brilliant silver luster with satin surfaces and splashes of gold toning. Census: 16 in 65, 6 finer (12/18).

Ex: *FUN Signature* (Heritage, 1/2012), lot 5567, realized \$1,610. NGC ID# 23FD, PCGS# 4852

- 3311 1914-S MS66 PCGS Gold Shield. CAC.** This spectacular Premium Gem exhibits sharply detailed design elements throughout, with impeccably preserved surfaces that radiate vibrant mint luster on both sides. Population: 19 in 66 (2 in 66+), 2 finer. CAC: 14 in 66, 2 finer (12/18). NGC ID# 23FV, PCGS# 4867

PROOF BARBER DIMES

- 3312 1894 PR66 NGC.** This is an impressive, fully brilliant Premium Gem proof dime. Notable contrast is seen on both sides, though no formal Cameo designation is awarded. The 1894 has a limited business-strike mintage, adding to the demand for Gem proof examples such as this.

From The Speechless Collection. NGC ID# 23G6, PCGS# 4878

- 3313 1894 PR67 NGC.** Sky-blue, gold, and amber toning appears on both sides of this Superb Gem proof that retains exceptional eye appeal. Lustrous and sharply detailed devices float over the deeply mirrored fields. Census: 24 in 67 (3 in 67 ★), 10 finer (12/18). NGC ID# 23G6, PCGS# 4878
- 3314 1895 PR65 PCGS.** Silver and green-gold colors prevail on this Gem proof, contrasted on each side but not to Cameo levels. Boldly mirrored with strong eye appeal.
From The Speechless Collection. NGC ID# 23G8, PCGS# 4879
- 3315 1896 PR66 Cameo NGC.** A boldly defined Premium Gem Cameo proof, this example has excellent field-to-device contrast that shines through its blue and violet toning. Census: 18 in 66 Cameo (2 in 66 ★), 15 finer (12/18). NGC ID# 23G9, PCGS# 84880
- 3316 1897 PR66 Cameo NGC.** This stunning Premium Gem Cameo proof is fully brilliant and untuned, exhibiting needle-sharp design definition and amazing contrast between the deeply mirrored fields and fully lustrous devices. Census: 15 in 66 Cameo, 26 finer (12/18). NGC ID# 23GA, PCGS# 84881

**1897 Dime, PR67 ★ Cameo
Impeccable Production Quality**

- 3317 1897 PR67 ★ Cameo NGC. CAC.** Production quality at the Philadelphia Mint was at its peak during the final years of the 19th century, producing some of the finest proofs it had ever or would ever make. This 1897 dime in spectacular PR67 ★ Cameo condition showcases dramatic field-device contrast unobscured by pale glints of golden border toning. Census: 22 in 67 Cameo (1 in 67+, 6 in 67 ★), 4 finer in this category. CAC: 9 in 67, 6 finer (12/18).
From The Speechless Collection. NGC ID# 23GA, PCGS# 84881
- 3318 1900 PR66 PCGS. CAC.** Pastel lilac and sky-blue hues adorn the interiors of this Premium Gem proof, ceding to vivid orange-gold around the borders. The strike is sharp and each side displays modest cameo contrast. The CAC endorsement is well-deserved. Proof 1900 Barber dimes are scarce in this condition.
Ex: FUN Signature (Heritage, 1/2003), lot 6490, which realized \$1,167.25. NGC ID# 23GD, PCGS# 4884
- 3319 1900 PR65 Cameo NGC.** This delightful Gem proof exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. The well-preserved surfaces show a few subtle hints of pale jade toning. Census: 10 in 65 Cameo, 18 finer (12/18).
From The Speechless Collection. NGC ID# 23GD, PCGS# 84884
- 3320 1907 PR65 Cameo PCGS. CAC.** This impressive Gem exhibits intense cameo contrast between the sharply detailed, frosty design elements and the deeply mirrored fields. The impeccably preserved surfaces show highlights of pale gold toning. Population: 11 in 65 (1 in 65+) Cameo, 5 finer. CAC: 7 in 65, 7 finer (12/18). NGC ID# 23GM, PCGS# 84891

MERCURY DIMES

- 3321 1916 MS67+ Full Bands PCGS Gold Shield.** This stunning Plus-graded Superb Gem exhibits sharply detailed design elements throughout, with Full Bands definition on the fascies. The impeccably preserved surfaces radiate vibrant mint luster, under vivid shades of golden-brown, sea-green, and magenta toning. PCGS has graded 13 numerically finer Full Bands examples (12/18). NGC ID# 23GX, PCGS# 4905
- 3322 1916-D VG8 NGC.** An attractive example for the assigned grade, this smoothly worn 1916-D must have circulated widely for many years before being plucked from circulation. The mintmark remains sharp and all of the devices retain definition suggestive of a slightly finer grade. Attractive warm-gray toning covers both sides. NGC ID# 23GY, PCGS# 4906

**1916-D Mercury Dime, VF-20
First-Year Series Key**

- 3323 1916-D VF20 PCGS.** From a series-low mintage of 264,000 pieces, the 1916-D Mercury dime is the undisputed key to the series. This impressive VF20 specimen shows the central bands on the fascies still visible, but not separated. The date, mintmark, and all legends remain bold and the silver-gray surfaces are lightly abraded. The overall presentation is quite pleasing. NGC ID# 23GY, PCGS# 4906
- 3324 1918-D MS66 PCGS Gold Shield.** This delightful Premium Gem is sharply detailed in most areas, but just the slightest blending is evident on the central bands on the fascies. The well-preserved surfaces radiate vibrant mint luster throughout. Population: 22 in 66 (1 in 66+), 2 finer (12/18). NGC ID# 23H6, PCGS# 4918
- 3325 1919-D MS65 PCGS. CAC.** The 1919-D Mercury dime is an elusive issue in MS65 condition. This impressive Gem offers well-detailed design elements, with a touch of the usual softness on the central bands. The well-preserved surfaces are lightly toned in shades of emerald-green and lavender. Population: 34 in 65 (2 in 65+), 8 finer. CAC: 10 in 65, 0 finer (12/18). NGC ID# 23H9, PCGS# 4924

**1919-D Mercury Dime, MS64 Full Bands
Brilliant and Fully Lustrous**

- 3326 1919-D MS64 Full Bands PCGS Gold Shield.** This Choice Mint State 1919-D dime is brilliant and essentially untuned, exhibiting frosty silver luster and sharp design motifs. A glass reveals extremely faint splashes of lavender toning. PCGS has certified only 21 numerically finer examples of this issue (12/18). NGC ID# 23H9, PCGS# 4925

3327 1920-S MS64 Full Bands PCGS Gold Shield. This satiny near-Gem features bold design motifs and brilliant luster beneath splashes of rich golden-brown toning on the obverse, and traces of similar toning on the bright silver reverse. Slight peripheral weakness is evident. PCGS has certified just 52 finer examples (12/18). NGC ID# 23HD, PCGS# 4933

3328 1924 MS67 PCGS. CAC. A conditional rarity and among the finest non-Full Bands examples known of this date. Frosty surfaces display light golden and lavender hues, and the fasces bands are almost entirely separated. PCGS lists a quantity of Full Bands coins in this grade. Population: 7 in 67 (2 in 67+), 0 finer. CAC: 4 in 67, 0 finer (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# 23HJ, PCGS# 4942

3329 1926-S MS62 Full Bands PCGS Gold Shield. A sharply struck and fully brilliant example of this elusive issue. Both sides are lustrous and untoned. The 1926-S had the fifth lowest mintage of the Mercury dime series at just 1.52 million examples. NGC ID# 5LX7, PCGS# 4959

3330 1927 MS67 Full Bands PCGS. A lovely example with a bold strike that shows full split bands on the reverse, this 1927 Mercury dime features frosty silver mint luster with splashes of gold toning. A wonderful Superb Gem. Population: 33 in 67 (2 in 67+) Full Bands, 1 finer (12/18). NGC ID# 5KLC, PCGS# 4961

3331 1929-D MS67 Full Bands PCGS. CAC. This Denver issue is scarce in Superb Gem condition, and CAC-endorsed pieces are rare this fine. The present coin displays sharp design elements and satiny mint luster that backlights delicate lilac-gold toning on each side. Eye appeal is outstanding. Population: 57 in 67 (5 in 67+) Full Bands, 3 finer. CAC: 23 in 67, 1 finer (12/18). NGC ID# 5LXC, PCGS# 4975

1931-S Dime, MS66 Full Bands Doubled Die Obverse

3332 1931-S Doubled Die Obverse, FS-101, MS66 Full Bands PCGS. Die doubling is evident on the date, Liberty's portrait, the L in LIBERTY, and the designer's initials. Full Bands examples of the 1931-S dime are much more difficult to locate than their non-Full Bands counterparts. Premium Gems are scarce, and fewer than a dozen coins are graded higher at PCGS and NGC combined. This Registry-grade representative is utterly brilliant, awash in thick mint luster, and nearly unabraded. Detail is strong around the borders, as it is over the centers. Population (for the variety): 3 in 66 Full Bands, 0 finer (12/18). PCGS# 145444 Base PCGS# 4987

3333 1939-S MS67 Full Bands PCGS Gold Shield. CAC. This spectacular Superb Gem exhibits sharply detailed design elements throughout, with fully separated bands on the fasces. The impeccably preserved, brilliant surfaces radiate vibrant mint luster with outstanding eye appeal. Population: 55 in 67 (6 in 67+) Full Bands, 1 finer. CAC: 21 in 67, 0 finer (12/18). NGC ID# 23JT, PCGS# 5021

1942/1 FS-101 Dime, MS63 Famous 20th Century Variety

3334 1942/1 FS-101 MS63 PCGS Gold Shield. The average certified grade for the famous 1942/1 dime falls between VF35 and XF40. While those circulated examples are perfect for budget-restricted sets, an MS63 example like the present coin is sure to serve as a highlight in any collection. Gold and gray patina allows partial luster to shine through softly. The central bands are virtually completely separated, but not quite enough for a formal designation. The overdate is bold. NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

1942-S Mercury Dime, MS67+ Full Bands

3335 1942-S MS67+ Full Bands PCGS Gold Shield. An amazing example, this Superb Gem has a bold strike with fully split bands on the reverse. Vivid rose and blue toning is evident on both sides, with splashes of gold on the reverse. PCGS has only graded 17 examples as MS67+ Full Bands, and just five numerically finer pieces (12/18). NGC ID# 23K7, PCGS# 5043

1945-S Dime, MS67 Full Bands FS-512, Micro S Mintmark

3336 1945-S Micro S, FS-512, MS67 Full Bands PCGS Gold Shield. This scarce variety represents the only use of the Micro S mintmark punch during the 1940s, according to the *Cherrypickers' Guide*. Dappled multicolor toning lightly paints otherwise frosty surfaces that retain bright underlying mint brilliance. Strongly struck without any obvious abrasions. Population: 38 in 67 (3 in 67+) Full Bands, 3 finer (12/18). NGC ID# 37PD, PCGS# 145415 Base PCGS# 5063

PROOF MERCURY DIMES

- 3337 1936 PR67 PCGS Gold Shield.** This lovely Superb Gem proof survives from a proof mintage of 4,130 coins following a 20-year intermission with limited proof production. This piece is brilliant and untuned with fully mirrored fields and reflective devices, creating excellent eye appeal. Population: 93 in 67 (7 in 67+), 3 finer (12/18). NGC ID# 27DG, PCGS# 5071
- 3338 1936 PR67 NGC.** The NGC label is hand signed by *Guide Book* editor Ken Bressett. 1936 marks the first year of the modern-era of proof coins after a two decade intermission. This Superb Gem proof is brilliant and untuned with satin devices over fully mirrored fields. Census: 88 in 67 (2 in 67+, 4 in 67 ★), 3 finer (12/18). NGC ID# 27DG, PCGS# 5071
- 3339 1937 PR68 NGC.** Delicate shades of lime-green toning visit the impeccably preserved surfaces of this magnificent PR68 Mercury dime, with sharply detailed design elements and deeply reflective fields on both sides. Census: 37 in 68 (2 in 68+, 2 in 68 ★), 0 finer (12/18). NGC ID# 27DH, PCGS# 5072
- 3340 1937 PR68 PCGS.** Conditionally scarce and among the finest pieces known, this high-end proof 1937 dime displays sharp design elements and deeply reflective fields. A faint blush of champagne color warms each side. Population: 34 in 68 (1 in 68+), 0 finer (12/18).
From The Five Generations of Eby Collection, Part II. NGC ID# 27DH, PCGS# 5072

ROOSEVELT DIME

- 3341 1949-D MS68 Full Bands PCGS Gold Shield.** Tied for the finest certified, this Superb Gem exhibits an unusually bold strike and blazing silver luster with frosty surfaces and full brilliance inside a frame of lovely gold and rose toning. Population: 10 in 68 Full Bands, 0 finer (12/18). NGC ID# 23KV, PCGS# 85092

TWENTY CENT PIECES

- 3342 1875 MS64 NGC. BF-1, R.1.** A splendid Choice Mint State 1875 twenty cent piece, this piece survives from a modest mintage of 38,500 coins. Both sides are brilliant white with reflective fields, lustrous devices, and light cameo contrast. Census: 47 in 64, 33 finer (12/18). NGC ID# 23R5, PCGS# 5296
- 3343 1875-S MS64 PCGS. BF-7, R.2.** Delicate die cracks are seen in the peripheral areas of the reverse of this Choice Mint State 1875-S twenty cent piece. Both sides are fully lustrous with brilliant, untuned silver surfaces. NGC ID# 23R7, PCGS# 5298
- 3344 1875-S MS65 NGC. BF-5, R.2.** A thoroughly lustrous Gem Seated type coin. Pastel powder-blue and butter-gold toning competes for territory across the clashed but unabraded surfaces. Myriad cracks throughout the reverse margin confirm the Brunner-Frost variety. NGC ID# 23R7, PCGS# 5298
- 3345 1875-S Misplaced Date, FS-301, BF-12, R.2, MS64 NGC.** The upper obverse and lower reverse show characteristic weakness on this Choice Mint State example, an ideal type coin as the most plentiful issue of the denomination. Faint reddish gold toning appears on the frosty and lustrous silver surfaces of this piece. PCGS# 395943 Base PCGS# 5298
- 3346 1875-S Misplaced Date, FS-301, BF-12, R.2, MS65 PCGS.** The top of an apparent date digit is lodged within the dentils below the 8. A lustrous and magnificently preserved Seated type coin. Delicate tan-gold toning denies full brilliance. A good strike despite some softness on the upper stars and the crest of the left (facing) wing.
From The Speechless Collection. PCGS# 395943 Base PCGS# 5298
- 3347 1876 MS63 PCGS. BF-2, R.2.** The Centennial-year Philadelphia mintage of 14,750 pieces is a tiny fraction of the 1875-S production, and indeed the 1876 is scarcer, yet remains collectible. This lustrous and minimally marked Select example is well struck except for the crest of the left (facing) wing. The borders display light russet and olive-gray toning. NGC ID# 23R8, PCGS# 5299

PROOF TWENTY CENT PIECE

1878 Twenty Cent Piece, Unc Details Lowest Proof Mintage

- 3348 1878 — Questionable Color — PCGS Genuine Gold Shield. Unc Details. BF-1, R.3.** The 1878 is the rarest proof twenty cent piece with a mintage of only 600 pieces, and even fewer actually distributed. The fields display confirmed, deep reflectivity; however, the margins are deep blue with an almost opaque density that gives the coin its Questionable Color disclaimer. Full, pinpoint strike definition is seen on the devices.

EARLY QUARTERS

1804 Draped Bust Quarter, B-1, Good 4 Elusive Date, Important Type Issue

- 3349 1804 B-1, R.3, Good 4 PCGS. CAC.** The 1804 is the first quarter to feature the Heraldic Eagle reverse, making the issue an important one for type collectors. The 1804 is also an elusive key that boasts a low mintage of only 6,738 pieces, with two die varieties known for the date. This well-worn specimen represents the more available B-1 variety, with a die flaw between stars 8 and 9. The rim is worn smooth in places on the reverse, and some of the legend is gone, but the obverse retains all major design detail, at least in outline. Housed in a green label holder. NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

1804 B-1 Quarter, Good 4 Key Heraldic Eagle Issue

- 3350 1804 B-1, R.3, Good 4 NGC. CAC.** Cream and gunmetal toning encompasses this key date Heraldic Eagle quarter. No marks are noticeable, though portions of the right sides show subtle granularity. LIBERTY, the date, and STATES OF are sharp while the lower letters in AMERICA and UNITED are well worn. The shield lines are mostly separated. NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

- 3351 1807 B-1, R.2, VF35 PCGS.** Tompkins Die State 5/2. This Choice VF Draped Bust type coin is predominantly stone-gray, though splashes of light sea-green, wheat-gold, and lilac-red toning visit portions of the peripheries. Marks are relatively few and minor, and the eagle's plumage is well defined. NGC ID# 23RF, PCGS# 38939 Base PCGS# 5316

BUST QUARTERS

- 3352 1834 O Over F in OF, B-1, FS-901, R.1, AU58 NGC.** Tompkins Die State 1/4. A charming pearl-white Borderline Uncirculated Capped Bust type coin. Luster traverses the borders and motifs, and the surfaces display only minimal signs of contact. OF was initially entered too close to STATES. The letters were partially lapped from the die, and OF was entered again, this time correctly. NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353
- 3353 1834 B-4, R.1, AU58 NGC.** Tompkins Die State "5"/4. An unlisted late die state with prominent die polish lines on Liberty's neck, after the obverse die was lapped to remove the "bar" clash marks below the ear. A pleasing example with golden-brown toning across portions of the obverse periphery. We note a tick by star 4 and an impression on star 10 and the nearby rim. NGC ID# 23RZ, PCGS# 38995 Base PCGS# 5353

SEATED QUARTERS

- 3354 1840-O No Drapery MS62 PCGS.** Pale gold and steel toning reside on the lustrous surfaces of this attractive Mint State 1840-O No Drapery Seated Liberty quarter. The final date digit is shows recutting below. An important opportunity for the advanced collector as this date is elusive in Mint State grades with none graded finer than MS64. Population: 9 in 62, 8 finer (12/18). NGC ID# 23SG, PCGS# 5393

1841 Quarter, MS64 Lightly Toned, Bold Strike

- 3355 1841 MS64 PCGS. Briggs 1-A.** The date slopes slightly upward, and STATES OF AM is doubled north. With a mintage of 120,000 coins, the 1841 is a popular early Seated quarter that can still be found through MS64 with patience. Boldly struck, except the last two stars, and lightly toned with frosty underlying mint luster. Population: 8 in 64, 3 finer (12/18). NGC ID# 23SK, PCGS# 5399
- 3356 1851-O — Cleaned — NGC Details. AU. Briggs 1-A.** A difficult New Orleans issue with a scant mintage of 88,000 pieces. Presumably, silver deposits at the facility dropped once melt value exceeded face. Our auction archives confirm that Briggs 1-A, with the mintmark placed close to the branch, are rare relative to Briggs 1-B, with the mintmark further from the branch. This lightly hairlined pearl-gray example shows peripheral orange and aqua toning and microgranular, abraded areas near star 2. NGC ID# 23T7, PCGS# 5418
- 3357 1853/53 No Arrows, Briggs 1-A, FS-301 — Cleaned — NGC Details. XF.** The 1853 Arrows and Rays quarter was struck in great quantity, but the No Arrows variety has a tiny mintage of 44,200 pieces. Many were undoubtedly melted shortly after production, since the bullion value exceeded face. This slightly glossy example has a bold LIBERTY, and displays iridescent peripheral aquamarine, lavender, and cherry-red patina. NGC ID# 23TA, PCGS# 395930 Base PCGS# 5421

- 3358 1853 Arrows and Rays MS64 PCGS.** Medium wheat-brown and apple-green toning enriches this lustrous single-year Seated type coin. The fields are clashed, but unabraded save for a roundish mark near the lower wrist. A narrow horizontal streak of struck-in grease crosses the pole above the arm. PCGS has certified only 37 examples finer (12/18). PCGS# 5426

1856-S Quarter, AU53 Rare So Fine

- 3359 1856-S AU53 PCGS Gold Shield. Briggs-Unlisted.** The 1 is aligned with the fifth shield stripe, matching Obverse 2, while the S mintmark is embedded in the fletching, matching Reverse D. Larry Briggs designated the 1856-S as R.5 in AU condition, and indeed, the issue is a significant rarity this fine. Both sides are fully struck and untuned with flashes of luster around the motifs. Friction and marks are minimal. NGC ID# 23TD, PCGS# 5440
- 3360 1857 MS65 NGC.** This attractive Gem offers sharply detailed design elements and well-preserved surfaces, with vibrant mint luster throughout. Parallel die striations are visible in the fields on both sides. Census: 57 in 65, 64 finer (12/18). NGC ID# 23TE, PCGS# 5442

1857 Quarter, MS66 Mostly Brilliant and Semiprooflike

- 3361 1857 MS66 NGC.** Pale silver luster overall with occasional green-gold whispers at the lower reverse. Both sides of this Premium Gem have generally strong detail, though minor softness is noted on the right-side obverse stars and in the fletchings area on the reverse. Strong die polish appears in the fields behind the eagle. Census: 45 in 66 (1 in 66+, 3 in 66 ★, 4 in 66+★), 19 finer (12/18). *From The Speechless Collection.* NGC ID# 23TE, PCGS# 5442
- 3362 1859-S — Cleaned — NGC Details. XF.** This is an important issue from a mintage of 80,000 coins, nearly all that entered circulation in California, with the region in dire need of small change throughout the 1850s. As a result, few have survived in higher grades. The surface roughness and cleaning suggest that this piece was probably lost shortly after it was minted, and located more recently, likely with a metal detector. NGC ID# 23TN, PCGS# 5450
- 3363 1860 MS64 PCGS.** An important opportunity for the specialist as this date is rarely found so fine. Both sides have sharp design motifs, save for a few stars at the upper left obverse. The surfaces are frosty and fully brilliant with no evidence of toning on either side. Population: 21 in 64, 13 finer (12/18). NGC ID# 23TP, PCGS# 5451

- 3364 1861 MS65 PCGS. CAC.** A bold strike brings up the clash marks between the eagle's neck and left facing wing on this splendid Gem that features pristine surfaces and delicate gold toning over its frosty silver surfaces. Population: 41 in 65, 20 finer. CAC: 12 in 65, 7 finer (12/18). NGC ID# 23TT, PCGS# 5454

1862 Quarter, Lustrous MS65

- 3365 1862 MS65 NGC.** Although 932,000 pieces were struck of the 1862 quarter, it is surprisingly scarce to locate in Uncirculated grades as much of the original mintage was either melted domestically or exported. This is one of the few Gems of this issue known. The surfaces are brilliant throughout with a sparkling, semiprooflike finish in the fields. Sharply struck, each side is virtually abrasion-free. Census: 13 in 65 (1 in 65+), 11 finer (12/18). *From The Speechless Collection.* NGC ID# 23TV, PCGS# 5456

- 3366 1862-S XF45 PCGS. Briggs 1-A.** From a mintage of 67,000 pieces, this lightly worn Seated Liberty quarter displays dusky gray patina, with silver highlights on the devices. Nicely detailed, and remarkably clean for a coin that circulated briefly in the West during the Civil War. Population: 11 in 45, 47 finer (12/18). *Ex: Central States Signature (Heritage, 4/2012), lot 3957, which realized \$1,265.* NGC ID# 23TW, PCGS# 5457

1864 Seated Liberty Quarter, MS64 Low-Mintage Civil War Issue

- 3367 1864 MS64 PCGS. CAC.** A modest mintage of 93,600 Seated Liberty quarters was accomplished in 1864, at the height of the Civil War. This attractive Choice specimen exhibits sharply detailed design elements with vibrant mint luster and traces of champagne-gold toning. Eye appeal is outstanding. Population: 18 in 64 (2 in 64+), 19 finer. CAC: 3 in 64, 4 finer (12/18). NGC ID# 23TY, PCGS# 5459
- 3368 1867-S — Cleaned — NGC Details. AU.** Noticeable cleaning lines are evident through the light gold toning of this elusive issue. Slight wear is evident on the boldly defined design motifs. NGC ID# 23UE, PCGS# 5471

1872-CC Quarter Dollar, VG10 Key Carson City Issue

- 3369 1872-CC VG10 PCGS. Briggs 1-A.** The 1872-CC is a key date in the Seated Liberty quarter series. Only 22,850 pieces were struck, and the vast majority are lost to attrition. This date is rare in any grade. Offered here is a collectible VG10 example, with smooth golden-gray surfaces and most of LIBERTY legible. Housed in a green label holder. Population: 7 in 10, 41 finer (12/18). NGC ID# 23US, PCGS# 5482
- 3370 1873 Arrows MS64 PCGS.** Attractive champagne toning graces the obverse and reverse surfaces, permitting the brilliant luster to shine unimpeded. A pleasing Choice Mint State example, this With Arrows quarter has an acceptable strike although a few stars are weak. Population: 42 in 64, 18 finer (12/18). NGC ID# BZMG, PCGS# 5491
- 3371 1874-S Arrows MS64 PCGS.** This Choice Mint State piece is fully brilliant and untoned, with sharp design elements on both sides. The obverse luster is satiny, with frosty reverse luster. An impressive example for a high-grade Seated quarter collection. NGC ID# 23VY, PCGS# 5495
- 3372 1875 MS66 NGC.** This delightful Premium Gem exhibits well-detailed design elements with just a touch of softness on Liberty's bodice. The well-preserved brilliant surfaces are lustrous and appealing. Census: 10 in 66 (2 in 66 ★), 9 finer (12/18). NGC ID# 23UX, PCGS# 5498
- 3373 1875-S MS64 PCGS. Briggs 3-C. Type Two Reverse.** Medium S. The '75-S is unexpectedly scarce in XF and better grades. This desirable near-Gem offers dynamic luster and lightly marked surfaces. The strike is sharp except on the upper stars. Population: 29 in 64 (1 in 64+), 14 finer (12/18). *From The Speechless Collection.* NGC ID# 23UZ, PCGS# 5500
- 3374 1876-S MS66 NGC. Type Two Reverse.** Narrow feet on the As. This Premium Gem 1876-S quarter is characteristically frosted and extraordinarily clean. A faint dusting of pale gold color complements mostly bright silver surfaces. A well-struck Seated quarter in unimprovable condition. Census: 7 in 66, 0 finer (12/18). *From The Speechless Collection.* NGC ID# 23V4, PCGS# 5503
- 3375 1877-CC Large CC MS63 PCGS Gold Shield. CAC.** A Select Mint State Carson City quarter, this piece has subdued luster beneath rich gold, ivory, and blue toning. A sharp impression. CAC: 14 in 63, 41 finer (12/18). NGC ID# 23V6, PCGS# 5505
- 3376 1877-CC MS65 PCGS. Large Wide CC.** A crisply impressed and lightly toned Gem that boasts dynamic luster and a nearly pristine reverse. Struck from boldly clashed dies. An ideal acquisition for the advanced Carson City type collector. Population: 43 in 65 (1 in 65+), 28 finer (12/18). NGC ID# 23V6, PCGS# 5505
- 3377 1881 MS66 NGC. Briggs 1-A.** This well-detailed Premium Gem shows a touch of the usual softness on the stars. Vertical lines 5 and 6 in the shield are cut by a die defect near the base. The well-preserved surfaces radiate vibrant mint luster throughout. From a small mintage of 12,000 pieces. Census: 10 in 66, 11 finer (12/18). NGC ID# 23VD, PCGS# 5513

3378 1885 MS64 ANACS. A lovely Choice Mint State example of a scarce issue from a mintage of only 13,600 coins. This piece is sharply defined with delightful lime-green and peach-gold patina. A sharp strike except on the right-side stars. In a small-sized holder. Ex: *Central States Signature (Heritage, 4/2012)*, lot 3969, which realized \$1,495. NGC ID# 23VH, PCGS# 5517

3379 1891 MS65 PCGS Gold Shield. Occasional wisps of cobalt-blue, orange, and lavender make appearances on the lustrous surfaces of this delightful Gem. Sharply struck and impeccably preserved. Population: 76 in 65, 37 finer (12/18). NGC ID# 23VR, PCGS# 5524

3380 1891 MS65 NGC. Briggs-Unlisted. This interesting coin was struck from a die pair that was not listed by Larry Briggs in his outstanding series reference. The design elements are sharply detailed, with strongly impressed stars that show complete radials. This eliminates most Briggs varieties, which exhibit diagnostic weakness on the stars. Both sides are heavily clashed, like Briggs 7-G, but there is no trace of the errant numerals in the denticles that characterize that variety. A well-preserved, lustrous example of this exciting new variety. *From The Speechless Collection.* NGC ID# 23VR, PCGS# 5524

3381 1891 MS66 NGC. This sharply detailed Premium Gem exhibits an extensive network of die cracks through the obverse stars and dramatic clash marks show on the reverse. The flawless brilliant surfaces radiate vibrant mint luster. Census: 46 in 66 (1 in 66 ★, 1 in 66+★), 14 finer (12/18). NGC ID# 23VR, PCGS# 5524

3382 1891 MS66 PCGS Gold Shield. CAC. This brilliant Premium Gem has original gray-gold toning with a horizontal line of brilliant silver on the obverse. The reverse is brilliant with delicate peripheral gold toning. Population: 33 in 66 (6 in 66+), 4 finer. CAC: 12 in 66, 4 finer (12/18). NGC ID# 23VR, PCGS# 5524

PROOF SEATED QUARTERS

3383 1859 PR64 PCGS. Briggs 2-B. Type One Obverse. Type Two Reverse. Dusky forest-green and golden-brown patina blankets undisturbed and sharply struck surfaces. 1859 was the earliest date with a published proof mintage: 800 pieces. Housed in a green label holder.

From The Speechless Collection. NGC ID# 23WL, PCGS# 5555

1860 Quarter, Gem Proof Diversely Patinated

3384 1860 PR65 PCGS Gold Shield. Briggs 9-H. Type Two Obverse. Type One Reverse. Fire-red toning adorns the obverse margin, though the obverse field displays sun-gold and lime-green shades. The reverse offers vivid aquamarine and lavender patina. A well-preserved Gem with imposing eye appeal. A crisp strike except on a few of the upper stars. Population: 19 in 65, 10 finer (12/18). NGC ID# 23WM, PCGS# 5556

3385 1863 PR64 PCGS. Briggs 4-D. Medium to deep sea-green, straw-gold, and russet-red toning embraces this razor-sharp Choice proof No Motto quarter. No detractors emerge beneath a loupe, and the grade appears conservatively assessed. A Civil War date with a proof mintage of only 460 pieces.

From The Speechless Collection. NGC ID# 23WR, PCGS# 5559

1864 Quarter, PR65 Only 470 Proofs Struck

3386 1864 PR65 NGC. Briggs 3-C. Icy motifs rise in full detail above glassy fields. This flashy Gem appears brilliant upon first glance, though both sides display faint golden toning. Thorough inspection is required to locate the few unimportant imperfections. A Civil War date with a low proof mintage of 470 pieces. Census: 13 in 65, 15 finer (12/18). NGC ID# 23WS, PCGS# 5560

1865 Quarter, PR64 Cameo Nearly Brilliant

3387 1865 PR64 Cameo NGC. This pleasingly contrasted near-Gem is faintly hairlined in the fields but brightly reflective around the frosted devices. The strike is full and the surfaces are bright silver, save for a few hints of gold at the rims. Great eye appeal for this low-mintage date with only 500 proofs produced. Census: 12 in 64 Cameo (2 in 64 ★), 16 finer (12/18).

From The Speechless Collection. NGC ID# 23WT, PCGS# 85561

3388 1867 PR64 Cameo NGC. An untuned Choice proof whose fully struck devices are icy and favorably contrast with the reflective fields. Neither side has any apparent detractors. Census: 15 in 64 Cameo (1 in 64 ★), 16 finer (12/18). NGC ID# 23WY, PCGS# 85566

**1869 Quarter, PR66 Cameo
All-Brilliant, Reflective Mirrors**

- 3389 1869 PR66 Cameo NGC. Briggs 2-B.** All 600 proofs from this year feature a die-doubled obverse. This Premium Gem proof quarter is brilliant throughout and strongly contrasted with the frosted devices and deeply mirrored fields. Fully struck. A few tiny disturbances in the fields have little impact on the eye appeal. Census: 4 in 66 Cameo, 3 finer (12/18). NGC ID# 23X2, PCGS# 85568

**1872 Quarter, PR66 Cameo
Rarely Seen Finer**

- 3390 1872 PR66 Cameo NGC.** This lovely Premium Gem Cameo proof survives from a mintage of 950 coins, and an era where about half of the proof production has survived to the present day. Delicate gold and blue toning appears on the mostly brilliant silver surfaces of this lovely Seated Liberty quarter. Census: 6 in 66 Cameo, 7 finer (12/18). NGC ID# 23X5, PCGS# 85571

- 3391 1876 PR64 Cameo PCGS.** A stunning Choice Cameo proof, this centennial year quarter dollar exhibits excellent field-to-device contrast with fully mirrored fields and lustrous devices. A brilliant and untuned example with precision design definition. Population: 14 in 64 Cameo, 19 finer (12/18). NGC ID# 23X8, PCGS# 85577

- 3392 1877 PR66 Cameo NGC.** The 77 in the date is lightly repunched at the peaks of the numbers, one of the characteristics of the obverse die used on all proof 1877 quarters. This brilliant Gem has frosty devices and deeply mirrored fields. The surfaces have been carefully preserved and show no noticeable contact marks. The 1877 quarter is an elusive date, as a mere 510 proofs were struck. Census: 6 in 66 Cameo, 4 finer (12/18). Ex: 2003 November Signature Auction (Heritage, 11/2003), lot 6203. NGC ID# 23X9, PCGS# 85578

- 3393 1878 PR66 NGC.** Type Two Reverse. Sea-green and lilac toning blankets this delightful Premium Gem. A bold strike and reflective fields further ensure the eye appeal. No detractions are apparent. Just 800 proofs were coined. Census: 9 in 66 (1 in 66+), 3 finer (12/18). NGC ID# 23XA, PCGS# 5579

- 3394 1880 PR65 PCGS Gold Shield. Briggs 2-B.** The circulation-strike-to-proof ratio reached 10:1 in 1880, when 1,355 proofs were struck. Contrast is minimal, but the fields remain flashy beneath a layer of original violet, blue, and sea-green patina. Lovely eye appeal. NGC ID# 23XC, PCGS# 5581

- 3395 1882 PR66 PCGS. Briggs 2-B.** The reverse is fully white, but the obverse displays light silver-gray toning on the right field. Cameo contrast is significant, but nonetheless undesignated by PCGS. The strike is intricate, and the eye appeal is considerable. *From The Speechless Collection.* NGC ID# 23XE, PCGS# 5583

- 3396 1883 PR65 NGC. Briggs 1-A.** An attractive Gem from a relatively generous proof mintage of 1,039 pieces, this coin exhibits sharply detailed design elements throughout. The well-preserved brilliant surfaces display deeply mirrored fields with outstanding eye appeal. Census: 50 in 65 (1 in 65 ★), 47 finer (12/18). *From The Speechless Collection.* NGC ID# 23XF, PCGS# 5584

- 3397 1884 PR64 Cameo NGC. CAC.** This marvelous Choice proof displays razor-sharp definition on all design elements and the rich mint frost provides bold contrast with the deeply mirrored brilliant fields. Census: 5 in 64 Cameo, 34 finer. CAC: 9 in 64, 16 finer (12/18). NGC ID# AEZK, PCGS# 85585

- 3398 1885 PR66 Cameo NGC.** A lovely Premium Gem Cameo proof, this 1885 Seated Liberty quarter has brilliant, untuned silver surfaces with excellent field-to-device contrast. Census: 13 in 66 Cameo (1 in 66 ★), 10 finer (12/18). *From The Speechless Collection.* NGC ID# 23XH, PCGS# 85586

- 3399 1885 PR66 Cameo PCGS. CAC. Briggs 3-B.** The proof dies, with thin date numerals and faint recutting on the reverse shield verticals. A mintage of 930 proofs supplemented the meager production of 13,600 business strikes in 1885. The rarity of the latter in upper Mint State grades puts pressure on high-end proofs like this Premium Gem Cameo. The interiors are mostly brilliant with lightly frosted motifs and deeply reflective fields. Faint reddish-gold patina colors the borders. *From The Speechless Collection.* NGC ID# 23XH, PCGS# 85586

- 3400 1889 PR66 PCGS. Briggs 2-B.** Frosty motifs contrast with glassy fields, though the holder lacks a Cameo designation. A boldly struck and practically brilliant specimen without any evident detractions. From a low proof mintage of only 711 pieces. *From The Speechless Collection.* NGC ID# 44CX, PCGS# 5590

- 3401 1889 PR64 Cameo NGC. CAC. Briggs 2-B.** This attractive Choice specimen exhibits well-detailed design elements, with a touch of the usual softness on the star centers. The well-preserved surfaces include deeply mirrored fields that contrast boldly with the frosty devices. Census: 12 in 64 Cameo (1 in 64+), 27 finer. CAC: 3 in 64, 10 finer (12/18). NGC ID# 23XM, PCGS# 85590

**1891 Quarter, PR66 Cameo
Pronounced Contrast, Final-Year Issue**

- 3402 1891 PR66 Cameo NGC. Briggs 1-A.** A thick layer of frost over the relief elements and pronounced mirroring in the fields deliver marvelous Cameo contrast to this all-brilliant Premium Gem. One minute contact mark appears on Liberty's forearm, but there are no other imperfections, and that tiny fleck poses no distraction. From the final year of Seated Liberty production and a mintage of 600 proofs. *From The Speechless Collection.* NGC ID# 597E, PCGS# 85592

BARBER QUARTERS

- 3403 1897-O MS65 NGC.** A spectacular Gem Barber quarter, with well-detailed design elements that show a touch of softness on the eagle's claw and some star centers. The well-preserved brilliant surfaces are lustrous and appealing. Census: 6 in 65, 8 finer (12/18). NGC ID# 23YB, PCGS# 5617

1900-O Barber Quarter, MS66 Rarely Seen This Fine

- 3404 1900-O MS66 PCGS Gold Shield.** This lightly toned, lustrous Premium Gem displays bold definition on most of the design features, including the hair over Liberty's ear, but a touch of the usual softness is evident on the eagle's claw and arrow fletchings. A couple of trivial marks on Liberty's cheek do not detract from the outstanding overall eye appeal. Population: 8 in 66 (1 in 66+), 5 finer (12/18).
Ex: Long Beach Signature (Heritage, 6/2006), lot 2267. NGC ID# 23YL, PCGS# 5626

1903-O Barber Quarter, MS65 Rare Issue in High Grade

- 3405 1903-O MS65 PCGS. CAC.** From a substantial mintage of 3.5 million pieces, the 1903-O Barber quarter is still a rare issue in high grade. This spectacular Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces, under attractive shades of light blue, magenta and sea-green toning. Population: 12 in 65, 9 finer. CAC: 6 in 65, 4 finer (12/18).
From The Speechless Collection. NGC ID# 23YW, PCGS# 5635
- 3406 1910 MS66 PCGS Gold Shield.** A trace of gold toning appears in the margins of this brilliant and highly lustrous Premium Gem that exhibits pristine surfaces and an exceptional strike. Few Barber quarters survive as fine as this piece. Population: 20 in 66, 3 finer (12/18). NGC ID# 23ZL, PCGS# 5657
- 3407 1913-S VG10 PCGS Gold Shield.** The 1913-S is a key issue from a low mintage of 40,000 pieces. This VG10 example exhibits evenly worn lavender-gray surfaces that retain all major design elements complete in outline. Some interior detail remains intact. NGC ID# 23ZW, PCGS# 5666

PROOF BARBER QUARTERS

- 3408 1893 PR66 Cameo PCGS. CAC.** From a reported mintage of 792 pieces, the proof 1893 Barber quarter is an available issue in lower grades, but examples in PR66 condition with the Cameo designation are quite rare. The present coin is a magnificent example, with reflective fields and frosty devices that establish a splendid cameo effect. Population: 17 in 66 (3 in 66+) Cameo, 22 finer. CAC: 13 in 66, 14 finer (12/18).
From The Speechless Collection. NGC ID# 2428, PCGS# 85679

- 3409 1894 PR66 NGC.** A spectacular Premium Gem proof, with sharply detailed design elements throughout and well-preserved surfaces that include deeply mirrored fields with a few hints of pale gold toning. Census: 41 in 66 (1 in 66 ★), 29 finer (12/18).
From The Speechless Collection. NGC ID# 2429, PCGS# 5680

- 3410 1894 PR66 NGC.** The design elements of this spectacular Premium Gem proof exhibit razor-sharp definition throughout and the flawless, brilliant surfaces include deeply reflective fields with outstanding eye appeal. Census: 41 in 66 (1 in 66 ★), 29 finer (12/18).
From The Speechless Collection. NGC ID# 2429, PCGS# 5680

- 3411 1895 PR66 Cameo NGC.** Essentially brilliant with the dusky remains of a partial print and lint marks in the frost on Liberty's cheek. The fields are profoundly mirrored, and the considerable contrast makes this Premium Gem all the more appealing. Census: 14 in 66 Cameo, 37 finer (12/18).
From The Speechless Collection. NGC ID# 242A, PCGS# 85681

- 3412 1896 PR66 PCGS Gold Shield. CAC.** Rarely found finer, this Premium Gem proof has noticeable field-to-device contrast beneath its gold and iridescent obverse, and cobalt-blue and iridescent reverse. Population: 29 in 66 (1 in 66+), 22 finer. CAC: 5 in 66, 6 finer (12/18). NGC ID# 23Y7, PCGS# 5682

1896 Quarter, PR65 Deep Cameo Outstanding Quality

- 3413 1896 PR65 Deep Cameo PCGS. CAC.** The obverse is entirely brilliant, while the reverse shows thin accents of dusky green-gold color without obscuring the dramatic Deep Cameo contrast that defines this Gem proof quarter. A few small contact marks appear on the obverse, but they are trivial. The overall quality is outstanding. From a mintage of 762 pieces. Population: 3 in 65 Deep Cameo, 21 finer. CAC: 2 in 65, 11 finer (12/18).
From The Speechless Collection. NGC ID# 242B, PCGS# 95682

- 3414 1897 PR66 Cameo NGC.** Pinpoint definition is evident on all design elements of this delightful Premium Gem proof, with deeply reflective fields that contrast boldly with the frosty devices. A few hints of pale gold toning enhance the flawless surfaces. Census: 17 in 66 Cameo (1 in 66+), 20 finer (12/18).
From The Speechless Collection. NGC ID# 242C, PCGS# 85683

- 3415 1899 PR64 Cameo NGC.** The completely brilliant surfaces of this attractive Choice proof show no mentionable distractions. The design elements are razor-sharp and the deeply mirrored fields contrast boldly with the frosty devices. Census: 10 in 64 Cameo, 28 finer (12/18). NGC ID# 242E, PCGS# 85685

- 3416 1900 PR66 NGC.** The obverse displays moderately reflective fields and hints of dusky gold and powder-blue patina, while the reverse is mostly silver-gray with pale tan accents. A couple of trivial marks occur on the neck. A pleasing turn-of-the-century proof quarter.
From The Speechless Collection. NGC ID# 43VN, PCGS# 5686
- 3417 1900 PR64 Cameo NGC.** This sharply detailed Choice proof exhibits bold cameo contrast between the deeply reflective fields and the frosty design elements. The completely brilliant surfaces are well-preserved and eye appeal is outstanding. Census: 8 in 64 Cameo, 37 finer (12/18). NGC ID# 242F, PCGS# 85686
- 3418 1900 PR64 Cameo PCGS. CAC.** One of the final issues at the second Philadelphia Mint building, this near-Gem Cameo proof has hints of gold toning on its brilliant silver surfaces with excellent field-to-device contrast. Population: 13 in 64 Cameo, 47 finer. CAC: 2 in 64, 28 finer (12/18). NGC ID# 242F, PCGS# 85686
- 3419 1901 PR65 Cameo NGC.** This delightful Gem proof exhibits sharply detailed, frosty design elements that contrast boldly with the deeply reflective fields. The brilliant surfaces are impeccably preserved. Census: 8 in 65 Cameo (1 in 65 ★), 31 finer (12/18). NGC ID# 242G, PCGS# 85687
- 3420 1903 PR65 NGC.** The design elements of this delightful proof Barber quarter are sharply detailed throughout, and the fields are deeply reflective, with a few hints of pale green toning. Census: 46 in 65, 84 finer (12/18). NGC ID# 242J, PCGS# 5689
- 3421 1903 PR66 Cameo NGC.** This delightful Premium Gem proof exhibits sharply detailed design elements and deeply mirrored fields that contrast boldly with the frosty devices to create an intense cameo effect. The mostly brilliant surfaces are virtually flawless. Census: 11 in 66 Cameo (1 in 66 ★), 20 finer (12/18).
From The Speechless Collection. NGC ID# 242J, PCGS# 85689
- 3422 1905 PR65 PCGS.** Wisps of gold toning appear on the fully mirrored fields of this lightly contrasted Gem proof. This piece is sharply defined with excellent eye appeal. Population: 55 in 65, 51 finer (12/18). NGC ID# 242L, PCGS# 5691
- 3423 1906 PR66 NGC.** Peripheral gold, orange, and blue-violet elements fade to champagne and pale silver toward the centers. A sharp Premium Gem proof with a suggestion of contrast on both obverse and reverse. Great eye appeal for this issue of just 675 specimens. Census: 49 in 66 (1 in 66+), 41 finer (12/18). NGC ID# 242M, PCGS# 5692
- 3424 1906 PR66 PCGS. CAC.** An original proof Barber quarter showcasing the post-1902, all-brilliant finish. Traces of color are seen on each side, but this Gem remains essentially untoned. The devices exhibit complete detail, as expected. One of 675 pieces minted.
From The Speechless Collection. NGC ID# 242M, PCGS# 5692
- 3425 1907 PR66 NGC.** A beautiful, near-brilliant coin whose only concession to color are a couple of spots by star 13. An interesting coin from the standpoint of numismatic study, there is an unfinished area of die polish in the lower right field by stars 11-13. Also, there are several circular unfrosted areas on the lower cheek of Liberty. Census: 57 in 66 (2 in 66+), 29 finer (12/18).
From The Speechless Collection. NGC ID# 242N, PCGS# 5693
- 3426 1909 PR66 PCGS.** The proof mintage of 1909 Barber quarters was a mere 650 pieces, the eighth lowest production total of the series. The present coin is a rare Premium Gem proof with delightful pale green and lavender toning. The design elements are sharply detailed and the fields are brightly reflective under the patina. Population: 34 in 66 (1 in 66+), 30 finer (12/18).
From The Speechless Collection. NGC ID# 242R, PCGS# 5695
- 3427 1910 PR64+ Cameo NGC.** This Plus-graded Choice proof exhibits dramatic cameo contrast, created by the sharply detailed frosty design elements and the deeply mirrored fields. Overall eye appeal is terrific. Census: 14 in 64 Cameo, 59 finer (12/18). NGC ID# 254Y, PCGS# 85696
- 3428 1911 PR65 Cameo PCGS.** Wisps of gold toning appear over the brilliant and contrasting silver surfaces of this Gem Cameo proof. A sharply defined example, this piece has deeply mirrored fields that contrast nicely with the lustrous devices. Population: 22 in 65 Cameo, 40 finer (12/18).
From The Speechless Collection. NGC ID# 242T, PCGS# 85697
- 3429 1911 PR65 Cameo NGC.** The sharply detailed design elements of this attractive Gem proof display a thick coat of mint frost, creating intense cameo contrast with the deeply mirrored fields. The brilliant surfaces are impeccably preserved. Census: 13 in 65 Cameo, 42 finer (12/18). NGC ID# 242T, PCGS# 85697

**1911 Barber Quarter, PR66 Cameo
Only 543 Pieces Struck**

- 3430 1911 PR66 Cameo PCGS. CAC.** From a meager mintage of 543 pieces, this delightful Premium Gem proof offers sharply detailed design elements and deeply mirrored fields that contrast boldly with the frosty devices. The virtually flawless surfaces are brilliant and appealing. Population: 25 in 66 (4 in 66+) Cameo, 15 finer. CAC: 14 in 66, 26 finer (12/18). NGC ID# 242T, PCGS# 85697

- 3431 1912 PR65+ Cameo NGC.** This Plus-graded Gem proof displays sharply detailed, frosty design elements against starkly contrasted, deeply reflective fields. The well-preserved surfaces are completely brilliant. Census: 13 in 65 Cameo (1 in 65+), 19 finer (12/18). NGC ID# 242U, PCGS# 85698

1913 Quarter Dollar, PR67

- 3432 1913 PR67 NGC.** This beautiful Superb Gem proof is likely a candidate for a Cameo designation, although the mint-green, amber, pale blue, and lavender toning has prevented that designation. Only eight finer Cameo proofs have been examined by NGC and PCGS. Census: 18 in 67 (1 in 67+), 5 finer (12/18). NGC ID# 242V, PCGS# 5699
-

**1914 Quarter, PR66 Cameo
Low Mintage of 380 Proofs**

- 3433** 1914 PR66 Cameo NGC. CAC. The 1914 has the distinct honor of claiming the lowest proof mintage in the Barber quarter series with just 380 pieces. This example is virtually brilliant with a faint original "skin" of dusky golden patina around the obverse border. Watery fields surround fully struck and frosted motifs. Eye appeal and quality for the grade are terrific. Census: 11 in 66 Cameo, 6 finer in this category. CAC: 13 in 66, 6 finer (12/18). *From The Speechless Collection.* NGC ID# 242W, PCGS# 85700

STANDING LIBERTY QUARTERS

- 3434** 1917 Type One MS66+ Full Head PCGS Gold Shield. The 1917 Type One quarters is perhaps the best produced issue of the series. This frosty Premium Gem has brilliant silver luster and exceptional aesthetic appeal. PCGS has assigned the Plus designation to this splendid piece, and they have only certified 93 finer examples (12/18). NGC ID# 242Z, PCGS# 5707
- 3435** 1917 Type One MS66 Full Head NGC. CAC. A stunning Premium Gem from the last year of the short-lived Type One design, this coin exhibits sharply detailed design elements and impeccably preserved brilliant surfaces throughout. Vibrant mint luster adds to the terrific eye appeal. NGC ID# 242Z, PCGS# 5707
- 3436** 1917 Type One MS66 Full Head PCGS Gold Shield. CAC. Satiny mint luster glistens on each side of this CAC-approved type coin almost without abrasion, bowing to the lofty MS66 Full Head grade that earns this piece tremendous collector appeal. A hint of pastel gold graces each side, complementing razor-sharp definition on the devices. NGC ID# 242Z, PCGS# 5707
- 3437** 1917 Type One MS66 Full Head PCGS. CAC. Light powder-blue toning accompanies this highly lustrous and crisply struck Premium Gem. The obverse is exceptionally free from contact, and the reverse displays only unimportant marks. Effectively a single-year type coin, since the 1916 is a rarity. Housed in an old green label holder. *From The Speechless Collection.* NGC ID# 242Z, PCGS# 5707
- 3438** 1917 Type One MS66+ Full Head PCGS Gold Shield. CAC. Razor-sharp definition is evident on all design elements of this Plus-graded Premium Gem. The impeccably preserved surfaces radiate vibrant mint luster with intense eye appeal. A few delicate hints of pale gold toning add to the exceptional presentation. NGC ID# 242Z, PCGS# 5707
- 3439** 1917-D Type One MS65 Full Head PCGS Gold Shield. Hints of gold visit the lustrous ivory surfaces of this lovely Gem Type One quarter. Both sides have frosty silver luster and excellent design definition. NGC ID# 2432, PCGS# 5709
- 3440** 1917-S Type One MS65 PCGS. CAC. This impressive Gem exhibits sharply detailed design elements in most areas, but the definition on Liberty's head is just short of full. Dusky shades of lavender-gray toning blanket the well-preserved surfaces. Population: 45 in 65 (2 in 65+), 19 finer. CAC: 7 in 65, 4 finer (12/18). NGC ID# 2433, PCGS# 5710

- 3441** 1917-S Type One MS66 PCGS Gold Shield. This delightful Premium Gem is sharply detailed and impeccably preserved, with vibrant mint luster and delicate highlights of lavender and pale gold toning. Population: 17 in 66, 2 finer (12/18). NGC ID# 2433, PCGS# 5710

- 3442** 1917-S Type One MS65 Full Head PCGS Gold Shield. This Gem Full Head 1917-S Type One quarter displays delicate champagne toning over finely textured, mattelike mint luster. The design elements are impressively sharp, save for the tops of the date numerals, which are slightly weak. Eye appeal is outstanding. NGC ID# 2433, PCGS# 5711

**1917 Type One Quarter, MS66 Full Head
Luminous, Pristine Surfaces**

- 3443** 1917-S Type One MS66 Full Head NGC. Spectacular luster is the hallmark of this Premium Gem, illuminating exceptionally well-preserved surfaces that have a delicate champagne hue. Trivial strike weakness is apparent on the outermost edge of the shield, but the head detail is sharp. A mint-made, linear grease streak below the Y in LIBERTY is a reliable pedigree marker on this original and attractive Type Two San Francisco quarter. Census: 62 in 66 (1 in 66+) Full Head, 19 finer (12/18). NGC ID# 2433, PCGS# 5711

**1917-S Quarter, MS66 Full Head
Type One**

- 3444** 1917-S Type One MS66 Full Head PCGS Gold Shield. All of the design details, including the head and shield, are fully defined on this lovely Premium Gem Type One quarter. Amazing frosty mint luster is evident on the brilliant silver surfaces of this delightful example. PCGS has certified only 20 numerically finer Full Head examples of this issue (12/18). NGC ID# 2433, PCGS# 5711
- 3445** 1917-S Type Two MS65 Full Head PCGS Gold Shield. The full head details and nearly full shield details characterize this splendid Gem that displays brilliant ivory luster and splashes of deep gold at the lower obverse. Population: 63 in 65 (3 in 65+) Full Head, 39 finer (12/18). NGC ID# 2436, PCGS# 5719
- 3446** 1918-D MS65 PCGS. Liberty's head, rivets 2 and 3, and the date digits are incomplete, but preservation is outstanding without any abrasions to report. This Gem displays radiant mint brilliance and satiny luster, with a blush of reddish-gold color on the lower part of Liberty's leg. *From The Speechless Collection.* NGC ID# 2438, PCGS# 5722
- 3447** 1918-D MS65+ PCGS. CAC. A Plus-graded Gem, with well-detailed design elements that show a touch of the typical softness on Liberty's head and the shield rivets. The well-preserved, lustrous surfaces show highlights of golden-tan toning. Population: 70 in 65 (3 in 65+), 28 finer. CAC: 8 in 65, 7 finer (12/18). NGC ID# 2438, PCGS# 5722

1918-D Quarter, MS65 Full Head
Impressively Sharp Throughout

3448 1918-D MS65 Full Head NGC. A scarce Gem Full Head example of this better Denver issue, showing not only needle-sharp head detail but also a bold date, sharp toes, and well-defined shield details. On the reverse, the leading edge of the eagle's right (facing) wing is sharp, which is seldom found on the 1918-D. Satiny luster illuminates a blush of warm golden toning, and neither side has bothersome abrasions. Census: 38 in 65 (2 in 65+) Full Head, 9 finer (12/18). NGC ID# 3TWU, PCGS# 5723

3449 1918-S MS65 PCGS Gold Shield. The 1918-S Standing Liberty quarter becomes elusive at the MS65 grade level. This well-detailed Gem displays a touch of the usual softness on the head and shield rivets. The well-preserved, lustrous surfaces exhibit highlights of russet and amber toning at the peripheries. Population: 80 in 65, 28 finer (12/18). NGC ID# 2439, PCGS# 5724

3450 1919 MS66+ PCGS Gold Shield. CAC. This delightful Plus-graded Premium Gem exhibits sharp details in most areas, with bold definition on the shield rivets, but the head details fall just short of full. The brilliant surfaces are lustrous and impeccably preserved. PCGS has graded 39 finer examples (12/18). NGC ID# 243B, PCGS# 5728

3451 1919 MS66 Full Head NGC. Full Head details are evident on this sharply detailed Premium Gem, with fine definition on other usual trouble spots, like the shield rivets. The virtually pristine brilliant surfaces radiate vibrant mint luster, with terrific eye appeal. Census: 50 in 66 (1 in 66+) Full Head, 16 finer (12/18). NGC ID# 243B, PCGS# 5729

3452 1919 MS66 Full Head NGC. A spectacular Premium Gem, with sharply detailed design elements that show Full Head definition. The impeccably preserved surfaces are completely brilliant, with vibrant mint luster on both sides. Census: 50 in 66 (1 in 66+) Full Head, 16 finer (12/18). NGC ID# 243B, PCGS# 5729

3453 1919 MS66 Full Head NGC. Delicate gold toning visits the obverse and reverse surfaces of this lovely Premium Gem quarter that exhibits a bold strike including full head details and a sharp shield. Both sides are frosty and highly lustrous. Census: 50 in 66 (1 in 66+) Full Head, 16 finer (12/18). NGC ID# 243B, PCGS# 5729

3454 1920 MS66 Full Head PCGS. The 1920 Standing Liberty quarter is among the more plentiful pre-1925 Type Two issues in Gem and finer Full Head. Such coins are nonetheless highly sought-after as the 1920 in Full Head typically shows bold definition throughout Liberty's figure and the eagle, as well. This is an outstanding example with sharp central detail and smooth satin luster. Tinges of amber, teal, and violet surround the peripheries, while the central regions show soft champagne color. Population: 45 in 66 (6 in 66+) Full Head, 8 finer (12/18). NGC ID# 243E, PCGS# 5735

3455 1920-D MS64 PCGS Gold Shield. An attractive Choice representative of this popular issue, which is a better date in high grade. The design elements are well-detailed, with a touch of the usual softness on the head. The well-preserved surfaces are lightly toned and lustrous. Population: 95 in 64, 85 finer (12/18). NGC ID# 243F, PCGS# 5736

3456 1920-S MS64 PCGS Gold Shield. An attractive Choice specimen of this popular issue, with well-detailed design elements that show a touch of softness on the head and shield rivets. The lightly marked surfaces are lustrous and appealing. NGC ID# 243G, PCGS# 5738

1920-S Quarter, MS62 Full Head
Seldom Seen This Strong

3457 1920-S MS62 Full Head NGC. Full Head examples of the 1920-S quarter are hard to come by in any grade. This strongly defined representative shows remarkable detail on Liberty's head, and on the shield and breast feathers. Delicately toned in golden-russet and powder-blue hues, although each side remains largely frosty and bright. Minimally marked. NGC ID# 243G, PCGS# 5739

3458 1921 MS65 NGC. The 1921 is scarce in all grades, since Mint presses were consumed by silver dollar production for most of that year. This is a stone-white Gem with vibrant luster and exceptionally clean surfaces. Well struck on the waist and shield rivets, though the center of the head lacks full details. NGC ID# 243H, PCGS# 5740

1924-D Standing Liberty Quarter, MS65
Impressive Full Head Example

3459 1924-D MS65 Full Head NGC. The 1924-D Standing Liberty quarter is an elusive issue in MS65 condition, with Full Head definition, and finer coins are rare. This impressive Gem is sharply detailed in most areas, with a touch of the typical softness on the shield rivets. The well-preserved, brilliant surfaces are lustrous and appealing. Census: 29 in 65 Full Head, 12 finer (12/18). NGC ID# 243M, PCGS# 5749

3460 1924-S MS64 PCGS Gold Shield. Dappled lilac and gold toning appears on both sides of this important Standing Liberty quarter that exhibits better than usual head and shield details on satiny surfaces. NGC ID# 243N, PCGS# 5750

**1924-S Quarter, MS66
Considerable Head Details**

- 3461 1924-S MS66 PCGS.** This lovely 1924-S quarter is much finer than usually encountered. A highly lustrous Premium Gem, this piece has brilliant and untuned silver surfaces and an excellent strike that shows considerable head detail and typical shield details. Population: 39 in 66 (3 in 66+), 13 in 66 Full Head, 10 finer (12/18).

From The Speechless Collection. NGC ID# 243N, PCGS# 5750

- 3462 1925 MS66 Full Head PCGS Gold Shield.** Delicate ice-blue toning graces this Premium Gem Full Head 1925 quarter, with tinges of russet at the borders. The strike is sharp, and Liberty's hairline is complete. All shield rivets are at least partially visible, although not fully struck. The 1925 is scarce this fine with a Full Head. Population: 91 in 66 (4 in 66+) Full Head, 14 finer (12/18). NGC ID# 243P, PCGS# 5753

- 3463 1925 MS66 Full Head NGC.** A solidly struck Premium Gem, highly lustrous with smooth surfaces. Delicate blue and gold tints give this coin a pastel cast. Census: 40 in 66 (3 in 66+) Full Head, 13 finer (12/18). NGC ID# 243P, PCGS# 5753

- 3464 1926-S MS65 PCGS.** Full Head examples of the 1926-S are scarce in all grades and prohibitive for most collectors. This Gem is a pleasing alternative with strong detail on the date and chainmail, though Liberty's head is incomplete. The obverse is frosty and brilliant, while the reverse exhibits dusky lavender-gray and gold patina. *From The Speechless Collection.* NGC ID# 4462, PCGS# 5758

- 3465 1927 MS66 Full Head PCGS Gold Shield. CAC.** Vivid shades of sea-green, burnt-orange, and lavender toning blanket the well-preserved surfaces of this delightful Premium Gem, with vibrant mint luster shining through the patina. Full details are evident on Liberty's head. Population: 73 in 66 (8 in 66+) Full Head, 7 finer. CAC: 16 in 66, 1 finer (12/18). NGC ID# 243U, PCGS# 5761

**1928-D Quarter, Full Head Gem
Scarcer, Late-Date Issue**

- 3466 1928-D MS65 Full Head PCGS Gold Shield.** The 1928-D is a challenging coin to locate with Full Head details, even more than its already low mintage of 1.6 million pieces would indicate. Pinpoint strike details are seen over each side, and the highly lustrous surfaces display even golden toning. Population: 36 in 65 (1 in 65+) Full Head, 23 finer (12/18). NGC ID# 243Y, PCGS# 5769

- 3467 1929-D MS64 Full Head PCGS Gold Shield.** This sharply detailed Choice example shows just the slightest softness on some shield rivets, but full definition is evident on Liberty's head. The lightly toned, lustrous surfaces are impeccably preserved. Population: 80 in 64 (1 in 64+) Full Head, 69 finer (12/18). NGC ID# 2443, PCGS# 5775

**1929-D Quarter, MS65 Full Head
Golden-Toned and Lustrous**

- 3468 1929-D MS65 Full Head PCGS.** In recent years, the 1929-D Standing Liberty quarter has been gaining popularity as a scarce issue in high-grade Full Head. This Gem example is well-struck with good head detail and above-average definition on the shield rivets. Frosty surfaces display light golden toning, and a few minor ticks are not out of line for the grade. Population: 51 in 65 Full Head, 18 finer (12/18). NGC ID# 2443, PCGS# 5775

- 3469 1929-S MS67 NGC. CAC.** The 1929-S is inherently elusive in Superb Gem condition, with or without a Full Head. This piece is beautifully preserved and vibrantly lustrous with mottled sun-gold, olive, and blue-gray toning. Liberty's head and the central portion of the figure are not fully detailed, although the design is hardly impeded. Census: 24 in 67 (2 in 67+), 1 finer. CAC: 17 in 67, 0 finer (12/18). NGC ID# 2444, PCGS# 5776

- 3470 1930-S MS66 Full Head NGC.** Although this well-detailed Premium Gem shows Full Head definition, some softness is noted on the central devices. Full satiny mint luster shines under a patina of gold and ice-blue. Census: 77 in 66 (2 in 66+ Full Head, 2 in 66 ★), 35 finer (12/18). NGC ID# 2446, PCGS# 5781

WASHINGTON QUARTERS

- 3471 1932-D MS63 PCGS.** A Select Mint State representative of the key Denver issue from the first year of the design. This piece has frosty luster and brilliant silver surfaces with no toning on either side. NGC ID# 2448, PCGS# 5791

- 3472 1932-D MS64+ PCGS Gold Shield.** Close examination of this Plus-graded near-Gem fails to reveal any noticeable distractions, and the overall eye appeal easily rivals that of many MS65 coins on the market. This piece displays sharp detail and satiny luster with bits of olive and russet toning on each side near the borders. Washington's cheek is clean. Finer examples of this key issue are seldom offered. NGC ID# 2448, PCGS# 5791

- 3473 1932-S MS65 NGC.** A spectacular Gem representative of this first-year key, with well-detailed design elements and well-preserved, lustrous surfaces on both sides. Highlights of beige and lavender-gray toning are evident on the obverse. Census: 75 in 65 (1 in 65+, 1 in 65 ★), 7 finer (12/18). NGC ID# 2449, PCGS# 5792

- 3474 1932-S MS65 PCGS Gold Shield.** Both sides of this Gem key-date Washington quarter are fully and highly lustrous with mottled gold and steel patina on ivory surfaces with brilliant silver in the central reverse region. PCGS has only certified four numerically finer examples (12/18). NGC ID# 2449, PCGS# 5792

- 3475 1932-S MS65 PCGS Gold Shield.** This is a lovely Gem with delicate lavender-gold and silvery toning over frosted mint luster. The strike is sharp and no abrasions are bothersome. The 1932-S is available in this grade but rare finer, with only four coins so graded at PCGS (12/18). NGC ID# 2449, PCGS# 5792

3476 1934 Medium Motto, FS-402, MS67 PCGS. CAC. Heavy, medium, and light motto variants are known for the Washington quarters of 1934. All three elements of the W are the same height on the Heavy Motto variety, and the center of the W is lower than the outside diagonals on the Light Motto and Medium Motto varieties. Only two numerically finer examples have left the PCGS grading room (12/18). This Superb Gem has fully lustrous ivory surfaces with peripheral gold toning on the obverse. PCGS# 146002 Base PCGS# 5793

3477 1935 MS67+ PCGS. CAC. This amazing MS67+ quarter with CAC approval is easily among the finest survivors from a mintage in excess of 32 million coins. Intermingled shades of orange, magenta, and ice-blue swathe the obverse, leaving the other side mostly brilliant with daubs of color around the border. Well-rendered without any blatant imperfections. PCGS reports a single coin finer (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# 244D, PCGS# 5797

3478 1938 MS67+ PCGS. CAC. A few highlights of russet and amber toning visit the virtually pristine surfaces of this Plus-graded Superb Gem, with vibrant mint luster and well-detailed design elements underneath. Population: 98 in 67 (12 in 67+), 0 finer. CAC: 36 in 67, 0 finer (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# 244N, PCGS# 5806

3479 1943 MS67+ PCGS. CAC. A snow-white Superb Gem that exhibits a bold strike and exceptionally unabraded surfaces. This World War II quarter is a desirable addition to the competitive Registry entry. PCGS has graded four numerically finer examples (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# 2455, PCGS# 5820

3480 1948-S MS67+ PCGS. CAC. A Plus-graded Superb Gem representative of this popular issue, with sharply detailed design elements and impeccably preserved, lustrous surfaces on both sides. Highlights of champagne toning enhance the outstanding eye appeal. PCGS has graded two numerically finer examples (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# 245N, PCGS# 5838

3481 1950-D MS67+ NGC. CAC. Easily among the finest-known 1950-D quarters, this frosty and pinpoint-sharp Registry Set contender displays a faint speckling of slate-gray toning that does not diminish the silver luster one whit. CAC endorsed, NGC reports just one numerically finer piece, with none finer at PCGS (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# 245T, PCGS# 5842

PROOF WASHINGTON QUARTERS

1936 Quarter, PR67

Attractively Toned

3482 1936 PR67 NGC. The first proof issue in the Washington quarter series claims a mintage of 3,837 coins. This Superb Gem features a blend of dusky cream-gray toning that melds with vibrant multicolor iridescence around the obverse border and throughout the reverse. The NGC insert is hand-signed by Kenneth Bressett. Census: 24 in 67 (1 in 67 ★), 1 finer (12/18). NGC ID# 27HN, PCGS# 5975

3483 1942 PR68 NGC. Colorful highlights of sea-green and magenta toning enhance the impeccably preserved surfaces of this magnificent PR68 example, with sharply detailed design elements and deeply mirrored fields on both sides. Census: 23 in 68 (3 in 68 ★), 1 finer (12/18). NGC ID# 27HV, PCGS# 5981

End of Session One

SESSION TWO

COLONIALS

1652 Pine Tree Shilling, MS65
Large Planchet, Noe-1

- 3485** 1652 Pine Tree Shilling, Large Planchet, Pellets at Trunk, MS65 NGC. Noe-1, W-690, Salmon 1-A, R.2. 73.8 grains. Ex: Hanson, Donald G. Partrick Collection. The Pine Tree shilling captures the imagination of the American collecting and non-collecting public unlike any other colonial issue. Nathaniel Hawthorne wrote a story, "Grandfather's Chair," about a mint master whose daughter, Betsey, was said to have a dowry equal to her weight in silver shillings:

" 'And now,' said honest John Hull to the servants, 'bring that box hither.' The box to which the mint-master pointed was a huge, square, iron-bound, oaken chest; it was big enough, my children, for all four of you to play at hide-and-seek in. The servants tugged with might and main, but could not lift this enormous receptacle, and were finally obliged to drag it across the floor. Captain Hull then took a key from his girdle, unlocked the chest, and lifted its ponderous lid. Behold! It was full to the brim of bright pine-tree shillings, fresh from the mint; and Samuel Sewell began to think that his father-in-law had got possession of all the money in the Massachusetts treasury."

Noe-1 is a plentiful variety with several exceptional examples known. Although toned over the centuries, the present Gem might be one of those bright pine-tree shillings that Hawthorne mentioned in that passage. This highly lustrous example has gray coin-silver surfaces with delicate gold and blue overtones. Both sides are flawless. The sharp strike of this excess-weight example has above-average centering with the tops of only a few letters off the flan. Listed on page 51 of the 2019 *Guide Book*.

Ex: Jon Hanson (4/1/2000); Donald Groves Partrick / FUN Signature (Heritage, 1/2015), lot 5567, which realized \$49,350.

From *The Speechless Collection*. NGC ID# 2ARU, PCGS# 45369 Base PCGS# 23

1787 Massachusetts Cent, MS65 Brown
Ryder 3-G, Arrows in Left Talon

- 3486** 1787 Massachusetts Cent, Arrows in Left Talon, MS65 Brown PCGS. CAC. Ryder 3-G, W-6090, R.3. A splendid Gem of the popular statehood type. Both sides exhibit plentiful glimpses of brick-red in design recesses, but this predominantly chocolate-brown coin is certified as Brown by PCGS. No marks or spots are apparent. Nicely struck, though the centers retain hints of the granular planchet surface, as always for the issue. Connecticut and Vermont began coining coppers in 1785, and New Jersey commenced coinage in 1786, but Massachusetts did not strike cents and half cents until 1787. The U.S. Constitution, ratified in June 1788, prohibited state coinage. Population: 3 in 65 Brown, 0 finer (12/18). Listed on page 71 of the 2019 *Guide Book*. NGC ID# 2B25, PCGS# 302

1787 Fugio Cent, Pointed Rays, MS65 Brown
STATES UNITED, 4 Cinquefoils, N. 13-X

- 3487 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS65 Brown NGC. N. 13-X, W-6855, R.2. A probable Bank of New York hoard representative, with the vertical die crack at 6 o'clock on the reverse. More than 700 Fugio cents were included in that cache, many of them in high Mint State grades. Medium brown surfaces display flashes of original red color and light clashing. Slightly unevenly struck but remarkably smooth and well-preserved. Listed on page 99 of the 2019 *Guide Book*. NGC ID# AX5E, PCGS# 883

1787 Fugio Cent, N. 104-FF, MS66
New Haven Brass Restrike

- 3488 1787 Fugio Cent, New Haven Restrike, Brass, MS66 PCGS Gold Shield. N. 104-FF, W-17560, R.3. Considerable orange mint color accompanies the olive-brown surfaces of this New Haven Restrike that PCGS describes as brass. This Premium Gem exhibits pale blue overtones on both sides. It is the single finest example of a brass strike as reported in the PCGS population data (12/18). Listed on page 100 of the 2019 *Guide Book*. NGC ID# 2B8T, PCGS# 919

Washington Funeral Urn Medal in Silver, VG10
Baker-166A, Musante GW-70, GW on Urn

- 3489 (1800) Washington Funeral Urn, Silver VG10 PCGS. Baker-166A, Fuld 1-B, Musante GW-70. 29mm. Plain edge. According to Neil Musante, "Perkins advertised these medals widely, with one ad stating that he could strike between three and five thousand per day! ... the medals were obviously very popular and saw a wide distribution." The hole at the upper obverse (as made) is plugged. Although well-worn, this historically important medal maintains strong outlines and clear legends. Olive and lavender-gold patina adorns each side. NGC ID# D4P6, PCGS# 928

1792 Getz Small Eagle Cent, MS61 Brown
Washington Copper Pattern, Plain Edge
The Bushnell Specimen

3490 1792 Washington Getz Pattern Cent, Small Eagle, Copper MS61 Brown PCGS Gold Shield. Baker-25, W-10775, Musante GW-22, High R.5. The 1792 Washington I copper and silver coins are attributed to the hand of Lancaster, Pennsylvania engraver Peter Getz. Working with a large number of contributors, the late George Fuld published *The Washington Pattern Coinage of Peter Getz*, a history and census of this issue in 2009.

Pennsylvanian Robert Morris, who was born in Liverpool, England in 1734, served as the United States Superintendent of Finance from 1781 to 1784, and later as a U.S. Senator from Pennsylvania from 1789 to 1795. Fuld relates that it was in that capacity that Morris served on a committee to consider establishment of a Mint. He introduced a bill on December 21, 1791 that provided:

“That, upon said coins, respectfully, there shall be the following devices and legends, namely: Upon one side of each of the said coins there shall be an impression or representation of the head of the President of the United States for the time being, with an inscription of which shall express the initial or first letter of his Christian or first name, and his surname at length, the succession of the Presidency numerically, and the year of the coinage, and upon the reverse of each of the gold and silver coins there shall be the figure or representation of an eagle, with the inscription, ‘United States of America’ and upon the reverse of each of the copper coins, there shall be an inscription which shall express the denomination of the piece, namely cent, or half cent, as the case may require.”

The Getz pieces were produced in silver and copper, the latter offered here, and both compositions follow the Morris recommendation for gold and silver coins. The obverse features President Washington in profile facing left, with the inscription G. WASHINGTON. PRESIDENT. I., and the date, 1792, below. The reverse has an eagle with a shield covering its breast, its wings raised with 15 stars between the wings. The eagle clutches an olive branch and six arrows. Around, the legend UNITED STATES OF AMERICA.

The Getz patterns exist in silver with a plain edge, circles and squares edge, or twinned olive leaves edge. The majority of silver pieces show undertype from various other coins. Copper examples are known with a plain edge or circle and squares edge. The plain edge pieces, such as this one, are the most frequently encountered, although only about 35 pieces are known. This Mint State example has pleasing tan and chocolate-brown surfaces with minor rim bruises that confirm a storied provenance. Listed on page 94 of the 2019 *Guide Book*.

Ex: Charles Ira Bushnell (Chapman Brothers, 6/1882), lot 1252; Lorin G. Parmelee (New York Coin & Stamp Co., 6/1890), lot 617; William S. Baker; Historical Society of Pennsylvania; stolen; unknown intermediaries; later, Dorothy Gershenson; Steve Ivy (at the June 1975 Long Beach Expo); Fairfield Collection; Herdman Sale (Bowers and Ruddy, 12/1977), lot 5097 at \$4,500 [funds donated to the Historical Society of Pennsylvania]. NGC ID# 2B7B, PCGS# 921 1157 FP

HALF CENT

1796 C-2, B-2 Half Cent, Good Details
With Pole, Key Date in the Series

3491 1796 With Pole, C-2, B-2, High R.4 — Environmental Damage — NGC Details. Good. Two varieties are known for the 1796 half cents. They are easily distinguished by the presence (as here) or absence of a pole from the pileus that extends behind and below the portrait. The With Pole variant is the more collectible. As a date, the 1796 is a key to the series with a total mintage estimated to be 1,390 coins. The legends are mostly readable, except for HALF CENT, and Liberty and the wreath show clear outlines. Deep brown surfaces show extensive granularity. Our EAC grade Good 4. NGC ID# 2227, PCGS# 35098 Base PCGS# 1027

LARGE CENTS

1793 Chain Cent, VG Details
S-2, B-2, AMERICA

3492 1793 Chain, AMERICA, S-2, B-2, High R.4 — Corrosion — NGC Details. VG. Breen Die State II, with a bulge at the base of 793. LIBERTY and the date are widely spaced, and the E in ONE is close to the chain link. This well-worn Chain cent, one of the most famous types in American coinage, has better detail on the reverse than the obverse. The date is mostly clear, but BE in LIBERTY is incomplete. Deep brown surfaces are rough from corrosion. Our EAC grade Good 4.

1793 S-3, B-4 Chain Cent, XF40
AMERICA Reverse

3493 1793 Chain, AMERICA, S-3, B-4, Low R.3, XF40 PCGS Gold Shield. Before the establishment of the U.S. Mint, the coins that circulated in the United States were a mind-boggling array of metals, designs, denominations, and currencies of various states and nations. The circulating coinage was definitely E PLURIBUS rather than UNUM. That would come later.

Among the more frequently seen copper coins were the various pieces from the Colonies—New Hampshire, Massachusetts, New York, Connecticut, and Virginia chief among them. Those pieces circulated along with the Fugio or Franklin cents, the first U.S. federal coinage, although made on a contract basis. Alongside the U.S.-based coins were the Spanish colonial coinages, the silver pillar dollar and its fractional equivalents most prominent. Other national coinages included real and counterfeit British copper coinage, French silver, the North American tokens and Bar coppers, Kentucky tokens (Conder tokens made in England), and the Washington pieces.

Seen less often but still regularly were Dutch coins, Irish and Portuguese currency. Will Nipper writes about the coinage circulating in the United States in the 1780s in *In Yankee Doodle's Pocket*:

“With English, Irish, Spanish, French, Dutch, Portuguese, American and other coins all in circulation, the ability to convert readily from one system to another was an absolute necessity. To ease conversions, colonial governments, almanac publishers and others frequently printed equivalence tables. These sheets were indispensable to merchants because they listed commonly encountered denominations with their respective values in pounds, shillings and pence. In addition to sterling money conversions, the tables usually listed local money equivalents. Early tables even listed various commodities and trade goods against more proper currencies.”

The establishment of the U.S. Mint, of course, was only a beginning toward solving the problem. The Mint was burdened initially by the requirement for excessive surety bonds for the chief coiner and assayer. It was further hampered by the law specifying that the Mint would bear the expense of converting raw metal into coins (seigniorage), and by the lack of a bullion fund to enable gold and silver coinage in the absence of deposits from private citizens.

The Sheldon-3 is by far the most available of the Chain cents, the first coin type struck within the Philadelphia Mint walls in 1793. This XF example is nicely brought up, with better-than-average definition on the hair detail. The Chain is strong, of course, as always on this type. The surfaces are clean overall, with even, subdued reddish-brown color and little red. The only mentionable surface defects are planchet crumbling between the 1 and 7 of the date and a thin diagonal mark to the right of the last A in AMERICA. Our EAC grade VF30. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

1793 S-9, B-12 Wreath Cent, XF40
Vine and Bars Edge

- 3494** 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, XF40 PCGS. The S-9 or B-12 variety has an obverse with the stem on the plant pointing directly to the right and a reverse with a spray of berries that runs diagonally under the S in STATES almost up to the nearby T. While the S-9 is the single most accessible Wreath cent die pair (or any 1793 cent die pair, for that matter), insatiable type demand means that the collector dedicated to quality will pay a price for it. This XF example has rich teak-brown color and few significant abrasions, though a few long planchet voids appear at the right side of the obverse, one of them overlapping Liberty's cheek. Worn to a golden-brown sheen on the high points but generally attractive. Our EAC grade VF25. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

1794 S-24, B-8 Cent, XF40
The 'Apple Cheek' Variety

- 3495** 1794 Head of 1794, S-24, B-8, R.1, XF40 PCGS. Sheldon wrote of this variety: "The face has exceptionally rounded, full cheeks – a characteristic by which collectors recognize it immediately. My father used to call it the Apple Cheek variety." The name is popular today. This splendid piece has pleasing olive-brown surfaces with minor handling marks on each side. A trivial edge dent leaves a small raised area over LI of LIBERTY that looks almost identical to the rim break of S-32. Our EAC grade VF25. NGC ID# 223P, PCGS# 35537 Base PCGS# 901374

1795 Lettered Edge Cent, AU55
S-74, B-2

- 3496** 1795 Lettered Edge, S-74, B-2, Low R.4, AU55 PCGS. The fields are generally golden-brown, while the portrait and central reverse are steel-blue. Evenly struck and free from remotely consequential marks. Light wear on the leaves and other high points corresponds to the grade. A pleasing Choice AU example of this popular early cent type. Our EAC grade XF40. NGC ID# 223S, PCGS# 35714 Base PCGS# 1377

1808 S-279 Cent, MS64 Brown
Condition Census

- 3497** 1808 S-279, B-3, R.1, MS64 Brown PCGS. This Choice Mint State 1808 S-279 cent does not appear in the Condition Census of the variety, although it certainly qualifies as one of the six finest examples known. Bill Noyes records four Mint State pieces in his Census (63-63-60-60), and Del Bland listed five Mint State pieces (63-61-61-61-60). One of those listed in both rosters was reported as stolen in the middle 20th century, and this piece does not match the plate of the stolen example. This impressive piece is imperfectly centered, with the right-side obverse stars tight against the border. Both sides have full cartwheel luster with splendid steel-brown surfaces showing faint traces of faded mint red on the obverse, and attractive emerald overtones on the reverse. Our EAC grade MS60. Population for all three 1808 varieties: 10 in 64 Brown, 3 in 64 Red and Brown, 6 finer (12/18). NGC ID# 224P, PCGS# 36463 Base PCGS# 1543

1811 Cent, AU55
S-287, B-1

- 3498** 1811 S-287, B-1, R.2, AU55 PCGS Gold Shield. The obverse features a heavy die scratch that slants downward from star 5. Both varieties of the 1811 Classic Head cent are elusive in high grades, including Choice About Uncirculated. Glossy chocolate-brown surfaces show flashes of glowing coppery color within the recesses on each side. Detail is slightly uneven, and only partial dentil definition is seen. There are several large carbon spots, including one below the 8 in the date. Our EAC grade XF45. NGC ID# 224U, PCGS# 36496 Base PCGS# 1555

1811 S-287 Cent, MS61 Brown
Elusive Mint State Survivor

- 3499** 1811 S-287, B-1, R.2, MS61 Brown NGC. A type that is quite challenging to locate in the finer circulated and Mint State grades, since most examples were struck on inferior quality planchets. But the present coin has pleasing deep mahogany-brown surfaces. Satiny and well struck with a small spot at 6:30 and a few minor marks above the N in ONE and beneath the E in CENT. Struck slightly off center toward 2 o'clock, but only dentil width is affected. Our EAC grade AU55. Ex: *Denver Signature (Heritage, 8/2006)*, lot 168. NGC ID# 224U, PCGS# 36496 Base PCGS# 1555

1823/2 N-1 Cent, AU55
Famous *Guide Book* Variety

- 3500** 1823/2 N-1, R.2, AU55 NGC. The 3 is punched over a strong underlying 2 on this famous Matron Head cent variety. High-grade examples like this Choice AU representative are seldom offered. In fact, this is the finest 1823/2 we have seen since 2015. Liberty's portrait, the denomination, and wreath all show strong detail. The stars are a touch soft, as always. Smooth olive-brown and steel-blue surfaces exhibit little evidence of circulation. Our EAC grade XF40. NGC ID# 225B, PCGS# 36760 Base PCGS# 1630

1823 N-2 Large Cent, AU58
From the Rasmussen Collection

3501 1823 N-2, R.2, AU58 NGC. Ex: Rasmussen Collection. Late Die State. Although the N-2 Normal Date is slightly scarcer than its overdate counterpart, there are actually a larger number of high-grade survivors. In addition to a single proof example, there are eight Mint State coins including two Gems, followed by about 10 examples in the various AU grades. This late die state has a wedge-shaped rim break extending from the fused dentils over stars 5 and 6. Later, this same obverse die was used to produce the 1823 Restrike large cents. A number of the Restrikes had the obverse rim break carefully filed down with dentils reengraved, probably at the time they were made. This coin has far above-average surfaces with desirable steel and olive-brown coloration. Just a few scattered handling marks are seen on each side. The 1823 Normal Date cents are in demand from variety collectors as well as date collectors, and the supply seldom meets the existing demand. Our EAC grade VF35.

Ex: Floyd Starr (*Stack's*, 12/1984), lot 1627; Anthony Terranova; R.E. Naftzger, Jr.; *Early American Coppers sale* (4/1989), lot 263; Dennis Mendelson (*Superior*, 2/1991), lot 314; Robinson S. Brown, Jr. (*Superior*, 1/1996), lot 489; Rasmussen Collection (*Heritage*, 1/2005), lot 3480. NGC ID# 225A, PCGS# 36757 Base PCGS# 1627

1840 N-8 Cent, MS65 Red
Late Die State

3502 1840 Large Date, N-8, R.1, MS65 Red NGC. Grellman Die State d. A series of rim breaks extends clockwise from star 10 to below the date on this late die state N-8 cent. Centering does not permit viewing of other rim breaks that may or may not extend up to star 8. Both sides have brilliant orange mint luster with hints of bluish-brown, but not enough to prevent a full Red designation for this lovely cent. A trivial dark toning spot appears in the field adjacent to Liberty's forehead. NGC and PCGS have certified ten 1840 large cents with a Red designation, for all varieties combined. Our EAC grade MS65. Census: 4 in 65 Red, none finer (12/18). PCGS# 395842 Base PCGS# 1822

1840 Cent, MS66 Red and Brown
Large Date, N-10, None Finer at PCGS

- 3503** 1840 Large Date, N-10, R.2, MS66 Red and Brown PCGS Gold Shield. Large Date without hole in ear, and the curl over the 4 is blunt. The 1840 Large Date cent is marginally more available than its Small Date counterpart. Still, most coins are seen in the Brown color category. About 10% of survivors feature enough copper-orange color to qualify as Red and Brown. Of those, most are in MS64 and MS65 condition. Premium Gems are significant rarities, with only three so-graded at PCGS in this category and none finer for all Large Date varieties (12/18). This coin may be the sole finest among N-10 representatives. Copper-orange dominates both sides, with amber-gold, violet, and steel-blue serving as accents. The surfaces are exceptionally lustrous and unabraded, and strike detail is strong. A few unimportant carbon spots occur on the reverse. Our EAC grade MS63. PCGS# 395847 Base PCGS# 1821

1850 N-7 Cent, MS65+ Red
Late Die State

- 3504** 1850 N-7, R.2, MS65+ Red PCGS Gold Shield. CAC. Grellman Die State b, the late die state for N-7 with flowlined fields evident on both sides, obscuring most of the identifying characteristics of this die. Grellman reports that a hoard of late die state examples was well-dispersed in the marketplace, many with faded original mint color, an apt description for this piece that is likely one from that group. Both sides have mellow orange luster with frosty mint surfaces. Our EAC grade MS65. Population for all 1850 varieties: 25 in 65 Red (2 in 65+ Red), 1 finer (12/18). PCGS# 405882 Base PCGS# 1891

PROOF FLYING EAGLE CENT

1856 Flying Eagle Cent, PR63
Snow-9 Variant

- 3505** 1856 Snow-9 PR63 PCGS. CAC. The usual proof-only variety. This gorgeous, deeply toned proof has fully mirrored fields and it is clearly a proof, unlike some others that are proofs but more closely resemble business strikes. Both sides exhibit intermingled brown, tan, pale blue, light green, and lilac toning, with sharp devices that stand boldly against the background. A few tiny surface marks are evident on each side, with a planchet defect in the center of the reverse, present before the coin was struck. Such imperfections have little or no effect on the grade. An exceptional example of the popular 1856 Flying Eagle cent. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

CONFEDERATE STATES OF AMERICA

1874 Haseltine Restrike in Copper of the 1861 Confederate Cent Proof Details

- 3506** 1861 Confederate States of America Cent, Copper Restrike — Cleaned — NGC Details. Proof. Breen-8008, Bertram-B861-202. Captain John W. Haseltine is associated with the March 1874 restrike of the Robert Lovett, Jr. 1861 Confederate cent. An often-told tale has it that Lovett accidentally paid a bartender with an original copper-nickel Confederate cent. Word reached Haseltine, who contacted Lovett and purchased the original dies. Haseltine issued restrikes in gold, silver, and copper, with respective reputed mintages of 7, 12, and 55 pieces. The 1874 restrikes should not be confused with the common 1961 Bashlow “restrikes” made from transfer dies of the cancelled original dies. Significantly, the original dies were cancelled after production of the Haseltine restrikes. The present specimen is well struck and unmarked. The surfaces are somewhat glossy and display rich powder-blue, orange-red, and lilac patina.

INDIAN CENTS

1877 Indian Cent, MS64 Red and Brown High Demand Key Date Issue

- 3507** 1877 MS64 Red and Brown NGC. Shallow N. Die Pair 1, per Snow. The 18 in the date nearly touch, and the reverse shows the usual die clashing from the jaw-neck juncture above the O in ONE. Light tan patina is more extensive and deeper on the reverse of this near-Gem. The top diamond is sharp, and parts of the middle diamonds show. Light obverse marks limit the grade, but this is nevertheless a nice example of this key date. NGC ID# 2284, PCGS# 2128

1908-S Indian Cent, MS66 Red Registry Set Candidate

- 3508** 1908-S MS66 Red PCGS Gold Shield. A spectacular Premium Gem Indian cent from the penultimate year of the series, this coin exhibits sharp definition on all design elements and the original red surfaces are impeccably preserved. Vibrant mint luster radiates from both sides, enhancing the terrific eye appeal. Population: 70 in 66 (8 in 66+) Red, 1 finer (12/18). NGC ID# 2296, PCGS# 2234

1909-S Indian Cent, MS65 Red Rare This Fine With CAC Endorsement

- 3509** 1909-S MS65 Red PCGS. CAC. The 1909-S Indian Head cent boasts the lowest mintage of the series at 309,000 pieces. The issue is always in demand as the last date of the series, as well. The present coin features blazing golden surfaces and outstanding eye appeal. The feather tips are always weakly struck on the 1909-S, and this specimen shows the usual softness in this area, but the remaining details are sharp. PCGS has seen 33 finer submissions. CAC: 27 in 65, 10 finer (12/18).
From The Speechless Collection. NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

1868 Indian Cent, PR65 Red Cameo
Rarely Seen This Fine

- 3510** 1868 PR65 Red Cameo PCGS Gold Shield. From a proof mintage of 3,790 pieces, this delightful Gem Indian cent exhibits razor-sharp definition on all the design elements and the deeply reflective fields contrast boldly with the frosty devices to create a dramatic cameo effect. The original red surfaces are free of mentionable distractions. Population: 8 in 65 (1 in 65+) Cameo, 3 finer (12/18). NGC ID# 229L, PCGS# 82293

1875 Cent, PR65 Red
Seldom Seen in Gem or Finer Grades

- 3511** 1875 PR65 Red PCGS. CAC. The 1875 is equivalent in rarity to the issues from the 1860s, and it is especially challenging with full Red surfaces. Gems in this color category are rarely seen. As expected, the surfaces on this piece are undiminished gold and orange in color, and they are evenly balanced over each side. The fields are moderately mirrored and there are no noticeable contact marks. Population: 16 in 65 Red, 2 finer; 4 in 65 Red Cameo, 1 finer. CAC: 3 in 65, 0 finer (12/18).
From The Speechless Collection. NGC ID# 229U, PCGS# 2314

LINCOLN CENTS

1909-S VDB Cent, MS66 Red and Brown
Appealing Woodgrain Pattern

- 3512** 1909-S VDB MS66 Red and Brown NGC. A woodgrain pattern of violet, copper-orange, and golden-brown toning provides excellent eye appeal without diminishing the soft mint luster that radiates from each carefully preserved side. Most devices exhibit good detail, with softness limited to LI and the upper-left part of the O in ONE. Few issues are as famous and desirable as the 1909-S VDB Lincoln cent. Census: 47 in 66 (4 in 66 ★) Red and Brown, 0 finer in this category (12/18). NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red
Highly Popular Series Rarity

- 3513** 1909-S VDB MS65 Red PCGS. CAC. The 1909-S VDB cent needs no introduction to collectors or non-collectors alike, as one of the most popular varieties in American numismatics. This lovely Gem has fiery orange mint luster with minimal microscopic spots that limit the numeric grade. A sharply struck and highly attractive example for the connoisseur. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS66 Red
Eye-Catching Color, Strong Strike

- 3514** 1909-S VDB MS66 Red PCGS Gold Shield. Victor David Brenner's initials are strongly impressed at the lower reverse border, and the other design elements are similarly sharp on this glowing Red Premium Gem. Each side features eye-catching fire-orange color and vibrant mint frost. The famous 1909-S VDB cent (484,000 coins struck) becomes prohibitively rare in better condition, with just 15 submissions reported at PCGS (12/18). NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS66 Red
Boldly Impressed Series Key

- 3515 1909-S VDB MS66 Red PCGS Gold Shield.** The 1909-S VDB is sought-after in all grades, but high-end examples are particularly desirable. With only 15 coins finer at PCGS, this piece would be extremely difficult to upgrade (12/18). Victor David Brenner's initials often come weakly impressed on this famous single-year type, but they are razor-sharp on this impeccable Premium Gem with full Red surfaces. In fact, the entire impression is bold. Minor carbon spotting occurs primarily on the reverse, while the obverse exhibits a slight woodgrain pattern from the portrait toward the date. NGC ID# 22B2, PCGS# 2428

1912 Lincoln Cent, MS67 Red
Tied for the Finest Certified

- 3516 1912 MS67 Red PCGS Gold Shield.** This Superb Gem 1912 Lincoln cent features a full strike, pristine surfaces, fiery orange mint luster, and an absence of spots or other marks. It is an exceptional example that is destined for a top quality Registry set of the series. Population: 15 in 67 Red, 0 finer (12/18). NGC ID# 22BA, PCGS# 2452

1914-D Lincoln Cent, MS65 Red and Brown
Conditionally Rare in Finer Grades

- 3517 1914-D MS65 Red and Brown PCGS.** This key-date Lincoln cent showcases luminous satin surfaces with a faint mattelike texture. Original copper-red luster remains on each side, although burgundy and chestnut toning affects about 50% of the coin's surfaces. A few scattered flecks do not detract. Higher-graded Red and Brown coins are decidedly rare. Population: 72 in 65 (2 in 65+) Red and Brown, 4 finer (12/18). NGC ID# 22BH, PCGS# 2472

1915 Lincoln Cent, MS67 Red
Lovely Example With Just One Coin Finer

- 3518 1915 MS67 Red PCGS Gold Shield. CAC.** Mint-green accents blend with the luminous gold and copper-orange hues that dominate each side. Frosty luster glistens across the virtually unabraded surfaces. A single carbon spot occurs at the lower reverse. Razor-sharp strike, especially on the portrait. Population: 14 in 67 (1 in 67+) Red, 1 finer. CAC: 4 in 67, 1 finer (12/18). NGC ID# 22BK, PCGS# 2479

1915-S Cent, MS66 Red
Among the Top Examples Certified

- 3519 1915-S MS66 Red PCGS.** Because of the generally poor quality of the bronze used for the planchets, the 1915-S is seldom found with original mint Red color. This extraordinary offering is an exception. The issue is known for being relatively well-struck, with fully defined examples available from time to time. Both sides are completely struck, with softly frosted luster over luminous copper-orange surfaces. There are a few carbon spots mostly on the obverse, including one just right of the D in GOD. Registry collectors will appreciate the importance of this coin, which ranks among the finest examples at PCGS and NGC combined. Population: 9 in 66 Red, 0 finer (12/18). NGC ID# 22BM, PCGS# 2485

1922 No D Cent, MS63 Brown
Strong Reverse, FS-401

- 3520** 1922 No D, Strong Reverse, FS-401, MS63 Brown NGC. Die Pair 2. Although 1922 No D cents are known with Weak and Strong Reverses, it is the latter coins that command significant interest from collectors. These are designated as Die Pair 2 (FS-401 in the *Cherrypicker's Guide*). Although the Denver Mint was accustomed to using badly worn dies as a cost-saving measure, it appears that officials replaced the worn-out reverse with a new die en route to creating this popular variety, with obverse clashing and the mintmark lapped away. The reverse is razor-sharp on this MS63 example with even chocolate-brown color. Obverse detail is typically mushy. No trace of the D is seen. A couple of ticks appear on the portrait. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

1926-S Cent, MS65 Red and Brown
Eye-Appealing Color and Luster

- 3521** 1926-S MS65 Red and Brown PCGS. CAC. Satiny mint luster on this Gem 1926-S cent leans heavily toward the Red end of the color spectrum, showing rich olive-gold, copper-orange, and fire-red hues. No abrasions or carbon spots are seen. The strike is weak as usual for the issue, especially on the high points of the obverse portrait, the O in ONE, and the AME in AMERICA. The 1926-S is a better date in all grades and is rare in Gem condition. Population: 17 in 65 Red and Brown, 0 finer. CAC: 7 in 65, 0 finer (12/18). NGC ID# 22CL, PCGS# 2574

1955 FS-101 Cent, MS64 Red and Brown
Doubled Die Obverse, CAC Approval

- 3522** 1955 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. CAC. There is a strong argument to be made that the 1955 Doubled Die Obverse cent is the most famous 20th century issue in U.S. coinage and a holy grail of sorts in the Lincoln cent series. This richly toned, copper-brown and fire-orange example is typically soft on the obverse high points, but doubling is dramatic and the fields are smooth. Fantastic eye appeal. PCGS has graded only 10 Red and Brown submissions finer (12/18). NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

1955 Lincoln Cent, MS65 Red and Brown
Doubled Die Obverse, FS-101

- 3523** 1955 Doubled Die Obverse, FS-101, MS65 Red and Brown NGC. A magnificent Gem example of this sought-after error coin, with well-detailed design elements that clearly show the doubling on all obverse lettering and the date. The well-preserved and lustrous red surfaces have mellowed to light brown in many areas. The holder commemorates the *Guide Book* and is signed by Ken Bressett. Census: 15 in 65 Red and Brown, 1 finer (12/18). NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

1955 Doubled Die Cent, MS63 Red
Rarely Encountered With Full Mint Luster

- 3524 1955 Doubled Die Obverse, FS-101, MS63 Red PCGS.** Orange-gold and rose-red endow this lustrous and virtually mark-free key date cent. The coin is sharply struck and the obverse legends, of course, demonstrate remarkable die doubling. One spot on the cheekbone and a second at 7:30 are all that limit the grade. Most Uncirculated examples of this important variety are toned, and many certified as full Red lack the unmellowed vibrant color of the present piece.

Ex: *Houston Signature* (Heritage, 11/2012), lot 3259, which realized \$4,406.25. NGC ID# 8H87, PCGS# 37912 Base PCGS# 2827

1969-S Doubled Die Obverse Cent
FS-101, MS63 Brown
Incredible Mint State Example

- 3525 1969-S Doubled Die Obverse, FS-101, MS63 Brown PCGS Gold Shield. CAC.** In *100 Greatest U.S. Modern Coins*, third edition, the 1969-S Double Die Obverse cent is ranked in the #2 placement. Schechter and Garrett write: "The overall rarity and mystique of this coin give the king of the Lincoln cent varieties a comfortable seat among the greatest modern U.S. coins." The king of Lincoln cent varieties indeed — the 1969-S doubled die is nearly as strongly doubled as the 1955 doubled die, but it is more than 100 times rarer.

Discovered in mid-1970, the 1969-S doubled die was initially declared counterfeit by the U.S. Secret Service, but after investigation the Service reversed its position and accepted the reality that the mint error was genuine. At the time of discovery and in the decades since, finds of the variety have been almost exclusively in circulation or bank rolls. PCGS estimates that about 30 pieces are known today overall. The certified population exceeds that estimate by a large margin — PCGS and NGC combined report 66 grading events. It is reasonable to estimate that between 30 and 50 pieces are known, and most are in circulated condition.

The pick-up point for this variety is, of course, the strong obverse die doubling. LIBERTY, IN GOD WE TRUST, the date, and Lincoln's jacket exhibit pronounced doubling. On this piece, some light machine doubling (a different phenomenon caused during coinage) is evident on the mintmark. Satiny luster glimmers when tilted beneath a light, and there are surprisingly few distractions. Outstanding eye appeal is generated by vivid copper-orange luster in the protected areas with burgundy and olive toning elsewhere. This is one of just three Brown coins for the grade at PCGS, with only a handful of Red and Brown and Red pieces listed finer. The CAC endorsement will only heighten collector interest, as it is one of only two endorsements awarded to a Brown coin in this grade (12/18). PCGS# 37994 Base PCGS# 2921

PROOF LINCOLN CENTS

1916 Lincoln Cent
PR66 Red and Brown

- 3526** 1916 PR66 Red and Brown PCGS. CAC. This sharply detailed Premium Gem matte proof has considerable orange mint color on the obverse with light green toning, and is mostly toned in the same light green on the reverse, with splashes of orange color. This is a lovely example and rarely found in finer grades. Population: 28 in 66 (2 in 66+) Red and Brown, 4 finer. CAC: 14 in 66, 1 finer (12/18). NGC ID# 22KZ, PCGS# 3325

1971-S Lincoln Cent, PR69 Red Deep Cameo
Only Nine Others So Graded

- 3527** 1971-S PR69 Red Deep Cameo PCGS. Only about 25% of all 1971-S proof cents submitted to PCGS have earned the Deep Cameo designation. That grading service has only certified 10 examples at this lofty grade, from a total proof population of about 2,000 coins (12/18). Cents were struck in proof and circulation-strike format at San Francisco from 1968 through 1974, and then only in proof format beginning in 1975. This Superb Gem exhibits brilliant light orange-red mint color with deep mirrors that frame and emphasize the boldly detailed and thickly frosted devices. NGC ID# 22M3, PCGS# 93434

TWO CENT PIECE

1864 Small Motto Two Cent, MS65 Red
Old Green Label Holder

- 3528** 1864 Small Motto, FS-401, MS65 Red PCGS. Although the Large Motto two cent piece is the most plentiful issue of the series, its Small Motto predecessor is rare in full Red. The ephemeral Small Motto subtype is identified by small lettering on IN GOD WE TRUST. This *Guide Book* variety is rare in Gem Red condition. The present coin displays a sharp strike and satiny golden and copper-pink mint luster. On the reverse, an array of peripheral die cracks adds interest. Housed in an old green label holder. Population: 21 in 65 (1 in 65+) Red, 5 finer (12/18). PCGS# 38234 Base PCGS# 3581

1872 Two Cent, MS65 Red
The Finest Red Coin at NGC
CAC-Endorsed and Outstanding

- 3529** 1872 MS65 Red NGC. CAC. The 1872 two cent piece boasts a trivial mintage of 65,000 pieces and is the final circulation issue in the series. It is rarer in Red condition than the Small Motto variety of 1864. NGC lists only four Red examples, of which this Gem is the sole finest (12/18). The CAC-endorsed surfaces are satiny, unabraded, and virtually carbon-free. This is a well-struck piece with original copper-orange mint luster and outstanding eye appeal. A few minuscule flecks are noted on the reverse exergue. Census: 1 in 65 Red, 0 finer. CAC: 3 in 65, 1 finer (12/18). NGC ID# 22NG, PCGS# 3614

PROOF TWO CENT PIECE

1873 Two Cent Piece, PR66
Pleasing Red and Brown Surfaces

- 3530** 1873 Closed 3 PR66 Red and Brown NGC. Faded mint red on both sides with light tan to brown elsewhere. The surfaces are clean and attractive, with no distracting specks or spots. This is the final year of issue for the Two Cent piece, with the reported mintage of 600 pieces. It is believed that at least a portion of these were melted on July 10, 1873 once sales dwindled. Census: 41 in 66 (1 in 66 ★) Red and Brown, 3 finer (12/18).
Ex: Palm Beach Signature (Heritage, 3/2006), lot 224, realized \$3,220. NGC ID# 2753, PCGS# 3652

THREE CENT SILVER

1851-O Three Cent Silver, MS66
First-Year Branch Mint Issue

- 3531** 1851-O MS66 PCGS. CAC. This impressive Premium Gem three cent silver from the New Orleans Mint represents the first year of the denomination. The design elements are well-detailed and the well-preserved surfaces are lustrous and appealing, with subtle highlights of gold, lavender and amber toning. Population: 35 in 66 (3 in 66+), 0 finer. CAC: 20 in 66, 0 finer (12/18). NGC ID# 22YY, PCGS# 3665

1857 Three Cent Silver, MS66
Near-Flawlessly Preserved

- 3532** 1857 MS66 PCGS Gold Shield. Struck from heavily clashed dies, this all-brilliant three cent silver coin displays good definition on the central star and denomination, while the border elements are slightly soft. The surfaces are virtually flawlessly preserved; There are no marks to report. Population: 15 in 66 (2 in 66+), 2 finer (12/18). NGC ID# 22Z6, PCGS# 3673

PROOF THREE CENT NICKEL

1877 Three Cent Nickel, PR67 ★ Cameo
Struck in Proof Format Only

- 3533** 1877 PR67 ★ Cameo NGC. A key date struck in proof format only to the extent of 900 pieces, the 1877 is conditionally scarce and widely sought in this high grade. The frosted devices stand out dramatically against the deeply reflective fields. Although mostly brilliant, the surfaces showcase attractive blushes of original coppery-gold toning. Census: 25 in 67 Cameo (1 in 67+, 5 in 67 ★, 1 in 67+★), 3 finer (12/18). NGC ID# 275X, PCGS# 83773

SHIELD NICKEL

1880 Shield Nickel, Unc Details
Low-Mintage Key

- 3534** 1880 — Rim Damage — PCGS Genuine. Unc Details. Only 16,000 business-strike Shield nickels were struck in 1880, making the issue elusive in all grades and conditions today. This otherwise attractive specimen has been diagnosed with rim damage by PCGS, but the well-detailed design elements are free of wear and the pleasing surfaces are lightly abraded, with slightly muted satiny mint luster.

PROOF SHIELD NICKELS

1866 Shield Nickel, PR67
First-Year Rays Design

- 3535** 1866 Rays PR67 NGC. Although a few patterns from the regular issue design were struck in 1865, the 1866 With Rays nickel represents the first year of issue, with examples available in all grades, Mint State and proof.

The first proof reverse was used to strike this example. Two reverse dies have been identified for the 1866 Rays proofs. This reverse, used only in 1866, has a prominent center dot, and the upper left vertical of the large 5 sharply doubled.

This Superb Gem proof has light gray color with subtle blue, lilac, and gold toning on each side. The fields are exquisitely preserved and fully mirrored, with light cameo contrast. Undoubtedly minted with special care as all of the design elements are boldly defined. Census: 3 in 67, 0 finer (12/18). NGC ID# 276G, PCGS# 3817

1877 Shield Nickel, PR66+
Pastel Patina

- 3536** 1877 PR66+ PCGS Gold Shield. Delicate pastel toning graces uncommonly reflective fields on this high-end Premium Gem proof, complementing sharp design elements. Eye appeal is outstanding. The 1877 Shield nickel was only produced in proof format, to the tune of just 900 pieces. Population: 44 in 66 (1 in 66+), 1 finer (12/18). NGC ID# 276U, PCGS# 3831

LIBERTY NICKEL

1885 Liberty Nickel, MS65
Key to the Series

- 3537** 1885 MS65 PCGS Gold Shield. CAC. From a low mintage of 1.4 million pieces, the 1885 Shield nickel is the acknowledged key to the series. This delightful Gem exhibits well-detailed design elements, with a touch of the usual softness on the lower wreath. The well-preserved surfaces show a mix of satiny mint luster and prooflike reflectivity. Population: 52 in 65 (4 in 65+), 92 finer. CAC: 14 in 65, 15 finer (12/18). NGC ID# 2773, PCGS# 3846

PROOF LIBERTY NICKEL

1909 Nickel, PR68 Cameo
Black-and-White Contrast

- 3538** 1909 PR68 Cameo NGC. The Mint struck a substantial quantity of proof nickels in 1909 — 4,763 coins. This Superb Gem is essentially black-and-white with a few specks of pale gold color. Contrast is dramatic, and there are no contact marks to report. Census: 11 in 68 Cameo (1 in 68+, 2 in 68 ★), 0 finer in this category (12/18). NGC ID# 278K, PCGS# 83907

BUFFALO NICKELS

1913 Buffalo Nickel, MS65
Type One, 3 1/2 Legs, FS-901

- 3539** 1913 Type One, 3-1/2 Legs, FS-901, MS65 PCGS Gold Shield. CAC. This attractive first-year Buffalo nickel exhibits the denomination in an exposed, raised position on the exergue, identifying the short-lived Type One design. This attractive Gem shows incomplete detail on the bison's leading leg, probably caused by excessive die polishing to remove clash marks. The design elements are well-detailed, with a touch of the typical softness on the letters in LIBERTY. The well-preserved surfaces display slightly subdued satiny mint luster, with subtle hints of ice-blue toning. This rare and valuable variety was discovered by Joseph Ambrulevitch about 1988. Population: 1 in 65, 1 finer (12/18). PCGS# 38428 Base PCGS# 3915

1914/3 FS-101 Nickel, MS64
Perennially Popular *Guide Book* Variety

- 3540** 1914/3 FS-101 MS64 PCGS Gold Shield. The origin of this so-called overdate, whether caused by overdating of the die or the hub, is debated. However, the variety remains perennially popular with collectors and is included in both the *Cherrypickers' Guide* and the *Guide Book*. The underdigit 3 is clear on this well-struck and softly frosted near-Gem. Lightly toned. Population: 19 in 64 (1 in 64+), 4 finer (12/18). NGC ID# 22R4, PCGS# 147844 Base PCGS# 93924

1916 Buffalo Nickel, MS67
Tied for the Finest at PCGS

- 3541** 1916 MS67 PCGS Gold Shield. A small number of similarly graded examples have been certified at PCGS, and these top grade pieces are candidates for the finest Registry sets of the series. This piece would upgrade four of the 10 finest set in the PCGS Set Registry. A lovely Superb Gem, this example exhibits a bold strike and nearly flawless surfaces. Frosty mint luster shines through the delicate gold toning. Population: 34 in 67 (1 in 67+), 0 finer (12/18). NGC ID# 22RA, PCGS# 3930

1916 Buffalo Nickel, AU50
Doubled Die Obverse

- 3542** 1916 Doubled Die Obverse, FS-101, AU50 PCGS Gold Shield. Aside from the basic collection of dates and mintmarks, there are a few special varieties recorded in the *Guide Book* for the Buffalo nickel series. The 1916 Doubled Die, the 1918/7-D, and the 1937-D Three-Legged varieties are the most easily recognized, all evident without magnification. The Indian's feathers and the date show considerable separation on this die doubled obverse. The surfaces exhibit natural light gray color with splashes and streaks of dark patina on both sides. Population: 12 in 50, 40 finer (12/18). NGC ID# 2TSS, PCGS# 145628 Base PCGS# 3931

1916-D Nickel, Satiny MS66
Tied for Finest Certified

- 3543** 1916-D MS66 PCGS Gold Shield. CAC. Despite a mintage of 13.3 million coins, this D-mint nickel issue poses a surprising challenge in high grades. In fact, none are graded finer than this at PCGS or NGC. Satiny mint luster and a sharp impression are characteristic. The minimally marked, lightly toned surfaces set this Premium Gem apart from its peers. Population: 31 in 66 (3 in 66+), 0 finer. CAC: 16 in 66, 0 finer (12/18). NGC ID# 22RB, PCGS# 3932

1926-S Buffalo Nickel, MS64
Key Series Issue

- 3544** 1926-S MS64 PCGS Gold Shield. The 1926-S is one of the key issues in the Buffalo nickel series, and is rarely seen in finer grades than the piece offered here. PCGS has only certified 16 finer examples, including resubmissions (12/18). An above average strike is evident, with satiny light gray luster and delicate iridescent toning. NGC ID# 22S7, PCGS# 3959

1927 Nickel, Top-Graded MS67

- 3545** 1927 MS67 PCGS Gold Shield. Nearly 38 million nickels were struck at the Philadelphia Mint in 1927, explaining the availability of this issue relative to most other dates from 1920s. However, comparable Superb Gems are conditionally rare, and none are graded finer. This softly lustrous, exceptionally clean nickel is razor-sharp with just a trace of softness on the braid. Population: 20 in 67, 0 finer (12/18). NGC ID# 22S8, PCGS# 3960

1929 Nickel, MS67
Tied for Finest Certified

- 3546** 1929 MS67 PCGS Gold Shield. CAC. The 36 million coin-mintage ranks among the higher totals in the series, and the 1929 is correspondingly available through MS66. However, it is a major rarity in Superb Gem condition with none finer at PCGS or NGC. Glowing peach-orange and powder-blue toning delicately blankets softly frosted, marvelously preserved surfaces. A touch of merging on the braid and bison's shoulder is normal. Faintly clashed at the neck. Population: 13 in 67, 0 finer. CAC: 4 in 67, 0 finer (12/18). NGC ID# 22SE, PCGS# 3966

1937-D Buffalo Nickel, MS64
Three-Legged, *Guide Book* Variety

- 3547** 1937-D Three-Legged, FS-901, MS64 NGC. An attractive Choice example of this famous *Guide Book* and *Cherry-pickers* variety, caused by some over-zealous die polishing that effaced most of the bison's leading leg. This well-detailed specimen shows just a touch of softness on the bison's shoulder and the well-preserved surfaces exhibit traces of ice-blue and greenish-gold toning. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1937-D Three-Legged Nickel, MS64
Excellent CAC-Approved Example

- 3548** 1937-D Three-Legged, FS-901, MS64 PCGS. CAC. Always in demand because of its dramatic, easily seen die polishing error, the 1937-D Three-Legged Buffalo nickel is among the most sought-after 20th century coins. Subtle hints of lavender and gold toning enhance the surfaces of this sharply detailed near-Gem. The extraordinary eye appeal is confirmed by the CAC sticker. Struck from an earlier state of the dies than usual, this piece still shows a faint remnant of the bison's forward right leg. *From The Speechless Collection.* NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1937-D Three-Legged Nickel, MS66
 Pastel Iridescence, FS-901
 Among the Nicest Coins We Have Seen

3549 1937-D Three-Legged, FS-901, MS66 PCGS Gold Shield. Q. David Bowers calls the 1937-D Three-Legged Buffalo an “interesting variety” in *A Guide Book of Buffalo and Jefferson Nickels*, adding the following comments:

“In the 1950s, nearly all coins in the marketplace were in grades such as Very Fine and Extremely Fine. Coins graded About Uncirculated were rare, even though in the late 1950s Aubrey and Adeline Bebee reported having nearly two dozen Mint State coins. Many hundreds of Mint State coins exist today. I have no idea where all of these coins came from, but it certainly was a surprise when they first appeared in quantity. Perhaps a bunch of rolls turned up that included examples from this particular die. The typical Mint State coin is attractive, with a satiny or slightly grainy luster.”

It is true that many Mint State examples exist and are available — for a price, one that is well-supported by a seemingly insatiable public demand for one of the most popular varieties in any coin series. Rather than a “bunch of rolls” turning up, it is perhaps equally likely that the variety coins were widely scattered in and among the non-variety coins before they left the Denver Mint in 1937, waiting to be discovered piecemeal as fresh rolls were opened up over time.

The mintage of the 1937-D Buffalo nickels was 17.8 million coins, and we know that all of the Three-Leggeds were produced from a single die pair. If one assumes that each working die struck an average of 300,000 coins, there would have been about 60 dies each for the obverse and reverse to produce the total run. But we also know that this particular die was repolished after it clashed, so it may have been that only 100,000 Three-Leggeds were produced after the dies were resurfaced, one-third of the normal total for each die pair. In other words, perhaps only 1 in 180 coins made was of the Three-Legged variety, which would yield a total of 99,000 examples originally made. As NGC and PCGS combined have certified more than 10,000 specimens in all grades (barring duplicates) — most of which are Fine to AU — our estimate may not be far off the mark. That may seem like a lot of coins until one considers that the 1937-D Three-Legged is one of the few collector coins that has become a pop culture icon, a variety that is well-known even among non-collectors.

This Registry-grade Premium Gem is one of the prettiest examples we have ever handled, and it ranks among the finest coins certified by PCGS. Satiny surfaces are impeccably preserved. Peach-gold iridescence over the centers merges with violet and blue color toward the rims. This really is an amazing representative of one of the most famous 20th century varieties. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKEL

1913 Nickel, PR67
Iridescent Type Two

- 3550** 1913 Type Two PR67 PCGS Gold Shield. It would be terribly difficult to locate a finer example of the first-year 1913 Type Two nickel in proof format. This gorgeous Superb Gem offers eye-appealing iridescence in shades of pastel blue, rose, and peach-orange. Finely textured fields and razor-sharp devices enhance the desirability. PCGS has graded nine submissions higher (12/18). NGC ID# 278S, PCGS# 3990

JEFFERSON NICKELS

1939-S Nickel, MS67 Full Steps
Reverse of 1940, None Finer

- 3551** 1939-S Reverse of 1940 MS67 Full Steps PCGS Gold Shield. According to Ron Guth, writing for PCGS CoinFacts, the 1939-S Reverse of 1940 is generally much more elusive than its Reverse of 1938 counterpart with less-defined steps. The issue is a significant condition rarity in Superb Gem, where this coin is tied with two others at PCGS for finest known (12/18). Wisps of golden color complement satiny nickel-gray surfaces practically devoid of marks, except for a single tick on the eyebrow. NGC ID# 22TC, PCGS# 894006

1952-D Nickel, MS67 Full Steps
Tied for Finest Certified

- 3552** 1952-D MS67 Full Steps PCGS Gold Shield. Only 12% of all Mint State PCGS submissions for the 1952-D Jefferson nickel have been designated as Full Steps. This Superb Gem is tied with three other coins in that category for finest certified (12/18). It is also the plate coin for PCGS CoinFacts. Rings of blue, green, yellow, and rose-violet toning surround untuned centers. There are predictably few marks, and the impression is razor-sharp. We note two specks of aqua residue on the obverse, one in front of the forehead and another below the star between LIBERTY and the date. NGC ID# 22UL, PCGS# 84047

1963 Jefferson Nickel, MS67
Five Full Steps

- 3553** 1963 MS67 Five Full Steps NGC. This spectacular Superb Gem Jefferson nickel exhibits sharply detailed design elements throughout, with five steps fully defined on Monticello. The brilliant surfaces are impeccably preserved, with vibrant mint luster on both sides. Overall eye appeal is terrific. Census: 32 in 67 (2 in 67+ Full Steps, 4 in 67 ★), 0 finer (12/18). NGC ID# 22VE, PCGS# 4073

EARLY HALF DIMES

1792 Half Disme, VG Details
Judd-7, First Federal Coinage

- 3554** 1792 Half Disme, Judd-7, Pollock-7, R.4 — Holed — PCGS Genuine Gold Shield. VG Details. The 1792 half dime is a monumentally important offering in any grade, being one of the first coins struck under federal authority after the passage of the Mint Act of April 2, 1792. With the 2017 publication of *1792: Birth of a Nation's Coinage* by Smith, Orosz, and Augsburg, much has been done to clarify the circumstances under which the coins were struck and distributed, first in July 1792 and then again in October that year. The authors also include a detailed census for the 1792 half dime with 169 individual pieces. This distinctive example is not part of that list. It has a sizeable hole over the B in LIB and the adjacent period on the obverse, obscuring the O in OF on the reverse. Detail is otherwise good for the grade. Liberty's portrait and the date are bold, as are the legends on that side. The reverse is somewhat less defined with a die bulge in the right field, as seen on late-stage Period One coins. Blue, lavender, and gold patina covers marks and scratches on each side, except for two prominent ones below AM. A series of small planchet flaws cut across the eagle's head.

1795 Half Dime, AU50
V-4, LM-10

- 3555** 1795 V-4, LM-10, R.3, AU50 PCGS. CAC. This beautiful final-year Flowing Hair half dime exhibits blended lavender and chestnut-brown toning. Glimmers of luster accompany design elements. Evaluation under a loupe locates only a couple of thin lines on the right obverse field and beneath the eagle's wings. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

1795 Flowing Hair Half Dime, AU58
V-4, LM-10 Variety

- 3556** 1795 V-4, LM-10, R.3, AU58 NGC. Star 15 touches the bust tip, identifying the LM-10 variety. This attractive near-Mint specimen offers well-detailed design elements, with just a trace of wear on the high points. The lustrous, lightly marked surfaces are blanketed in shades of pale gold, magenta, and slate-gray toning. Census (for the variety): 5 in 58, 1 finer (12/18). NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

1800 V-2, LM-3 Half Dime, AU58
LIBEKTY Guide Book Variety

- 3557** 1800 LIBEKTY, V-2, LM-3, R.4, AU58 PCGS. Star 9 is distant from the Y, and TES in STATES is low over the clouds. Heritage Senior Numismatist Mark Borckardt recently discovered that the 8 in the date was formed using two small 0 punches (0.8mm in diameter), previously used for the denominator on the half cent. This nearly Uncirculated LIBEKTY representative is essentially unworn and well-detailed, aside from advanced die buckling at the upper reverse. Golden-gray patina adorns each side and is most attractive. Population: 7 in 58 (1 in 58+), 14 finer (12/18). NGC ID# 2326, PCGS# 38603 Base PCGS# 4265

PROOF BUST HALF DIME

1829 Half Dime, V-3, LM-2, PR65 Cameo
The Eliasberg Specimen

- 3558** 1829 PR65 Cameo PCGS. CAC. V-3, LM-2, R.7 as a proof. Ex: Eliasberg. The year 1829 marked multiple milestones for the U.S. Mint, including its second Mint Building and the introduction of close-collar technology which refined the facility's output. Proofs were struck for the Second Mint Building cornerstone and distribution to important persons. This Gem proof with strong contrast is richly toned yet thoroughly Cameo-worthy. The fields are reflective under gold-orange outer patina with sea-green and blue along much of the margins. A marvelously appealing representative of one of the few well-documented early proof issues bearing one of the most famous pedigrees in all of numismatics. Ex: Eliasberg Collection (Bowers and Merena, 5/1996), lot 908; Greensboro Collection, Part V / FUN Signature (Heritage, 1/2014), lot 5178. From The Speechless Collection. PCGS# 392608

SEATED HALF DIMES

1837 Seated Half Dime, MS66+
No Stars, Small Date

- 3559** 1837 No Stars, Small Date (Flat Top 1) MS66+ PCGS Gold Shield. Block 8 in the date. This inaugural-year Seated Liberty half dime is marvelously toned in original cobalt-blue, sea-green, and lavender patina with splashes of golden-orange color on each side. The motifs exhibit a full strike, and the lustrous surfaces are spectacularly preserved. Population: 17 in 66 (4 in 66+), 7 finer (12/18). NGC ID# 232M, PCGS# 4312

1840-O Drapery Half Dime, MS61
A Rare Issue in Mint State

- 3560** 1840-O Drapery MS61 NGC. Circulated examples of the 1840-O With Drapery half dime are available, but this date becomes a major condition rarity in Mint State. The issue is moderately more elusive overall than the No Drapery variant of the same date and mint. This MS61 coin displays satiny mint luster and ivory-gray surfaces, with tinges of deeper olive-gold toning in the protected border regions. Struck from clashed dies, as usual for this type. Census: 3 in 61, 3 finer (12/18). NGC ID# 232X, PCGS# 4327

1849/8 Half Dime, MS67
FS-301

- 3561** 1849/8 V-1, FS-301, MS67 PCGS Gold Shield. CAC. The *Cherrypicker's Guide* reports two overdates, FS-301 and FS-302, and they describe both as 1849/8 overdates, while the *Guide Book* records them both as 1849/6. There are also at least two other repunched date varieties that are not overdates. This Superb Gem has an old-time collection look with light heather central areas and splashes of sky-blue along the borders. While it is not the Eliasberg specimen, it has the same appearance as many coins from that great collection.

The PCGS population report for 1849/8 half dimes records one grade MS68, one graded MS67+, and four graded MS67. However, examination of the images at PCGS Coin Facts reveals that the MS67+ is actually an example of FS-302, historically called the 1849/6. Population: 4 in 67, 1 finer (12/18). PCGS# 38738 Base PCGS# 4343

1853 Arrows Half Dime, MS67
Tied for the Finest Certified

- 3562** 1853 Arrows MS67 PCGS Gold Shield. The bold strike of this Superb Gem includes faint reverse clash marks. This frosty and lustrous example displays considerable mint brilliance with rose, gold, and blue toning that strengthens near the borders. An excellent candidate for a type set or specialized half dime collection. Population: 14 in 67 (3 in 67+), 0 finer (12/18). NGC ID# 233Y, PCGS# 4356

PROOF SEATED HALF DIMES

1841 Seated Liberty Half Dime, PR65
Tied for Finest Certified

3563 1841 PR65 NGC. CAC. Russet, pale blue, and silver-white areas alternate to splendid effect on this attractive Gem proof 1841 half dime, one of perhaps eight to 10 known to survive of this early proof issue. The design elements are fully struck. NGC reports one each in PR63, PR64, and two in PR65, while PCGS shows two examples in PR63 and one in PR63 Cameo, making a total of seven *grading events* between the two services — not necessarily all separate coins. In any case, this piece is tied for finest graded, at a minimum, and is the finer of only two with the CAC green approval sticker (12/18).

Developing rosters of distinctly different survivors of these early proofs is not for the faint of heart; some examples trade privately or stay in one collection for decades. Others appear at auction in old catalogs with minimal descriptions and poor (or no) photographs, making their documentation and identification virtually impossible. Although we find seven separate grading events for the 1841 proof half dime, the number of survivors could be as low as five or as high as 10, although we lean in the direction of the lower number.

Ex: *Boys Town* (Bowers and Merena, 3/1998), lot 501; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98212. NGC ID# 2359, PCGS# 4417

1856 Half Dime, Toned PR65
Scarce Pre-1858 Proof Issue

3564 1856 PR65 NGC. A sharply impressed example — one of 40 to 60 half dime proofs that were struck by the Mint upon request from dealers and favored individuals. Arrows on each side of the date were removed, although the increased weight from 1853-1855 Arrows coins was maintained. As usual, the date numerals (especially 56) are weaker than the overall strike, a die characteristic seen on all 1856 proof half dimes. This Gem example displays lively mirrors and attractive orange-gold toning with moderate contrast between the frosted devices and glassy fields. Census: 6 in 65, 5 finer (12/18). NGC ID# 235L, PCGS# 4434

EARLY DIMES

1796 JR-2 Dime, AU55
First-Year Issue

3565 1796 JR-2, R.4, AU55 NGC. Even dove-gray toning, this scarce first year Draped Bust dime also has steel-blue hues where luster remains. Richly detailed on Liberty's hair and on the wreath and the left (facing) wing, most of the eagle is typically impressed, and some swirling planchet adjustment marks on the upper reverse (as made) were not completely removed by the strike. Refreshingly void of post-strike contact, this sharp and scarce two-year type coin will be a formidable contribution to the advanced early United States collection.

Ex: Dallas Signature (Heritage, 11/2005), lot 2064, where it brought \$9,775. NGC ID# 236B, PCGS# 38743 Base PCGS# 4461

1797 JR-2 Dime, VF35
13 Stars Obverse

3566 1797 13 Stars, JR-2, R.4, VF35 PCGS Gold Shield. Both sides of this Choice VF Draped Bust dime feature pleasing light gray surfaces with golden tendencies. A few trivial marks are evident, as expected for the grade, and mostly visible only with magnification. Although the 13 Stars and 16 Stars varieties are both rated R.4, the 13 Stars variant is scarcer, according to the population data at PCGS and NGC. The Heritage Permanent Auction Archives supports that data. Population: 3 in 35, 12 finer (12/18). NGC ID# 236D, PCGS# 38749 Base PCGS# 4463

BUST DIMES

1814 Dime, Lustrous Gem
Large Date, JR-3

3567 1814 Large Date, JR-3, R.2, MS65 NGC. The right edge of the second 1 is aligned with the left edge of the curl, and the second T in STATES is left of the I in PLURIBUS. JR-3 is a collectible die marriage in high grades, although it has been nearly five years since we last encountered a finer representative. Softly lustrous, marvelously preserved surfaces show wisps of golden color and light clashing. The devices are well-rendered, except for the lowest stars. Census (for the JR-3 variety): 2 in 65, 2 finer (12/18). NGC ID# 236W, PCGS# 38775 Base PCGS# 4488

1825 JR-4 Dime, MS64+
Bulged Obverse Die

- 3568** 1825 JR-4, R.2, MS64+ PCGS Gold Shield. A prominent die bulge (technically sinking) is evident beneath the bust tip on this late state of the obverse die that was not used in any other combinations. There is no mintage figure recorded for the 1825 dimes, and the *Guide Book* suggests that they were included in the recorded mintage for 1824 dimes, while we believe that some of the 1.2 million dimes struck in 1827 were actually dated 1825. This lovely Choice Mint State example has brilliant luster that shines through its gold, blue, and iridescent toning, presenting exceptional eye appeal. Population for all 1825 varieties: 20 in 64 (4 in 64+), 10 finer (12/18). NGC ID# 2374, PCGS# 38810 Base PCGS# 4503

1836 JR-1 Dime, MS65
Toned and Needle-Sharp

- 3569** 1836 JR-1, R.3, MS65 PCGS Gold Shield. The spacing of the denomination, 10 C., is narrow on this die pair — one of three for the year used to strike nearly 1.2 million Capped Bust dimes. Although the issue is among the most collectible in the series, few coins are as fine as this Gem, regardless of die variety. Ice-blue, rose-violet, and orange-gold patina blankets each side. Strike detail is needle-sharp. Population: 11 in 65, 6 finer (12/18). NGC ID# 4DEF, PCGS# 38888 Base PCGS# 4528

SEATED DIME

1865 Seated Dime, MS67+
Fortin-101a, Early Die State

- 3570** 1865 Repunched Date, F-101a, R.5, MS67+ PCGS. CAC. Gerry Fortin identifies two varieties of 1865 Seated dimes, one used for business strikes and the other for proofs. Evidence of repunching is seen between the 8 and 6 in the date on the die pair used for the 10,000 circulation strike pieces, including this Superb Gem. The repunching provides quick and easy identification of the manufacturing method, which is especially important for prooflike Mint State pieces. This example has vibrant blue, russet, and gold toning over its brilliant and frosty silver surfaces, creating sensational eye appeal. Population: 5 in 67 (2 in 67+), 0 finer. CAC: 6 in 67, 0 finer (12/18). NGC ID# 239P, PCGS# 538204 Base PCGS# 4641
-

BARBER DIME

1896-S Barber Dime, MS66 Prooflike Incredible Eye Appeal

- 3571 1896-S MS66 Prooflike NGC.** Beautifully patinated in peach-gold and powder-blue. Well-struck with smooth surfaces and noticeable field reflectivity. The 1896-S claims the third-lowest mintage of the series (575,956 coins), trailing only the key 1895-O and the non-collectible 1894-S. NGC reports only five Prooflike examples across all grades, including a PR62 and four PR66 coins (one PR66+). NGC has yet to grade any 1896-S dimes above MS66, with or without a Prooflike designation (12/18). PCGS# 64811 Base PCGS# 4811

MERCURY DIMES

1916-D Dime, Choice AU Partly Lustrous with Golden Accents

- 3572 1916-D AU55 NGC.** The 1916-D dime is one of those issues that even non-collectors know to be on the lookout for. It is one of the premier 20th century key dates, claiming a series-low mintage of 264,000 coins. With an average certified grade of VG8, this Choice AU representative is much finer than the typical 1916-D. Actually, anything finer would be extremely difficult for most collectors to target. Pale golden accents over light steel-gray surfaces and crisp detail define this lovely survivor. Smooth with satiny luster remaining. NGC ID# 23GY, PCGS# 4906

1919-S Dime, MS64 Full Bands Ice-Blue and Crimson Patina

- 3573 1919-S MS64 Full Bands PCGS Gold Shield. CAC.** With Gem Full Bands examples of the 1919-S Mercury dime being as conditionally rare as they are, this near-Gem would make an excellent, more affordable alternative. It is obviously high-end for the grade and attractively toned in ice-blue patina with crimson color around the border. Population: 46 in 64 (1 in 64+) Full Bands, 28 finer. CAC: 6 in 64, 5 finer (12/18). NGC ID# 5LLN, PCGS# 4927

1934 Dime, MS68+ Full Bands Exceptional Quality

- 3574 1934 MS68+ Full Bands PCGS Gold Shield.** A splash of powder-blue color on Liberty's neck and additional glints of tan-gold on each side accent brilliant and seemingly flawless surfaces. The devices are completely brought-up, and full separation occurs on the bands of the fasces. Population: 30 in 68 (2 in 68+) Full Bands, 0 finer (12/18). NGC ID# 5BZ8, PCGS# 4989

1938 Mercury Dime, MS68 Full Bands Tied for the Finest Certified

- 3575 1938 MS68 Full Bands PCGS Gold Shield.** Neither PCGS nor NGC have certified a finer example of this issue that displays bold design definition. Hints of gold toning appear on the highly lustrous silver surfaces of this fully brilliant and frosty Superb Gem. Population: 11 in 68 Full Bands, 0 finer (12/18). NGC ID# 5C9Y, PCGS# 5011

TWENTY CENT PIECES

1875-S Twenty Cent, MS66
Exceptional Preservation

- 3576** 1875-S MS66 NGC. BF-4, R.4. This is one of the scarcer varieties of the 1875-S twenty cent piece. There is a small vertical tine on the dentil beneath the 5 in the date and a die line in the dentils to the left of stars 2 and 3. On the reverse, a few faint die lines are evident within the eagle's wings. This Premium Gem is conditionally scarce and a satiny, untuned type coin. Luster is brilliant and unabraded, and the design elements show full definition. Census: 54 in 66 (2 in 66+, 3 in 66 ★), 9 finer (12/18). *From The Speechless Collection.* NGC ID# 23R7, PCGS# 5298

1875-S Twenty Cent, CAC-Approved MS66
Shimmering Luster, Scarce This Fine

- 3577** 1875-S MS66 PCGS. CAC. BF-14, R.1. The peak of a repunched date digit lurks in the dentils beneath the primary 8. This Premium Gem type coin is minimally toned and exceptionally lustrous with an unabraded appearance. The strike is good, although the two uppermost stars are incomplete, and we note mint-made vertical roller marks above the eagle's left (facing) shoulder. This San Francisco issue is scarce so fine, but it is most accessible type coin option in this grade. Population: 77 in 66 (11 in 66+), 6 finer. CAC: 21 in 66, 0 finer (12/18). *From The Speechless Collection.* NGC ID# 23R7, PCGS# 5298

1875-S/S Twenty Cent, MS66
FS-302, Misplaced Date
Boldly Repunched Mintmark

- 3578** 1875-S/S Misplaced Date, FS-302, BF-16, R.1, MS66 NGC. The top of a misplaced 7 is in the dentils beneath the primary 7. On the reverse, the mintmark is noticeably repunched at the serifs. The 1875-S is the most plentiful issue in the short-lived twenty cent series, the ideal type coin. Nonetheless, it is conditionally scarce in MS66, and finer pieces are rare. This example displays brilliant satin luster and shows no mentionable abrasions. Trivial strike weakness affects the rock behind the shield, as well as the upper edge of the eagle's left (facing) wing. Census: 54 in 66 (2 in 66+, 3 in 66 ★), 9 finer (12/18). *From The Speechless Collection.* NGC ID# 23R7, PCGS# 145009 Base PCGS# 5298

PROOF TWENTY CENT PIECES

1876 Twenty Cent, PR65
Deeply Reflective Fields

- 3579** 1876 PR65 NGC. Proof twenty cent production declined slightly to 1,150 pieces in the series' second year of issue. There was simply little interest in this loathed denomination, which frequently cheated users out of a nickel. The 1876 is much more sought-after today. This example enjoys pristine, well-contrasted surfaces and attractive silver centers ringed with iridescence. Census: 24 in 65, 14 finer (12/18).
Ex: Central States Signature (Heritage, 4-5/2010), lot 600; Long Beach Signature (Heritage, 9/2010), lot 3895; FUN Signature (Heritage, 1/2013), lot 4072, where it realized \$6,991.25. NGC ID# 27H3, PCGS# 5304

1878 Twenty Cent, PR64 Cameo
Scarce Contrasted Example

3580 1878 PR64 Cameo PCGS. BF-1, R.3. Only one die pair is documented for the proof 1878 twenty cent piece. The reverse was heavily polished before production, leaving the lower olive leaves partially effaced. Overall, the proof 1878 is scarce with cameo contrast, and such coins are rare finer than the present Choice example. This piece is sharp and untuned with modest contrast. Eye appeal is pleasing. Population: 35 in 64 (1 in 64+) Cameo, 13 finer; 2 in 64 Deep Cameo, 2 finer (12/18).

From The Speechless Collection. NGC ID# 27H5, PCGS# 85306

EARLY QUARTERS

1804 B-1 Quarter, VG10
Popular Collector Grade

3581 1804 B-1, R.3, VG10 PCGS. Struck from clashed dies. After the small production of Small Eagle quarters in 1796, the denomination was suspended until 1804 when the new Heraldic Eagle reverse was introduced. Housed in a green-label holder, this quarter exhibits natural light gray and tan surfaces with minimal imperfections for the grade. This is an important example of the key issue in a popular grade for collectors. NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

1804 B-1 Quarter, VF20
Late Die State

3582 1804 B-1, R.3, VF20 PCGS Gold Shield. Clash marks and faint obverse and reverse die cracks are visible on this late die state example of the scarce 1804 B-1 quarter, the first year of issue for the Draped Bust/Heraldic Eagle design type. Although the usual trivial handling marks are present on both sides, this is an exceptional example for the grade, featuring pale reddish-gold toning on its medium gray surfaces. The still-youthful Philadelphia Mint coined 6,738 quarters in 1804, and probably no more than 10% of those coins survive today. Population: 20 in 20, 52 finer (12/18). NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

1806 B-5 Quarter, MS65
Probably the Finest Known

3583 1806 B-5, High R.4, MS64 PCGS Gold Shield. CAC. This late die state has a prominent die crack through the top of Y in LIBERTY, with a branch from the left top of that letter curving down through the field to the nose. The first crack has a branch from the right side of Y down to star 8. In *Early United States Quarters 1796-1838*, Steve Tompkins records a Condition Census including an MS64, an MS63, an MS60, and three AU coins. Many years ago, Walter Breen revised the Browning reference, and described this very same coin as "more or less Uncirculated, centers weak," placing it at the top of his census listing. With a grade of MS64, PCGS has stated that it is more Uncirculated.

The centers, especially on the reverse, are weakly defined, although the peripheral areas are much sharper, apparently typical of all known examples. This fully lustrous near-Gem has violet toning at the centers, framed by sea-green and light gold closer to the borders. A few trivial marks keep it from a Gem grade.

Ex: *Stack's* (5/1965), lot 598; *Stack's* (3/1974), lot 5; *Stack's* 6/1999), lot 2074; *Heritage* (8/2004), lot 5924; *American Numismatic Rarities* (12/2005), lot 542; *Joseph C. Thomas Collection / Central States Signature* (*Heritage*, 4-5/2009), lot 2315, where it sold for \$21,850. NGC ID# 23RD, PCGS# 38931 Base PCGS# 5314

PROOF BUST QUARTER

1835 B-7 Quarter, PR63
Extremely Rare Proof Strike

3584 1835 PR63 PCGS. B-7, High R.7 as a Proof. The Condition Census data in *Early Quarter Dollars of the United States Mint* indicates that there are six proof 1835 quarters known, including one example of Browning-1 and five of B-7. The grades recorded in that reference are PR65, PR64 (B-1), PR64, PR63, PR63, and PR60. The finest of those is in the Smithsonian Institution, leaving only five in collectors' hands.

Dappled golden-brown and dove-gray colors endow this meticulously struck specimen. Despite the rich toning, the fields are flashy and show no evidence of cartwheel luster. Some moderate marks are detected on the left obverse; these are by no means conspicuous because of subsequent toning. A small planchet flaw is seen beneath the first star and Liberty's neck, and serves to identify the present piece in the event of future auction appearances. Population: 1 in 63, 1 finer (7/13).

Ex: *Lester Merkin* (2/1971), lot 574; *Auction '82 (RARCOA, 8/1982)*, lot 717; *American Numismatic Rarities* (9/2003), lot 266; *Heritage* (12/2005), lot 607; *Stack's* (1/2009), lot 317. NGC ID# 27HE, PCGS# 5383

SEATED QUARTERS

1850 Quarter, Extraordinary MS66
Second Finest Known, Ex: Mills / Eliasberg

3585 1850 Misplaced Date, Briggs 1-A, FS-301, Flynn-MPD-001, MS66 NGC. Ex: Eliasberg. Precious few of the 190,800 Seated quarters delivered by the Philadelphia Mint in 1850 escaped the rampant melting of the early 1850s. The majority of survivors are circulated, Mint State pieces being rare. This MS66 example ranks as the sole second finest known, trailing only a lone Superb Gem PCGS coin. Mottled russet shadings adorn the otherwise champagne-lilac surfaces, and one can also discern isolated swirls of electric-blue color in a few areas around the obverse margin. Warmly frosted with bold detail and no disturbing abrasions. This piece represents the FS-301 die variety, with the base of a misplaced 1 in the rim beneath the primary 1 in the date. Census: 1 in 66, 0 finer (12/18).

Ex: John G. Mills Collection (S. H. and H. Chapman, 4/1904); J. M. Clapp; John H. Clapp; Clapp Estate, 1942; Louis E. Eliasberg, Sr.; Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1447; Long Beach Bullet Sale (Heritage, 9/2002), lot 905, where it brought \$9,000; Central States Signature (Heritage, 4/2013), lot 4208, which realized \$9,400.

From The Speechless Collection. NGC ID# 23T4, PCGS# 395929 Base PCGS# 5415

1853 Arrows and Rays Quarter, MS65
Frosty White Luster

3586 1853 Arrows and Rays MS65 NGC. The general public recognized the obverse/reverse design changes immediately and numerous examples of the Arrows and Rays type were set aside. However, most of those were circulated or lower-grade Uncirculated coins. Gems remain difficult to locate and are highly prized by type collectors. This is a remarkably lustrous coin with a trace of pinkish-gray on each side, and with much original mint brilliance still in evidence as well. The NGC insert bears the signature of *Guide Book* authority Ken Bressett. Census: 29 in 65, 11 finer (12/18). PCGS# 5426

1871-CC Quarter, VF Details
Rare in All Grades, Nicely Toned

3587 1871-CC — Scratched — PCGS Genuine Gold Shield. VF Details. Briggs 1-A, Flynn-RPD-001. All 10,890 1871-CC quarters were struck from this die pair, with strong repunching on the date. The issue is a significant rarity in any grade. Probably fewer than 100 coins exist, and a majority of those show various surface problems and extreme wear. This example enjoys VF sharpness and attractive golden-olive and gunmetal-blue patina. At some point someone thought it might be a good idea to carve several gouges into the lower obverse. Although they are not ideal, this remains a pleasing, strongly detailed representative with far better eye appeal than most pieces on the market.

Carson City Mint, 1875

1880 Quarter, MS68
Only 13,600 Coins Struck
Tied for Finest at Both Services

- 3588** 1880 MS68 NGC. Briggs 1-A. Type Two Reverse. Silver subsidiary coinage sent abroad during the 1860s and early 1870s began to return to the United States after the passage of the Specie Resumption Act of 1876. Neil Carothers explains: "In the winter of 1877 there suddenly reappeared in circulation literally hundred of millions of the silver 3 cent pieces, 5 cent pieces, dimes, quarters, and half-dollars that had as suddenly departed in 1862." By 1880, there was no longer any need to produce quarters (or half dollars) for circulation, explaining the issue's low mintage of 13,600 coins. Examples remain accessible in most Uncirculated grade levels, but Superb Gems of this quality are significant rarities. Violet and peach-gold patina lightly drapes the frosted, partly contrasted surfaces of this semireflective MS68 quarter. An exceptionally attractive Registry coin. Census: 5 in 68, 0 finer (12/18). NGC ID# 23VC, PCGS# 5512

PROOF SEATED QUARTERS

1845 Quarter, PR64
One of Eight Known Proofs
Ex: Newman

- 3589** 1845 PR64 NGC. CAC. Briggs 5-E. Ex: Eric P. Newman. Like all other known proof 1845 quarters, this piece has the date (845) heavily repunched to the right with the original digits left of the final position. Every vertical shield line on the reverse extends into the horizontal crossbars, most nearly reaching the top of the shield. There are no die cracks, clash marks, or other die anomalies.

We are aware of eight distinct examples of the 1845 proof quarter, one of which is permanently impounded in the Smithsonian Institution. The other seven coins are privately held. This example, long hidden away as part of the Eric P. Newman Collection before surfacing in 2013, is ranked sixth but it is virtually as fine as the coins ranked higher, including the Pittman-Kaufman-Gardner example in PR66 and the PR65 Eliasberg coin.

This spectacular near-Gem exhibits light ivory surfaces with powder-blue peripheral toning on the obverse and deep blue patina with splashes of champagne on the reverse. The design elements are boldly detailed as expected. A few faint hairlines are minimal for the grade.

Ex: Eric P. Newman / Central States Signature (Heritage, 4/2013), lot 3904, where it realized \$30,550.

From The Speechless Collection. NGC ID# 23W8, PCGS# 5539

1859 Quarter, PR66 Cameo
Rare High-End Cameo

- 3590** 1859 PR66 Cameo NGC. Briggs 1-A. A proof mintage of 800 Seated Liberty quarters was achieved in 1859, the second year of the Mint's commercial proof program. Pieces in Premium Gem condition with the coveted Cameo designation are rare, and NGC has not certified a single Ultra Cameo. The present coin displays deeply mirrored fields that starkly contrast with the sharp, frosty devices. Warm golden toning on each side is deepest around the borders. Census: 6 in 66 Cameo, 1 finer (12/18).
From The Speechless Collection. NGC ID# 23WL, PCGS# 85555

1872 Quarter, PR67 Cameo
Spectacular Contrast and Mirroring

- 3591** 1872 PR67 Cameo NGC. Briggs 3-C. Bordering on an Ultra Cameo designation, this Superb Gem proof showcases intense mint frost on the devices and is deeply mirrored in pristine fields. There is a lone spot of milky toning lost over Liberty's head, but the surfaces are otherwise exceptional. A halo of golden toning surrounds the outer peripheries. Eye appeal is exceptional. Cameo proofs of this date are scarce, and only a handful of coins are known at the Superb Gem level. Census: 6 in 67 Cameo (1 in 67 ★), 1 finer (12/18).
From The Speechless Collection. NGC ID# 23X5, PCGS# 85571

1873 Arrows Quarter, PR66+
Popular Two-Year Type

- 3592** 1873 Arrows PR66+ PCGS. CAC. Briggs 5-D. Both the 1873 and 1874 Arrows proof quarters are in-demand issues. The type was only implemented for two years to signify an indiscernible weight increase. This is the slightly scarcer of the two issues with a lower mintage of 500 pieces. Bluish-green and rose-violet iridescence confirm the originality of this Premium Gem, and the glassy underlying surfaces lack any blemishes that merit attention. Population: 6 in 66 (1 in 66+), 1 finer. CAC: 4 in 66, 0 finer (12/18). NGC ID# 23XR, PCGS# 5574

1874 Arrows Quarter, PR65
Low-Mintage Two-Year Type

- 3593** 1874 Arrows PR65 PCGS. CAC. Briggs 5-D. The two-year Arrows type is always in high demand, especially in proof format. However, production was limited to 500 pieces in 1873 and 700 in 1874. That total is lower than certain single-year mintages like the 1880. Thin splashes of golden color drape otherwise brilliant surfaces that retain semireflective fields. A terrific example of the type. Population: 27 in 65, 38 finer. CAC: 1 in 65, 8 finer (12/18). NGC ID# 23XS, PCGS# 5575

1885 Quarter, PR67 Cameo
Eye-Appealing and Starkly Contrasted

- 3594** 1885 PR67 Cameo NGC. CAC. Briggs 3-B. Overseas importations reduced the need to strike new quarters for circulation through the 1880s. Small quantities were minted to have on hand for depositors and to reduce speculation in proofs, of which 930 pieces were coined in 1885. This all-brilliant Superb Gem enjoys stark field-device contrast and virtually flawless preservation. Eye appeal is exactly what one would expect of a proof in this high grade. Census: 6 in 67 Cameo, 4 finer. CAC: 8 in 67, 3 finer (12/18).
From The Speechless Collection. NGC ID# 23XH, PCGS# 85586

BARBER QUARTERS

1913-S Quarter, Fine 15
Unusual Collector Grade

- 3595** 1913-S Fine 15 PCGS. CAC. The 1913-S Barber quarter has an unusual grade distribution according to the PCGS population charts. Nearly 1,200 of these coins have been certified in grades from Poor to VG. Just 61 have earned grades of Fine 12 or Fine 15, 60 are graded VF20 to AU58, and 70 more are graded MS60 or better (12/18). Collectors seeking middle or higher circulated grade examples have quite a challenge. Although a glass reveals faint hairlines, this pleasing Fine 15 representative has pleasing medium gray surfaces that are consistent with its time in circulation. Neither side shows any consequential marks. An important opportunity for the Barber quarter enthusiast. NGC ID# 23ZW, PCGS# 5666

PROOF BARBER QUARTERS

1895 Quarter Dollar, PR67+
Toned and Original

- 3596 1895 PR67+ PCGS. CAC.** The 1895 proof is a plentiful issue in most non-Cameo grades, but Superb Gems are conditionally rare. Cameos are scarce at all levels and extremely rare in grades comparable to the present non-Cameo. This Plus-designated, CAC-approved type coin offers needle-sharp detail and pristine surfaces. A Cameo designation would have easily been achieved by this piece were the original sea-green, lavender, and russet-gold hues on each side not quite as all-encompassing as they are. Population: 17 in 67 (6 in 67+), 4 finer. CAC: 14 in 67, 8 finer (12/18). NGC ID# 242A, PCGS# 5681

1911 Barber Quarter, PR68 Cameo
Dramatic Contrast

- 3597 1911 PR68 Cameo PCGS. CAC.** Proof quarter production was limited to 543 pieces in 1911. PCGS has graded 293 submissions in all, including non-Cameo, Cameo, and Deep Cameo proofs. This Superb Gem ranks among the six finest Cameo representatives at that service, and there are only eight pieces that have been awarded a Deep Cameo designation (12/18). These totals almost certainly contain multiple duplications. To be sure, all examples are rare at this level. Brilliant surfaces allow the frosted motifs to stand out dramatically against the reflective, unmarked fields. Every element of the design is fully struck, as expected. NGC ID# 242T, PCGS# 85697

STANDING LIBERTY QUARTERS

1916 Quarter, MS61
First Standing Liberty Issue

- 3598 1916 MS61 ANACS.** The Philadelphia Mint coined 52,000 Standing Liberty quarters in December 1916, and they were the first of the design. The Mercury dime and the Walking Liberty half dollar also debuted in 1916, a time of artistry at the Mint. Considerable head and shield details remain on this pleasing Mint State piece that shows frosty silver luster with delicate gold and iridescent toning on both sides. All four date digits are boldly rendered. Surviving examples of this key issue are always in great demand among series specialists and general collectors as well. NGC ID# 43XR, PCGS# 5704

**1916 Standing Liberty Quarter
CAC-Approved MS65 Full Head**

3599 1916 MS65 Full Head PCGS. CAC. In an effort to discourage hoarding of the low-mintage 1916, the debut Standing Liberty quarter was not released to the public until January 1917, when it was dispersed amid a flood of new 1917-dated coins. Few collectors initially realized the rarity of the 1916 issue — or even that there was such a date — and when they did, they would spend years searching the channels of commerce for lost examples of the rarity. In fact, there is evidence that worn examples of the rarity eluded collectors in circulation until as late as the 1940s. The New York Subway Hoard, which is described as having been accumulated during the 1940s, contained 19 examples of the 1916 quarter, spent by the general public with no knowledge of the coins' high numismatic value.

The first-year key is particularly sought-after in Gem Full Head grades, and this remarkable coin is among a minority of so-graded pieces with CAC endorsement. The strike is remarkably sharp for the issue, particularly on Liberty's head and toes, and the frosty original mint luster glistens with unabraded luminance. Traces of pastel toning grace each side.

From The Speechless Collection. NGC ID# 2AMV, PCGS# 5705

**1924-D Standing Liberty Quarter, MS68
Tied for Finest Non-Full Head**

3600 1924-D MS68 NGC. This magnificent MS68 Standing Liberty quarter is sharply detailed in most areas, but a touch of the usual softness is evident on the shield rivets and the head detail is not quite full. The virtually pristine surfaces are completely brilliant, with vibrant mint luster throughout. Census: 2 in 68, 0 finer (12/18). NGC ID# 243M, PCGS# 5748

WASHINGTON QUARTER

**1955 Washington Quarter, MS67+
Intense Rainbow Toning**

3601 1955 MS67+ PCGS Gold Shield. CAC. This Superb Gem, tied for the finest certified, exhibits frosty mint luster beneath intense gold, blue, and iridescent toning that provides exceptional aesthetic appeal. The Registry collector will want to give due consideration to this beauty that is one of only three PCGS Plus-designated pieces at this top grade level. Population: 44 in 67 (3 in 67+), 0 finer. CAC: 27 in 67, 0 finer (12/18). NGC ID# 2469, PCGS# 5858

PROOF WASHINGTON QUARTER

**1938 Quarter, PR68
Beautifully Patinated, None Finer**

3602 1938 PR68 PCGS Gold Shield. Crimson and golden-orange patina surrounds shades of pastel blue, violet, and green over the centers of this impeccable proof Washington quarter. Completely free of contact marks and fully struck, as expected. A major rarity in this grade, ideal for a Registry Set. Population: 5 in 68, 0 finer (12/18). NGC ID# 27HR, PCGS# 5977

EARLY HALF DOLLARS

1794 Half Dollar, Choice VF
Elusive O-105 Die Variety

- 3603** 1794 O-105, T-3, R.5, VF35 NGC. In a later die state, O-105 develops a crack from the dentils to the first T in STATES. That die state (O-105a) is rare, but O-105 is scarce in its own right. The leaf pair beneath OF on the reverse is positioned below the F, and on the obverse, star 15 is just higher than the tip of the bust truncation. Star 1 is free of the hair curl to the left of the date, but star 2 touches it.

This piece shows moderate wear with pleasing light golden patina. Deeper amber and russet toning surrounds the borders. Minor adjustment marks appear along the right-obverse stars, but the dentils in that region are still well-defined. Additional adjustment marks are seen on the center of the portrait. The reverse shows wear most significantly on the body of the eagle, leaving the wings well-detailed. NGC ID# 24E6, PCGS# 39206 Base PCGS# 6051

1803 O-101 Half Dollar, AU55
Large 3, Small Stars Reverse

- 3604** 1803 Large 3, Small Reverse Stars, 12 Arrows, O-101, T-1, R.3, AU55 PCGS. CAC. Tompkins Die State 2/2, with a crack across the top of LIBERTY and raised die lumps between ERICA down to the eagle's tail. O-101 features a Large 3, Small Reverse Stars, and 12 arrows. With 188,234 pieces struck for this issue in 1803 and 1804, the date is more accessible than the 1801 or 1802, but it is seldom seen in Choice AU condition, especially with CAC approval. Attractive stone-gray surfaces are smooth with golden accents and partial luster around the stars. Although the centers are trivially soft, some detail is apparent on the eagle's neck. NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

1805/4 O-101 Half Dollar, AU53
Guide Book Overdate, Early Die State

- 3605** 1805/4 O-101, T-4, R.3, AU53 PCGS Gold Shield. Tompkins Die State 1/2. An important *Guide Book* overdate. In this die state, there is a thin crack along the top of MERI in AMERICA, but the retained cud has not yet formed. The latest state of this marriage shows a full cud in this area. This About Uncirculated 1805/4 half dollar has luster in the protected portions of the fields, a bold strike, and little wear. Sea-green and golden hues adorn the borders, leaving the interiors with dusky tan patina. NGC ID# 24EH, PCGS# 39290 Base PCGS# 6070

1805 Draped Bust Half, VF25
O-105a, T-12

- 3606** 1805 O-105a, T-12, R.5, VF25 PCGS Gold Shield. Tompkins Die State 1/4, a middle die state with a die crack from the rim across the top of ITE in UNITED. The full cud above TE in STATES only extends to the A, with a retained cud continuing to the first S. This moderately worn example shows the left side of the drapery worn smooth at the shoulder, but much interior detail remains intact in other areas. The dove-gray surfaces are lightly abraded for the grade. NGC ID# 373R, PCGS# 39277 Base PCGS# 6069

1806 O-106 Half Dollar, AU58
Knob 6, Small Stars, Condition Census Coin

- 3607** 1806 Knob 6, Small Stars, O-106, T-4, R.4, AU58 PCGS. CAC. Tompkins Die State 1.5/1. The crack through LIBERTY is faint. No crack is present between stars 8 and 10. This Knob 6 die marriage has star 1 low relative to the curl, the 1 in the date mostly right of the curl, and the leaf tip points between IC. Silvery centers are framed by dappled gold, violet and blue toning. Liberty's curls are strong, while softness occurs on the reverse stars and right most clouds. This AU58 representative qualifies for the the Condition Census. One MS65 and one MS63 are finer, according to Tompkins. NGC ID# 24EJ, PCGS# 39306 Base PCGS# 6075

BUST HALF DOLLARS

1815/2 O-101a Half Dollar, AU50 NGC
Sole Die Pairing of the Year

- 3608** 1815/2 O-101a, R.3, AU50 NGC. The curve of the underdigit 2 is noted above the lower loop of the 5 in the date. The only variety of the year, the 1815 is also a low-mintage issue with only 47,150 pieces struck, thus making it a key issue in the Bust half series. Seen here with the reverse die cracks and heavier die clashing that characterize this later die state. Splashes of apricot-gold patina bathe each side of this example. The design elements display good definition, and are well centered on the planchet. The surfaces are relatively well-preserved, with no significant abrasions apparent. Ex: Long Beach Signature (Heritage, 9/2005), lot 3161, where it sold for \$5,462.50. NGC ID# 24F5, PCGS# 39492 Base PCGS# 6108

1817 O-111a Half Dollar, MS63
Intermediate Die State

- 3609** 1817 O-111a, R.1, MS63 NGC. This Select Mint State O-111a half dollar exhibits the reverse die crack seen on late state pieces, but has no evidence of obverse clash marks. Rich gold, violet, and blue toning visits both sides of this lovely example that features strong design definition and trivial, scattered marks. NGC ID# 24F6, PCGS# 39505 Base PCGS# 6109

**1826 Half Dollar, Outstanding MS66
Finest Certified of the O-114 Die Pair**

- 3610 1826 O-114, High R.4, MS66 NGC.** A challenging die pair in all grades and die states, the O-114 — and the rare O-114' — are not listed higher than MS65 in the current Steve Herrman revision (Autumn, 2018), nor does an example exceed MS65 in the Parsley reference. Yet here is a splendid MS66 example, beautifully toned in classic album-infused shades of deep blue at the borders, ceding to pearlescent gold at the centers, with deep and abiding mint luster throughout both sides.

Seldom available in grades above About Uncirculated, the O-114 die marriage is rarely seen in any die state. The “prime” state with sharp obverse stars and no trace of filling of the upper N in UNITED is especially rare. This coin represents a more advanced die stage than the earliest strikes, with the upper stars rather flat, and all of the stars drawn to the edge. The N in UNITED is slightly filled along its upper portion into the nook where the diagonal meets its upright. An angled die line inside the upper shield sits close to a nearby die dot. NGC reports this sole MS66 example, while the PCGS listing cites a single MS64 coin and none finer (12/18). NGC ID# 24FM, PCGS# 39685 Base PCGS# 6143

**1834 Half Dollar, Multicolor MS65
O-116, Small Date, Small Letters**

- 3611 1834 Small Date, Small Letters, O-116, R.1, MS65 PCGS.** Overton-116 is interesting for its repunched bust tip. An outline of the left border of the bust truncation is noted near star 1. The die engraver would likely have been amazed if told that 179 years later collectors would cherish such features on early Federal coinage. This is a lustrous and exceptionally preserved half dollar bathed in dappled autumn-brown, ocean-blue, and gunmetal-gray toning. Population for all Small Date, Small Letters varieties: 16 in 65, 5 finer (12/18). NGC ID# 24FY, PCGS# 39921 Base PCGS# 6166

SEATED HALF DOLLARS

**1844 Seated Liberty Half Dollar, MS65 ★
Among the Finest Certified**

- 3612 1844 WB-Unlisted, Die Pair 10, R.3, MS65 ★ NGC.** The date is positioned far left, with the 8 repunched south plus slight repunching on the first and second 4s. The fields are semiprooflike on both sides and the motifs display a full strike. Needle-sharp star centers and full details on Liberty's hair strands and facial features join full feathers on the eagle except for minor incompleteness on the left (facing) talon.

Pleasing gold toning deepens slightly at the margins, with mint luster shining softly across the reflective surfaces and the similarly toned, lightly frosted devices. A few tiny marks are visible with a glass but they are entirely inconsequential. This coin is the sole MS65 with the NGC Star designation. Neither NGC nor PCGS report a finer 1844 half. Census: 3 in 65 (1 in 65 ★), 0 finer (12/18). NGC ID# 24GZ, PCGS# 6245 Base PCGS# 6245

1881 Half Dollar, Prooflike MS66
Exceptional Mint Luster

1883 Seated Half Dollar, All-Brilliant MS66

3613 1881 Closed Bud, WB-102, MS66 NGC. All circulation strike 1881 half dollars are of the Closed Bud reverse type. Only 10,000 half dollars were struck in 1881, all at Philadelphia. This Premium Gem displays considerable mirroring in the fields, struck from dies that retained their original polish. The devices are frosted. Although no toning of any sort is evident, this remarkable coin appears entirely original, boasting a mint-fresh look. Modest cameo contrast is apparent on each side. No distracting abrasions are seen. Census: 9 in 66 (1 in 66 ★), 2 finer (12/18).

From The Speechless Collection. NGC ID# 24KU, PCGS# 572264 Base PCGS# 6363

3614 1883 WB-101 MS66 NGC. The 1883 is one of the popular low-mintage half dollar issues put out during the 1880s. Only 8,000 coins were struck. All-brilliant surfaces showcase vibrant, frosty mint luster. Both sides are well-defined, with the exception of the upper obverse border, including Liberty's head and the adjacent stars, and the corresponding area on the reverse. Census: 10 in 66 (1 in 66 ★), 4 finer (12/18). NGC ID# 24KW, PCGS# 572267 Base PCGS# 6365

PROOF SEATED HALF DOLLARS

1839 Seated Liberty Half Dollar, PR62
One-Year No Drapery Design Type
Only Six Proofs Traced

3615 1839 No Drapery PR62 NGC. WB-101. The 1839 proof No Drapery Seated Liberty half dollar is a celebrated 19th century rarity and a one-year design type that will appeal to series specialists and advanced type collectors alike. Walter Breen recognized three specimens in his 1977 *Encyclopedia of United States and Colonial Proof Coins*, but his list contained an example in the Norweb Collection, and that famous gathering did not have a representative of this issue when it was sold in the late 1980s. PCGS population data list only two examples and estimate a survival of two to four pieces in all grades, while NGC has certified six specimens, including an unknown number of resubmissions and crossovers (12/18). Randy Wiley and Bill Bugert estimated “less than six” different coins were extant in 1993, a figure that closely agrees with our roster, which identifies six individual pieces today. One of the coins known to us has been impounded in the collection of the Bibliothèque Nationale in Paris since 1858.

Prominent coin dealers S.H. and H. Chapman described an example of the 1839 No Drapery half dollar in lot 539 of the Richard B. Winsor Collection (Chapman, 12/1895):

“1839 Liberty clad in a chiton, seated on a rock, her right hand supporting a U.S. shield, her left a staff of liberty, 13 stars; ex’g date. R. as 1836 but with HALF DOL instead of 50 CENTS. Edge milled. Type 1839-1865. Brilliant proof, very slightly hairmarked. Sharp impression. No drapery from elbow. Excessively rare. See plate.”

The lot brought \$16.50, the same amount as an 1842 Small Date proof half dollar in lot 545, and much more than any other Seated Liberty half in the sale. More recent appearances include the PR65 NGC (now PR64+ PCGS) specimen in lot 2481 of the Central States Signature (Heritage, 4/2009), which realized \$241,500.

The present coin has no traceable auction history before it appeared in a Stack’s sale in 1996. It may be the specimen included in a proof set from a European holding discovered by Marc Emory in 1981. It is an impressive PR62 specimen, with sharply detailed design elements and reflective fields that show attractive highlights of champagne-gold toning. A few minor hairlines are evident, accounting for the grade. The reverse shows the usual die crack through MERICA and HAL DOL that is seen on all examples of this issue. Any appearance of an 1839 No Drapery Seated Liberty half dollar is a major numismatic event and we expect intense competition when this lot is called.

Ex: U.S. Gold, Silver and Copper Coins (Stack’s, 10/1996), lot 300; Long Beach Signature (Heritage, 2/2016), lot 3238. Unknown previous pedigree, possibly the coin discovered in a European collection by Marc Emory in 1981.

From The Speechless Collection. NGC ID# 27SZ, PCGS# 6381

1841 Half Dollar, PR64

Only Eight Proofs Believed Extant

3616 1841 PR64 NGC. WB-102. The date shows repunching on the base of 18. This Choice proof was described in the Bowers and Merena catalog as: "Light gold toning with faint blue highlights over deeply reflective fields. Boldly struck with every detail extremely sharp." We add that the patina occurs primarily around the borders, while the centers are only delicately toned. The central motifs feature a moderate degree of frost, and although it is insufficient to warrant a Cameo designation, the field-device contrast remains noticeable.

The number of 1841 proof half dollars struck is unknown, but there is no doubt of the issue's extreme rarity today. Breen reported nine appearances and believed that five were different examples. The Wiley-Bugert reference wrote "less than 6 [proofs] known." In the John Jay Pittman catalog, David Akers explained that he had verified six 1841 proof halves. Our auction records suggest eight examples are extant.

Roster of Proof 1841 Half Dollars

- 1. PR65+ NGC.** Boys Town Sale (Superior, 5/1990), lot 3803 (as PR64 NGC); Long Beach Signature (Heritage, 5/2008), lot 718; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98500; Baltimore Auction (Stack's Bowers, 3/2015), lot 13079.
- 2. PR65 NGC.** James Kelly (privately, 1946); John Jay Pittman Collection, Part II (David Akers, 5/1998, lot 1522); Richmond Collection (David Lawrence, 3/2005), lot 1786; C.L. Lee Sale (America Numismatic Rarities, 9/2005), lot 413; Pre-Long Beach (Ira & Larry Goldberg, 2/2006), lot 1472.
- 3. PR64 NGC.** John G. Mills (S.H. and H. Chapman, 4/1904), lot 896; J.M. Clapp; Clapp Estate, to Louis E. Eliasberg, Sr. (1942); Eliasberg Collection (Bowers and Merena, 4/1997), lot 1919; Phil Kaufman; FUN Signature (Heritage, 1/2008), lot 3021; FUN Signature (Heritage, 1/2013), lot 5655; Long Beach Signature (Heritage, 9/2013), lot 6446.
- 4. PR64 NGC.** Dr. R.H. Wilson; 1952 ANA Sale (New Netherlands, 8/1952), lot 310; Elliot Landau Collection (New Netherlands, 12/1958), lot 575; Dr. James O. Sloss Sale (Bowers and Merena, 1/1999), lot 1137; unknown intermediaries; purchased from Pinnacle Rarities (4/2008); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98712. **The present coin.**
- 5. PR62.** Charles A. Cass; Empire Collection (Stack's, 11/1957), lot 1352; Reed Hawn Collection (Stack's, 8/1973), lot 132; Auction '81 (RARCOA, 7/1981), lot 137; Auction '90 (Stack's, 8/1990), lot 210; Brooklyn Sale (Stack's, 3/2007), lot 849.
- 6. PR61 PCGS.** Rarities Sale (Bowers and Merena, 7/2005), lot 550; Philadelphia Signature (Heritage, 8/2012), lot 5154.
- 7. Proof.** Smithsonian Institution.
- 8. Proof.** American Numismatic Society.

Additional Appearances

- A. Proof.** David Golding (Stack's, 6/1952), lot 232.
- B. Proof.** Gustav Lichtenfels Collection (Kreisberg and Schulman, 2/1961), lot 2806. "Brilliant Proof. Sharp square edge. One of the very few in existence. Rare." Unplated.
- C. Proof.** Amwest (7/1981).
- D. Proof.** George H. Earle (H. Chapman, 6/1912), lot 2970. NGC ID# 27T3, PCGS# 6385

1856 Half Dollar, PR64+ Cameo
Rare Proof Issue, Border-Toned

- 3617** 1856 PR64+ Cameo PCGS. CAC. Ex: Teich Family Collection. An unknown but undoubtedly small number of proof 1856 half dollars made their way from the U.S. Mint to collectors' hands, and the best survivors from the issue enjoy high demand today. This PR64+ Cameo specimen deserves particular praise for its gorgeous interplay of contrast and color. Pale interiors have a strong cameo effect, particularly on the reverse, while the margins offer gold, orange, and indigo patina in colorful bands. A few tiny surface imperfections leave the grade just shy of full Gem status. Population: 3 in 64 (1 in 64+) Cameo, 2 finer. CAC: 1 in 64, 2 finer (12/18).

From *The Teich Family Collection*. NGC ID# 27TF, PCGS# 86410

1881 Half Dollar, PR67 Cameo
Top-Grade Rarity

- 3618** 1881 PR67 Cameo NGC. Type One Reverse. Dramatic contrast is provided by the ice-white devices and mirrored fields. This brilliant Superb Gem proof has only one remotely mentionable identifier: a thin horizontal planchet flaw in the reverse field that passes through the top of the eagle's right (facing) wing. The strike is sharp, with incompleteness only present on the eagle's left (facing) ankle and on the highpoints of Liberty's chest. Only 975 proofs and 10,000 business strikes were issued in 1881. No Ultra Cameos are reported at NGC. Census: 3 in 67 Cameo (1 in 67 ★), 0 finer (12/18).

From *The Speechless Collection*. NGC ID# 27UG, PCGS# 86442

PROOF BARBER HALF DOLLAR

1895 Barber Half Dollar, PR68
Registry-Grade Example

- 3619** 1895 PR68 NGC. Only 880 silver proof sets were struck at the Philadelphia Mint in 1895. The proof sets were especially important to Morgan dollar collectors because no business-strike coins are known, despite Mint records that indicate 12,000 examples were struck. Most of the proof sets were broken up in the early 20th century to satisfy collector demand for the rare dollars. Subsequently, the smaller denomination coins were often just spent for face value, as they realized only small premiums when offered at auction. As a result, the 1895 proof Barber half dollar is an elusive issue today, especially in high grade.

The present coin is a spectacular PR68 specimen, with razor-sharp detail on all design elements. The virtually pristine surfaces include deeply reflective fields, under vivid shades of emerald-green, grayish-gold, and cobalt-blue. Eye appeal is terrific. Census: 12 in 68 (2 in 68 ★), 0 finer (12/18). NGC ID# 24NX, PCGS# 6542

WALKING LIBERTY HALF DOLLARS

1916-S Walking Liberty Half, MS65 Rarely Available Finer

- 3620 1916-S MS65 PCGS. CAC.** The first-year San Francisco issue is only marginally scarce in MS65, but CAC-approved coins in this grade are rare. PCGS lists just 14 finer representatives (12/18). This piece shimmers with original, frosty luster and it is almost entirely free of contact marks. Some minor strike weakness is visible in the centers. Neither side has significant toning, although a blush of light golden color makes an appearance around the borders.
From The Speechless Collection. NGC ID# 24PN, PCGS# 6568

1917-S Half Dollar, MS63 Obverse Mintmark

- 3621 1917-S Obverse Mintmark MS63 PCGS.** This well-detailed Select example of the popular 1917-S Obverse Mintmark half dollar displays flecks of golden color over primarily frosty silver surfaces. Minor chatter on the drapery and a couple of ticks in the upper-right obverse field are all that are seen. RU in TRUST is soft, and rim crumbling occurs along the border above IB. NGC ID# 26G7, PCGS# 6572

1918-S Walking Liberty Half, MS65 Bold Strike, Colorful Surfaces

- 3622 1918-S MS65 NGC.** The 1918-S Walking Liberty half dollar claims a substantial mintage of 10.2 million pieces, as there was an enormous demand for coinage from the booming U.S. economy in the last year of World War I. Unfortunately, few high-quality examples were saved by contemporary numismatists, making the 1918-S difficult to locate in high grade. In addition, the 1918-S is a strike-rarity, with almost all examples seen showing some softness on the central design elements.

The present Gem is a welcome exception to the rule, with a bold strike that shows clear separation between Liberty's thumb and fingers on the wreath hand. Emerging (but not full) detail also shows on other trouble spots, like Liberty's head and the eagle's leg. Attractive shades of champagne-gold and lavender toning enhance the well-preserved surfaces, with vibrant mint luster and terrific eye appeal. Census: 36 in 65, 3 finer (12/18). NGC ID# 24PX, PCGS# 6576

1919-D Half Dollar, MS64
Above-Average Strike
Rarely Offered in Finer Condition

- 3623 1919-D MS64 PCGS Gold Shield. CAC.** The 1919-D is the rarest Walking Liberty half dollar in Gem condition, and it is scarce even at the Choice grade level. This issue is also weakly struck more often than not, contributing to its rarity in high grade. This near-Gem is above-average in that regard, showing partial thumb separation on Liberty's branch hand and moderate head detail. Incomplete definition is still visible on Liberty's thigh and the eagle's trailing leg. A few light marks in the right obverse field prevent Gem assessment but are not bothersome. Just left of Liberty's figure, in the field, a small bluish toning spot serves as a pedigree marker, but the coin is otherwise brilliant. An outstanding example of this condition key in the Walking Liberty half dollar series. There are only 12 finer submissions at PCGS (12/18). NGC ID# 24PZ, PCGS# 6578

1920-D Half Dollar, MS64
Underrated in High Grades

- 3624 1920-D MS64 PCGS. CAC.** The 1920-D is one of the most difficult Walking Liberty half dollars in high grades, but it is still underrated outside of the specialist community. Satin mint luster illuminates this near-Gem, highlighting the faint traces of golden color that reside over its otherwise brilliant surfaces. Liberty's head is razor-sharp, and ticks are generally well-hidden. CAC: 18 in 64, 12 finer (12/18). NGC ID# 24R4, PCGS# 6581

1921 Half Dollar, AU55
Second Lowest Mintage in the Series

- 3625 1921 AU55 PCGS.** A low mintage of 246,000 coins ensures the 1921 will always remain at the top of collectors' want lists. This Choice AU example grades more than 35 points higher than the typical certified survivor. Soft mint frost remains beneath the thin overlay of golden color. A sharply struck example with minimal wear and abrasions. NGC ID# 24R6, PCGS# 6583

1927-S Half Dollar, MS65
Popular Date

- 3626 1927-S MS65 PCGS Gold Shield.** Walking Liberty half dollar output was confined to the San Francisco Mint in 1927, and only 2.3 million coins were struck. These factors account for the issue's popularity, but comparable Gems are conditionally scarce. Only eight coins are graded numerically finer, all at PCGS (12/18). Well-struck devices appear over frosty, untuned surfaces. A handful of luster grazes in the right obverse field prevent an even higher grade. NGC ID# 24RA, PCGS# 6587

1927-S Half Dollar, MS65
CAC-Approved Condition Rarity

3627 1927-S MS65 PCGS. CAC. In 1927, only the San Francisco Mint struck half dollars. This issue circulated extensively, and few high-grade pieces were preserved for numismatists. In Gem condition, the date is scarce, and CAC-approved coins are rare. This piece displays bright, untoned surfaces and satiny luster. The usual strike weakness is noted on the central high points and Liberty's head. PCGS lists only eight numerically finer representatives, NGC none. Population: 84 in 65 (7 in 65+), 8 finer. CAC: 27 in 65, 5 finer (12/18).

From The Speechless Collection. NGC ID# 24RA, PCGS# 6587

1943-S Half Dollar, MS67
Among the Finest at Both Services

3628 1943-S MS67 PCGS. Large S. Gems and Premium Gems are plentiful for this late-date San Francisco issue (13.4 million coins struck), but finer coins like this are scarce and impossible to upgrade with none finer. Completely brilliant and well-struck, each side of this frosty Registry coin displays excellent preservation. Free of marks to mention. Population: 49 in 67 (1 in 67+), 0 finer (12/18). NGC ID# 24SB, PCGS# 6620

FRANKLIN HALF DOLLARS

1949-S Half Dollar, MS67 Full Bell Lines
Tied For Finest at Both Grading Firms

3629 1949-S MS67 Full Bell Lines NGC. About 10% of the 1949-S Franklin half dollars at NGC have been designated as Full Bell Lines. This early date in the series is a significant rarity at this level, with none finer at either grading service. S-mint frost shines through pale lavender-gray toning over the centers that cedes to golden-orange toward the rims. Void of apparent contact. Census: 9 in 67 (1 in 67+ Full Bell Lines, 2 in 67+★), 0 finer (12/18). NGC ID# 24SV, PCGS# 86655 Base PCGS# 86655

1949-S Half Dollar, MS67+ ★ Full Bell Lines
Among the Best-Preserved Examples

3630 1949-S MS67+ ★ Full Bell Lines NGC. This is one of two Superb Gem 1949-S Franklin halves at NGC with Full Bell Lines and both a Plus and Star designation for quality and eye appeal. It is an important offering, destined for the finest set and should command a significant premium. The obverse is wholly toned in original multicolor patina dominated by shades of crimson, orange-gold, and rose-violet. Similar tones cling to the reverse margins, leaving the center largely brilliant. Census: 9 in 67 (1 in 67+ Full Bell Lines, 2 in 67+★), 0 finer (12/18). NGC ID# 24SV, PCGS# 86655 Base PCGS# 86655

1953-S Half Dollar, MS65 Full Bell Lines
Significant Strike Rarity, One Coin Finer

- 3631 1953-S MS65 Full Bell Lines NGC.** The 1953-S Franklin half dollar claims an unassuming mintage of 4.1 million coins and is a readily available issue through Premium Gem condition. However, examples are hardly ever found with Full Bell Lines, making this Gem a significant rarity. Indeed, while NGC has graded more than 5,700 1953-S halves, the services reports merely 14 FBL submissions, including eight coins in MS65 and a single MS66 finer (12/18).

Specks of crimson and gunmetal patina occur around the obverse border. That side is otherwise frosty and brilliant, while the reverse is richly toned in similar hues. The devices exhibit pinpoint-sharp detail, and there are just a couple of small reeding marks on the forehead and lower curls. This would make a great addition to a specialized collection. NGC ID# 6L2Y, PCGS# 86666

1955 Half Dollar, MS67
Sole Finest Non-Full Bell Lines Coin

- 3632 1955 MS67 NGC.** The 1955 half dollar is a rarity with or without Full Bell Lines at the Superb Gem grade level. This is the only non-Full Bell Lines MS67 at NGC (or PCGS), and there are only six FBL examples at that service (12/18). Shades of blue, violet, and gold lighten toward near-brilliant interiors. Frosty and sharply defined on each side. A prize for the Franklin half dollar specialist. NGC ID# 24TC, PCGS# 6670

PROOF FRANKLIN HALF DOLLAR

1951 Franklin Half, PR68
None Certified Finer

- 3633 1951 PR68 NGC.** The second year of postwar proof sets witnessed a modest increase in sales. 57,500 proofs were struck, only a fraction of the production for the final three dates of the proof series, each of which exceeded 3 million pieces. This is a brilliant, fully struck, and immaculate Superb Gem. Census: 22 in 68 (1 in 68 ★), 0 finer (12/18). NGC ID# 27VB, PCGS# 6692

EARLY DOLLARS

1795 Flowing Hair Dollar, AU53
B-5, BB-27, Three Leaves
Essential Type Coin

- 3634 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, AU53 PCGS Gold Shield.** Bowers Die State III, as often seen, with a die line from the branch stem to the rim. The 1795 BB-27 dollar is an essential type coin, by far the most collectible Flowing Hair dollar variety, and one of the few that is accessible in high grades. Bowers writes:

“Due to the depth of the Miss Liberty portrait in the die, the resultant coins were in high relief. ... On some (but not all) higher grade coins, usually Die State III in EF or finer preservation, the hair detail at the center of the obverse and the eagle’s breast feathers are well defined.”

This AU53 dollar features good detail on the upper and lower curls, though typical blending occurs over the middle of the high-relief portrait and the eagle’s breast. The legends and other border elements are fully struck. Wear is trivial, and each side exhibits pleasing silver-gray patina with golden accents. Surprisingly clean for the grade. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Draped Bust Dollar, XF40
Off Center, B-14, BB-51

- 3635 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, XF40 PCGS.** Bowers Die State I. This attractive XF specimen exhibits strongly impressed design elements, with some light wear on the high points. Most interior detail remains intact on the drapery and Liberty’s hair. The glossy lavender-gray surfaces are lightly abraded, but a planchet flaw is evident at 10 o’clock on the reverse rim. Housed in a green label holder. Population (for the variety): 2 in 40, 12 finer (12/18). NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1797 Draped Bust Dollar, VF25
10x6 Stars, Large Letters, B-3, BB-71

- 3636 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF25 PCGS.** Bowers Die State III, with lapped leaves near the final A in AMERICA. The obverse features a 10x6 star arrangement, identifying the BB-71 variety. This attractive VF25 example shows moderate wear on the devices, with the left side of the drapery worn smooth at the shoulder. The lightly abraded surfaces are toned in shades of lavender-gray and amber. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1798 B-23, BB-105 Silver Dollar, AU50
Late Die State

- 3637 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, AU50 PCGS Gold Shield.** The late die state, also known as B-23a, shows lapping of both dies. The obverse is missing almost all of the highest curl, and is missing much of curl 2, adjacent to star 1. The reverse has missing details in the clouds, especially cloud 3 below AT in STATES. Typical for this variety, the central design motifs are weakly defined. The surfaces are light ivory with nearly full luster. Trivial marks are inconsequential. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

1798 Heraldic Eagle Dollar, AU55
Pointed 9, B-13, BB-108

- 3638** 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, AU55 NGC. Bowers Die State II, featuring a die crack above right edge of L(BERTY). BB-108 is a plentiful die marriage with the following diagnostic markers: star 7 away from the L, arrowhead under the right foot of the N in UNITED, and the leaf tip pointing to the left serif of the I in AMERICA. Glints of luster issue from surfaces lightly toned in lavender and golden-gray patina. This bold Draped Bust dollar is well-struck with trivial friction. NGC ID# 24X6, PCGS# 40025 Base PCGS# 40018

1799/8 B-3, BB-141 Silver Dollar, AU58+
15 Stars Reverse

- 3639** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, AU58+ PCGS Gold Shield. The reverse die with 15 stars was apparently an engraving blunder as the design called for 13 stars. To literally cover his error, the engraver enlarged the top left and right clouds to hide the two extra stars, but points of each star are still visible. The obverse die was likely engraved early in 1798, and shows scattered die rust. The reverse die appears slightly bulged, weakening the central details. This is a spectacular representative with lovely gold and iridescent toning over its lustrous silver surfaces. Population: 14 in 58 (1 in 58+), 17 finer (12/18). NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

1799 7x6 Stars Dollar, Richly Toned AU50
B-8b, BB-165, Advanced Die Stage

3640 1799 7x6 Stars, B-8b, BB-165, R.3, AU50 NGC. Bowers Die State III. Like many Bust dollars, BB-165 examples are generally attainable up to the XF level, and then there is a sharp reduction in availability. This appealing About Uncirculated representative is notable for its smooth, problem-free surfaces and its rich, original coloration. Gunmetal-blue and brownish-gray shades combine with chestnut-gold undertones. Mint luster shines through the rich patina — especially at the margins. The strike is crisp except at the central field stars above the eagle's head, a striking feature that is often seen on the variety in its later die stages. NGC ID# 24X7, PCGS# 6878

1799 7x6 Stars Draped Bust Dollar
B-14, BB-167, Sharp AU58

3641 1799 7x6 Stars, B-14, BB-167, R.3, AU58 NGC. Bowers Die State III, with a thin crack along the tops of the AM in AMERICA. This available variety shows star 13 nearly touching the bust, and the 1 in the date nearly touching the hair curl. High-grade examples are rarely offered. This near-Mint coin shows only a trace of high-point friction that prevents it from receiving a Mint State grade. The strike is incredibly sharp — every obverse border star is fully defined, and only a few of the reverse stars above the eagle are incomplete. Complete border dentils surround each side. Varied pastel hues tone the fields and devices, and no distracting abrasions are present. Significant luster remains. NGC ID# 24X7, PCGS# 40058 Base PCGS# 6878

1800 Draped Bust Dollar, AU50
Guide Book Dotted Date, B-14, BB-194

- 3642** 1800 Dotted Date, B-14, BB-194, R.3, AU50 PCGS. Bowers Die State II. This popular *Guide Book* variety is easily recognized by the series of die lumps around the first 0 in the date. The BB-194 is reasonably available in lower circulated grades, but Mint State examples are rare. This pleasing AU example exhibits strongly impressed design elements with some light wear on the high points. The lightly abraded surfaces are toned in shades of lavender-gray and blue-steel. Population (for the variety): 1 in 50, 6 finer (12/18). NGC ID# 24X9, PCGS# 40078 Base PCGS# 6889

1802 Draped Bust Dollar, AU55
Narrow Date, B-6, BB-241

- 3643** 1802 Narrow Date, B-6, BB-241, R.1, AU55 NGC. CAC. Bowers Die State III, with the lapped obverse showing incomplete detail on the lower curls. This attractive Choice AU specimen exhibits sharply detailed design elements with just a touch of high-point wear. The smooth, lightly abraded surfaces are toned in shades of slate-gray, with occasional highlights of golden-tan. A few hints of original mint luster shine through the patina. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

GOBRECHT DOLLARS

1836 Gobrecht Dollar, AU Details
Judd-60 Original, Die State E

- 3644** 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1 — Repaired — PCGS Genuine. Proof, AU Details. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State E. This die state was struck just after the widely recognized State D, that shows the straight, slanted die clash mark above the eagle's wing. The coin was struck on a defective planchet that still shows long streaks of porosity on the lower reverse. The repair consists of numerous pinscratches in the obverse fields. Moderately toned.

1836 Gobrecht Dollar, Deeply Mirrored PR63
Judd-60, Die Alignment I
Ex: Richmond Coin

- 3645** 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1, PR63 NGC. Ex: Richmond Collection. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State E. Struck midway through the final week of 1836, as indicated by the rim nick above the A in STATES and die chip in the dentils to the right of the R in DOLLAR.

We don't want to extend ourselves too far here, and first it needs to be noted that only one true proof Gobrecht dollar exists in the sense that we understand the word today, the Korein-47 coin (now in the ANS). But ... this piece should really be examined closely. The fields are suggestive of a modern proof and have more mirroring on each side than 99% of the Judd-60s we have seen. A couple of times have we thought we have seen a true proof in the modern sense, only to have the coin discounted by John Dannreuther or Craig Sholley as having fields that are similar to a Deep Mirror Prooflike Morgan. Maybe this one is also, but if you are searching for the closest Gobrecht dollar to a modern proof, then this piece is worth your time.

The surfaces are almost brilliant with a light golden haze present. The appearance, in terms of color, depth of mirrors, and strike definition is well-balanced from side to side. A few light hairlines explain the grade, but do not detract. Housed in a special Red Book NGC slab and signed by Ken Bressett.

Ex: Richmond Collection, Part II (DLRC Auctions, 11/2004), lot 1458. NGC ID# BLWV, PCGS# 11225

SEATED DOLLARS

1840 Seated Liberty Dollar, MS62
First Year of Design

- 3646** 1840 MS62 PCGS. OC-3, R.3. Osburn-Cushing Die State a/a. A remarkable MS62 specimen from the first year of the design, this coin exhibits well-detailed design elements and lightly marked lustrous surfaces that show traces of prooflike reflectivity in sheltered areas. Both obverse and reverse were struck from dies that were previously used to strike proofs. Highlights of emerald-green and lavender-gray toning enhance the eye appeal. Population: 18 in 62 (2 in 62+), 14 finer (12/18). NGC ID# 24YA, PCGS# 6926

1846-O Seated Liberty Dollar, MS62
Rarely Seen Finer

- 3647** 1846-O MS62 NGC. OC-1, R.2. Osburn-Cushing Die State b/d, with die cracks through many obverse stars and a reverse crack from the left wing to the middle of U in UNITED. From a mintage of 59,000 pieces, the 1846-O Seated Liberty dollar is surprisingly difficult to locate in high grade. This attractive MS62 example exhibits well-detailed design elements, with a touch of the typical softness on the obverse stars. The lightly marked surfaces are blanketed in shades of cerulean-blue, magenta, and lavender-gray toning, with satiny mint luster underneath. Census: 8 in 62, 4 finer (12/18). NGC ID# 26GG, PCGS# 6933

1859-O Silver Dollar, MS64
Exceptionally Lustrous, Rare This Fine

- 3648** 1859-O MS64 PCGS. OC-3, R.2. The 1859-O is a go-to issue for type collectors, as Mint State pieces can be found with ease. However, near-Gem examples are conditionally rare, and finer representatives are nearly uncollectible. This piece showcases frosty, luminous mint luster with traces of light golden toning. The strike is sharp and there are no bothersome abrasions. Population: 32 in 64 (2 in 64+), 2 finer (12/18). NGC ID# 24YY, PCGS# 6947

TRADE DOLLARS

1874 Trade Dollar, MS65
Only Two Numerically Finer

- 3649** 1874 MS65 PCGS Gold Shield. CAC. No period after FINE, as often seen on this issue. Pretty much any Trade dollar issue is a condition rarity in MS65, although the 1874 Philadelphia coin a little more so than some later dates. The Trade dollar was first and foremost a trade coin, intended only for export. When it ultimately did circulate domestically, it caused a commercial use problem due to its heavy silver weight. It was never the subject of strong numismatic interest at the time of issue, and most collectors who did obtain examples often acquired proofs (which are plentiful today).

We have previously handled a Gem 1874 Trade dollar on only five occasions, and we have never seen a finer coin (although four are reported in total at PCGS and NGC). This piece is the most attractively toned Gem 1874 that we have seen, showing natural amber, lilac, and sky-blue toning overall. The fields are moderately reflective, although strike weakness around the borders and on the eagle's right (facing) leg confirms the business strike origin of this piece. Population: 6 in 65 (1 in 65+), 2 finer. CAC: 2 in 65, 2 finer (12/18). NGC ID# 252Z, PCGS# 7034

1874-CC Trade Dollar, MS63
Challenging Branch Mint Issue

- 3650 1874-CC MS63 NGC.** Micro CC, no period after FINE. Since most of the mintage was used in the China trade, the 1874-CC Trade dollar is one of the most challenging issues of the series in high grade. This impressive Select specimen offers well-detailed design elements, with some of the usual softness on the stars and peripheral die cracks on both sides. The lightly marked surfaces are blanketed in low-intensity shades of lavender-gray toning, with slightly subdued mint luster. Census: 28 in 63, 14 finer (12/18). NGC ID# 2532, PCGS# 7035

1876-CC Trade Dollar, MS61
Bright Semiprooflike Fields

- 3651 1876-CC Type Two Reverse MS61 NGC.** Tall CC. An interesting coin, the nearly untoned obverse contrasts markedly with the dappled orange-russet and charcoal patina that adorns the reverse. There is some light color at the upper-right obverse border, and every feature on both sides exhibits needle sharp striking definition. The scattered, grade-defining abrasions include a shallow scrape in the left reverse field. Still, a desirable coin for the grade with a pleasing semiprooflike finish. Census: 17 in 61, 29 finer (12/18).
Ex: Long Beach Signature (Heritage, 9/2002), lot 7251. NGC ID# 4EML, PCGS# 40113 Base PCGS# 7042

PROOF TRADE DOLLARS

1879 Trade Dollar, PR65
Sharp and Modestly Contrasted

- 3652 1879 PR65 NGC.** Every detail of the stars and devices is fully brought up on this Gem proof, glistening with satiny luster. The fields glimmer with mercury-like reflectivity. Although not pronounced enough for a Cameo designation, appreciable field-device contrast is apparent on both sides, warmed by a blush light golden toning. Only proof Trade dollars were struck in 1879, amounting to 1,541 pieces at Philadelphia. Proof coinage of the Trade dollar continued regularly through 1883. The 1884 and 1885 issues are ultra rare.

From The Speechless Collection. NGC ID# 27YR, PCGS# 7059

1879 Trade Dollar, PR65
Lovely Toning

- 3653 1879 PR65 PCGS. CAC.** Exuberant luster radiates from underneath moderately deep pinkish-gray toning on both sides, accented by glints of aqua at the rims. Tiny contact marks are noted on Liberty's left (right facing) breast and arm, but other than those, the pristine fields and devices show a near-complete absence of evident contact, confirming both the grade and the high aesthetic appeal. Exquisitely struck throughout. Population: 40 in 65 (3 in 65+), 28 finer. CAC: 11 in 65, 12 finer (12/18). NGC ID# 27YR, PCGS# 7059

1879 Trade Dollar, PR67
Vivid Multicolor Toning

- 3654 1879 PR67 PCGS.** The last commercial Trade dollar coinage was accomplished in 1878 at the San Francisco and Carson City Mints. In 1879, a production of 1,541 proofs from the Philadelphia Mint was the only issuance of this type. This mintage exceeded that of the proof Morgan dollar of the same year (1,100 pieces), and the Trade dollar experienced a higher survival rate than its Morgan counterpart. Nonetheless, in Superb Gem condition, both issues are similarly rare. PCGS has seen fewer than a dozen 1879 proof Trade dollars in PR67 and PR67 Cameo combined, with none so fine in the Deep Cameo category. The present coin is needle-sharp and displays thickly frosted devices set against deeply mirrored fields, but a Cameo designation is traded for rich gold, lavender, mint-green, and ocean-blue toning that blankets each side. Modest contrast yet emerges from beneath the patina. The coin is beautifully preserved and eye-appealing. Population: 6 in 67, 0 finer (12/18). NGC ID# 27YR, PCGS# 7059

1879 Trade Dollar, PR66 Cameo
High-End Proof Type Coin

- 3655 1879 PR66 Cameo NGC.** Satiny, ice-white luster glistens on the sharp devices of this Premium Gem Cameo proof, contrasted against liquidlike mirroring in the fields. Every detail of the design is sharp, and in this lofty grade, no contact marks distract from the immense eye appeal. A faint blush of golden border toning frames the brilliant interiors. Proof 1879 Trade dollars are rarely offered this fine. Census: 21 in 66 Cameo (1 in 66+, 3 in 66 ★), 27 finer (12/18).

From The Speechless Collection. NGC ID# 27YR, PCGS# 87059

1879 Trade Dollar, PR66 Cameo
Spectacular Quality and Appeal

- 3656 1879 PR66 Cameo NGC.** Starting in 1879, coinage of Trade dollars was restricted to proofs at Philadelphia, and demonetization of the denomination was less than a decade away. The proof mintages persisted through most of that time, however, presenting numismatists with a distinctive collecting opportunity. This is a gorgeous Premium Gem Cameo example of the 1879 issue, minimally toned save for a few small patches of haze. The devices on each side are attractively frosted. On the obverse, a curling lint depression below the date should serve as an effective pedigree marker. Census: 21 in 66 Cameo (1 in 66+, 3 in 66 ★), 27 finer (12/18).

From The Speechless Collection. NGC ID# 27YR, PCGS# 87059

1879 Trade Dollar, PR66 Cameo
Second Proof-Only Issue

- 3657** 1879 PR66 Cameo NGC. Beginning in 1878, and continuing through the end of the series, the Philadelphia Mint coined only proofs as they concentrated their efforts on Morgan. Proof production amounted to 1,541 Trade dollars in 1879, exceeded only by 1,987 proofs minted in the following year. This lovely Premium Gem Cameo proof exhibits brilliant white surfaces with deeply mirrored fields and fully lustrous. Census: 21 in 66 Cameo (1 in 66+, 3 in 66 ★), 27 finer (12/18). NGC ID# 27YR, PCGS# 87059

1880 Trade Dollar, PR66 Cameo
Lovely Golden Toning and Contrast

- 3658** 1880 PR66 Cameo NGC. Warm golden toning heightens the eye appeal of this Premium Gem Cameo, which is sharp throughout the design elements and starkly contrasted. Preservation is exceptional. The 1880 proof Trade dollar is a well-made issue, popular as a type coin. However, examples grading as fine as this piece are conditionally rare. Census: 34 in 66 Cameo (1 in 66+, 4 in 66 ★), 20 finer; 2 in 66 Ultra Cameo, 4 finer (12/18).

From The Speechless Collection. NGC ID# 27YS, PCGS# 87060

1882 Trade Dollar, PR66+
Attractive Multicolor Toning

- 3659** 1882 PR66+ NGC. From a relatively generous proof-only mintage of 1,097 pieces, this Plus-graded Premium Gem exhibits sharply detailed design elements in most areas, with the slightest touch of softness on Liberty's head. The impeccably preserved surfaces include deeply mirrored fields, under attractive shades of lavender and emerald-green toning. Census: 34 in 66 (1 in 66+, 1 in 66 ★), 5 finer (12/18). NGC ID# 27YU, PCGS# 7062

MORGAN DOLLARS

1878 Seven Tailfeathers Morgan, MS66
Reverse of 1879

- 3660** 1878 7TF Reverse of 1879 MS66 NGC. The 1878 seven tailfeathers issue was struck from both reverse hub types: the first with parallel top arrow feather, and concave breast on the eagle, often referred to as the Reverse of 1878, and the second variation, referred to as the Reverse of 1879, with a slanting top arrow feather, and convex, or rounded, breast to the eagle. The latter variety is considered to be scarcer in both circulated and Mint State grades. Q. David Bowers, in *A Guide Book of Morgan Silver Dollars*, fifth edition, estimates only 50 to 100 survivors in MS65 or better, versus an estimate of 1,000 to 1,800 MS65 or better Reverse of 1878 survivors. The Reverse of 1879 example we offer here is sharp, virtually untoned, and free of mentionable marks.

Ex: Dallas Signature (Heritage, 4/2007), lot 992, which realized \$10,350.

From The Dr. Joseph A. Murphy Collection, Part II. NGC ID# 253L, PCGS# 7076

1878-S Morgan Dollar, MS67
Rarely Offered So Fine

- 3661** 1878-S MS67 NGC. All 1878-S Morgan dollars have the Reverse of 1878. Although more than 9.7 million pieces were struck, this date is remarkably rare in Superb Gem condition. This brilliant, radiantly lustrous example displays a sharp strike and dazzling cartwheel luster, complemented by a hint of reflectivity in the obverse fields. The strike is sharp and the preservation is outstanding. Census: 37 in 67 (6 in 67 ★), 0 finer; 0 in 67 Prooflike, 1 finer (12/18).

From The Dr. Joseph A. Murphy Collection, Part II. NGC ID# 253R, PCGS# 7082

1879-CC Dollar, Lustrous MS62
Wisps of Gold and Powder-Blue

3662 1879-CC MS62 PCGS. Normal Mintmark. This is a well-known semikey issue from the historic Carson City Mint. A relatively small quantity of silver dollars was produced there in 1879, totaling 756,000 coins. Survivors prove challenging in mint condition. This coin is attractive for the MS62 grade, strongly struck, and awash in radiant frosty luster. Wisps of powder-blue and gold color are present on each side. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS63
Relatively Few Examples in the GSA Hoard

3665 1879-CC MS63 PCGS. Normal Mintmark. The 1879-CC dollar claims a small mintage of 756,000 pieces and only 4,123 examples were included in the GSA sales of the 1970s, making it the second most elusive Carson City Morgan. This attractive Select specimen exhibits sharply detailed design elements and lightly marked, lustrous surfaces, with outstanding eye appeal. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS63
Challenging Branch Mint Issue

3663 1879-CC MS63 PCGS Gold Shield. Normal Mintmark. Its small mintage of 756,000 pieces and limited representation in the GSA sales of the 1970s make the 1879-CC Morgan dollar a challenging issue in the Carson City series. This attractive Select specimen exhibits well-detailed design elements and lightly marked, lustrous surfaces with outstanding eye appeal. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, MS64
Second-Year Carson City Semikey

3666 1879-CC MS64 PCGS. CAC. Normal Mintmark. A second-year Carson City Morgan dollar and one of the most challenging issues in the series from this facility. Choice Uncirculated surfaces are brilliant and frosty, accented with wisps of gold. Definition is slightly soft, and roller marks appear on each side, particularly at the lower wreath. Scarce any finer. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, Frosty MS63
Blushes of Golden Color

3664 1879-CC MS63 PCGS. Normal Mintmark. Blushes of original golden patina complement this otherwise brilliant Carson City silver dollar from a mintage of 756,000 coins. The central design elements exhibit a trace of softness, as usual for this issue. The 1879-CC is a well-known Nevada mint semikey, trailing only the 1889-CC and 1893-CC in high grades. NGC ID# 253U, PCGS# 7086

1879-CC GSA Dollar, MS63
White and Semiprooflike

3667 1879-CC GSA MS63 NGC. VAM-4. A semiprooflike example of this key Carson City issue. Lightly toned and flashy with carefully preserved fields and the expected number of wispy facial marks. The hair above the ear is indistinct, but the remainder of the strike is good. A die line down from the nostril is the pick-up point, though also diagnostic is the light doubling on the second C in the mintmark. NGC ID# 253T, PCGS# 518848 Base PCGS# 7086

1879-CC Silver Dollar, MS63
In Original GSA Holder and Box

- 3668** 1879-CC GSA MS63 NGC. Frosty devices and semiprooflike fields adorn this untuned Select 1879-CC Morgan dollar. The strike is bold and grade-limiting abrasions are mainly restricted to Liberty's cheek, as often on GSA dollars. The 1879-CC is the second-scarcest Carson City Morgan in high grade, trailing only the key-date 1889-CC. Includes GSA box. NGC ID# 253T, PCGS# 518848 Base PCGS# 7086

1879-CC Morgan Dollar, MS62
Important Capped Die Variety

- 3669** 1879-CC Capped Die, VAM-3A, MS62 PCGS. A Top 100 Variety. The "Capped Die" variety occurred when small CC mintmark was partially effaced from the die and overpunched with a larger CC. This variety is definitely more difficult to locate than the perfect CC type, and has become popular with students of die varieties because of its dramatic appearance. This pleasing example is well-struck, with lustrous, brilliant surfaces.

Ex: Houston Signature (Heritage, 1/2010), lot 3862, where it brought \$4,168.75. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC Morgan Dollar, MS63
VAM-3, Capped Die

- 3670** 1879-CC Capped Die, VAM-3, MS63 PCGS. A Top 100 Variety. The popular "Capped Die" variety shows the remnants of a small, partially effaced, CC under the primary mintmark. This impressive Select specimen displays well-detailed design elements, with just the slightest blending on the hair above the ear. The lightly marked, lightly toned surfaces radiate vibrant mint luster. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC Morgan Dollar, MS64
Famous Capped Die Variant

- 3671** 1879-CC Capped Die, VAM-3, MS64 PCGS Gold Shield. A Top 100 Variety. A small CC mintmark was inadvertently punched into the die, then partially effaced and overpunched with a normal CC mintmark, creating the famous "Capped Die" variety. This well-detailed Choice example exhibits lightly marked, mostly brilliant surfaces that radiate vibrant mint luster throughout. PCGS has graded 15 numerically finer examples of this variety (12/18). NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC Morgan Dollar, MS64
Popular Capped Die Variety

- 3672** 1879-CC Capped Die, VAM-3, MS64 PCGS. A Top 100 Variety. The remnants of a smaller under-type CC are clearly visible beneath the primary mintmark, identifying the "Capped Die" variety. This attractive Choice example exhibits well-detailed design elements that show just a touch of the usual softness on the hair strands above Liberty's ear. The well-preserved surfaces radiate vibrant mint luster with outstanding eye appeal. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC Morgan Dollar, MS64
Top 100 VAM-3 Variety

- 3673** 1879-CC Capped Die, VAM-3, MS64 NGC. A Top 100 Variety. Shades of lavender and golden-brown toning blanket the well-preserved surfaces of this impressive Choice Morgan dollar, with vibrant satiny mint luster underneath. The primary mintmark is plainly overpunched on a smaller, partially effaced CC, identifying the "Capped Die" VAM-3. The design elements are well-detailed, with just a trace of the usual blending on the hair above the ear. NGC has graded seven numerically finer specimens of the variety (12/18). NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-O Morgan Dollar, MS66
Among the Finest at NGC

- 3674 1879-O MS66 NGC.** NGC has seen only 10 Premium Gem examples of the 1879-O Morgan, and none finer. This is a major condition rarity in the series. Liberty's cheek is pristine on this untoned MS66 example, and only a few truly faint grazes in the fields prevent an even finer designation. A sharp strike further advances the appeal. An essential acquisition for Registry Set collectors. Census: 9 in 66, 0 finer; 1 in 66 Deep Prooflike, 0 finer (12/18). *From The Dr. Joseph A. Murphy Collection, Part II.* NGC ID# 253X, PCGS# 7090

1879-S Morgan Dollar, MS65
Elusive Reverse of 1878 Variety

- 3675 1879-S Reverse of 1878 MS65 PCGS.** This is a sharp Gem with frosty, brilliant mint luster and only a few light, scattered abrasions. The Reverse of 1878 comprises a minority of the 1879-S Morgan dollar survivorship, and in Gem condition this issue is genuinely scarce. Offered here is a lovely example, with only a handful of finer pieces known. Population: 62 in 65 (3 in 65+), 2 finer (12/18). *From The Speechless Collection.* NGC ID# 253W, PCGS# 7094

1880-S Dollar, MS68
Almost Impossible to Upgrade

- 3676 1880-S MS68 PCGS.** Large S. The 1880-S is one of the most plentiful issues in the series, readily collectible through MS68. There are even a handful examples certified in MS69, but they command extremely strong prices when offered. This outstanding type coin has a crescent of multicolor toning along the obverse border from 12 o'clock to 6 o'clock. The remainder of each side is brilliant and thickly frosted. NGC reports five finer submissions (12/18). NGC ID# 2544, PCGS# 7118

1880-S Dollar, MS68
Nearly Perfect Surfaces

- 3677 1880-S MS68 PCGS.** Large S. This truly is a coin that has to be seen to be fully appreciated. The intense mint frost is virtually unaffected by abrasions of any size. Fully struck, of course, and brilliant throughout. This is the ultimate Morgan type coin, and this lofty grade level it is virtually impossible to improve upon. PCGS has only certified five finer pieces (12/18). *Ex: Santa Clara Signature (Heritage, 11/2002), lot 6477.* NGC ID# 2544, PCGS# 7118

1880-S Morgan Dollar, MS68
Sharply Detailed, Impeccably Preserved

- 3678 1880-S MS68 NGC.** CAC. Large S. The San Francisco Mint struck a large production of 8.9 million Morgan dollars in 1880 and the coins were uniformly well-produced. This stunning MS68 specimen exhibits sharply detailed design elements throughout and the virtually pristine surfaces radiate vibrant mint luster from both sides. Overall eye appeal is terrific. NGC has graded five numerically finer examples (12/18). NGC ID# 2544, PCGS# 7118

1881 Dollar, MS65 Deep Mirror Prooflike
None Finer at PCGS or NGC

- 3679 1881 MS65 Deep Mirror Prooflike ANACS.** *Ex: Miller Plate Coin.* A reflective finish enhances the minimally abraded surfaces of this Gem example with Deep Mirror Prooflike contrast. Cobalt-blue and golden-russet toning is evident at the rims, furthering the eye appeal. The 1881 is seldom seen with this degree of mint frost and liquidlike fields, and none are graded higher at the leading certifications services. The coin does not match the 1881 plates in Wayne Miller's *Morgan and Peace Dollar Textbook*. NGC ID# 3RG7, PCGS# 97125

**1882 Morgan Dollar, MS67
Top-Grade Condition Rarity**

- 3680 1882 MS67 NGC.** The finest 1882 Morgan dollars are graded MS67, all are non-Prooflike pieces, and they are rare. Fewer than two dozen Superb Gems are reported at NGC and PCGS combined (12/18). This NGC coin is untoned and radiantly lustrous, showing a full strike and nearly flawless preservation. Eye appeal is outstanding on this important Registry coin. Census: 10 in 67 (1 in 67 ★), 0 finer (12/18).

From The Dr. Joseph A. Murphy Collection, Part II. NGC ID# 254A, PCGS# 7132

**1882-CC Silver Dollar, Frosty MS67
High-End and Scarce**

- 3681 1882-CC MS67 PCGS Gold Shield.** The 1882-CC Morgan dollar is occasionally available in MS67, but finer pieces are far out of reach for most collectors. This Superb Gem showcases frosty original mint luster and a dusting of pastel-gold, blue, and lavender toning along the left-hand side of the obverse. The reverse is mainly brilliant. Both sides are well-struck, and only a few faint graces on Liberty's cheek prevent an even finer grade. Population: 100 in 67 (4 in 67+), 1 finer; 2 in 67 Prooflike, 0 finer; 1 in 67 Deep Mirror Prooflike, 0 finer (12/18). NGC ID# 254S, PCGS# 7134

**1882-O Dollar, MS66 ★
Beautifully Toned**

- 3682 1882-O MS66 ★ NGC.** NGC has not graded a single Prooflike 1882-O dollar finer than MS65. This Star-designated Premium Gem is lustrous rather than prooflike, and it shows a bold strike and satiny surfaces. Vivid rainbow toning arcs across the upper obverse and spills over onto the lower-left portion of the reverse periphery. A few tiny marks on Liberty's cheek are all that prevent an even finer grade. Census: 13 in 66 (2 in 66 ★), 1 finer (12/18).

From The Dr. Joseph A. Murphy Collection, Part II. NGC ID# 254C, PCGS# 7136

1883-CC Dollar, Brilliant MS67

- 3683 1883-CC MS67 PCGS. CAC.** Even though only 1.2 million pieces were struck of the 1883-CC dollar, this issue constituted a significant portion of the GSA holdings of (mostly) CC dollars that were sold off in the 1970s. This is a remarkably clean dollar, unlike most of the baggy CC dollars that were part of the GSA holdings. Each side is brilliant and fully struck, the surfaces are brilliant throughout. NGC ID# 254J, PCGS# 7144

**1884-S Morgan Dollar, Untoned MS60
Surprisingly Strong Eye Appeal**

- 3684 1884-S MS60 NGC.** Abundant cartwheel luster rolls around both sides of this frosty S-mint key-date Morgan dollar. The untoned silver-white surfaces show numerous luster grazes and scrapes, including on the cheek and temple of Liberty and in the reverse fields that account for the grade. The eye appeal is nonetheless surprisingly high for a coin in this grade. NGC ID# 254P, PCGS# 7156

**1885-CC Morgan Dollar, Frosty MS67
Spectacular Registry Candidate**

- 3685 1885-CC MS67 NGC. VAM-2.** Luminous, frosty mint luster engulfs this virtually pristine 1885-CC Morgan dollar, and neither side exhibits toning. The eagle's breast is slightly soft, as is the hair above Liberty's ear, but these are minor considerations on this immensely attractive Carson City dollar. The 1885-CC is a rarity in circulated grades, and until the GSA sales of the 1970s, it was also scarce in Mint State. More than 148,000 pieces were distributed through the GSA sales. Superb Gems represent the best of these, although coins in this condition are not always available on demand.

From The Dr. Joseph A. Murphy Collection, Part II. NGC ID# 254S, PCGS# 7160

1886-O Silver Dollar, MS64
Outstanding Luster and Sharpness

- 3686 1886-O MS64 PCGS.** Radiant cartwheel luster rolls across nearly brilliant surfaces on this Choice 1886-O Morgan dollar. Such is rarely seen on the 1886-O, and this piece is also better struck than typical for the issue. Only a few faint grazes on the obverse prevent Gem classification. The 1886-O Morgan is relatively elusive in this grade, and finer pieces are almost uncollectible. PCGS lists only four finer examples, including a lone Deep Mirror Prooflike Superb Gem (12/18).

From The Dr. Joseph A. Murphy Collection, Part II. NGC ID# 254W, PCGS# 7168

1888-O Dollar, MS63+
VAM-1B4, Scarface Variety

- 3687 1888-O Scarface, VAM-1B4, MS63+ PCGS Gold Shield.** A Top 100 Variety. This die is known in various stages, with the final two (VAM-1B3 and VAM-1B4) showing a massive diagonal die break across the portrait that gives the variety its "Scarface" moniker. This example, the latest state with the crack to the neck, features a crescent of blue, violet, and orange patina at the left obverse border. The remainder of the coin is mostly brilliant with typical O-mint satin luster. Soft at the centers and lightly marked. NGC ID# 2556, PCGS# 133918 Base PCGS# 87184

1889 Morgan Dollar, MS67
Finest Certified at NGC

- 3688 1889 MS67 NGC.** Vivid shades of sea-green and magenta toning blanket the well-preserved surfaces of this remarkable Superb Gem. Especially vibrant mint luster shines through the patina. The design elements exhibit razor-sharp definition throughout and overall eye appeal is terrific. Census: 1 in 67, 0 finer (12/18). NGC ID# 2558, PCGS# 7188

1889-CC Morgan Dollar, AU50
Scarce Branch Mint Issue

- 3689 1889-CC AU50 ANACS.** The well-known key to the Carson City series of Morgan dollars, the 1889-CC enjoys great demand in all grades. This piece shows light wear on the high points as the grade suggests, retaining considerable luster on its light gray surfaces, with pleasing golden peripheries.

Ex: Houston Signature (Heritage, 11/2012), lot 4261, realized \$4,993.75. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, AU58
Key Carson City Issue

- 3690 1889-CC AU58 NGC.** The 1889-CC Morgan dollar is a demand rarity, and it is a key date in the series. No other Carson City Morgan is as sought-after and elusive. The bulk of the survivorship grades VF or lower, and there are a small number of Mint State pieces known for ambitious, well-heeled collectors. What are lacking in the market are attractive AU coins. This near-Mint example displays original satin luster in the fields, complementing sharp central devices that show only slight high-point friction. Both sides are smooth without noticeable abrasions. Eye appeal is pleasing. This attractive 1889-CC dollar displays a blush of light golden toning on each side. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, MS62
Scarce, Low-Mintage Issue

3691 1889-CC MS62 PCGS. The 1889-CC Morgan dollar claims a low mintage of 350,000 pieces. There was little collector interest in branch mint issues before Augustus Heaton published his treatise on mintmarks in 1893, so few examples were saved by contemporary collectors. Most of the coins were released into circulation in the 19th century and the small mintage suffered heavily from attrition over the years, making the 1889-CC the most elusive Morgan dollar from the Carson City Mint.

The present coin displays sharply detailed design elements and lightly marked brilliant surfaces with vibrant mint luster on both sides. Overall eye appeal is quite strong for the issue and the 1889-CC is definitely scarce in finer grades. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, MS62
Rare So Fine With CAC Approval

3692 1889-CC MS62 PCGS. CAC. CAC has appropriately endorsed this 1889-CC dollar for quality within the grade, eye appeal, and originality. That is no small feat. Most 1889-CC lack a numeric grade because of various surface problems, usually cleaning, and those that do survive in problem-free condition are typically well-circulated or heavily bagmarked. The surfaces of this example are absolutely clean for the MS62 assessment, and small abrasions on the cheek are minimal. This untoned Carson City dollar displays luminous mint frost and a strong impression. Much finer than the typical VF30 representative, and rare so nice with a green approval sticker. CAC: 19 in 62, 15 finer (12/18). NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, MS63
Sought-After Carson City Key

3693 1889-CC MS63 PCGS. CAC. The Carson City Mint resumed coinage operations in October of 1889, after a nearly four year hiatus. The famous Western facility accomplished a small mintage of 350,000 Morgan dollars in the short three months before the year ran out. There was little numismatic interest in branch mint issues at the time, so few high-quality examples were saved by contemporary collectors. As a result, the 1889-CC is the most challenging issue in the Carson City series and a sought-after key to the heavily collected Morgan dollar set.

The present coin is an attractive Select specimen, with sharply detailed design elements and lightly marked, lustrous surfaces. Hints of sea-green and lavender toning add to the considerable eye appeal. PCGS has graded 34 numerically finer examples (12/18). NGC ID# 2559, PCGS# 7190

1890 Dollar, MS65 Deep Mirror Prooflike
Appealing Cameo Contrast

3694 1890 MS65 Deep Mirror Prooflike PCGS Gold Shield. This Philadelphia Mint Morgan dollar issue is readily available through Gem condition, but it is scarcely seen in any grade with Deep Mirror Prooflike contrast. Coins of this quality are rare and unsurpassed at PCGS or NGC. Richly frosted and fully struck relief elements stand out in stark contrast to the glassy fields. The cameo effect is highly appealing. Population: 11 in 65 Deep Mirror Prooflike, 0 finer (12/18). NGC ID# 3VX7, PCGS# 97197

1892 Dollar, Frosty MS65+

3695 1892 MS65+ PCGS Gold Shield. There were actually fewer Morgan dollars minted at Philadelphia than there were at San Francisco in 1892. However, while the 1892-S is a storied condition rarity, the 1892 is collectible through MS65, becoming rare any finer. Brilliant surfaces present sharp strike definition, except over Liberty's ear. Luminous mint frost enhances the appeal of this minimally marked, high-end Gem. PCGS has seen merely nine finer submissions (12/18). NGC ID# 255L, PCGS# 7212

1892-CC Morgan Dollar, MS65
Creamy, Lustrous Surfaces

3696 1892-CC MS65 PCGS Gold Shield. This attractive Gem Morgan dollar exhibits well-detailed design elements with an extensive number of spidery peripheral die cracks on both sides. The well-preserved surfaces show no mentionable distractions and vibrant mint luster radiates from all angles. Eye appeal is outstanding. PCGS has graded 39 numerically finer examples (12/18). NGC ID# 255M, PCGS# 7214

1892-O Morgan Dollar, MS65
Lustrous, Well-Preserved Example

- 3697 1892-O MS65+ PCGS Gold Shield.** The 1892-O Morgan dollar is a scarce issue at the MS65 grade level and finer coins are condition rarities. This attractive Plus-graded Gem exhibits a typical strike for a New Orleans issue, with just a touch of softness on the hair above the ear. The well-preserved, lustrous surfaces show subtle hints of pink toning with outstanding eye appeal. Only eight coins finer at PCGS (12/18). NGC ID# 255N, PCGS# 7216

1892-S Silver Dollar, AU58
Semiprooflike Fields

- 3698 1892-S AU58 NGC.** Aside from some brief field chatter and a few tiny marks and faint lines, the surfaces of this conditionally scarce 1892-S dollar are remarkably problem-free given their semiprooflike qualities. The strike is sharp and actual wear is difficult to discern. The coin is virtually untoned save for a glint of gold at the rims. A near-Mint example, challenging at this level and any finer.
Ex: New York Signature (Heritage, 10-11/2016), lot 4924, which realized \$3,055. NGC ID# 255P, PCGS# 7218

1893 Morgan Dollar, MS62
Elusive Prooflike Example

- 3699 1893 MS62 Prooflike NGC.** The 1893 Morgan dollar is a low-mintage Philadelphia issue that is seldom encountered with prooflike surfaces. This impressive MS62 specimen exhibits sharply detailed design elements and deeply mirrored fields, under attractive shades of lavender-gray toning. The surfaces are lightly marked for the grade. Census: 2 in 62 Prooflike, 1 finer (12/18). NGC ID# 255R, PCGS# 7221

1893-CC Silver Dollar, MS62
Final-Year Carson City Issue

- 3700 1893-CC MS62 PCGS.** The Carson City Mint ceased silver dollar production on May 23, 1893, after striking 677,000 pieces during the first five months of the year. Despite the ample mintage, this issue is relatively scarce by Morgan dollar standards, especially in high grade. Only a single coin was reportedly distributed through the GSA sales of the 1970s, the source of large quantities of other Carson City issues. This example is brilliant and well-struck for the issue, with a hint of reflectivity in the fields. Scattered abrasions are light and unobtrusive. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, MS63
Frosty With Blushes of Golden Color

- 3701 1893-CC MS63 PCGS.** This is the second most popular Carson City Morgan dollar after the famous 1889-CC. Survivors from a mintage of 677,000 coins are usually heavily abraded. The obverse does show the usual marks on Liberty's cheek, but the reverse is comparatively clean. Each side exhibits crisp detail and frosty luster with blushes of golden color. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, Brilliant MS63
Last Year of the Carson City Mint

- 3702 1893-CC MS63 NGC.** Bowers opines of the final Carson City Morgan dollar issue: "A piece MS-63 or finer, with minimum bagmarks, is a numismatic find and is very special." Here is one such coin with fully brilliant, nearly prooflike surfaces that show typically incomplete central definition. Larger bagmarks are limited to three depressions in the vicinity of the eagle's left (facing) wing. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, Lightly Toned MS63
A Better Carson City Issue

- 3703 1893-CC MS63 PCGS.** This frosty, lightly toned Select Uncirculated 1893-CC Morgan displays clean fields with only a few light abrasions on Liberty's cheek. The central high points are considerably weak, as is often the case on Carson City Morgans of the 1890s, particularly the 1893. A pleasant cartwheel effect adds to the visual appeal. Demand remains strong for attractive late-date Carson City Morgans in high grade. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, All-Brilliant MS63

- 3704 1893-CC MS63 PCGS. CAC.** Always a collector-favorite, the 1893-CC is a much scarcer CC dollar as well as the final year of issue for the Carson City Mint. This piece displays flashy mint luster and is exceptionally well-struck. This fully brilliant dollar displays a snow-white appearance overall. Lightly peppered with abrasions, thus explaining the grade.
Ex: Palm Beach Signature (Heritage, 11/2004), lot 9795, where it realized \$6,900. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS64
Final-Year Collector Favorite

- 3705 1893-CC MS64 PCGS.** The 1893-CC dollar has always been a collector's favorite due to its scarcity and status as the last Carson City Mint coin of its denomination. In his *Silver and Trade dollar Encyclopedia* (1993), Dave Bowers writes:

"Mint bags of 1893-CC dollars came on the market as early as 1920 at face value through the Cash Room at the Treasury in Washington and, in particular, from storage at the San Francisco Mint. However, the quantity was small in comparison to certain other Carson City dates, particularly those of the early and mid-1880s. The supply seems to have been exhausted by the late 1950s, and there are no records of any quantities being paid out after that time."

A hint or two of light tan color appears under magnification on the near-Gem being offered in this lot. Lustrous surfaces yield some prooflike tendencies in the fields, with the consequent mild contrast with the motifs. The design elements are sharply detailed, with fine definition on the hair at Liberty's ear and the eagle's breast feathers. A few minute obverse marks and luster grazes preclude the assignment of full Gem classification. PCGS lists only 15 numerically finer representatives (12/18). NGC ID# 255S, PCGS# 7222

1893-O Morgan, Semiprooflike MS63
Better Date in High Grade

3706 1893-O MS63 PCGS. The 1893-O Morgan dollar is a great rarity in the series with prooflike fields. This Select example does not carry a Prooflike designation, although it is moderately reflective in the fields. A band of light golden toning stretches horizontally across the reverse, but the remainder of the coin is brilliant. A few faint grazes on Liberty's cheek are all that prevent a finer grade. Some strike weakness is noted above Liberty's ear and on the eagle's breast, as usual for New Orleans dollars of the mid-1890s.

From The Dr. Joseph A. Murphy Collection, Part II. NGC ID# 255T, PCGS# 7224

1893-O Dollar, MS64
Conditionally Rare Morgan

3707 1893-O MS64 PCGS. Very scarce in any condition, the 1893-O is especially elusive in Mint State. Fewer than 100 pieces have been certified in MS64 by PCGS, with only six finer (12/18) — not many coins for the thousands of Morgan dollar collectors in this country. This piece is essentially untoned with shimmering, even semiprooflike luster, and a sharper strike in the centers than is often seen for this issue. There are a few minor facial marks, and some contact on the breast of the eagle, but certainly nothing serious for a coin in this grade. The surfaces are frosty and bright, mostly white with just a hint of peripheral reverse mottling. A very pleasing example of this scarce date.

Ex: Baltimore Signature (Heritage, 7/2003), lot 8795.

From The Speechless Collection. NGC ID# 255T, PCGS# 7224

1893-S Morgan Dollar, VF25
In an Old Green Label Holder

- 3708 1893-S VF25 PCGS.** Bright, untoned surfaces show moderate wear on this midgrade 1893-S Morgan dollar, consistent with the grade. Scattered light marks are not bothersome. The 1893-S is the heralded series key date in all grades, although it is plentiful in VF and lower levels for the casual date and mintmark collector. This piece is housed in an old green label holder. NGC ID# 255U, PCGS# 7226

1893-S Dollar, VF25
Steel-Gray With Olive-Gold Accents

- 3709 1893-S VF25 PCGS.** This is a readily appealing example for the VF25 grade level. Considerable blending merges the finer points of the hair curls and breast feathers, but the overall impression remains clear. Minimally marked steel-gray surfaces exhibit olive-gold accents within the protected areas. From a series-low mintage of 100,000 coins. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, VF35
Business-Strike King of the Series

- 3710 1893-S VF35 PCGS. CAC.** The eagle's breast and wingtips show considerable wear, but almost all the lines in Liberty's hair remain intact. The pleasing, lightly abraded surfaces are blanketed in attractive shades of lavender-gray and amber toning. The 1893-S Morgan dollar is universally regarded as the key to the series, due to its minuscule mintage of 100,000 pieces. NGC ID# 255U, PCGS# 7226

1894 Morgan Dollar, MS63
Low-Mintage Philadelphia Key

- 3711 1894 MS63 PCGS Gold Shield.** The 1894 Morgan dollar claims one of the smallest production totals of the series, at a meager 110,000 pieces. This attractive Select specimen exhibits sharply detailed design elements throughout and the lightly marked surfaces show faint highlights of pale gold and lavender toning. Vibrant mint luster adds to the outstanding visual appeal. NGC ID# 255V, PCGS# 7228

1894-O Morgan Dollar, MS64
Rare Any Finer

- 3712 1894-O MS64 NGC.** This fully brilliant near-Gem has nearly pristine fields, and the eagle and wreath are unabraded. Moderate facial contact and lightly impressed centers are all that limit the grade. The 1894-O has a higher mintage than the 1893-O and 1895-O but is typically found in circulated grades and is very rare above the MS64 level. The holder commemorates the *Guide Book* and is signed by Ken Bressett. NGC has graded eight numerically finer examples (12/18).
Ex: Long Beach Signature (Heritage, 6/2011), lot 4090, realized \$6,037.50. NGC ID# 255W, PCGS# 7230

1894-S Morgan Dollar, MS65
Condition Rarity in Finer Grades

- 3713 1894-S MS65 NGC.** A flashy Gem that exhibits great eye appeal. With 1.2 million pieces produced, the 1894-S is surpassed in mintage by the 1894-O among 1894-dated Morgan dollars, but it is still more available than either the '94-P or the '94-O in Mint State. In Gem, the 1894-S is a noteworthy condition rarity in its own right. On this example, the strike is sharp and the fields are clean. Die polish marks on both sides are not to be confused with scratches. The surfaces are bright and display just a touch of hazy toning. The holder commemorates the *Guide Book* and is signed by Ken Bressett. Census: 40 in 65 (1 in 65+, 1 in 65 ★), 12 finer (12/18).
Ex: FUN Signature (Heritage, 1/2007), lot 7333, realized \$4,887.50. NGC ID# 255X, PCGS# 7232

1894-S Silver Dollar, MS65+
Rare Any Finer, Semiprooflike Fields

- 3714** 1894-S MS65+ PCGS. Moderately available through MS64, the 1894-S Morgan dollar becomes scarce at the Gem level and is rare any finer. This Plus-designated representative displays sharp, satiny devices set against semiprooflike fields. A light champagne glow warms each side, and grade-limiting abrasions are scant. PCGS has seen only 19 superior representatives (12/18). NGC ID# 255X, PCGS# 7232

1894-S Morgan Dollar, MS65+
Seldom Seen Finer

- 3715** 1894-S MS65+ PCGS. CAC. The unusual but attractive toning pattern on each side of this Gem 1894-S dollar includes untuned silver-gray areas that alternate with charcoal, rose, cinnamon, and bluish-gray patina. Even a loupe fails to reveal more than scattered, insignificant contact marks. Some light roller marks appear on the hair over the ear and on the cheek. An extremely attractive coin for the grade. PCGS has graded 19 numerically finer examples (12/18). NGC ID# 255X, PCGS# 7232

1895-O Morgan, Minimally Marked AU58

- 3716** 1895-O AU58 PCGS. An AU58 example of this issue is “just right” for many collectors, as a Mint State example with minimal abrasions is going to cost 3x-5x as much. This silver-white piece shows top-notch eye appeal and friction that is barely perceptible on the high points. Liberty’s cheek is nicely preserved. This piece would fit well into a mostly Mint State fine Morgan dollar collection. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, MS60
Elusive Branch Mint Issue

- 3717** 1895-O MS60 ANACS. The effects of the Panic of 1893 were still being felt in 1895 and there was little demand for silver dollars in the national economy. No business-strike Morgan dollars are known from the Philadelphia Mint, and the branch mints both struck only nominal mintages. At the New Orleans facility, a meager production total of 450,000 pieces was accomplished. The issue was not well-produced and few examples were saved for numismatic purposes. As a result, the 1895-O is the third-rarest Morgan dollar in Mint State grades, behind the 1893-S and 1892-S.

This attractive Mint State specimen offers well-detailed design elements, with some of the typical softness on the hair above the ear and the eagle’s breast. The surfaces are lightly marked for the grade and retain much original mint luster. NGC ID# 255Y, PCGS# 7236

1895-S Dollar, MS62
Elusive Date in Mint Condition

- 3718 1895-S MS62 NGC.** Brightly untuned surfaces display hints of reflectivity in the fields. The centers and date show a touch of softness, but the rest of this Uncirculated 1895-S dollar from a low mintage of 400,000 coins is well-defined. A challenging date to obtain in high grades, since the only other issue for the year, the 1895-O, is a major condition rarity, exacerbating demand for the 1895-S. NGC ID# 255Z, PCGS# 7238

1895-S Morgan Dollar, MS62
Scarcer S-Mint Issue

- 3719 1895-S MS62 NGC. CAC.** An attractive MS62 representative of this low-mintage San Francisco Mint issue, with well-detailed design elements that exhibit just a touch of the typical softness on the hair above the ear. The lightly marked surfaces are lustrous and appealing, with subtle highlights of sea-green toning on both sides. NGC ID# 255Z, PCGS# 7238

1895-S Dollar, MS63
Nearly 30 Grade Points Above Average

- 3720 1895-S MS63 PCGS.** Morgan dollar production was restricted to 400,000 coins at the S-mint and 450,000 pieces at the O-mint, making this one of the most challenging dates in the series. With the 1895-O practically uncollectible at this level, there are no other options for collectors. Characteristic mint frost washes over this mostly brilliant Select example. Golden-orange accents appear intermittently around the edges. Scattered bagmarks and slight central softness limit the grade. NGC ID# 255Z, PCGS# 7238

1895-S Morgan Dollar, MS64
Low-Mintage S-Mint Issue

- 3721 1895-S MS64 NGC. CAC.** The 1895-S Morgan dollar claims a low mintage of 400,000 pieces and many Mint State examples suffer from excessive bagmarks, making the issue rare in grades above MS64. This attractive Choice example exhibits well-detailed design elements, with just a touch of the usual softness on the hair above the ear. The lustrous, well-preserved surfaces show speckled highlights of sea-green toning. NGC has graded 15 numerically finer examples (12/18). NGC ID# 255Z, PCGS# 7238

1896 Morgan Dollar, MS67+
Impressive, Lovely Type Coin

- 3722 1896 MS67+ PCGS.** The 1896 was a reasonably high-mintage issue that followed a proof-only date (1895), and has proven to be a popular selection for type collectors that is readily available up to and including the MS66 grade level. As a Superb Gem this Philadelphia Mint date becomes much scarcer, and the + designation by PCGS further elevates the conditionally impressive status of this lovely example. It is essentially untuned, save for a slight degree of golden-yellow color on the left side of the reverse, with sharply struck design features and remarkably clean surfaces. Population: (30 in 67+), 2 finer (12/18). NGC ID# 2562, PCGS# 7240

1896-S Dollar, MS64+
Bright Mint Frost

- 3723 1896-S MS64+ PCGS Gold Shield. CAC.** The 1896-S transitions from elusive but obtainable in Choice Uncirculated condition to scarce and prohibitively expensive for most collectors in MS65. This Plus-graded, CAC-approved near-Gem radiates bright mint frost from surfaces that show blushes of pale almond-gold patina around brilliant interiors. A touch of softness is limited to the centers. NGC ID# 2564, PCGS# 7244

1897-O Dollar, MS64
Satin With Red-Gold Accents

- 3724 1897-O MS64 PCGS Gold Shield.** Reddish-gold toning colors the design recesses, while the open areas are nearly brilliant and awash in soft, satiny mint luster. This near-Gem is expectedly incomplete over the centers but detail is still relatively good for a New Orleans dollar. The 1897-O is plentiful in circulated and lower Uncirculated grades. Survivors in MS64 are conditionally scarce. PCGS reports 14 finer submissions (12/18). NGC ID# 2565, PCGS# 7248

1900-O/CC Dollar, MS66+
VAM-8, Early Die State
A Top 100 Variety

- 3725 1900-O/CC VAM-8, MS66+ PCGS Gold Shield. CAC.** A Top 100 Variety. VAM-8 was discovered by Leroy Van Allen in December 1965. The underlying CC mintmark is shifted left with remnants clearly visible on each side of the primary O. In later stages pitting develops around the mintmark and the dies become clashed. This impressively detailed New Orleans Morgan dollar exhibits near-total brilliance, save for a splash of golden color at 11 o'clock on the reverse. Both sides are surprisingly frosty and incredibly clean. Just a few small ticks appear on Liberty's neck. PCGS reports two finer submissions for all 1900-O/CC varieties (12/18). NGC ID# 256G, PCGS# 133960 Base PCGS# 7268

**1901 Morgan Dollar, MS63
P-Mint Condition Rarity**

3726 1901 MS63 PCGS. The 1901 Morgan dollar claims a substantial mintage of nearly 7 million pieces, but the issue is scarce in MS63 condition, and finer coins are rare. It seems likely that a significant number of coins were released into circulation at the time of issue, and the 1901 can be found in AU grades with a little patience. Most of the coins held in government storage were probably melted in 1918, under the provisions of the Pittman Act. The 1901 was not well represented in the Treasury releases of the 1960s.

The 1901 dies were impressed from the new C4 hub, with reduced definition on Liberty's hair and the eagle's breast feathers. The present coin exhibits a better-than-average strike in these areas, and the design elements are sharply rendered, on the whole. The lightly marked, brilliant surfaces radiate vibrant mint luster, with outstanding eye appeal. PCGS has graded 36 numerically finer examples (12/18). NGC ID# 256J, PCGS# 7272

**1902-S Morgan, MS66
Rare Any Finer**

3727 1902-S MS66 PCGS. Swirling cartwheel luster envelopes both sides of this Premium Gem 1902-S, an issue that is virtually unavailable in a finer grade. The sharply struck silver-white surfaces on both sides are almost completely devoid of perceptible color. There are few visible abrasions, yet the only mark of note appears above the stars to the right of the date. The fields display semiprooflike reflectivity, while some faint roller marks are seen on the obverse upon close examination. Population: 56 in 66 (7 in 66+), 5 finer (12/18). NGC ID# 256P, PCGS# 7282

**1904-S Morgan Dollar, MS64
Elusive CAC-Approved Coin**

3728 1904-S MS64 NGC. CAC. This better 20th century issue is occasionally available in MS64, but rarely with CAC endorsement. Finer pieces are scarce. This near-Gem displays untuned, satiny mint luster with remarkably few discernible abrasions. A touch of the usual strike softness is visible on the eagle's breast and the hair above Liberty's ear, although it is not bothersome.

From The Dr. Joseph A. Murphy Collection, Part II. NGC ID# 256W, PCGS# 7294

**1904-S Dollar, MS65
Incredibly Clean, Originally Toned**

3729 1904-S MS65 PCGS Gold Shield. This Gem 1904-S dollar features dappled violet, blue, and tan-gold patina over softly frosted, well-preserved surfaces. The obverse is slightly deeper in hue than the reverse, but both sides are obviously original. The centers show typical strike softness, yet there are incredibly few bagmarks for a 1904-S. Only 19 coins are graded higher at PCGS (12/18). NGC ID# 256W, PCGS# 7294

1904-S Dollar, MS65
Sought-After Late-Date Issue

- 3730 1904-S MS65 PCGS.** Somewhat like the 1903-S, this late-date San Francisco issue is collectible in circulated condition (more so than the 1903-S), but high-grade pieces are notable rarities. Examples of the 1904-S trickled out of the San Francisco Mint throughout the first half of the 20th century. Bowers writes that a few bags came on the market in the early 1940s, augmenting dealers' inventory for a long time. This brilliant Gem showcases frosty luster over well-preserved surfaces. The hair over Liberty's ear and the eagle's breast are a touch soft, as usual, but there are no other imperfections to report. PCGS shows 19 submissions graded higher (12/18). NGC ID# 256W, PCGS# 7294

PROOF MORGAN DOLLARS

1880 Morgan, Near-Brilliant PR66
Modestly Contrasted

- 3731 1880 PR66 PCGS.** A relatively large number of proof sets were ordered in 1880 because of widespread speculation in proof-only Trade dollars, which were discontinued for mass production in 1878 but continued in proof production through 1883 (excluding the ultra-rare 1884 and 1885 issues). As a result, the mintage of proof Morgan dollars, which were included in the sets, totaled a whopping 1,355 pieces. The issue is available in lower grades, but quite scarce at the Premium Gem level. The present coin is sharply struck, with brilliant, reflective fields and the slightest hint of gold overtones. Modest cameo contrast is apparent on each side.

From The Speechless Collection. NGC ID# 2724, PCGS# 7315

1880 Morgan Dollar, PR66
Obverse Cameo Contrast

- 3732 1880 PR66 NGC.** Brilliant across the interiors, this Premium Gem proof displays warm russet-gold border toning and is sharply struck. Appreciable cameo contrast is apparent on the obverse, although the reverse is slightly less contrasted, preventing a Cameo designation on the holder. Higher-grade 1880 proof Morgans are rare.

From The Speechless Collection. NGC ID# 2724, PCGS# 7315

1880 Morgan Dollar, PR66 Cameo
Well-Contrasted and Appealing

- 3733 1880 PR66 Cameo NGC.** Stark field-device contrast on both sides earns this Premium Gem proof a well-deserved Cameo designation. It is a fully struck coin, brilliant across the interiors with light golden toning around the borders. Neither side has bothersome contact marks. The proof 1880 Morgan dollar is highly sought-after in lofty grades such as this. Census: 35 in 66 Cameo (2 in 66+, 1 in 66 ★, 1 in 66+★), 42 finer; 0 in 66 Ultra Cameo, 1 finer (12/18).

From The Speechless Collection. NGC ID# 2724, PCGS# 87315

1881 Morgan, PR66 Cameo
Rarely Seen Contrasted in This Grade

- 3734 1881 PR66 Cameo NGC.** The proof 1881 Morgan dollar is scarce with cameo contrast, and no Ultra Cameos are reported at NGC. This Premium Gem Cameo displays a full strike and luminous satin luster. The obverse interior is brilliant, while the border and most of the reverse are light golden. This attractive proof type coin is beautifully preserved. Census: 12 in 66 Cameo, 17 finer (12/18).

From The Speechless Collection. NGC ID# 2725, PCGS# 87316

1887 Morgan Dollar, PR67 Cameo
Among the Finest Certified

3735 1887 PR67 Cameo NGC. Only 710 proof Morgan dollars were struck in 1887, but the business-strike mintage of more than 20 million pieces was a record that stood until 1921. Many prooflike coins exist, and some examples were mistaken for genuine proofs before the advent of third-party grading services. However, prooflike business strikes tend to lack strong elements of contrast, and few would qualify for a Cameo designation. In fact, relatively few proof examples have been awarded the coveted designation, and specimens at the Superb Gem level are extremely rare. To date, NGC has certified 10 examples in PR67 Cameo, with none finer; PCGS has only graded three coins in this exalted grade, and none finer (12/18).

The present coin is a magnificent Superb Gem proof, with brightly reflective fields and sharply frosted devices. Every detail of Liberty's hair and every feather on the eagle's breast is crisply defined. The field-device contrast is bold, and the slightest hints of attractive gold color can be seen when the coin is tilted in the light.

From The Speechless Collection. NGC ID# 27ZG, PCGS# 87322

1891 Silver Dollar, PR65
Modest Undesignated Contrast

3736 1891 PR65 PCGS. The mintage of 1891 proof Morgan dollars was a mere 650 pieces, and examples in Gem condition are definitely scarce today. The present coin features sharply detailed, frosty devices and brightly reflective fields. There is significant field-device contrast, although no Cameo designation has been awarded. A few field hairlines do not detract from the outstanding eye appeal. *From The Speechless Collection.* NGC ID# 27ZL, PCGS# 7326

1892 Silver Dollar, PR67
Conditionally Rare Proof Type Coin

3737 1892 PR67 NGC. An impeccable cameo proof that displays a glassy, untoned appearance with little of the often-seen weakness on the hair curls over Liberty's ear. The contrast between fields and devices is unmistakable and fragile fields have survived hairline-free and with only the most trivial disturbances. The 1892 proof is rarely offered this fine. Census: 15 in 67 (1 in 67 ★), 7 finer; 17 in 67 (3 in 67+), Cameo, 4 finer; 2 in 67 Ultra Cameo, 2 finer (12/18). *From The Speechless Collection.* NGC ID# 27ZM, PCGS# 7327

1893 Dollar, PR66 Cameo
Rare CAC-Approved Example

3738 1893 PR66 Cameo NGC. CAC. Fantastic eye appeal for this issue, struck on the cusp of the beautiful-proof era of Morgan dollars. The portrait is amply frosted, if a trifle softly struck on the hair over the ear, and the mirrors offer a gorgeous gleam. Light gold-orange toning covers parts of the fields, and deeper blue to violet hues appear in patches at the rims. Census: 12 in 66 Cameo (2 in 66+), 7 finer; 1 in 66 Ultra Cameo, 7 finer. CAC: 8 in 66, 1 finer (12/18).

From The Speechless Collection. NGC ID# 27ZN, PCGS# 87328

1894 Morgan Dollar, PR66
In-Demand P-Mint Proof

3739 1894 PR66 NGC. A fairly generous mintage of 972 proof Morgan dollars was accomplished at the Philadelphia Mint in 1894, to accompany one of the smallest business-strike mintages of the series (110,000 pieces). This delightful Premium Gem exhibits sharply detailed design elements and impeccably preserved surfaces, with deeply mirrored fields. Highlights of lavender-gray and sea-green toning are visible at certain angles. Census: 40 in 66 (1 in 66+), 34 finer (12/18).

From The Speechless Collection. NGC ID# 2577, PCGS# 7329

1894 Dollar, PR67+ Cameo
A Proof of the Highest Order
Fantastic Overall Quality

3740 1894 PR67+ Cameo NGC. This is a proof Morgan dollar of the highest order. Most examples of the 1894 (972 pieces) survive in PR63 to PR66 without Cameo contrast. Cameo proofs are scarce, and they are usually offered in PR66 and occasionally in PR67. Anything finer is rare, as are Ultra Cameo representatives. Additionally, all proof examples are subject to heightened demand given the conditional rarity of the 1894 is business-strike format. This wonderful Superb Gem appears flawless. Brilliant, well-contrasted surfaces are practically void of contact, and strike detail is unsurprisingly full. Faint golden accents are noted on the reverse. Census: 23 in 67 Cameo (3 in 67 ★), 6 finer (12/18). NGC ID# 2577, PCGS# 87329

1896 Morgan Dollar, PR66
Vivid Multicolor Toning

- 3741** 1896 PR66 PCGS Gold Shield. If cameo contrast is muted on this Gem proof Morgan dollar, that is only because both sides are covered in rich crimson, violet, and blue patina with golden accents. The fields are flashy and reflective, and the relief elements are typically strong. One of 762 specimens manufactured in 1896. NGC ID# 27ZT, PCGS# 7331

1897 Morgan Dollar, PR66 Cameo
Only 731 Pieces Struck

- 3742** 1897 PR66 Cameo NGC. This stunning Premium Gem proof exhibits sharply detailed design elements and deeply mirrored fields that set up bold cameo contrast with the frosty devices. The impeccably preserved surfaces are mostly brilliant, with faint highlights of pale gold toning. From a proof mintage of 731 pieces. Census: 7 in 66 Cameo, 21 finer (12/18). NGC ID# 27ZV, PCGS# 87332

1898 Morgan, PR67+ Cameo
Conditionally Rare Type Coin

- 3743** 1898 PR67+ Cameo PCGS. The 1898 was a well-made proof issue, often sharp and starkly contrasted. In fact, more high-end Deep Cameos are known than Cameos, as is shown in the population data. This high-end Superb Gem proof is on the cusp of a Deep Cameo designation. It is well-contrasted on both sides, although slightly more so on the reverse. A delicate champagne tint across the interiors cedes to russet and blue border toning, which frames the sharp, satiny central devices. Eye appeal is outstanding. Population: 1 in 67 (1 in 67+) Cameo, 1 finer; 18 in 67 (3 in 67+) Deep Cameo, 3 finer (12/18). NGC ID# 27ZW, PCGS# 87333

1898 Dollar, PR63 Ultra Cameo
Blatant Field-Device Contrast

- 3744** 1898 PR63 Ultra Cameo NGC. The proportion of proof 1898 dollars that survive with Ultra Cameo contrast attests to the production standards at the Philadelphia Mint during the final years of the 19th century. This dramatically contrasted example exhibits a thin veneer of golden color over mostly frosty silver surfaces. Minor hairlines limit the grade. NGC ID# 27ZW, PCGS# 97333

1898 Morgan Dollar, PR65
Brilliant Ultra Cameo Surfaces

- 3745** 1898 PR65 Ultra Cameo NGC. The 1898 Morgan dollar was one of the best-produced issues of the series in proof format. This delightful Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast dramatically with the richly frosted devices to produce a startling white-on-black cameo flash when this coin is tilted in the light. The brilliant surfaces show no mentionable distractions. Census: 14 in 65 Ultra Cameo (1 in 65+, 2 in 65 ★), 34 finer (12/18). NGC ID# 27ZW, PCGS# 97333

1900 Morgan Dollar, PR68
Registry Grade Example

- 3746** 1900 PR68 NGC. According to Mint records, a fairly generous mintage of 912 proof Morgan dollars was achieved in 1900. The coins were delivered in four batches, one delivery per quarter. The proofs were well-produced and many high-quality examples have survived. PCGS and NGC have certified a total of 18 coins in PR68, in various levels of contrast, but none have been seen in higher numeric grades (12/18).

The coin offered here is a magnificent PR68 example, with razor-sharp definition on all design elements. The impeccably preserved surfaces feature deeply mirrored fields and the devices have enough mint frost to create noticeable, if unacknowledged, cameo contrast. Delicate hints of pale gold toning add to the tremendous eye appeal. This coin should find a home in the finest collection or Registry Set. NGC ID# 3KYV, PCGS# 7335

1900 Morgan Dollar, PR66 Cameo
Scarce This Fine

3747 1900 PR66 Cameo PCGS. The proof 1900 Morgan dollar is quite rare with the Premium Gem Cameo designation, and Deep Cameos in this grade are out of reach for most collectors. The present coin is breathtaking, with crisply detailed, frosty devices and brilliant, mirrored fields. The coveted Cameo designation is well-deserved. Population: 12 in 66 Cameo, 5 finer; 3 in 66 (1 in 66+), 5 finer (12/18).

From The Speechless Collection. NGC ID# 3MNH, PCGS# 87335

1902 Dollar, PR64 Cameo
Rare With Such Contrast

3748 1902 PR64 Cameo NGC. This was a significant year for proof production, with the Mint switching to an entirely brilliant finish for the first time. Cameo examples are significant rarities, with only eight such coins at NGC and three at PCGS. This brilliant near-Gem displays dramatically reflective mirrors against surprisingly frosted motifs. A couple of alloy spots appear on the portrait — the only indication of color. Census: 1 in 64 Cameo, 8 finer (12/18). NGC ID# 2822, PCGS# 87337

PEACE DOLLARS

1924-S Peace Dollar, MS65
Few Finer Pieces Are Known

3749 1924-S MS65 PCGS. Available in lower grades, the 1924-S Peace dollar is conditionally scarce in MS65 and rarely encountered finer. This Gem showcases frosty mint luster with a blush of light golden toning. The coin is well-struck and has only a few light contact marks. PCGS lists a mere six finer examples of the 1924-S Peace dollar (12/18).

From The Speechless Collection. NGC ID# 257K, PCGS# 7364

1925-S Peace Dollar, MS65
A Condition Rarity

3750 1925-S MS65 NGC. Surviving examples of the 1925-S Peace dollar typically grade MS63 or MS64, and finer pieces are elusive. This lovely Gem exhibits frosty mint luster that illuminates the design motifs, themselves sharper than usually encountered. An exceptional example for the connoisseur. Census: 72 in 65 (2 in 65+), 1 finer (12/18). NGC ID# 257M, PCGS# 7366

1926-D Dollar, MS66+
On the Cusp of an Even Higher Grade

3751 1926-D MS66+ PCGS Gold Shield. CAC. This is a transitional grade level for the 1926-D. Gems are collectible but anything finer is a significant condition rarity. PCGS and CAC both believe this piece is on the cusp of an even higher grade. Preservation is outstanding; There are no marks visible on either side. Well-defined surfaces are entirely brilliant, glistening with satiny mint luster. PCGS reports eight finer submissions (12/18). NGC ID# 257P, PCGS# 7368

1927-D Peace Dollar, MS65
Scarce CAC-Approved Example

3752 1927-D MS65 PCGS. CAC. The 1927-D is a better Peace dollar issue, elusive in Gem condition and rarely offered finer. CAC-approved coins are especially scarce. This MS65 example displays radiant cartwheel luster and a delicate hint of light golden toning. The strike is sharp, and neither side exhibits bothersome abrasions. PCGS has seen 16 finer submissions. CAC: 52 in 65, 7 finer (12/18).

From The Speechless Collection. NGC ID# 257T, PCGS# 7371

1927-S Peace Dollar, Brilliant MS65
Almost Uncollectible Finer

3753 1927-S MS65 PCGS. This better-date Peace dollar boasts a small mintage of 866,000 pieces, the third-lowest in the series overall and the lowest from the San Francisco Mint. The issue is scarce in MS65 and nearly uncollectible finer. This Gem offers brilliant, frosty mint luster and a dazzling cartwheel effect. Well-struck design elements promote strong eye appeal. Population: 93 in 65 (10 in 65+), 2 finer (12/18).

From The Speechless Collection. NGC ID# 26J6, PCGS# 7372

1928-S Peace Dollar, MS65
Only One Coin Finer at PCGS

3754 1928-S MS65 PCGS. Although the 1928 Peace dollar is the low-mintage key date of the series, the 1928-S is a much more significant condition key. In MS65, the San Francisco issue is many times rarer than its Philadelphia counterpart, despite having a mintage that exceeds 1.6 million coins. This piece is frosty and untuned, showing original cartwheel luster. Only a few trivial surface grazes are visible beneath a loupe. Scarce in this grade, the 1928-S Peace dollar is nearly unknown finer, with just two pieces so graded at PCGS and NGC combined. Population: 66 in 65 (3 in 65+), 1 finer (12/18).

From The Speechless Collection. NGC ID# 257W, PCGS# 7374

1934-S Dollar, MS64
High-End Key With CAC Approval

3755 1934-S MS64 PCGS. CAC. With a mintage of 1 million coins, the 1934-S is the conditionally rare key date among Peace dollars, scarcely found in Gem condition and rarely any finer. Golden accents complement this frosty near-Gem. Well-struck throughout and a great high-end alternative to a prohibitive MS65 representative. NGC ID# 257Z, PCGS# 7377

1934-S Peace Dollar, MS65
Rarely Offered Finer

- 3756** 1934-S MS65 PCGS. A trifle more than 1 million silver dollars were struck at San Francisco in 1934, ensuring the relative scarcity of this issue in Gem condition. Finer representatives are rare. This MS65 coin displays frosty mint luster with a blush of delicate pastel and champagne toning. It is well-struck and eye-appealing. PCGS lists only 32 finer submissions (12/18).

From The Speechless Collection. NGC ID# 257Z, PCGS# 7377

ERRORS

1942 Lincoln Cent, MS63
Struck on a Dime Blank

- 3757** 1942 Lincoln Cent — Struck on a Dime Blank — MS63 NGC. A dime blank failed to pass through the upset mill to raise the rims. Instead, it ended up between cent dies, but its unusual straw-gold and cream-gray appearance (the zinc-plated steel cents were issued the next year) caused a fortunate finder to immediately set it aside. GOD WE exhibits the spreading toward the rim characteristic of wrong-planchet strikes. The upper left reverse is incompletely impressed. The insert bears the autograph of *Guide Book* editor Kenneth Bressett.

Two Cent Piece, MS61 Brown
Full Brockage Obverse

- 3758** Undated Two Cent Piece — Full Brockage Obverse — MS61 Brown PCGS. Struck between the reverse die and the reverse of a previously struck coin. The reverse is normal, but the obverse shows an incused, reversed, and expanded image of the reverse design. UNITED STATES OF AMERICA is absent on the brockage side, though the wreath is complete except for the ribbon ends. Such errors are rare on 19th century types. The origin of the error was a two cent piece that adhered to the obverse die during its strike. The reverse of that coin (not included) then acted as a die for a perfect brockage example (also not included). The present piece was then struck from the moderately expanded reverse of the obverse die cap.

GOLD DOLLARS

1849 Open Wreath Gold Dollar, MS65
Shimmering Golden-Orange Surfaces

- 3759** 1849 Open Wreath, D-4, Close Stars, MS65 PCGS Gold Shield. CAC. Breen-6004, Thin Date. The gold dollar was introduced in 1849 as a means of placing newly-found California gold into the channels of commerce. This example represents the first and single-year Open Wreath type. Golden-orange surfaces shimmer with vibrant mint frost, highlighting the dearth of abrasions on each side. The impression is bold, with a hint of softness on the middle curls and date. Population: 64 in 65 (1 in 65+), 17 finer. CAC: 6 in 65, 2 finer (12/18). NGC ID# 25B9, PCGS# 521671 Base PCGS# 7502

1849-O Gold Dollar, MS64
Open Wreath, Scarce So Fine

- 3760** 1849-O Open Wreath MS64 NGC. Variety 3. Lapped reverse. The first-year cachet of the 1849-O gold dollar explains its popularity, and a decent number of coins survive in lower Uncirculated grades for those who demand a Mint State representative. Choice pieces are more difficult to locate. The obverse is fully struck, while the reverse details are softened by die lapping. Vibrant luster flows across luminous lemon-gold surfaces. Census: 29 in 64 (4 in 64+), 16 finer (12/18). NGC ID# 25BE, PCGS# 7508

1852-D Gold Dollar, MS61
Exceptional Full Strike

- 3761** 1852-D MS61 PCGS Gold Shield. Variety 4-F. About 125 to 175 of these Type One Dahlonga gold dollars survive, according to Doug Winter. That total includes seven to 10 examples in Mint State, although the inflated population totals at PCGS and NGC are much higher. The original mintage for the 1852-D was 6,360 coins. This MS61 piece has bright yellow-gold surfaces and an exceptional full strike. The reverse is heavily cracked, and clash marks appear on each side. NGC ID# 25BS, PCGS# 7519

1855 Type Two Gold Dollar, MS63
Small Indian Head Design

- 3762** 1855 Type Two MS63 PCGS. CAC. Heavy clash marks appear on both sides of this Select Mint State Type Two gold dollar that exhibits frosty mint luster and splendid yellow-gold surfaces. A glass reveals the few trivial marks that prevent a higher numerical grade. An outstanding representative of this short-lived design. NGC ID# 25C4, PCGS# 7532

1855-C Gold Dollar, AU55
Challenging Charlotte Mint Issue

- 3763** 1855-C AU55 NGC. Variety 2. The second 5 in the date is centered slightly right under the A in DOLLAR. Probably around 350 1855-C gold dollars survive from a mintage of 9,803 coins. This is the second rarest Charlotte Mint issue in the series in high grades after the 1849-C Open Wreath. Each side is characteristically and struck from clashed dies. Faint marks appear over light yellow-gold surfaces. NGC ID# 25C5, PCGS# 7533

1856-D Gold Dollar, AU55
Challenging Branch Mint Issue

- 3764** 1856-D AU55 NGC. Variety 8-K. With a reported mintage of 1,460 pieces, the 1856-D gold dollar is one of the most challenging issues of the Dahlonga Mint series, regardless of denomination. This impressive Choice AU specimen is lightly worn and lightly abraded, with dramatic clash marks on both sides. Some localized softness is evident on the central reverse. Census: 9 in 55, 18 finer (12/18). NGC ID# 25CC, PCGS# 7543

1857-D Gold Dollar, Unc Details
Undervalued Dahlonga Issue

- 3765** 1857-D — Cleaned — NGC Details. Unc. Variety 9-L. From a mintage of 3,533 pieces, the 1857-D gold dollar is something of a sleeper, as it tends to get lumped together with the more available 1858-D and 1859-D issues in most collector's minds. This example exhibits well-detailed design elements, with mysterious raised segments from the dentils on the reverse. The surfaces remain lustrous and appealing, despite the noted cleaning. NGC ID# 25CE, PCGS# 7546

1860-S Gold Dollar, MS63
13,000 Coins Struck

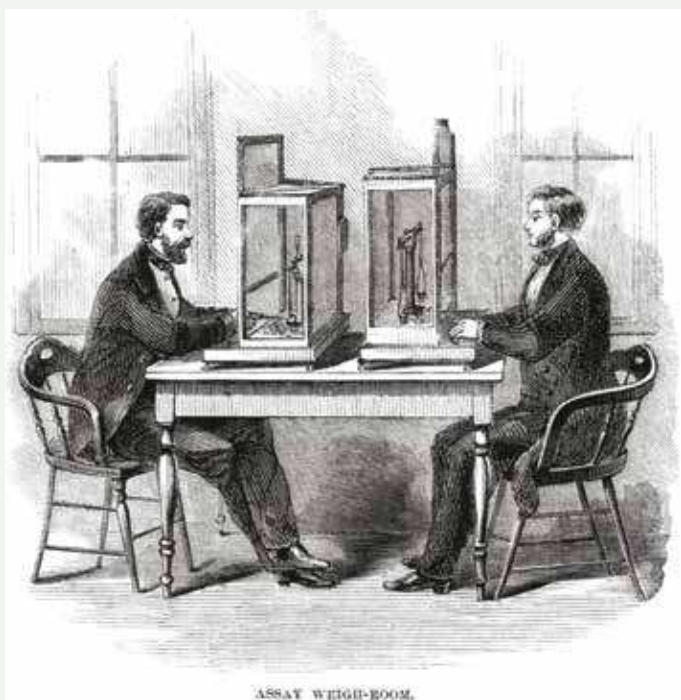

3766 1860-S MS63 NGC. Based on the certification totals at NGC and PCGS, we believe a fair survival rate for the 1860-S gold dollar is between 250 and 350 coins. About 20% of those are in Mint State, and only a handful are as fine as this fully struck Select Uncirculated example. A hint of reflectivity appears in the fields. Lustrous yellow-gold surfaces exhibit minor marks. Census: 5 in 63, 4 finer (12/18). NGC ID# 25CT, PCGS# 7557

1861-D Gold Dollar, XF Details
Struck Under the Confederacy

3767 1861-D — Cleaned — NGC Details. XF. Variety 12-Q. The 1861-D gold dollar is the rarest in the series from this mint, and it is unequaled in popularity due to the fact that the entire issue was coined under the auspices of the Confederacy, after the mint building was ceased from federal control. The number of coins struck is unknown, despite a *Guide Book* estimate of 1,250; Doug Winter, in *Gold Coins of the Dahlonega Mint*, third edition, writes that possibly as few as 500 to 1,000 pieces were struck. Only 65 to 75 coins are believed known today in all grades.

This XF-level coin is cleaned with hairlines, but the bright yellow-gold surfaces show no other problems. They are smooth, and wear on the devices is light. The lower obverse and upper reverse borders are considerably weak, as normal. Pleasing despite the cleaning. NGC ID# 25CV, PCGS# 7559

1864 Gold Dollar, MS69
Tied for Finest Known by Date, Type, and Series
Ex: Akers

3768 1864 MS69 NGC. In 1864, the Civil War raged on with severe consequences both on the battlefield and in commerce. The greenback could not hold its value and Confederate currency was worth next to nothing. Even the stalwart gold dollar fell victim to the war, with the Mint producing just 5,900 circulation strikes and 50 proofs for the year.

Many gold dollars found their way across the ocean and ended up in foreign hands. Business strikes were used to satisfy foreign obligations and to buy goods in the export trade, or to pay certain bond holders. Virtually none circulated, so today — although rare in all conditions — a proportionately large percentage of surviving 1864 gold dollars are in Uncirculated condition. Several of the Mint State pieces may have come back to U.S. shores from small hoards found abroad.

To be sure, 1864 gold dollars are rare in Gem or better condition. In near-perfect MS69 they are of highest rarity. PCGS and NGC have each graded one coin for the date in MS69 (12/18).

This jewel-like gold dollar previously in the Akers Collection is exceptional for its gorgeous reddish-gold and lilac color, semiprooflike fields, and vibrant mint luster. The strike demonstrates pinpoint sharpness in all aspects, including the few faint remnants of die clashing that appear solely on the obverse around Liberty's headdress and, to a lesser extent, on Liberty's frosted portrait. Several raised dots near Liberty's ear may be signs of die rust or improperly annealed dies. The surfaces appear flawless with no apparent abrasions. For the entire long-running gold dollar series (1849 to 1889) just 19 pieces are graded MS69 by PCGS and NGC combined (12/18).

Ex: The David & Sharron Akers Collection / FUN Signature (Heritage, 1/2014), lot 5351, which realized \$58,750.

From The Speechless Collection. NGC ID# 25CY, PCGS# 7563

1875 Gold Dollar, AU58
Classic 19th Century Rarity

3769 1875 AU58 PCGS. CAC. From a memorably low mintage of just 400 pieces, the 1875 gold dollar is the undisputed key to the series. This impressive near-Mint example shows sharply detailed design elements, with just a trace of friction on the high points. The thornlike projection from Liberty's throat identifies this example as a business strike, despite the deeply reflective prooflike fields. The lemon-yellow surfaces are lightly abraded and eye appeal is outstanding. Population: 11 in 58, 42 finer. CAC: 4 in 58, 8 finer (12/18). NGC ID# 25DD, PCGS# 7576

1875 Gold Dollar, MS64
Sought-After Series Rarity
Only 400 Examples Struck

3770 1875 MS64 PCGS. The 1875 gold dollar is the most famous and sought-after business-strike issue of the series, due to its low mintage of just 400 pieces. All examples seen have prooflike surfaces and business-strike examples were often erroneously called proofs by early catalogers. Fortunately, David Akers discovered a reliable diagnostic — all business strikes have a thorn-like projection from Liberty's throat into the field. Despite the legends popularized by incorrect early lot descriptions, the 1875 gold dollar is not any more elusive in Mint State than it is in proof format.

The present coin is an attractive Choice example, with sharply detailed design elements and well-preserved orange-gold surfaces. As expected, the fields exhibit prooflike reflectivity, with terrific eye appeal. This lot represents an important opportunity for the series specialist. Population: 8 in 64 (1 in 64+), 10 finer (12/18). NGC ID# 25DD, PCGS# 7576

1883 Gold Dollar, MS68
Lovely Color, Thick Mint Frost

- 3771 1883 MS68 PCGS Gold Shield.** Only 10,800 business strikes were produced of this popular late-date issue. This is one of the finest examples known with only one finer at NGC. While the surfaces show incredible technical preservation, what distinguishes this coin from others in high grade is both the thick mint frost and incredible golden-rose and lilac patination that swirls over each side. The design features show excellent definition. An outstanding representative of this low-mintage issue. Population: 21 in 68, 0 finer (12/18). NGC ID# 25DM, PCGS# 7584

1889 Gold Dollar, MS68
Last Year of Issue, Rich Color

- 3772 1889 MS68 PCGS.** A popular and highly collectible final-year issue. The 1889 becomes impossible to upgrade at the MS68 grade level, where 10 coins are reported at PCGS plus 16 at NGC (12/18). Spectacular orange-gold surfaces reveal vibrant lavender hues and a gleaming mint frost. Fully struck and practically pristine. NGC ID# 25DU, PCGS# 7590

PROOF GOLD DOLLARS

1872 Gold Dollar, PR66 Deep Cameo
Only 30 Examples Struck

- 3773 1872 PR66 Deep Cameo PCGS.** The proof 1872 gold dollar is a major rarity, coming from a mintage of only 30 pieces. PCGS CoinFacts estimates the surviving population at 18-22 examples in all grades today. PCGS and NGC combined report 25 grading events, which likely include resubmissions. At PCGS, there are only three Deep Cameos listed, two grading PR66, and one in PR67, with no Cameos or non-Cameos numerically equal or finer (12/18).

This delightful Premium Gem representative is fully struck and dramatically contrasted with rich orange-gold coloration. The fields display liquidlike mirroring. This coin represents an incredibly rare opportunity for the collector of 19th century proof gold. NGC ID# 25EF, PCGS# 97622

1887 Gold Dollar, PR65 Cameo
Scarcer JD-2 Variety

3774 1887 PR65 Cameo PCGS. CAC. A fairly generous mintage of 1,043 proof gold dollars was accomplished in 1887 and John Dannreuther has identified two die varieties for the date. This coin represents the scarcer JD-2 variety, with a new obverse die that shows a dot behind the eye and an irregular raised area on the chin (this obverse is also used on the JD-1 variety). The reverse die has a low date that slants slightly down from left to right. The JD-2 dies were also used to strike business strikes. The surviving population for JD-2 is estimated at 30-50 examples in all grades.

The present coin is a delightful Gem proof, with razor-sharp definition on all design elements and deeply mirrored fields that contrast boldly with the frosty devices. The Lemon-yellow surfaces are well-preserved and appealing. Population: 8 in 65 Cameo, 8 finer. CAC: 6 in 65, 4 finer (12/18). NGC ID# 25EX, PCGS# 87637

LIBERTY QUARTER EAGLES

1841-D Quarter Eagle, AU50
Scarce, Low-Mintage Date
Broadly Rotated Reverse

3775 1841-D AU50 NGC. Rotated Reverse, Variety 2-C. Struck with a loose collar, the reverse is rotated approximately 80° clockwise. The NGC holder notes the rotation, and describes it as a Mint Error. A crisp strike exists nonetheless, with bold obverse and reverse definition throughout the motifs. The mintmark sits high and touches the eagle's nearby talon, while pale-yellow color deepens slightly at the rims. Marks are limited to light field chatter softened by 10 points of wear. This is a notably scarce Dahlonega issue — just 4,164 pieces were struck. Census: 4 in 50, 23 finer (12/18). NGC ID# 54TW, PCGS# 7722

1855-C Quarter Eagle, Choice AU
Low Mintage of 3,677 Coins

3776 1855-C AU55 NGC. Variety 1. The only Charlotte Mint quarter eagle with a lower mintage than the 1855-C (3,677 coins) is the 1843-C Small Date. This is a scarce issue in all grades, and Winter estimates no more than 85 to 105 pieces survive. This light yellow-gold representative in Choice AU condition is characteristically struck with uneven detail. Flashes of luster remain around the eagle. Lightly abraded. NGC ID# 25J5, PCGS# 7775

1872 Quarter Eagle, Reflective MS61
3,000 Coins Struck, Underrated Issue

3777 1872 MS61 PCGS Gold Shield. Of the 3,000 quarter eagles struck in 1872, maybe 100 pieces survive, including 10 or 12 examples in Mint State. This MS61 could understandably be mistaken for a proof, the fields being deeply reflective and the devices fully struck. Yellow-gold surfaces are predictably abraded, and a small lamination occurs above Liberty's nose. NGC ID# 25KK, PCGS# 7815

1897 Quarter Eagle, MS67
Conditionally Rare

3778 1897 MS67 NGC. CAC. The 1897 is part of a run of low mintage quarter eagles coined at the Philadelphia Mint. This Superb Gem exhibits full cartwheel luster with frosty orange-gold surfaces and bold design motifs. The surfaces are exceptional and the eye appeal is second to none. Census: 17 in 67 (1 in 67 ★, 1 in 67+★), 1 finer. CAC: 6 in 67, 1 finer (12/18). NGC ID# 25LM, PCGS# 7849

PROOF LIBERTY QUARTER EAGLES

1872 Quarter Eagle, PR65 Ultra Cameo
Only 30 Pieces Struck

3779 1872 PR65 Ultra Cameo NGC. Only 30 proof Liberty quarter eagles were struck in 1872, making the issue a prime rarity today. John Dannreuther estimates the surviving population at 12-14 examples in all grades. Two examples are included in the great institutional collections at the Smithsonian and ANS, forever out of reach of eager collectors. Proof examples show a high date, with the 1 and 2 closer to the bust than the corresponding digits on the business-strike issue.

The coin offered here is a delightful Gem proof, with sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields. Dannreuther notes the Smithsonian coin shows no die rotation, while the ANS specimen has the reverse rotated in a clockwise direction, about 22 degrees. This coin has the same clockwise rotation as the ANS example. The lemon-yellow surfaces are impeccably preserved, with terrific eye appeal. Census: 2 in 65 Ultra Cameo, 1 finer (12/18). PCGS# 97898

1880 Liberty Quarter Eagle, PR63
Only 36 Examples Struck

3780 1880 PR63 NGC. CAC. Only 36 proof Liberty quarter eagles were struck in 1880, all struck from a single pair of dies (the reverse die had been used to strike proofs every year since 1877). This was the last year when gold proofs were only offered in sets. Unfortunately, the survival rate was fairly low and John Dannreuther estimates the surviving population at 14-18 examples in all grades. Specimens appear at auction about once every two years, on average.

The present coin is an attractive Select proof, with sharply detailed design elements throughout. The pleasing lemon-yellow surfaces include deeply reflective fields. A few minor marks and hairlines limit the grade. The reverse exhibits a wire rim around parts of the circumference. Overall eye appeal is outstanding. Census: 4 in 63, 9 finer. CAC: 2 in 63, 3 finer (12/18). NGC ID# 7K89, PCGS# 7906

1895 Quarter Eagle, PR65 Ultra Cameo
Delightful 'Orange-Peel' Texture

3781 1895 PR65 Ultra Cameo NGC. JD-1, High R.4. Die lumps on Liberty's forehead are diagnostic for the only known proof die pair for the year 1895, when 119 of these proof quarter eagles were struck at the Mint. John Dannreuther estimates 60 to 70 pieces survive, often with Cameo contrast, making this one of the more collectible 19th century proof issues.

The fields exhibit the classic "orange-peel" texture that collectors so enjoy, maintaining profound reflectivity and generating stark contrast against the frosted motifs. Aside from a tiny mint-made planchet flake in the left obverse field, there are no distinguishing marks. NGC ID# 288J, PCGS# 97921

1899 Liberty Quarter Eagle, PR66
Stunning Ultra Cameo Surfaces

3782 1899 PR66 Ultra Cameo NGC. CAC. According to Mint records, 150 proof Liberty quarter eagles were struck in 1899, down from the 165-piece production total of the year before, and much less than the 205 examples struck in 1900. Fortunately, the survival rate was high for this issue, and John Dannreuther estimates the surviving population at 90-110 examples in all grades. One die pair was used to strike all the proofs, but the reverse is seen in different die states, causing Walter Breen to speculate that two reverse dies were used.

The present coin is a spectacular Premium Gem proof, with razor-sharp definition on all design elements and deeply reflective fields that contrast profoundly with the richly frosted devices to create an intense cameo effect. The lemon-yellow surfaces are impeccably preserved and eye appeal is terrific. Census: 5 in 66 Ultra Cameo, 26 finer. CAC: 8 in 66, 13 finer (12/18). NGC ID# 288N, PCGS# 97925

1900 Quarter Eagle, PR67 +
Rare Deep Cameo Example

3783 1900 PR67+ Deep Cameo PCGS. CAC. A generous mintage of 205 proof Liberty quarter eagles was accomplished in 1900 and the issue was heavily saved, perhaps because of its turn-of-the-century date. The coins were delivered in four batches, one at the end of every quarter, indicating a more-or-less constant demand throughout the year. John Dannreuther estimates 120-150 examples are extant in all grades, making the 1900 one of the most available dates of the series.

This Plus-graded Superb Gem exhibits razor-sharp definition on all design elements, with evidence of the diagnostic repunching on the 1 and 9 in the date. The virtually pristine lemon-yellow surfaces include deeply mirrored fields that create profound cameo contrast with the richly frosted devices. Eye appeal is tremendous. Population: 10 in 67 (2 in 67+) Deep Cameo, 6 finer. CAC: 11 in 67, 6 finer (12/18). NGC ID# 288P, PCGS# 97926

INDIAN QUARTER EAGLES

1910 Indian Quarter Eagle, MS66
Better Date in High Grade

3784 1910 MS66 NGC. Despite an adequate mintage of 492,000 pieces, the 1910 Indian quarter eagle is seldom encountered in high grade, and the issue is unknown above the MS66 grade level. Currently, NGC has certified 16 examples in MS66 condition, with none finer, while PCGS has graded 11 Premium Gems (one in 66+), with none finer (12/18).

Fortunately, the 1910 was well-produced, and the present coin exhibits the sharply detailed design elements typical of the issue. The impeccably preserved yellow-gold surfaces are lustrous and appealing. This coin should find a home in the finest collection or Registry Set. NGC ID# 2892, PCGS# 7941

1911-D Two and a Half Dollar, AU58
Clear Mintmark

3785 1911-D AU58 NGC. A touch of friction on the cheek, headdress, and the eagle's feathers is the only thing standing in the way of a full Uncirculated grade assessment. No matter, for this near-Mint key-date quarter eagle maintains strong detail, including a clear mintmark. Yellow-gold surfaces are lightly hairlined. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, AU58
Collector-Grade Example

3786 1911-D AU58 NGC. The 1911-D quarter is most heavily collected in the upper AU grades, which provide coins with sharp detail at an achievable price for budget-conscious collectors. This piece shows bright, bronze-gold surfaces with little loss of detail from circulation. The mintmark is faint, but still clearly outlined. NGC ID# 7KR7, PCGS# 7943

1911-D Indian Quarter Eagle, AU58
Strong D Series Key

3787 1911-D AU58 PCGS Gold Shield. From a series-low mintage of 55,680 pieces, the 1911-D Indian quarter eagle is the acknowledged key to the series. This impressive near-Mint example exhibits just a trace of friction on the high points of the design elements, which were strongly impressed, with a bold D mintmark. The lightly abraded orange-gold surfaces retain much original mint luster. NGC ID# 7KR7, PCGS# 7943

1911-D Indian Quarter Eagle, MS61
Strong D

- 3788** 1911-D MS61 PCGS Gold Shield. Strong D. An impressive Mint State specimen of this sought-after, low-mintage key, with sharply detailed design elements and a bold D mintmark. The pleasing orange and rose-gold surfaces show the minimum number of minor contact marks for the grade and the overall presentation is most appealing. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS62
Bold Strike Definition

- 3790** 1911-D MS62 NGC. The partial wire rim found on authentic 1911-D quarter eagles is strong, as is the D mintmark, which is often difficult to make out on this key-date issue from a low mintage of 55,680 coins. Orange-gold surfaces exhibit bold strike definition. Subdued satiny mint luster appears over each side. A few faint hairlines limit the grade, but not the appeal. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS61
Strong D Mintmark

- 3789** 1911-D MS61 PCGS Gold Shield. Strong D. The mintmark is unusually bold on this Uncirculated example of the capstone Indian Head quarter eagle issue. Light straw-gold surfaces exhibit similarly bold detail on the other design features. Satiny mint luster shines softly from each side. From a mintage of 55,680 coins. NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half, MS62
CAC-Approved Collector Coin

- 3791** 1911-D MS62 NGC. CAC. A rare CAC-approved MS62 example of this key Denver issue, showing well-struck design elements and satiny brass-gold luster. Grade-limiting surface contact is not bothersome on this above-average example. The 1911-D quarter eagle is usually available for a price in the lower Mint State grades, but few are eye-appealing enough to warrant CAC endorsement. NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half, MS64
Satin Red-Gold Key Date

3792 1911-D MS64 NGC. According to Jeff Garrett and Ron Guth, writing in their *Encyclopedia of U.S. Gold Coins*:

“The 1911-D Indian Head quarter eagle is the key to the series in all grades. It boasts not only the lowest mintage (by far), but few examples were saved at the time of issue. Most of the survivors are in lower Mint State grades, and even those often show areas of minor friction on Liberty’s cheek.”

This near-Gem is obviously unworn. Each side exhibits crisp definition, including on the often-indistinguishable mintmark. Red-gold color and satiny mint luster blend over well-preserved surfaces, with the usual partial wire rim along the upper obverse border. The only notable abrasions occur above and behind the eagle’s head. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS64
Strong D, Singular Key to the Series

3793 1911-D MS64 PCGS Gold Shield. Strong D. No other Indian Head quarter eagle comes close to challenging the 1911-D for top spot in the series. The issue’s mintage of 55,680 pieces is less than 25% of the next-lowest production total, claimed by the 1914. As such, there is always plenty of demand for the 1911-D across all grades. Although the date is available in the absolute sense, supply is never enough to meet demand. Anything finer than this near-Gem is truly scarce.

The mintmark is fully and completely rendered on this lustrous Choice Uncirculated key date. The Indian’s portrait and the eagle display similarly strong detail. Medium yellow-gold surfaces are well-preserved and show a couple of small marks in the upper reverse field. PCGS has only graded 26 numerically higher submissions (12/18). NGC ID# 7KR7, PCGS# 7943

1911-D Indian Quarter Eagle, MS64
Low-Mintage Series Key

3794 1911-D MS64 PCGS Gold Shield. There are only three branch mint quarter eagles in the Indian series and the 1911-D is the first, and rarest, of the three. In fact, with a minuscule mintage of 55,680 pieces, the 1911-D is the rarest Indian quarter eagle from any mint and the acknowledged key to the series. The 1911-D can be located in MS64 condition with some patience, but finer examples are elusive and highly sought after.

The present coin is an attractive Choice example, with sharply detailed design elements and a bold D mintmark. A diagnostic wire rim is evident from 1 to 5 o'clock on the obverse. The well-preserved orange-gold surfaces are lustrous and appealing. PCGS has graded 26 numerically finer examples (12/18). NGC ID# 7KR7, PCGS# 7943

1914 Two and a Half Dollar, MS64+
Conditionally Elusive Semikey

3795 1914 MS64+ PCGS Gold Shield. The second key to the series after the 1911-D, this Philadelphia issue becomes conditionally scarce in Gem condition, putting pressure on high-quality Choice Uncirculated pieces. Coloration is a deep shade of orange-gold. Well-defined at the centers with slight buckling around the borders. Ticks in the left obverse field are trivial. NGC ID# 7KRA, PCGS# 7946

PROOF INDIAN QUARTER EAGLE

1908 Indian Two and a Half, PR66+
First-Year Issue, Exemplary Eye Appeal
High-End Matte Proof

3796 1908 PR66+ PCGS Gold Shield. CAC. The first-year American matte proofs of the new 1908 gold Indian Head and Saint-Gaudens designs were a startling departure from the finish of the previous Liberty Head issues, even though the texture continued a numismatic-artistic experiment that had been seen earlier in the decade in several other countries, including France, England, and Canada.

This Premium Gem proof 1908 quarter eagle of the Pratt design looks even finer than the technical grade, displaying the usual deep khaki-gold color over fully struck surfaces throughout. A darker spot adjacent to the Indian's chin might serve as a pedigree marker, but the eye appeal is exemplary. A fine example for a first-year-of-type. Population: 19 in 66 (2 in 66+), 6 finer. CAC: 8 in 66, 2 finer (12/18). NGC ID# 289G, PCGS# 7957

THREE DOLLAR GOLD PIECES

1855 Three Dollar Gold, MS64
Conditionally Rare in Finer Grades

3797 1855 MS64 NGC. Despite a relatively generous mintage of 50,555 pieces, the 1855 three dollar gold piece is an elusive issue in MS64 condition and finer pieces are condition rarities. This attractive Choice specimen exhibits well-detailed design elements, with a touch of the usual softness on the ribbon knot. The lightly marked orange-gold surfaces are lustrous and appealing. Census: 22 in 64 (1 in 64+), 1 finer (12/18). NGC ID# 25M6, PCGS# 7972

1855-S Three Dollar, AU55
Low-Mintage Second-Year Issue

3798 1855-S AU55 PCGS. This three dollar gold piece from the San Francisco Mint represents both the second year of operation for the facility and the second year of production for this denomination. Only 6,600 pieces were struck, and survivors are scarce-to-rare in Choice AU condition. Glowing luster around the borders frames lightly abraded yellow-gold surfaces. The motifs show strong detail. Housed in a green label holder. Population: 12 in 55, 11 finer (12/18). NGC ID# 7K5D, PCGS# 7973

1863 Three Dollar Gold, MS63
Elusive, Low-Mintage Issue

3799 1863 MS63 PCGS. The financial stresses and uncertainties of the Civil War caused widespread hoarding of all precious metal coinage during the war years. The U.S. government suspended specie payments in 1861, so gold coins did not circulate at par and there was limited demand for the three dollar gold piece in the national economy. Accordingly, only 5,000 three dollar gold pieces were struck in 1863, all delivered in one batch on November 21. The coins may have been intended to serve as Christmas presents, a common practice of the time, but relatively few examples were saved. As might be expected, the 1863 three dollar gold piece is an elusive issue in all grades today.

The present coin is an attractive Select example, with well-detailed design elements and dramatic clash marks on both sides. The reddish-gold surfaces are lightly marked, with vibrant mint luster and outstanding eye appeal. Housed in a green label holder. Population: 6 in 63, 19 finer (12/18). NGC ID# 7K5R, PCGS# 7984

1863 Three Dollar, MS64
Interesting Obverse Strike-Through
Seldom Seen This Fine

3800 1863 — Obverse Struck Through — MS64 NGC. The 1863 three dollar gold piece is an unquestionable rarity in mint condition. A total of 5,000 coins were struck, all were delivered on November 21, ostensibly in preparation for heightened demand for holiday gifts. At least, that is what is generally believed. Certainly, these coins were never intended to circulate, with the premium on gold and silver driving such coins out of commercial channels.

This near-Gem shows the heavy clash marks seen on all high-grade survivors. Light yellow-gold color and coruscating luster adorn each side. A mint-made strike through in the right obverse field is unmistakable, but it has no effect on the technical grade of this minimally abraded example. Census: 6 in 64, 14 finer (12/18). NGC ID# 7K5R, PCGS# 7984

1864 Three Dollar Gold Piece, AU53
Important Civil War Issue

- 3801** 1864 AU53 NGC. An important Civil War-era three dollar gold piece, this pleasing AU example survives from a low mintage of only 2,630 circulation strikes. Myriad marks are trivial and consistent with the grade. The light yellow-gold surfaces exhibit field reflectivity that contrasts with the still-lustrous devices. NGC ID# 7HSK, PCGS# 7985

1864 Three Dollar Gold, MS63
Elusive Series Sleeper

- 3802** 1864 MS63 PCGS. CAC. Although the Civil war was nearing its end in 1864, the government ban on specie payments would continue for many years and there was little demand for three dollar gold pieces in the national economy of the time. As a result, only 2,630 business-strike three dollar gold pieces were struck in 1864, all delivered in two batches (440 pieces on February 25 and 2,190 examples on December 6). Accordingly, the 1864 is one of the most elusive dates of the series, especially in high grade, but its elusive nature is not often recognized, outside of series specialists..

The present coin is an impressive Select example, with sharply detailed design elements in most areas, and just a trace of softness on the ribbon knot. The pleasing yellow-gold surfaces are lightly marked and show the light diagonal striations typical of this issue on the obverse. Both sides radiate vibrant mint luster, with a few hints of prooflike reflectivity in the fields. Population: 6 in 63 (1 in 63+), 11 finer. CAC: 1 in 63, 2 finer (12/18). NGC ID# 7HSK, PCGS# 7985

James B. Longacre

1878 Three Dollar, Glistening Gem

- 3803 1878 MS65 PCGS Gold Shield.** The preeminent type coin issue in the three dollar series, with a mintage of 82,304 pieces. Both sides present nearly complete strike definition; Only the lowest curls and the wreath bow show trivial blending. Rose-gold surfaces glisten with softly frosted mint luster, and there are no obvious abrasions to interrupt the eye-appealing effect. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, MS65
Lustrous, Colorful Example

- 3804 1878 MS65 PCGS.** The 1878 three dollar gold piece is a relatively available issue, thanks to its mintage of 82,304 pieces, making it a favorite choice of type collectors. This attractive Gem displays well-detailed design elements, with a touch of the usual softness on the ribbon knot. The virtually pristine orange-gold surfaces radiate satiny mint luster throughout, with terrific eye appeal. Housed in a green label holder. NGC ID# 25MZ, PCGS# 8000

1879 Three Dollar, MS64 Prooflike
Scarce With Reflective Fields

- 3805 1879 MS64 Prooflike NGC.** Despite its low mintage of 3,000 circulation strikes, the 1879 three dollar gold piece is represented by a relatively large number of Mint State examples. Indeed, NGC and PCGS have certified well over 900 Uncirculated specimens. Coins with the Prooflike designation are an entirely different matter. NGC gives this classification to only 29 coins. The apricot-gold surfaces of this near-Gem exhibit well struck devices and appreciable field-motif contrast at various angles. Scattered light marks preclude Gem status, yet still highly attractive. Census: 12 in 64 Prooflike, 1 finer (12/18).
Ex: October Signature (Heritage, 10/2009), lot 1392, where it sold for \$8,625. NGC ID# 25N2, PCGS# 78001

1880 Three Dollar Gold Piece, MS64
Only 1,000 Pieces Minted

- 3806 1880 MS64 PCGS. CAC.** An amazing near-Gem, this 1880 three dollar gold piece is one of just 1,000 circulation strikes produced at the Philadelphia Mint. An additional 36 proofs were coined. The fields are slightly mirrored and frame the lustrous devices of this lovely yellow-gold example that possesses exceptional eye appeal. Population: 64 in 64 (4 in 64+), 26 finer. CAC: 17 in 64, 6 finer (12/18). NGC ID# 25N3, PCGS# 8002

1885 Three Dollar Gold, MS65
Only 801 Examples Struck

3807 1885 MS65 NGC. CAC. There was little demand for three dollar gold coins in the national economy by 1885, a situation that was reflected in the business-strike mintage of 801 specimens that year. That minuscule production total was the second lowest of the series. Fortunately, contemporary collectors saved a number of high-quality specimens for posterity and the 1885 is not quite as elusive today as the limited mintage would suggest.

The present coin is a spectacular Gem, with sharply detailed design elements and well-preserved yellow-gold surfaces. The fields show a mix of vibrant mint luster and prooflike reflectivity, with terrific eye appeal. This coin should find a home in a fine collection of three dollar gold. Census: 4 in 65, 1 finer. CAC: 3 in 65, 1 finer (12/18). NGC ID# 7KDP, PCGS# 8007

1888 Three Dollar, MS64
5,000 Coins Struck

3808 1888 MS64 PCGS. CAC. One year before the denomination was abolished, the Mint accomplished a production of 5,000 three dollar gold pieces. Rich orange-gold color graces semireflective surfaces. Strike definition is razor-sharp. A single mark occurs on Liberty's cheek. Considerably finer than the average lower Uncirculated survivor. CAC: 22 in 64, 26 finer (12/18). NGC ID# 25NB, PCGS# 8010

1888 Three Dollar Gold, MS65
Far Above Average

3809 1888 MS65 PCGS. CAC. The Philadelphia Mint coined 5,000 circulation-strike three dollar gold pieces in 1888, along with 291 proof examples. Survivors are not particularly rare as few of those coins actually circulation. In fact, this date ranks among the five most plentiful issues of the denomination. However, Gem and finer pieces are infrequently encountered. PCGS and NGC have certified 1,266 examples of this issue with an average grade of MS61. This impressive Gem has frosty yellow-gold surfaces with delicate blue and orange overtones that create exceptional eye appeal. NGC ID# 25NB, PCGS# 8010

PROOF FOUR DOLLAR GOLD PIECE

1879 Flowing Hair Stella, PR64 Deep Cameo
America's Most Popular and Collectible Gold Pattern

3810 1879 Flowing Hair, Judd-1635, Pollock-1833, JD-1, R.3, PR64 Deep Cameo PCGS. CAC. The four dollar stella was a pattern for a proposed international coinage, an idea that was popular in the second half of the 19th century, but would only be realized in recent times, with the advent of the euro. Although the stella is technically a pattern, several hundred examples of the 1879 Flowing Hair design were struck, and the stella has been collected by mainstream gold collectors since the time of issue.

The stella was championed by Alexander Stephens, then-Chairman of the House Committee on Coinage, Weights and Measures, who was a close associate of Dr. William Wheeler Hubbell, the holder of the patent for the goloid alloy. Hubbell was aggressively marketing his alloy of gold, silver, and copper as a suitable metal for U.S. coinage at the time. Hubbell and Stevens capitalized on a letter from Ambassador John A. Kasson, who suggested the authorization of a U.S. gold coin of the exact value of the French 20 franc piece for use in international exchange, to introduce the idea for the stella to Congress. Two designs were produced in 1879, the familiar Flowing Hair design by Chief Engraver Charles Barber and the Coiled Hair design, which was clearly influenced by George T. Morgan's design for the Goloid Metric dollar, Judd-1631, but was probably adapted by Barber, as well (see Roger Burdette's article in the spring 2015 issue of the *Journal of Numismatic Research* for details). Both designs were struck again in 1880. Unfortunately, while the proposed value of the stella closely matched that of several European gold coins in use at the time, including the Austrian 8 florins, Spanish 20 pesetas, Italian 20 lire, French 20 francs, and others, it was not an exact match for any and would be useless in simplifying exchanges. Accordingly, Congress never authorized the issue.

The present coin is an attractive Choice proof, with sharply detailed, frosty design elements that create intense cameo contrast with the deeply reflective fields. Both sides show the enigmatic parallel planchet striations seen on all examples of this issue. In his *United States Proof Coins*, Volume IV, John Dannreuther theorizes that the stellas were struck from planchets punched out of gold alloy strips that were originally intended for half eagle production. The strips were pulled through a draw bench to reduce them to the proper thickness for the four dollar denomination, acquiring the striations in the process. Of course, this means the coins were not produced from Hubbell's goloid alloy at all, and none of the coins that have been tested show the goloid composition. The well-preserved greenish-gold surfaces of this piece show highlights of yellow and lilac, with outstanding eye appeal. Population: 12 in 64 (1 in 64+) Deep Cameo, 18 finer. CAC: 8 in 64, 8 finer (12/18). NGC ID# 28AZ, PCGS# 98057

EARLY HALF EAGLES

1795 Capped Bust Right Half Eagle, MS61
Important First-Year Type Issue
Small Eagle, BD-3

3811 1795 Small Eagle MS61 PCGS. CAC. BD-3, High R.3. Bass-Dannreuther Die State b/b, with the crack from the edge to the E in UNITED. Star 11 is solidly joined to Y and star 12, diagnostic for the obverse. The left branch of the wreath has a leaf joined to the final S with the right branch separated from the O, diagnostic for the reverse. The obverse appears to be state b, with a die crack from the border to star 12, continuing faintly into the field from the inner point of the same star. The reverse appears to be uncracked, with an engraving line from a dentil to the right top of E in UNITED. This may be the same feature that Dannreuther calls a crack in his state b. Die state analysis and emission sequence study indicate that BD-3 was probably the third variety coined in the late summer of 1795.

The BD-3 die combination is far more plentiful than any other 1795 variety, an ideal choice for date and type collectors. John Dannreuther estimates more than 200 examples exist, consistent with our estimate. Our own survey of auction records leads us to believe that about three dozen Mint State examples of the variety still exist today, mostly in the MS60 to MS63 range. This example compares favorably to many of the finest survivors.

Brilliant greenish yellow-gold surfaces exhibit satiny luster. Clean surfaces and excellent eye appeal help to define the grade. Slight surface roughness near the date appears to be the result of improperly mixed alloy that creates slight lamination in that area. Population: 23 in 61, 41 finer. CAC: 6 in 61, 8 finer (12/18).

Ex: *Central States Signature* (Heritage, 4/2008), lot 2425, realized \$89,125. NGC ID# 25ND, PCGS# 8066

1800 BD-5 Half Eagle, XF45
Strongly Rendered With Red-Gold Color

- 3812** 1800 BD-5, High R.3, XF45 NGC. Bass-Dannreuther Die State d/a. A rare early die state example without reverse cracks. Star 13 away from the bust and the star directly behind the eagle touching the neck confirm the attribution for this 1800 five dollar gold piece. Rich red-gold color is highly appealing, and the devices are strongly rendered with unimportant rub. Rim nicks at 12 o'clock on each side are the only notable imperfections. One of about 250 or so BD-5 half eagles believed extant. NGC ID# 25NW, PCGS# 45595 Base PCGS# 8082

1800 BD-5 Half Eagle, AU55
Green Label Holder, Gold CAC

- 3813** 1800 BD-5, High R.3, AU55 PCGS. Gold CAC. Bass-Dannreuther Die State e/c, cracked at the IBE in LIBERTY and through the eagle's tailfeathers on the reverse. BD-5 is a moderately plentiful early half eagle variety, with as many as 250 pieces believed to survive in all grades. This "availability" makes the issue popular as a type coin. Few representatives, however, can compete with this piece, at least for the grade. Certified AU55 in a green label PCGS holder, this lustrous yellow-gold example is considered undergraded by CAC, which awards it the coveted Gold label. Indeed, the surfaces are vibrantly lustrous, and only a trace of high-point friction is observed. The strike is generally sharp, and only light, scattered abrasions are apparent on each side. NGC ID# 25NW, PCGS# 45595 Base PCGS# 8082

1803/2 BD-3 Half Eagle, AU50
Early Die State

- 3814** 1803/2 BD-3, R.4, AU50 PCGS. Bass-Dannreuther Die State d/a, except there is faint evidence of a crack through the top of the R in LIBERTY, as mentioned for obverse die state f in the Bass-Dannreuther reference. There are no visible clash marks, die cracks, or signs of lapping on the reverse. Unlike most examples of the BD-3 die pair, the base of the 2 is visible in the lower loop of the 3. This pleasing green-gold example retains some luster on its pleasing surfaces. The fields are slightly reflective. NGC ID# 25NY, PCGS# 504950 Base PCGS# 8084

1804 BD-7 Half Eagle, AU Details

- 3815** 1804 Small Over Large 8, BD-7, R.4 — Cleaned — NGC Details. AU. Bass-Dannreuther Die State b/b, an early stage of this state, where the long crack through the shield is only visible in the horizontal lines and the adjacent field, into the wing. The obverse shows clash marks. This 1804 half eagle has a sharp strike and only light high-point wear. Remnants of adjustment marks are visible along the upper obverse border. The surfaces have scattered hairlines from an old cleaning, which prevent a numeric grade. NGC ID# BFXB, PCGS# 519897 Base PCGS# 8086

1804 Capped Bust Right Half Eagle, AU50
Small Over Large 8, BD-7

- 3816** 1804 Small Over Large 8, BD-7, R.4, AU50 PCGS Gold Shield. Bass-Dannreuther Die State c/c, with clash marks on both sides and an extensive network of die cracks on the reverse. This impressive AU specimen exhibits well-detailed design elements, with light wear on the high points, and lightly abraded, antique-gold surfaces that display radiant mint luster on both sides. NGC ID# BFXB, PCGS# 519897 Base PCGS# 8086

1806 Half Eagle, BD-1, AU50
Pointed 6, 8x5 Stars

- 3817** 1806 Pointed 6, 8x5 Stars, BD-1, R.4, AU50 PCGS. Bass-Dannreuther Die State c/e, with cracks around the peripheral obverse design elements and a cud above (STATE)S. The first two stars are close together and to the bust, as is the last star. The reverse features small letters with broken right feet on the Ts in STATES. This reverse was left over from 1805. About 100 to 150 BD-1 representatives are believed extant, per Dannreuther. This lightly circulated Draped Bust half eagle enjoys partial luster over light (and lightly abraded) yellow-gold surfaces. Blending occurs over the central obverse, while the reverse is strong. NGC ID# 25P7, PCGS# 45621 Base PCGS# 8090

1806 Knob 6, 7x6 Stars Five Dollar, AU58
An Ideal Early Half Eagle Type Coin

3818 1806 Knob 6, 7x6 Stars, BD-6, R.2, AU58 PCGS Gold Shield. Bass-Dannreuther Die State d/f. This late die state shows a lump on the R in LIBERTY and the reverse is re clashed, with marks prominent in the lower part of the shield. The 1806 Knob 6, 7x6 Stars half eagle is easily identified and serves as the most plentiful early five dollar gold piece — perfect for type purposes.

Bright mint luster glows from the recesses of the stars, legends, and the eagle. Friction is essentially unseen on this borderline-Uncirculated representative. Liberty's curls and the eagle's feathers display a strong impression. Incompleteness on the stars and fletchings is trivial. Scattered abrasions and a few hairlines fail to distract. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1807 Bust Right Half Eagle, MS60
Rare BD-2 Die Marriage, CAC Endorsed

3819 1807 Bust Right, BD-2, R.5, MS60 PCGS. CAC. Bass-Dannreuther Die State e/b, or a late stage thereof. This piece shows an obverse die crack above the E in LIBERTY, not described for this die state in John Dannreuther's *Early U.S. Gold Coin Varieties*. This crack later breaks away completely, forming the cud in die state f/b.

BD-2 is scarce with only 50 to 65 pieces believed known. This example is sharp and has light field chatter that limits the grade. Both sides are semiprooflike and appealing with bright straw-gold coloration. CAC endorsed in a green label holder and highly eye-appealing. NGC ID# CKLF, PCGS# 519899 Base PCGS# 8092

1808/7 BD-1 Wide Date Half Eagle
In a Green Label Holder as VF35
Gold CAC Label

3820 1808/7 Wide Date, BD-1, R.6, VF35 PCGS. Gold CAC. Bass-Dannreuther Die State c/c, with a heavy bisecting die crack through the first 8 in the date. A less pronounced crack connects Liberty's cap to star 8. This piece shows incredibly strong detail for the VF35 grade level, and CAC has awarded it a Gold label, considering it undergraded. Hints of luster remain in the protected areas. The bright yellow-gold surfaces are only lightly worn and show trivial contact marks. Eye appeal is pleasing. Housed in a green label holder. NGC ID# 25PB, PCGS# 45636 Base PCGS# 8103

1808 Capped Bust Left Five, MS63
Close 5D, BD-3 Variety

3821 1808 Close 5D, BD-3, R.4, MS63 NGC. Bass-Dannreuther Die State a/c, with light clash in the shield. According to Mint records, a substantial mintage of 55,578 Capped Bust Left half eagles was achieved in 1808, with four die varieties known for the date. This coin represents the BD-3 variety, with the normal date and closely spaced 5D. The BD-3 has a surviving population of 100-125 examples in all grades and probably accounted for 10,000-15,000 pieces of the reported mintage.

This spectacular Select specimen exhibits sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster throughout. Overall eye appeal is outstanding. Census: 19 in 63, 7 finer (12/18). NGC ID# 25PA, PCGS# 507604 Base PCGS# 8102

1808 Half Eagle, AU53
Wide 5D, BD-4, CAC Approval

- 3822** 1808 Wide 5D, BD-4, High R.3, AU53 PCGS. CAC. Bass-Dannreuther Die State c/a, as usual, without reverse clash marks. BD-4 is identified by the wide spacing of the 5 and D on the reverse, and is the most collectible die variety for the 1808 half eagle with an estimated 175 to 225 pieces known. Each side of this CAC-approved AU53 representative boasts lively remaining mint luster and attractive yellow-gold color. Friction occurs over the highest points of the portrait and eagle, which are both well-struck. A violet toning spot below the first U in PLURIBUS acts as a pedigree marker. NGC ID# 25PA, PCGS# 507605 Base PCGS# 8102

1808 Five Dollar, AU58
Red-Gold Color, CAC Approval
Wide 5D, BD-4

- 3823** 1808 Wide 5D, BD-4, High R.3, AU58 PCGS. CAC. Bass-Dannreuther Die State c/a. The reverse is unclashed on this BD-4 1808 half eagle, which features 5D widely spaced under the fletching and branch stem. This was only the second year that recently hired Mint Engraver John Reich's Draped Bust Left portrait was employed. Reportedly, 55,578 coins were struck, although Dannreuther suggests that total is higher and likely excludes some 1808-date coins included in the 1809 mintage (the Mint did not concern itself with ensuring dies from the preceding years were retired). This still-lustrous near-Mint example features original reddish-gold color and strong definition. Adjustments marks are seen along the reverse border.

Ex: Eliasberg and Krause Collections (Stack's Bowers, 3/2010), lot 1542. NGC ID# 25PA, PCGS# 507605 Base PCGS# 8102

1809/8 BD-1 Half Eagle, Unc Details
Scarcest Date of This Type

- 3824** 1809/8 BD-1, High R.3 — Altered Surfaces — PCGS Genuine Gold Shield. Unc Details. Bass-Dannreuther Die State a/b. The obverse die is uncracked, while clash marks occur above the eagle's wings and below the scroll. BD-1 is the only variety for the year. All examples feature an 1809/8 overdate, and about 250 to 325 are thought to survive. John Dannreuther has called this "the scarcest *date* of this type..." This coin showcases boldly struck and unworn devices over orange and yellow-gold surfaces that have been smoothed to minimize marks.

1810 BD-4 Half Eagle, MS60
Large Date, Large 5
Ideal for Type

- 3825** 1810 Large Date, Large 5, BD-4, R.2, MS60 PCGS. Bass-Dannreuther Die State c/b. A vertical die crack extends between 81 up toward Liberty's clasp. John Dannreuther estimates the Large Date, Large 5 BD-4 die pair was used to strike between 75% to 90% of the 100,287 half eagles minted in 1810. Consequently, this variety represents one of the most collectible half eagles struck from 1795 to 1834 (Motto).

This Uncirculated Draped Bust Left type coin showcases bright yellow-gold surfaces and good design detail. Softness is virtually limited to the shield and adjacent feathers. Faint hairlines explain the grade. Housed in a green label holder. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

1810 Capped Bust Left Half Eagle, MS60
Large Date, Large 5, BD-4

3826 1810 Large Date, Large 5, BD-4, R.2, MS60 PCGS. Bass-Dannreuther Die State a/a. A substantial mintage of 100,287 Capped Bust Left half eagles was accomplished in 1810, with four die varieties known for the date. This coin represents the BD-4 variety, with a Large Date and a Large 5 in the denomination. The BD-5 is an available variety and a popular choice of type collectors. John Dannreuther estimates the surviving population at 500-750 examples in all grades.

This attractive Mint State specimen exhibits well-detailed design elements, with some faint planchet adjustment marks on the lower obverse and a slight bulge in the left obverse field. The pleasing orange-gold surfaces are remarkably clean for the grade. Eye appeal is outstanding. Housed in a green label holder. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

1811 BD-2 Half Eagle, AU58
Partly Lustrous, Small 5

3827 1811 Small 5, BD-2, R.3, AU58 NGC. Bass-Dannreuther Die State d/a, without clash marks on reverse. Both varieties of the 1811 half eagle are relatively accessible, with this Small 5 type being marginally more available than its Tall 5 counterpart. About 225 to 300 pieces are known. Yellow-gold surfaces showcase remaining mint luster around the peripheral elements and strong central detail, though the strike has failed to obliterate roller marks at the upper reverse. A couple of reddish-violet alloy spots appear on that side. NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

**1811 Capped Bust Left Half Eagle, MS63
Small 5, BD-2 Variety**

3828 1811 Small 5, BD-2, R.3, MS63 PCGS. Bass-Dannreuther Die State e/b, with the die crack connecting stars 9 and 10. A substantial mintage of 98,851 Capped Bust Left half eagles was accomplished in 1811, with two die varieties known for the date. This coin represents the BD-2 variety, with the Small 5 in the denomination. The BD-2 is a relatively available variety, with a surviving population of 225-300 examples in all grades. It probably accounted for 35,000-50,000 pieces of the reported mintage.

The present coin is an attractive Select example, with well-detailed design elements and well-preserved orange-gold surfaces. Some faint planchet adjustment marks are evident on the lower left obverse. Vibrant, satiny mint luster adds to the outstanding eye appeal. Population: 0 in 63, 2 finer (12/18). NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

**1813 Capped Head Left Half Eagle, AU53
Popular BD-1 Variety**

3829 1813 AU53 NGC. BD-1, R.2. Bass-Dannreuther Die State b/b. This pleasing green-gold half eagle has a minor obverse rim bruise at 9 o'clock with further small rim blemishes on each side. Considerable satin luster is evident on both sides. Light planchet adjustment marks are noted at the central obverse. Only light wear shows on the well-detailed design elements.

Ex: FUN Signature (Heritage, 1/2012), lot 6323, realized \$6,900. NGC ID# 25PM, PCGS# 8116

**1814/3 BD-1 Half Eagle, AU50
Only Variety of the Year, CAC Approved**

3830 1814/3 BD-1, High R.4, AU50 PCGS. CAC. Bass-Dannreuther Die State c/d, heavily clashed on both sides. BD-1 is the only variety of the 1814 half eagle, and it employs a leftover 1813 obverse with remnants of the 3 still visible around the 4 in the date. In *Early U.S. Gold Coin Varieties*, John Dannreuther estimates a survivorship of 80 to 100 coins, which are in high demand at all levels due to the singularity of the variety. This CAC-approved AU coin is housed in a green label holder. The bright yellow-gold surfaces retain luster in the fields and show only light high-point wear. NGC ID# BFXT, PCGS# 519908 Base PCGS# 8117

CLASSIC HALF EAGLES

**1834 Classic Head Half Eagle, MS61
Plain 4, McCloskey 3-B**

3831 1834 Plain 4 MS61 PCGS. CAC. Breen-6501, McCloskey 3-B, R.1. First Head. Diagnostics include the Script 8, distance between 34 in the date, and the absence of the eagle's tongue. The stars, feathers, olive leaves, talons, and fletchings all show pinpoint detail. This CAC-endorsed MS61 representative is lustrous with attractive red-gold coloration. Peppered abrasions are undistracting. NGC ID# 25RR, PCGS# 8171

1835 Half Eagle, MS61
Important McCloskey 3-E Die Pair

3832 1835 MS61 NGC. Second Head, Breen-6505, McCloskey 3-E. There are three obverse dies and five reverse dies known for the 1835 half eagles, and the 3-E die pair is the only one to combine a Script 8 obverse die and a reverse die with a berry in the branch.

Our notes suggest that the McCloskey 3-E die marriage is very rare, or perhaps extremely rare. We are aware of just two or three other examples, although further specimens may be waiting for identification. An AU58 example appeared in a 2002 auction, and we sold a VF35 PCGS example in December 2009. Neither example was attributed in the catalog. There was no example of this die pair in the incomparable Harry W. Bass, Jr. collection, and none are shown among coins illustrated at PCGS Coin Facts.

The obverse has a Script or Fancy 8 in the date, and the 1 is well above the base line of the other digits. The reverse has a berry in the branch, and this is the only 1835 Classic half Eagle with that feature, making attribution simple. The D in the denomination is recut. Every horizontal shield line extends past the left border into the wing. A bisecting die crack may explain the rarity of this variety. The crack begins at the border just below the middle leaf pair, continues through the eagle's body, wing, and head, and nearly reaches the E in STATES.

A lovely Mint State example with frosty yellow luster, this piece exhibits a few scattered marks. While a complete survey of Classic gold coins is pending, we suggest that this example might be the finest known for the variety. NGC ID# 25RV, PCGS# 8173

LIBERTY HALF EAGLES

1844 Half Eagle, MS63
Elusive This Fine

3833 1844 MS63 PCGS Gold Shield. CAC. The 1844 is a fairly plentiful half eagle from this period, although Mint State coins are conditionally scarce, and this Select representative is tied for the finest endorsed by CAC. This is a distinctive die pair, showing the vertical shield lines extending far into the horizontal lines and below the shield border. On the obverse, a couple of short die lines appear in front of Liberty's eye and there is a centering hole on the ear lobe. Original green-gold luster is frosty and shows minimal abrasions for the grade. The strike is sharp. NGC ID# 25T7, PCGS# 8219

1846-O Five Dollar, MS60
Among the Finest Pieces Extant

- 3834 1846-O MS60 NGC. CAC. Variety 3.** The right most vertical shield stripe is noticeably wavy on this variety. Winter writes in the most recent edition of *Gold Coins of the New Orleans Mint, 1839-1909*: "Despite a higher mintage figure, the 1846-O is a scarcer date than the 1845-O. This is especially so in Uncirculated grades." He estimates five or six survivors in MS60 or higher and lists this example among his list of finest pieces. Strongly struck from the rims to the centers, there are relatively few abrasions scattered over the original yellow-gold surfaces. Census: 2 in 60, 6 finer. CAC: 1 in 60, 1 finer (12/18).
Ex: Baltimore Sale (*Stack's Bowers*, 3/2013), lot 4201. NGC ID# 25TK, PCGS# 8230

1851-C Half Eagle, AU58
Approaching the Finest Survivors

- 3835 1851-C AU58 PCGS. Variety 1.** Punchmark on the ear, mintmark close to the branch stem. The 1851-C is scarce in the absolute sense with probably no more than 250 to 300 pieces extant, most of which survive in VF through lower AU grades. This conditionally rare AU half eagle approaches the top 10 examples known. The reverse is strongly defined, while the obverse is a touch softer. Myriad abrasions occur over the deep yellow-gold surfaces. Population: 4 in 58, 6 finer (12/18). NGC ID# 25U6, PCGS# 8247

1855-C Half Eagle, MS60
A Rarity in Mint Condition

- 3836 1855-C MS60 NGC. Variety 1.** Half eagle production at the Charlotte, North Carolina branch mint in 1855 remained virtually identical to the previous year. A total of 39,788 pieces were struck, just a few hundred coins more than in 1854. The 1855-C is a collectible issue in most grades, becoming a major rarity in mint condition. Detail is slightly uneven over partly lustrous yellow-gold surfaces. Liberty's curls and the right-side stars are crisp, while the first few stars and the date are slightly soft. A similar effect characterizes the reverse. Minor abrasions are peppered throughout. Census: 4 in 60 (1 in 60+), 10 finer (12/18). NGC ID# 25UR, PCGS# 8262

1856-C Half Eagle, AU58+
Rare in Finer Grades

- 3837 1856-C AU58+ NGC. CAC.** A coin with wholly original surfaces and excellent eye appeal, this AU58 example is a mere whisper from Uncirculated as recognized by the NGC Plus designation. The natural green-gold color displays light-orange and lilac overtones over the boldly struck surfaces. Nearly full mint luster remains. Minor roughness in the lower left obverse field from die rust is noted, along with a small planchet flaw beneath stars 8 and 9. This coin is one of two AU58 examples to earn the Plus designation from NGC, where just 12 coins are certified numerically finer by the service (12/18).
Ex: Eric P. Newman Numismatic Education Society, Part V (*Heritage*, 11/2014), lot 3292. NGC ID# 25UW, PCGS# 8267

1858-D Liberty Half Eagle, AU55
Overlooked Branch Mint Scarcity

- 3838** 1858-D AU55 PCGS Gold Shield. CAC. Variety 43-HH. The 1858-D Liberty half eagle is a better date in the series, from a mintage of 15,362 pieces. Its elusive nature is seldom appreciated, outside of series specialists. This Choice AU specimen shows just a touch of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain much original mint luster. Population: 24 in 55, 38 finer. CAC: 3 in 55, 7 finer (12/18). NGC ID# CBBT, PCGS# 8278

1861-C Five Dollar, XF45
Final Charlotte Half Eagle

- 3839** 1861-C XF45 NGC. Variety 1. The 1861-C is popular as the final half eagle struck at the Charlotte Mint. A portion of the 6,879-coin mintage is believed to have been struck after the mint was ceased by the Confederacy. It is impossible to determine which coins were struck under Confederate control, but the factor of intrigue remains for collectors. Doug Winter estimates that 150 to 175 examples of the 1861-C half eagle survive. This Choice XF coin displays smooth olive-gold surfaces and well-detailed devices. Some flatness on the eagle's neck is a product of the strike more than wear. NGC ID# 25VL, PCGS# 8289

1861-D Half Eagle, XF45
Final Dahlonega Issue

- 3840** 1861-D XF45 NGC. Variety 46-JJ. The 1861-D is among the rarest Dahlonega half eagles overall, and it is highly sought-after as the final issue from this mint. Only 75 to 85 pieces are believed known from a recorded mintage of just 1,597 coins. This Choice XF representative displays remarkably smooth olive-gold surfaces and well-detailed design elements. Struck from slightly misaligned dies, the obverse is a trifle off-center toward 12 o'clock, while the reverse is a similar amount off-center toward 2 o'clock. The rims are nonetheless complete, and the remnants of a sharp strike characterize the devices. Eye appeal is outstanding. Census: 7 in 45, 30 finer (12/18). NGC ID# 25VM, PCGS# 8290

1870-CC Five Dollar, VF20
Inaugural-Year Carson City Key

- 3841** 1870-CC VF20 PCGS Gold Shield. CAC. Variety 1-A. Writing in their *Encyclopedia of U.S. Gold Coins*, Garrett and Guth explain: "The 1870-CC is one of the most popular coins from the Liberty Head series. It is the first year of issue from a popular mint and highly desirable." Only 7,675 examples were struck, and 75 to 100 pieces are believed extant. This well-worn key date has attractive reddish-gold color, and detail is good for the grade. Marks are unobtrusive. We only note a single rim nick at 11 o'clock on the obverse. Population: 9 in 20, 56 finer. CAC: 1 in 20, 10 finer (12/18). NGC ID# 25WA, PCGS# 8320

1874 Liberty Half Eagle, AU58
Elusive Issue in All Grades

- 3842** 1874 AU58 NGC. From a meager mintage of 3,488 pieces, the 1874 Liberty half eagle is scarce-to-rare in all grades today. This attractive near-Mint specimen exhibits just a trace of wear on the well-detailed design elements and the pleasing orange-gold surfaces are lightly abraded for the grade. Traces of original mint luster remain intact and the overall presentation is quite impressive. Census: 19 in 58, 4 finer (12/18). NGC ID# 25WN, PCGS# 8333

1877 Liberty Half Eagle, AU55
Rare, Low-Mintage Issue

- 3843** 1877 AU55 NGC. The 1877 Liberty half eagle claims the second-lowest business-strike Philadelphia mintage of the series, at a meager 1,132 pieces. Just a touch of wear shows on the high points of this impressive Choice AU specimen, and the lightly abraded orange-gold surfaces show traces of prooflike reflectivity in sheltered areas. Census: 7 in 55, 20 finer (12/18). NGC ID# 25WZ, PCGS# 8342

1882-S Half Eagle, MS66
One of the Four Finest Coins Graded

- 3844** 1882-S MS66 NGC. Nearly 1 million 1882-S half eagles were struck, and survivors are plentiful through MS64. Gems are scarce, while coins at this level are major rarities with just three submissions at NGC and a single example at PCGS (12/18). Glittering honey-gold surfaces exhibit full definition and a nearly pristine obverse. There are just a handful of tiny flecks on the reverse. NGC ID# 25XJ, PCGS# 8360

1893 Liberty Half Eagle, MS66
Condition Census Example

- 3845** 1893 MS66 NGC. Despite a substantial mintage of 1.5 million pieces, the 1893 Liberty half eagle is an elusive issue at the MS66 grade level. This delightful Premium Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster throughout. Overall eye appeal is outstanding. Census: 7 in 66, 2 finer (12/18). NGC ID# 25YA, PCGS# 8383

1903-S Half Eagle, MS66+
Cartwheel Frost

- 3846** 1903-S MS66+ PCGS Gold Shield. CAC. The rarity profile of the 1903-S half eagle is similar to that of the 1902-S. Examples are collectible through MS65, but the population drops off substantially in MS66. Pristine peach-gold surfaces glisten with cartwheel frost. Liberty's curls and the eagle's feathers are razor-sharp. Obviously on the verge of an even higher grade, with just a couple of unimportant grazes and flecks. Population: 34 in 66 (10 in 66+), 0 finer. CAC: 8 in 66, 0 finer (12/18). NGC ID# 25Z3, PCGS# 8408

INDIAN HALF EAGLES

1908 Pratt Half Eagle, MS65+
High-Grade First-Year Example

- 3847 1908 MS65+ PCGS Gold Shield.** The 1908 was a well-saved first-year issue. While it is considered one of the few accessible Pratt half eagles in Gem condition, the 1908 becomes scarce in MS66 and uncollectible in MS67. Strongly struck, highly lustrous surfaces display attractive orange-gold and lavender hues. A single wispy abrasion at the upper reverse prevents an even finer assessment. NGC ID# 28DE, PCGS# 8510

1911 Half Eagle, MS65
Scarce This Fine

- 3848 1911 MS65 NGC.** Its large mintage of 915,000 pieces makes the 1911 half eagle an available date in lower Mint State grades, and a popular choice for type collectors. The issue becomes scarce in MS64, and Gems are quite elusive. In *A Handbook of 20th Century United States Gold Coins*, David Akers opines "Gems are rare in an absolute sense" and "MS-66s are virtually unknown."

The present coin is a delightful Gem, with lustrous, greenish-gold surfaces. The strike is a little soft on the lower feathers of the headdress, a feature commonly seen on this issue. While the 1911 is usually seen heavily abraded, the surfaces of this example show only a few insignificant handling marks. Census: 50 in 65, 1 finer (12/18).

From The Speechless Collection. NGC ID# 28DP, PCGS# 8520

1911-S Indian Half Eagle, MS63
Seldomly Encountered Finer

- 3849 1911-S MS63 PCGS. CAC.** The 1911-S Indian half eagle claims a substantial mintage of 1.4 million pieces but the issue is still elusive in grades above the MS63 level. This attractive Choice example exhibits well-detailed design elements and lightly marked, lustrous orange-gold surfaces with a few amber alloy specks on both sides. PCGS has graded 35 numerically finer examples (12/18). NGC ID# 25ZM, PCGS# 8522

1916-S Half Eagle, MS64
Final Accessible Five Dollar Issue

- 3850 1916-S MS64 PCGS Gold Shield.** The San Francisco Mint was alone in striking 240,000 half eagles in 1916 — the denomination's final year of issue before its swan song in 1929. Those coins were struck at the Philadelphia Mint, though, and are generally uncollectible. This wheat-gold near-Gem is well-defined at the centers. Slight buckling around the rims softens peripheral detail somewhat. Mint luster is rich and frosty. PCGS has graded 15 finer submissions (12/18). NGC ID# 28DY, PCGS# 8532

EARLY EAGLES

1795 BD-5 13 Leaves Eagle, AU50
Elusive Variety

3851 1795 13 Leaves, BD-5, R.5, AU50 NGC. Bass-Dannreuther Die State e/c, both dies showing evidence of lapping that is most obvious on the obverse that has several shortened star points. The eagle's left facing leg is mostly severed from the body due to lapping of that die. A die chip between OF and AMERICA is present on all examples of BD-4 and BD-5 that shared a common reverse die. Die lapping was a process intended to remove unwanted details such as clash marks. The unintended consequence was often the partial or complete removal of design elements.

The 1795 eagles were the first of the denomination coined at the Philadelphia Mint. Five varieties are known, including the famous and very rare BD-3 Nine Leaves variety with just over 20 pieces known. Among the other four, BD-1 is encountered more often than all other varieties combined, with a population estimated at 225 to 325 examples, according to Dannreuther. BD-2 is scarce with about 100 examples known, BD-4 is also scarce with a total population of about 70 examples, and BD-5 is rare with approximately 40 surviving pieces. Less than 600 eagles of 1795 remain in numismatic circulation today, according to those estimates. In all grades and for all varieties, NGC and PCGS have certified 426 submissions.

Scattered marks and faint hairlines appear on the light yellow-gold surfaces of this pleasing piece. A few trivial splashes of copper toning appear along the right obverse border. This is an attractive example to represent the first year of issue for the gold eagle. The BD-5 die pair was the final variety coined with the 1795 date. NGC ID# 25ZU, PCGS# 45713 Base PCGS# 8551

1797 Large Eagle Ten Dollar, BD-2, VF35
Very Rare Early Die State

3852 1797 Large Eagle, BD-2, High R.4, VF35 NGC. Bass-Dannreuther Die State a/a. In 2006, John Dannreuther wrote that BD-2, identified by the long, thin eagle's neck, was only known with a crack through the 7. However, no such crack is present on this Choice VF representative, an important consideration for keen students of this series. This was the first use of this obverse, which was later used to strike BD-3 and BD-4 representatives, likely in 1798. All of those coins also show the crack. Further, we have only ever seen one other 1797 Large Eagle BD-2 ten dollar gold piece without the crack, an AU53 coin offered as part of our October 2009 Dallas Signature sale. Red and olive-gold tones color lightly worn and abraded surfaces. Good detail remains, however, including considerable definition on the eagle's neck feathers. A very rare and significant offering in this early die state. NGC ID# 25ZY, PCGS# 45717 Base PCGS# 8559

1799 Ten Dollar, MS63
Large Obverse Stars, BD-10
Ideal Early Eagle Type Coin

3853 1799 Large Obverse Stars, BD-10, R.3, MS63 NGC. CAC. Bass-Dannreuther Die State a/a, without any clashing, lapping, or cracks. Two varieties exist for the 1799 ten dollar gold piece. Each shares this common obverse with distinctive Large Stars. BD-9 is the much rarer of the two variants, identified by the leaf tip pointing between IC in AMERICA. This BD-10 die marriage with the leaf touching the I is much more collectible. Indeed, it is one of the most plentiful of all early eagles struck between 1795 and 1804. John Dannreuther estimates in *Early U.S. Gold Coin Varieties* (2006) that as many as 12,500 to 17,500 of the 37,449 eagles minted in 1799 were from this die pair, and that upward of 300 to 400 coins survive.

Considering that many of these pieces were meant either for export, where they would have been melted for bullion, or for domestic circulation, it is remarkable that any Mint State coins survive at all. But they do. In fact, PCGS CoinFacts estimates 150 BD-9 and BD-10 coins combined are extant in MS60 or higher. Naturally, they are tightly held, scarcely offered, and highly sought-after. Nevertheless, the 1799 Large Stars ten dollar is much more available in high grades than nearly all of its contemporaries and is ideal for type representation.

This gorgeous, fully struck Draped Bust eagle presents gleaming mint luster over warm, medium yellow-gold surfaces. Small marks are seen on each side, including a couple of tiny hits on the date digits, but they pale in comparison to the significance, conditional rarity, and eye appeal of this offering. NGC reports 44 finer submissions for all 1799 eagle varieties, Small and Large Obverse Stars combined. CAC (for both Large Obverse Stars varieties): 7 in 63, 17 finer (12/18). NGC ID# 2625, PCGS# 45723 Base PCGS# 8562

1801 Capped Bust Right Eagle, AU55
Scarcer BD-1 Variety

3854 1801 BD-1, R.5, AU55 PCGS Gold Shield. Bass-Dannreuther Die State b/d, with obverse die cracks between 0 and 1 in the date and from star 13 through the bust. The 1801 Capped Bust Right eagle claims a mintage of 44,344 pieces, but some of those coins were probably dated 1800. Two die varieties are known for the date. This coin represents the BD-1 variety, with star 8 away from the cap. The BD-1 is a scarce variety, with a surviving population of just 40-50 examples in all grades. The obverse die failed quickly, explaining the elusive nature of this variety, which probably accounted for 2,500-4,000 pieces of the reported mintage.

The present coin is an attractive Choice AU specimen, with just a trace of wear on the well-detailed design elements. The lightly abraded orange-gold surfaces retain much of their original mint luster, with traces of prooflike reflectivity in sheltered areas. Population (for the variety): 1 in 55, 1 finer (12/18). NGC ID# 2627, PCGS# 45733 Base PCGS# 8564

1803 BD-3 Eagle, MS61
Small Reverse Stars *Guide Book* Variety

3855 1803 Small Reverse Stars, BD-3, R.4, MS61 PCGS. Bass-Dannreuther Die State c/d, heavily clashed. The reverse clouds are imprinted in the obverse die above the date, and the outline of the date numerals is evident on the reverse amid the TES in STATES. BD-3 is the most plentiful 1803 ten variety and an excellent representative of the Small Reverse Stars *Guide Book* variety. This piece is sharp in the centers, and the left-hand obverse border is weak only because of adjustment marks that thinned the planchet in that area before striking. Isolated areas of weakness also affect the lower edge of Liberty's bust and the corresponding area of the reverse beneath OF. Luster clings to the fields, and the natural straw-gold coloration is highly appealing. Population: 11 in 61, 36 finer (12/18). NGC ID# 2629, PCGS# 45737 Base PCGS# 8565

LIBERTY EAGLES

Underrated 1846 Eagle, AU53
Few Coins Survive This Fine

- 3856 1846 AU53 PCGS Gold Shield.** With a mintage of 20,095 pieces and an estimated survivorship of probably fewer than 180 or 190 coins, the 1846 Philadelphia Mint eagle is terribly underrated, as are many of its contemporaries. This orange-gold example saw a bit of circulation and shows faint evidence thereof in the form of high-point blending and light abrasions. A single depression below star 5 merits note. Population: 8 in 53, 12 finer (12/18). NGC ID# 262W, PCGS# 8594

1851 Ten Dollar, Near-Mint
Ex: S.S. Republic

- 3857 1851 AU58 NGC.** Ex: S.S. Republic. A nicely struck butter-gold Borderline Uncirculated No Motto ten. The reverse displays considerable luster, and the fields are typically abraded. Includes a wooden S.S. Republic presentation box, Odyssey Marine Exploration DVD, and certificate of authenticity. Census: 62 in 58 (1 in 58+), 23 finer (12/18). NGC ID# 263A, PCGS# 8606

1872-CC Ten Dollar, XF Details
Well-Known, Low-Mintage Issue

- 3858 1872-CC — Damage — PCGS Genuine.** XF Details. Variety 1-A. The 1872-CC is a low-mintage, low-availability CC ten. Only 4,600 pieces were produced. The devices are well-struck overall. The surfaces have been whizzed and tapped, most likely to obscure graffiti. In spite of these problems, the CC collector will face a difficult challenge when trying to find a finer XF example.

1890-CC Liberty Eagle, MS62
Variety 1-A, the Only Dies

- 3859 1890-CC MS62 NGC. CAC. Variety 1-A.** Luster rolls across lightly marked and pleasing surfaces. A fully struck apricot-gold example of this low mintage Carson City issue. The 1890-CC is more elusive than its 1891-CC successor, especially in Uncirculated grades. Census: 35 in 62 (1 in 62 ★), 6 finer. CAC: 16 in 62, 3 finer (12/18). NGC ID# 266S, PCGS# 8718

1893-CC Eagle, AU55
Final Year of Carson City Production

- 3860 1893-CC AU55 NGC. Variety 1-A.** The only known dies. A total of 14,000 ten dollar gold pieces were struck at the Carson City branch mint in 1893 before the facility shut down on June 1. The issue is popular but challenging in all grades. This lightly circulated CC eagle enjoys deep reddish-gold color and shows strong detail on the relief elements. Small marks and some discoloration near stars 3 and 4 are noted. NGC ID# 2672, PCGS# 8726

1893-CC Ten Dollar, AU55
Surprisingly Scarce

- 3861 1893-CC AU55 PCGS. CAC. Variety 1-A.** Surprisingly difficult for this final year of issue, especially when compared to the availability of the 1893-CC double eagle. Only 14,000 tens of this date and mint were struck, and few are graded Choice AU or finer. Only slight friction has dulled the surfaces. Hints of original reddish patina surround the outer devices on each side. Well deserving of the CAC endorsement. NGC ID# 2672, PCGS# 8726

1903 Liberty Ten Dollar, MS65
Rarely Offered This Fine

3862 1903 MS65 PCGS. The last 1903 eagle in Gem condition we handled was one year ago as part of the spectacular Admiral Collection in our February 2018 Long Beach Signature sale. Comparable examples do not appear on the market with great frequency, which is understandable given their rarity. This lustrous orange-gold Liberty ten dollar presents well-struck motifs and a touch of softness at the lower obverse. Both sides are impressively clean with marks limited to trivial shallow ticks. Population: 9 in 65 (3 in 65+), 1 finer (12/18). NGC ID# 267V, PCGS# 8752

THE NEW MINT, SPRING GARDEN STREET, PHILADELPHIA.

PROOF LIBERTY EAGLES

1901 Liberty Eagle, PR66 Ultra Cameo
Only 85 Examples Struck

3863 1901 PR66 Ultra Cameo NGC. CAC. Only 85 proof Liberty eagles were struck in 1901, down considerably from the 120 specimens minted the year before. Population data from the leading grading services has been severely inflated by resubmissions and crossovers, as NGC and PCGS have recorded 91 grading events between them, six more than the number of coins minted (12/18). In *United States Proof Coins*, Volume IV, John Dannreuther estimates the surviving population at 40-55 examples in all grades today, an estimate that agrees well with the issue's frequency of appearance at auction. Three coins are included in institutional collections at the Smithsonian and ANS. PCGS also lists six specimens in impaired condition.

The proofs were delivered in four batches throughout the year, with 38 examples delivered on March 26, 11 specimens on June 17, three coins on September 24, and a final delivery of 33 pieces on December 30. The first three batches were struck inside the Second Philadelphia Mint, but the final group was struck in the new medal room of the Third Philadelphia Mint, which was occupied in October of 1901. The new facility had more modern machinery, powered by electricity, and a new hydraulic coin press, but all the proofs were struck from the same pair of dies. This was the last year before the Mint switched to the all-brilliant finish for proof coins, which severely reduced the cameo contrast on proofs of that era.

The present coin is a delightful Premium Gem, with razor-sharp definition on all design elements. The devices exhibit a thick coat of mint frost that contrasts profoundly with the deeply mirrored fields to create an intense cameo effect. The lemon-yellow surfaces are impeccably preserved, but two small marks on the obverse rim, outside star 5, can serve as pedigree markers. There is also a small lintmark in the reverse field, near AM in AMERICA. The 1 and 9 in the date show the diagnostic minor repunching. This coin combines absolute rarity, exceptional technical quality, and terrific eye appeal. Series specialists should bid accordingly. Census: 2 in 66 Ultra Cameo, 0 finer. CAC: 2 in 66, 0 finer (12/18).

Ex: Baltimore Auction (Bowers and Merena, 11/2006), lot 3837; J.A. Sherman Collection (Stack's, 8/2007), lot 3332; 73rd Anniversary Sale (Stack's, 10/2008), lot 1073; 74th Anniversary Sale (Stack's, 11/2009), lot 1924. NGC ID# 28G8, PCGS# 98841

INDIAN EAGLES

1907 Saint-Gaudens Eagle, MS65
No Motto, Population Tapers Off at This Level

- 3864** 1907 No Motto MS65 NGC. The certified population for the 1907 No Motto ten dollar really tapers off in MS65. Many of these first-year coins were saved in high grades, explaining the issue's general availability through MS64. This Gem is finely textured and lustrous, showing rich orange-gold color and a bold strike. Two ticks appear on the lower part of the neck. NGC ID# 28GF, PCGS# 8852

1907 Indian Ten, MS66
No Motto Type

- 3865** 1907 No Motto MS66 PCGS Gold Shield. After a small production of With Periods coins, illustrating the design as Saint-Gaudens intended, Mint engraver Charles Barber created his vision of the design, and the No Motto coins were struck in 1907 and 1908. After public outcry, the motto, IN GOD WE TRUST, was restored to the reverse in 1908. The No Motto and With Motto coins are the two major types of the Indian eagle series, while some collectors add an example of the rare Periods Obverse design. This amazing Premium Gem exhibits a solitary copper toning spot in the left obverse field. Otherwise, the surfaces are mark-free and exceptional. PCGS has only certified 12 finer examples (12/18). NGC ID# 28GF, PCGS# 8852

1908-S Ten Dollar, MS63
High-End for the Grade

- 3866** 1908-S MS63 PCGS Gold Shield. Boasting a small mintage of 59,850 pieces, the 1908-S Indian eagle is scarce in Mint State. The San Francisco Mint was the last to receive dies in 1908 for the new Saint-Gaudens issue. Production did not begin until after the reinstatement of IN GOD WE TRUST on the lower reverse, making only one variety for this issue. Uncirculated examples are widely scattered throughout various grades, although Gems are rare. This Select coin remains collectible and retains significant eye appeal, despite light, scattered marks. The strike is sharp, and each side displays luminous orange-gold luster. A thin mark on Liberty's cheek is the only individually mentionable abrasion. NGC ID# 28GL, PCGS# 8861

1909 Ten Dollar, MS64
Brightly Frosted, Textured Fields

3867 1909 MS64 PCGS Gold Shield. CAC. The 1909 can be more difficult to find than expected, particularly in Choice and Gem Uncirculated condition. This is a well-detailed and brightly frosted example that shows high-end preservation for the grade. The finely textured fields lack obvious abrasions, and warm yellow-gold color with orange accents is readily appealing. CAC: 28 in 64, 8 finer (12/18). NGC ID# 28GM, PCGS# 8862

1911 Ten Dollar Indian, MS66
Popular Type Coin

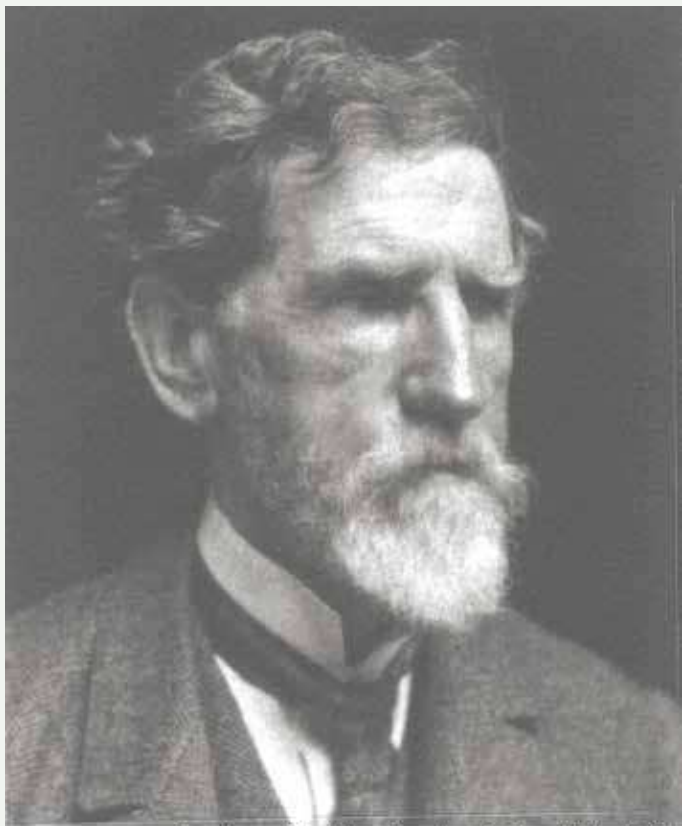

3868 1911 MS66 PCGS. CAC. The 1911 Indian eagle boasts a large business-strike mintage of 505,500 pieces, making it one of the more available dates of the series in today's market and a popular choice of type collectors. Many of the coins were used in international commerce and escaped the Gold Recall of the 1930s, to be repatriated in later years. Of course, the population does drop off considerably at the Premium Gem level, and finer examples are quite rare.

This spectacular Premium Gem exhibits sharply detailed design elements throughout and vibrant mint luster on both sides. The well-preserved orange-gold surfaces display a few highlights of green and rose, and eye appeal is terrific. Population: 29 in 66 (5 in 66+), 12 finer. CAC: 22 in 66, 5 finer (12/18).

Ex: Chicago Signature (Heritage, 8/2013), lot 5888, where it brought \$16,450.

From The Speechless Collection. NGC ID# 28GT, PCGS# 8868

Courtesy of the Saint-Gaudens National Historic Site

1911-D Eagle, AU58
Crisp Strike

- 3869 1911-D AU58 PCGS Gold Shield.** No other issue in this popular series by master sculptor Augustus Saint-Gaudens claims a lower mintage. Only 30,100 1911-D eagles were struck, and they are elusive in high grades, including all Mint State levels. Satiny yellow-gold surfaces display crisp detail with trivial high-point rub. Smooth with the only singular mark being a tick on the jaw. NGC ID# 28GU, PCGS# 8869

Head of Nike by Augustus Saint-Gaudens

1914-D Eagle, MS65
Remarkable Eye Appeal on Two-Toned Surfaces

- 3870 1914-D MS65 NGC. CAC.** The 1914-D eagle is a generally well-produced affair that shows generous luster and oftentimes a full strike. This Gem example, certified by NGC, shows remarkable eye appeal. The surfaces have a flashy color that runs from lemon-yellow in the fields to deep orange-gold on the device high points of each side, and cartwheel luster is blatant over each side. A loupe reveals a somewhat granular, frosty texture to the fields, and there are simply no contact marks of consequence on either side. While the strike is not absolute, it is not far from it. An example with greater eye appeal would be hard to find. Census: 46 in 65 (4 in 65+), 20 finer. CAC: 9 in 65, 8 finer (12/18).
From The Speechless Collection. NGC ID# 28H3, PCGS# 8876

LIBERTY DOUBLE EAGLES

1850-O Twenty Dollar, XF45
First-Year New Orleans Type Coin

- 3871 1850-O XF45 PCGS. Variety 2.** The mintmark is separated from the tailfeathers on this variety of the first-year New Orleans issue. Coinage of double eagles at the Louisiana branch mint in 1850 amounted to 141,000 pieces, fueled by gold deposits from California during the height of the Gold Rush. The 1850-O is one of only a few readily collectible double eagle issues from this mint. This Choice XF coin displays bright yellow-gold color and good detail. No significant abrasions are present. NGC ID# 268G, PCGS# 8903

1851-O Double Eagle, AU50
Accessible New Orleans Twenty

- 3872 1851-O AU50 PCGS Gold Shield. Variety 5.** Die chips occur between ER in LIBERTY, and the mintmark is placed slightly left over the N in TWENTY. This is by far the most accessible New Orleans double eagle, claiming a mintage of 315,000 coins. Moderately abraded yellow-gold surfaces show signs of brief circulation, including blending over the design high points. NGC ID# 268J, PCGS# 8905

1851-O Twenty Dollar, AU53
Attractive O-Mint Type Coin

- 3873 1851-O AU53 NGC. Variety 2.** The 1851-O boasts the highest double eagle mintage from the New Orleans Mint at 315,000 pieces. Gold deposits from California miners were at a peak during this period, as there was no federal branch mint yet on the West Coast, and the U.S. Assay Office of San Francisco was in its infancy in 1851. Survivors of this issue are popular with branch mint type collectors. This About Uncirculated coin has bright yellow-gold surfaces and sharp detail. Both sides are remarkably smooth and appealing. NGC ID# 268J, PCGS# 8905

1852-O Twenty Dollar, AU53
Among the Few Collectible Louisiana Issues

- 3874 1852-O AU53 PCGS. Variety 1.** The 1852-O is one of the few collectible New Orleans double eagles, but even this date is challenging in problem-free AU condition or better. Original luster glows around the raised design elements, which show typical definition for a lightly circulated O-mint product. Yellow-gold surfaces are lightly abraded without any singular blemishes to report. NGC ID# 268L, PCGS# 8907

1852-O Twenty Dollar, AU58
Attractive and High Grade for the Issue

- 3875 1852-O AU58 NGC. Variety 1.** The 1852-O is a median rarity in the Type One series, ranking 25th out of the 43 issues. The mintage for this date is an appealingly low 190,000 pieces, and survivors are seldom found in Uncirculated condition. The near-Mint grade, such as this coin, is usually considered the best collector value. With some green-gold tendencies, this coin is an attractive, well-defined example that is slightly nicer than average for the date. Minimally marked for a coin of this size with some slight prooflike tendencies in the fields as the coin is examined under a light. Ex: Long Beach Signature (Heritage, 1/2004), lot 342, where it realized \$10,925. NGC ID# 268L, PCGS# 8907

1853/'2' Double Eagle, AU58
FS-301, Interesting No Motto Variety

3876 1853/'2' FS-301 AU58 PCGS Gold Shield. CAC. The origin of the artifact within the lower loop of the 3 has been debated by America's foremost numismatic experts without a unified conclusion having been reached. Some argue it is the remnants of an underlying 2, while others suggest it may be a recut 3 or something else entirely. Regardless, it is included in the *Cherrypickers' Guide* and the *Guide Book*, and is highly collectible as such. Original red and olive-gold color are hallmarks of this sharply struck near-Mint twenty. The only softness occurs on the lowest reverse stars. Lustrous and well-preserved. Population: 26 in 58 (2 in 58+), 11 finer. CAC: 13 in 58, 7 finer (12/18). NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

1854 Small Date Twenty, MS61
Lustrous and Appealing

3877 1854 Small Date MS61 PCGS. The more plentiful Small Date variety of the 1854 double eagle is conditionally scarce in Uncirculated condition. This MS61 coin is in a collector-friendly grade, and displays few significant abrasions, surpassing expectations of eye appeal. Detail is sharp and luster is radiant and frosty. Bright reddish-gold interiors cede to yellow-gold borders. The 1 in the date is faintly repunched at its base. Population: 16 in 61, 10 finer (12/18). NGC ID# 268R, PCGS# 8911

1854 Liberty Double Eagle, AU58
Scarcer Large Date Variant

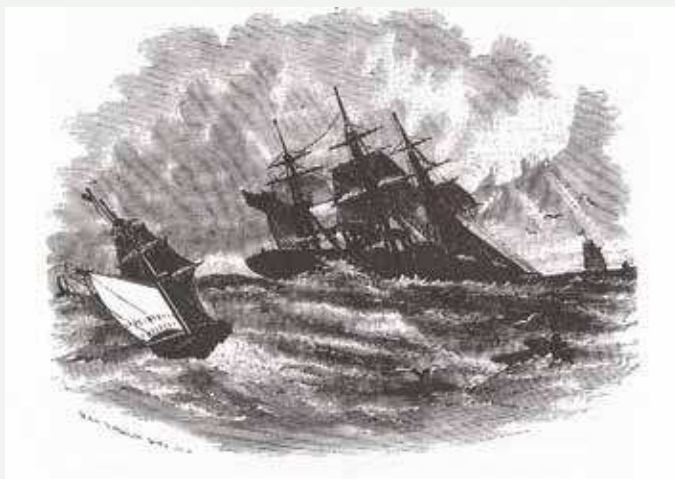

3878 1854 Large Date AU58 NGC. The 1854 Liberty double eagle claims a substantial mintage of 757,899 pieces, but experts estimate less than 10% of that total were struck from Large Date dies. The Large Date logotype was probably intended for use on silver dollars and the numerals are dramatically larger than those on the Small Date coins. Despite a few examples recovered from modern shipwreck finds, the Large Date remains much scarcer than its Small Date counterpart today.

The present coin is an attractive near-Mint example, with lustrous yellow and rose-gold surfaces that show only minor abrasions and chatter. Only the slightest trace of high-point wear is evident on the strongly impressed design elements. Overall eye appeal is outstanding. Census: 22 in 58 (1 in 58+), 9 finer (12/18). NGC ID# 268S, PCGS# 98911

1856 Double Eagle, AU55
One of Five S.S. *Central America* Coins

3879 1856 AU55 PCGS. Ex: S.S. *Central America*, SSCA 6742. According to Doug Winter, "There were only five [1856 double eagles] found on the S.S. *Central America*." This is one of them, having made its way from the East coast to the West shortly after its production, only to return on that fateful voyage in August-September 1857. This partly lustrous orange-gold representative enjoys strong design detail and shows minimal high-point friction. Scattered bagmarks from travel are expected. NGC ID# 268Y, PCGS# 8917

1856-S Liberty Twenty, MS62
Ex: S.S. Central America

3880 1856-S MS62 PCGS. CAC. Variety 17D. Ex: S.S. Central America. SSCA 5934. This coin exhibits a full upper-left serif on the U in UNITED and the mintmark is tilted to the right, identifying Variety 17D. The 1856-S Liberty double eagle enjoyed a substantial mintage of more than 1.1 million pieces. Thanks to its presence in several shipwreck finds and the famous Baltimore Hoard, the 1856-S has a high survival rate in high grade and the issue is a popular choice for type collectors. More than 1,000 specimens of the 1856-S were recovered from the S.S. Central America alone. The Mint State examples from the S.S. Central America are acknowledged as some of the finest Type One double eagles ever seen.

This an attractive MS62 representative with pleasing peach-gold surfaces that are lightly marked for the grade. The design elements are sharply detailed and both sides radiate vibrant mint luster. Overall eye appeal is outstanding. Population: 23 in 62, 15 finer. CAC: 2 in 62, 7 finer (12/18). NGC ID# 2692, PCGS# 8919

1857 Double Eagle, MS60
Rare Mint State Survivor

3881 1857 MS60 PCGS Gold Shield. Ex: Dallas Bank Browning / Gilded Age Collection. The plate coin in Bowers' *U.S. Liberty Head \$20 Double Eagles: The Gilded Age of Coinage* (2014). The 1857 is very scarce in mint condition, and this MS60 representative is far finer than its grade suggests. In fact, the Stack's Bowers cataloger noted in this coin's 2014 appearance: "In our opinion, if all MS-60 coins were this nice there would be no reason to seek MS-63 coins." A pinpoint strike, vibrant frosty luster, and amazing orange-gold color are highly desirable qualities. Inarguably high-end for the grade. Population: 12 in 60, 58 finer (12/18).

Ex: Dallas Bank Collection (Stack's, 10/2001), lot 18; *Gilded Age Collection* (Stack's Bowers, 8/2014), lot 12015, which realized \$12,925. NGC ID# 2693, PCGS# 8920

1857-O Liberty Double Eagle, AU58
Rare Issue in Mint State

3882 1857-O AU58 NGC. Variety 1. Although the 30,000-piece mintage of the 1857-O Liberty double eagle would be considered minuscule in almost any other series, it was actually a significant increase over the production totals of the previous three years. The coins were released into circulation, where they suffered heavy use and attrition over time. Despite a number of quality pieces that were recovered from the wreck of the *S.S. Republic* in recent times, the 1857-O is an elusive issue in AU58 condition, and Mint State specimens are rare.

This attractive near-Mint example exhibits just a trace of friction on the high points of the design elements and the pleasing orange-gold surfaces show only minor abrasions and chatter, with a mix of luster and prooflike reflectivity in the fields. Census: 27 in 58 (2 in 58+), 4 finer (12/18). NGC ID# 2694, PCGS# 8921

1857-S Double Eagle, MS62
Ex: *S.S. Central America*

3883 1857-S MS62 NGC. Variety 20A. Ex: *S.S. Central America*. The "Spiked Shield" variety, named by Robert Evans after the die line that pierces the left shield border. Variety 20A was the most prevalent recovered from the wreck, and was presumably coined shortly before the *S.S. Sonora* left San Francisco for Panama on August 20, 1857. Passengers (and their gold) crossed the isthmus to travel to New York City on the *S.S. Central America*, never to arrive. This is a sharply struck sun-gold example with good luster and fewer than the expected number of marks. We note a small pit below the left (facing) wing, west of the shield. (Total: 11 coins) NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, MS62
Rare Non-Shipwreck Survivor

3884 1857-S MS62 PCGS. CAC. Ex: The Fairmont Collection. The look of this MS62 representative distinguishes it from the plentiful 1857-S twenties recovered from the *S.S. Central America*. It is likely one of the few Mint State examples to have survived naturally above sea level. Mint frost issues from luminous yellow-gold surfaces and is only slightly subdued in the open fields. Each side exhibits a crisp impression and scattered bagmarks, two of which above the eagle's head merit mention. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, MS63
Ex: *SSCA, Spiked Shield Variety*

3885 1857-S MS63 PCGS. Spiked Shield, Variety 20A. Ex: *S.S. Central America*, *SSCA* 3695. A majority of the more than 5,000 1857-S double eagles brought up from the *Central America* exhibit a raised die line through the left shield border, giving the variety its name. This Select example has the classic look that its counterparts possess, including radiant mint luster, a full strike, and smooth peach-gold color. Minor marks at the lower left obverse and above the eagle's right (facing) wing explain the grade. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, MS64
Ex: S.S. Central America

- 3886** 1857-S MS64 PCGS. Spiked Shield, Variety 20A. Ex: S.S. Central America, SSCA 0051. An example of the plentiful Spiked Shield variety with a raised die gouge through the lower left shield border. This near-Gem 1857-S No Motto twenty from the famed Ship of Gold is typically frosty and razor-sharp. Each side shows an array of rose, orange, and mint-green accents over clean peach-gold surfaces. Housed in its original gold foil PCGS holder. NGC ID# 2696, PCGS# 8922

1857-S Twenty Dollar, MS64
Ex: S.S. Central America, Gold Label

- 3887** 1857-S MS64 PCGS. Variety 20C. Ex: S.S. Central America. SSCA 1427. The "Narrow Serif" variety, named by Robert Evans after the needle-thin left serif of the U in UNITED. A crisply struck peach-gold near-Gem with moderate contact on the field near the profile. Housed in a gold label holder. Included with the lot is a Ship of Gold faux book with a maroon cover and a certificate of authenticity signed by Tommy Thompson, leader of the circa-1988 shipwreck recovery team. NGC ID# 2696, PCGS# 8922

1857-S Twenty Dollar, MS65
From the S.S. Central America
Gem No Motto Type Coin

- 3888** 1857-S MS65 PCGS. Variety 20A. Ex: S.S. Central America. SSCA 2084. The specialist-familiar "Spiked Shield" variety with two die lines near the left shield border. A radiant lemon-gold Gem that boasts booming luster and extraordinary eye appeal. Careful examination is required to locate the minimal signs of contact. The strike is sharp except on the lowest arrowhead. Variety 20A was the most prevalent double eagle die marriage recovered from the S.S. Central America, which sank with great loss of life on September 12, 1857. Certified in a gold-label holder. Included with the lot is a Certificate of Authenticity signed by famous explorer Tommy Thompson, along with a maroon faux book and an emerald-green Bowers and Merena box. NGC ID# 2696, PCGS# 8922

1857-S Twenty Dollar, MS65
Superb Luster and Preservation
Likely Ex: S.S. *Central America*

- 3889** 1857-S MS65 NGC. Variety 20A. The Spiked Shield variety. Although not pedigreed to the S.S. *Central America*, this Gem 1857-S double eagle nonetheless possesses the distinct visual characteristics and exceptional high-grade quality for which the shipwreck coins are immediately identifiable. Prior to the 1980s, the 1857-S double eagle was a rarity in Mint State. But salvage operations of the *Central America* recovered more than 5,000 examples of the date, many remarkably preserved in the pristine condition in which they resided when loaded into the hold in 1857. The *Central America* recovery coins often show glistening yellow-gold interiors surrounded by a deeper halo of orange-gold peripheral color. Such is the appearance of the present coin, although the chief visual attribute of this piece is the exceptional preservation of the frosty luster. The strike is razor-sharp. A loupe reveals a few tiny ticks on Liberty's jaw that represent the only grade-limiting imperfections on the coin. Two die lines penetrating the left edge of the reverse shield identify the "Spiked Shield" variety, the most plentiful of the varieties found on the S.S. *Central America*. NGC ID# 2696, PCGS# 8922

1857-S Liberty Double Eagle, MS65
Ex: S.S. *Central America*

- 3890** 1857-S MS65 PCGS. CAC. Variety 20A. Ex: S.S. *Central America*, SSCA 2423. The 1857-S Liberty double eagle was a rare issue in high grade before the recovery of the treasure from the S.S. *Central America*. Fortunately for present-day collectors, more than 5,000 examples were discovered in that famous shipwreck find, making the 1857-S the most available Type One double eagle in high grade, and the favorite choice of type collectors.

Many die varieties were found when the recovered coins were studied. This coin represents the "Spiked Shield" variety, identified by two heavy die lines that extend from the shield into the left reverse field. The design elements of this spectacular Gem are sharply detailed and the well-preserved yellow and rose-gold surfaces radiate vibrant mint luster throughout. Eye appeal is terrific. A Certificate of Authenticity from the Columbus-America Discovery Group accompanies the lot. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, MS65
Vibrant Mint Frost, Rich Color

- 3891 1857-S MS65 PCGS Gold Shield. CAC. Variety 20B.** Ex: Chicago Classics. Although this Gem 1857-S Liberty double eagle no longer resides in its original PCGS gold foil holder, it is an unquestionable S.S. *Central America* recovery and example of the plentiful Spiked Shield variety designated by Robert Evans as Variety 20B. Rich golden-orange borders turn to lighter shades of peach-gold near the centers. Both sides are awash in the vibrant mint frost that characterizes the *Central America* coins, and the effect is highly appealing. CAC's endorsement is entirely deserved, affirming the quality of this Gem No Motto twenty. NGC ID# 2696, PCGS# 8922

1857-S Twenty Dollar, MS65+
Phenomenal Quality and Eye Appeal
No Motto Type Coin

- 3892 1857-S MS65+ PCGS. CAC. Variety 20B. Bold S mintmark.** There may not be a formal pedigree on the holder, but no official pedigree is needed to determine the origin of this magnificent 1857-S double eagle in Gem condition. It undoubtedly derives from the wreckage of the S.S. *Central America*, the contents of which were originally recovered by Tommy Thompson, Bob Evans, and their team during the late 1980s and early 1990s, although more coins have surfaced in recent years. The unabraded peach-gold surfaces and radiant mint frost are both hallmarks. Strike definition is complete, and the only abrasion is a tick within the ring of stars on the reverse. Phenomenal technical quality and eye appeal for a No Motto twenty dollar. NGC ID# 2696, PCGS# 8922

1858 Double Eagle, AU58
Elusive Issue in High Grade

3893 1858 AU58 PCGS. CAC. The 1858 Liberty double eagle is a scarce issue in AU grades, from a relatively small mintage of 211,714 pieces. This is an attractive near-Mint example of this Type One issue, with lustrous surfaces and rich yellow-gold color. Population: 38 in 58, 29 finer. CAC: 15 in 58, 6 finer (12/18). NGC ID# 2697, PCGS# 8923

1858-O Double Eagle, AU58
Scarce Southern No Motto Issue
Only Five or Six Coins Finer

3894 1858-O AU58 NGC. Variety 3. Double eagle production at the New Orleans Mint saw a modest increase over the previous year in 1858, rising to a still-small total of 35,250 pieces. Doug Winter estimates 225 to 275 examples of the 1858-O survive. Most of these are in XF through mid-AU condition. Nearly Uncirculated representatives like this are scarce, and there are only five or six examples known in Mint State. Four die varieties are identified. This one features the date low and left, with the mintmark high and slightly left over the N in TWENTY. Both sides are razor-sharp, with full detail on the portrait and obverse stars. Deep orange and red-gold surfaces show trivial evidence of rub, and myriad marks are relatively minor in nature. This is a phenomenally appealing example of a scarce New Orleans No Motto twenty. NGC ID# 2698, PCGS# 8924

1860 Twenty Dollar, AU58+
Popular Type One Issue

3895 1860 AU58+ PCGS Gold Shield. CAC. The 1860 is the second most available Type One twenty, an availability that is greatly attributable to its mintage of 577,670 pieces. There were only 82 pieces found in the salvage operations of the *S.S. Republic*, having little impact on the total survivorship in all grades between 1,500 and 2,000 pieces. This is a bright near-Mint example. The surfaces retain significant amounts of mint luster and there are numerous small abrasions scattered across each side. NGC ID# 269D, PCGS# 8929

1861 Twenty Dollar, MS61
Lustrous and Original

3896 1861 MS61 PCGS. Ex: The War Hoard. Original luster and olive-gold patina covers this low-end Mint State example of the plentiful 1861 double eagle, an excellent type coin for the collector who appreciates an old-time look. The coin is well-struck and unworn, although scattered abrasions limit the grade. NGC ID# 269G, PCGS# 8932

1861 Liberty Twenty, MS62
Lightly Marked, Colorful Surfaces

3897 1861 MS62 PCGS Gold Shield. From a large mintage of nearly 3 million pieces, the 1861 Liberty double eagle is an available Type One issue, but it does become scarce at the MS62 grade level. This attractive MS62 specimen is especially well-preserved for the assigned grade, with lustrous orange-gold surfaces and sharply detailed design elements throughout. PCGS has graded 53 numerically finer examples (12/18). NGC ID# 269G, PCGS# 8932

1862-S Liberty Double Eagle, AU58
Seldom Encountered Any Finer

3898 1862-S AU58 PCGS Gold Shield. Like many issues from the period, the 1862-S Liberty double eagle is available in lower circulated grades, but high-grade examples are elusive. This attractive near-Mint example displays just a trace of high-point wear on the design elements, with some spidery die cracks in the reverse legend. The vivid orange-gold surfaces are lightly abraded, with vibrant mint luster and outstanding eye appeal. Population: 66 in 58 (3 in 58+), 27 finer (12/18). NGC ID# 269N, PCGS# 8938

1864-S Liberty Double Eagle, MS61
Elusive Issue in Mint State

3899 1864-S MS61 PCGS Gold Shield. From a mintage of 793,660 pieces, the 1864-S Liberty double eagle is an elusive Type One issue in all Mint State grades. Most high-grade examples have been recovered from shipwrecks in relatively recent times, but we have no information about the origin of this piece. This impressive MS61 example displays well-detailed design elements, with just a trace of the usual softness on the prongs of the coronet. The vivid orange-gold surfaces radiate vibrant mint luster on both sides and show the expected number of minor contact marks for the grade. Overall eye appeal is strong for the issue. Population: 26 in 61, 18 finer (12/18). NGC ID# 269T, PCGS# 8942

1866-S No Motto Twenty, AU55
Scarce Type One Issue

3900 1866-S No Motto AU55 NGC. The 1866-S represents a transitional year between the Type One and Type Two designs, with the No Motto variety being by far the scarcer of the two. This is also an issue that is considered a high-grade condition rarity, although it is still very scarce in lower grades, even VF and below. This piece has reddish-golden surfaces, and while not fully struck, the design elements are surrounded by light mint frost. Typically abraded with myriad small and medium contact marks on either side. Census: 24 in 55, 16 finer (12/18).

Ex: November Signature (Heritage, 11/2003), lot 7825, where it realized \$27,600. NGC ID# 269W, PCGS# 8945

1866 Double Eagle, Choice AU
First-Year Motto Type

- 3901 1866 Motto AU55 PCGS.** The year 1866 witnessed the implementation of the motto, IN GOD WE TRUST, above the eagle. The motto would remain on this denomination until Saint-Gaudens' design was inaugurated late in 1907. The motto was reinstated partway through 1908. The 1866 Motto twenty is a popular issue but can be difficult to obtain in grades above Choice AU. Strong motifs display minimal friction. Rich sun-gold surfaces remain vibrant and partly lustrous. NGC ID# 269X, PCGS# 8949

1866-S Liberty Twenty, MS61
First S-Mint Type Two Issue

- 3902 1866-S Motto MS61 PCGS Gold Shield.** The San Francisco Mint struck a small mintage of the older Type One double eagles early in 1866, before the new dies with the motto IN GOD WE TRUST arrived from Philadelphia. Once the dies were on hand, a more substantial production of 842,250 double eagles of the new design was accomplished. Most of the coins circulated heavily in the hard money economy of the Western United States, or were used to settle accounts in foreign trade. Few were saved for numismatic purposes. As a result, the Type Two 1866-S Liberty twenty is an elusive issue in Mint State grades today.

The present coin is an attractive MS61 specimen, with well-detailed design elements and pleasing orange-gold surfaces that show the appropriate number of minor contact marks for the grade. Both sides retain much of their original mint luster intact. Population: 16 in 61, 8 finer (12/18). NGC ID# 26B2, PCGS# 8950

1868 Double Eagle, AU53
Scarce in Any Grade

3903 1868 AU53 NGC. The Mint manufactured 98,575 double eagles in 1868 — the third year of Type Two production. NGC and PCGS have certified only 368 pieces combined (12/18), and that total is likely inflated by resubmissions and crossovers. To be sure, the 1868 is elusive in any grade. This lightly circulated and predictably abraded AU53 representative showcases partial mint frost around the legends. The obverse stars are crisp, while blending occurs over the centers, as usual. NGC ID# 26A3, PCGS# 8953

1869 Double Eagle, MS61
Remarkable Mint State Survivor

3904 1869 MS61 PCGS Gold Shield. As of (12/18), PCGS and NGC have certified 51 Mint State submissions for the 1869 double eagle. With 175,155 pieces struck, that total represents an Uncirculated survival rate of merely 0.03%. The fact is none of these coins were ever intended to survive. They were manufactured exclusively for export, as gold and silver remained unseen in domestic circulation after the Civil War. Once the coins were received abroad, they were usually melted and recoinced. It is purely by chance that a few dozen Mint State pieces are extant, including this MS61 representative. Khaki accents complement frosty orange-gold surfaces. The stars show full radials, and partial detail appears on the eagle's neck feathers. Heavily abraded, as expected, with a scrape between OF AM. Population: 13 in 61, 17 finer (12/18). NGC ID# 26A5, PCGS# 8955

1870 Double Eagle, AU55
Low Survival Rate

3905 1870 AU55 NGC. The 1870 poses a challenge in any grade, with a survival rate of less than 1% from an original mintage of 155,150 coins. This Choice AU example remains partly lustrous with a hint of semireflectivity in the obverse fields and splashes of deep orange patina mostly on the reverse. Well-detailed for a Type Two twenty. A couple of abrasions on the cheek serve as pedigree markers. NGC ID# 26A7, PCGS# 8957

1872-CC Twenty Dollar, XF40
Smooth Surfaces

3906 1872-CC XF40 NGC. **Variety 1-A.** A scarce variety with the date close to the dentils and the mintmark closely spaced. The 1872-CC twenty is a slightly better early date in the Carson City short set and is widely sought in any grade obtainable. This lightly circulated piece displays wheat-gold surfaces with faint hints of luster. Unusually smooth surfaces for the grade. NGC ID# 26AE, PCGS# 8964

1873 Closed 3 Double Eagle, MS62+
Rarely Offered This Fine
None Finer at NGC

3907 1873 Closed 3 MS62+ NGC. The Closed 3 variant of the 1873 double eagle is far and away rarer than the Open 3 issue. Double eagle coinage at the Philadelphia Mint surpassed 1.7 million pieces in 1873, but no record was kept for differentiating the Closed 3 and Open 3 varieties. This Plus-graded MS62 example is tied for the finest at NGC, and only a single PCGS coin is reported finer (12/18). Luster encompasses the frosty wheat-gold fields, complementing well-struck design elements that show only light abrasions. Eye appeal exceeds expectations for the grade. Census: 11 in 62 (2 in 62+), 0 finer (12/18). NGC ID# 26AL, PCGS# 8966

1873 Open 3 Double Eagle, MS63+
Perfect Coin for Type Purposes

3908 1873 Open 3 MS63+ PCGS Gold Shield. CAC. The 1873 Open 3 twenty dollar gold piece is the most readily collectible Type Two double eagle and one of the two issues in that subset that can reasonably be obtained in MS63 condition. This Plus-graded example approaches the next highest grade level, where the 1873 Open 3 becomes a significant rarity.

The portrait and eagle show good detail on this eye-appealing Select Uncirculated representative. Definition is slightly soft around the borders, but trivially so. Luminous yellow-gold surfaces glisten with vibrant mint frost. Exceptionally clean for the assessment. PCGS reports 12 finer grading events (12/18). NGC ID# 26AL, PCGS# 8967

1873 Open 3 Twenty Dollar, MS63+
Vibrant Mint Frost, CAC Approval

3909 1873 Open 3 MS63+ PCGS Gold Shield. CAC. The 1873 Open 3 twenty dollar is more plentiful than its Closed 3 counterpart, but the issue is scarce in MS63 and finer examples are rarely seen. Although strike detail is typically uneven, this high-end Select representative showcases vibrant mint frost over each side that combines with eye-appealing yellow-gold color. Grazes are minimal. PCGS reports 12 finer submissions. CAC: 41 in 63, 4 finer (12/18). NGC ID# 26AL, PCGS# 8967

1874-CC Twenty Dollar, AU53
Collectible Carson City Type Coin

3910 1874-CC AU53 PCGS. Variety 4-A. The obverse features a large die chip on Liberty's neck, and the mintmark is widely spaced, as usual. A touch of central strike softness is noted on each side, but the outer elements are boldly defined despite a trace of friction. Color is light yellow-gold and hints of mint luster remain on this accessible Carson City type coin. NGC ID# 26AP, PCGS# 8971

1874-CC Double Eagle, Vibrant AU58
Rarely Seen Finer

3911 1874-CC AU58 PCGS Gold Shield. Variety 3-A. Die chip on Liberty's temple, Wide CC mintmark. In general, the 1874-CC double eagle is one of the most collectible Type Two twenties from the storied Nevada branch mint. Production reached 115,085 pieces in 1874, about a 500% increase in output over the previous year. Examples are offered regularly in VF through Choice AU condition, but near-Gems are more elusive. Anything finer is a serious condition rarity. Abundant mint frost remains, its vibrance undiminished by a trace of blending on the well-struck motifs and scattered abrasions. One mark on the cheek will identify this yellow-gold representative in future appearances. PCGS has graded 27 finer submissions (12/18). NGC ID# 26AP, PCGS# 8971

1875 Double Eagle, MS63
Highest Available Grade Level

3912 1875 MS63 PCGS Gold Shield. Aside from the 1873 Open 3 and the 1876-S, Type Two double eagles are generally uncollectible in MS63 condition. The 1875 is one of the only exceptions. Fair warning: It remains scarce at this level and is virtually impossible to obtain in MS64. This frosty example features attractive orange-gold color and crisp detail. The reverse is notably clean, with a dark alloy spot below TE. A die chip appears on Liberty's jaw line. Population: 90 in 63 (5 in 63+), 5 finer (12/18). NGC ID# 2547, PCGS# 8973

1875-CC Twenty Dollar, MS62
Impressively Smooth and Lustrous

3913 1875-CC MS62 NGC. Variety 2-B. The flag of the 5 in the date is mostly under Liberty's lowest curl, and the right edge of the second C in the mintmark is aligned with the left edge of (TWEN) T(Y). The 1875-CC claims a lower mintage than the 1874-CC with only 111,151 coins struck, but it is more accessible in high grades. Even so, MS62 is the top collectible grade for the issue, above which all examples become scarce. NGC has only seen 26 finer submissions, likely including duplications, and PCGS reports 32 finer representatives (12/18). Both sides are impressively smooth and lustrous with good central strike detail. There are a couple of grade-defining abrasions well-hidden within Liberty's hair. NGC ID# 26AT, PCGS# 8974

1876-CC Double Eagle, AU55
Abundant Mint Frost Remains

- 3914** 1876-CC AU55 NGC. **Variety 7-C.** This 1876 CC-mint double eagle is boldly impressed, and the reverse retains most of its original luster. Glints of frost also remain on the obverse, encircling the stars and filling the coronet and hair. No marks are worthy of mention, aside from a reed mark above the jaw and a thin mark above the right (facing) wing.
Ex: Summer FUN Signature (6/2008), lot 2312; Summer FUN Signature (Heritage, 7/2009), lot 2071, where it brought \$2,530. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU58
Semiprooflike Fields

- 3915** 1876-CC AU58 PCGS Gold Shield. **Variety 1-A.** The obverse shows a die scratch between IB in LIBERTY, and the second C in the mintmark is over the space between NT. The 1876-CC ranks among the most collectible Type Two double eagles from this Western facility (mintage of 138,441 coins). This example features obvious semiprooflikeness in the fields and good detail on the devices, with practically indistinguishable friction. Yellow-gold colors each side. Lightly abraded. NGC ID# 26AW, PCGS# 8977

1876-S Type Two Liberty Twenty, MS64
Ex: Saddle Ridge Hoard

- 3916** 1876-S MS64 NGC. **CAC.** *Ex: Saddle Ridge Hoard.* The Saddle Ridge Hoard is the largest known discovery of buried gold coins in the United States. It was found by a couple while walking their dog in the California gold country in February 2013. The hoard consisted of 1,427 U.S. gold coins, mostly Liberty double eagles, stored in rusted metal cans. Many coins were recovered in Uncirculated condition. The origin of the hoard remains a mystery.

This 1876-S Liberty double eagle represents the final year of the Type Two design, with the denomination abbreviated as TWENTY D. This attractive Choice example exhibits sharply detailed design elements and well-preserved greenish-gold surfaces throughout. Vibrant mint luster radiates from both sides and eye appeal is terrific. Census: 11 in 64, 4 finer. CAC: 5 in 64, 1 finer (12/18). NGC ID# 26AX, PCGS# 8978

1877-CC Double Eagle, AU55
Original Surfaces, CAC Approval

- 3917 1877-CC AU55 NGC. CAC. Variety 1-A.** Die lines from the rim to star 10 and from the upper serif of the E in AMERICA to the rim confirm the variety. The 1877-CC has a much lower mintage than its immediate predecessors — only 42,565 coins compared to 138,441 pieces for the 1876-CC and similar totals for the 1874 and 1875 Carson City twenties. The surviving population is also much lower. This is an original, lightly circulated example with pleasing olive and red-gold color. The devices show good detail with minimal friction. Marks are unobtrusive. CAC: 18 in 55, 18 finer (12/18). NGC ID# 26AZ, PCGS# 8983

1878-CC Double Eagle, XF45
Variety 2-B

- 3918 1878-CC XF45 PCGS. Variety 2-B.** A small production of 13,180 double eagles at Carson City in 1878 used three obverse dies and two reverse dies to form three die marriages identified to date. It seems surprising to have multiple die pairs for such a small mintage. This lovely Choice XF example has light yellow surfaces with minimal marks, and exhibits traces of a mirrored finish on both sides. NGC ID# 26B4, PCGS# 8986

1878-S Twenty Dollar, MS62+
Blatantly Original

- 3919 1878-S MS62+ PCGS Gold Shield. CAC.** Small S. Type Three doubles eagles were produced for the second year in 1878, with San Francisco production reaching 1.7 million coins. The 1878-S is accessible through MS62 but rare in MS63. Khaki and rose accents blend with original orange-gold color. Each side is well-struck and awash in lively mint frost. Scattered marks barely limit the grade. PCGS records 13 higher grading events (12/18). NGC ID# 338K, PCGS# 8987

1879-S Double Eagle, MS62
Underrated in High Grades

- 3920 1879-S MS62 PCGS Gold Shield.** Small S. Collectors should have little to no trouble finding an example of the 1879-S in circulated grades. Even those who demand an Uncirculated representative will be able to find one in MS60 or MS61 with a bit of searching. It is at this level that the 1879-S begins to show its true colors. Examples are scarce in MS62, just a handful are known in MS63, and two near-Gems are tied for finest. This representative displays medium yellow-gold color over well-frosted, lightly marked surfaces. The impression is sharp. PCGS reports 10 finer submissions (12/18). NGC ID# 26B9, PCGS# 8991

1881 Liberty Double Eagle, AU55
Sought-After, Low-Mintage Issue
Rarely Seen Finer

3921 1881 AU55 PCGS Gold Shield. From the early days of the Civil War until 1878, gold coins did not circulate at par in the United States. After that time, banks no longer charged a premium for gold coins, but people in most parts of the country had become accustomed to using the more convenient paper money for everyday transactions, so gold was still seldom seen in circulation. This was not true in the Western states, however, where the hard-money economy remained popular until World War I. Accordingly, the Philadelphia Mint's policy for most of the 1880s was to leave the production of large numbers of double eagles to the San Francisco Mint and concentrate their resources on producing lower denomination gold, silver, and minor coins, especially the Morgan dollar. As a result, the 1881 Liberty double eagle claims a memorably low business-strike mintage of 2,199 pieces, accompanied by 61 proofs.

Collecting large denomination gold coins was too expensive for all but the wealthiest 19th century collectors, and the few who did pursue double eagles systematically were usually content to update their collections by buying a gold proof set every year. The business strikes were released into circulation and few high-quality examples were saved by contemporary numismatists, making the 1881 a rare issue in all grades. Today, there are a few more business strikes than proofs extant, but Mint State examples are even rarer than the proofs. PCGS CoinFacts estimates 40-60 specimens survive in all grades, with five Mint State examples certified, the finest in MS62. NGC has graded six Mint State survivors, with the finest also MS62 (12/18). These figures include an unknown number of resubmissions and crossovers. Even the finest old-time collections often lacked a Mint State example.

This attractive Choice AU specimen exhibits just a trace of friction on the high points of the design elements and the lightly abraded orange-gold surfaces show a mix of satiny mint luster and prooflike reflectivity in sheltered areas. There is some chatter in the fields, but the only mark of note is a dig in the reverse field, near the C in AMERICA. This coin displays exceptional eye appeal for the issue, which is seldom seen this fine. Population: 4 in 55, 12 finer (12/18). NGC ID# 26BC, PCGS# 8994

1882-CC Double Eagle, AU55
Endorsed by CAC

- 3922** 1882-CC AU55 PCGS Gold Shield. CAC. Variety 1-B. This die pair shows a spike from Liberty's eyelid, and the second C in the mintmark is over D(OLLARS). The 1882-CC twenty, with only 39,140 coins struck, has become somewhat more available in the past couple of years, but demand continues to outpace supply. Reddish accents on the reverse accompany light yellow-gold color overall. Partial luster emanates from well-struck surfaces with scattered marks and clash marks in the fields. NGC ID# 26BF, PCGS# 8997

1883-CC Twenty, AU55
Variety 2-A

- 3923** 1883-CC AU55 PCGS. Variety 2-A. The obverse and reverse diagnostics for the 2-A die combination are clearly visible on this Choice AU double eagle that has traces of dark patina on its brilliant and frosty yellow-gold surfaces. Myriad marks on both sides are inconsequential. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, MS61
Rarely Offered With CAC Endorsement

- 3924** 1883-CC MS61 PCGS. CAC. Variety 2-A. The main diagnostic for this variety is the mintmark placement, with the second C partly over the D in DOLLARS. All Carson City double eagles are popular, sustaining ever-strong collector demand. The 1883-CC is no exception, with a relatively small production of 59,962 coins. Examples in MS60 and MS61 are accessible, but those with CAC approval are rare, as are numerically finer survivors. This lustrous orange-gold representative shows complete radial lines on the stars, and well-detailed curls and feathers. Abrasions are scant. PCGS reports 32 finer submissions. CAC: 8 in 61, 4 finer (12/18). NGC ID# 26BH, PCGS# 8999

1884-CC Coronet Twenty, AU58
Sought After in High Grades

- 3925** 1884-CC AU58 PCGS Gold Shield. Variety 1-A. One set of dies struck 81,139 double eagles at the Carson City Mint in 1884. Although this issue is available in the absolute sense, high-grade survivors are fiercely sought. Boldly struck motifs exhibit little trace of friction, and abundant mint luster remains over the yellow-gold surfaces. NGC ID# 26BK, PCGS# 9001

1884-CC Twenty Dollar, MS62
Only Seven Coins Finer at PCGS
Popular Carson City Emission

3926 1884-CC MS62 PCGS Gold Shield. Variety 1-A. The appeal of the Carson City Mint and its coinage is almost inherently understood by collectors. The Nevada facility was relatively short-lived, produced many low-mintage issues, and was deeply connected with the gold and silver mining operations that were so fundamental to Western expansion. In 1884, the CC-mint manufactured 81,139 double eagles. They were intended for local circulation and export. The few Mint State survivors that exist are purely the result of chance. Most derive from overseas sources, where the coins sat in vaults rather than being sent to the melting pot for recoinage.

This frosty orange-gold twenty displays a crisp impression. Each side has a number of bagmarks and other grazes and abrasions, but none overly distract. There are only six finer grading events at PCGS (12/18). NGC ID# 26BK, PCGS# 9001

1884-CC Liberty Twenty, MS62+
Conditionally Rare in Finer Grades

3927 1884-CC MS62+ PCGS Gold Shield. Variety 1-A. The 1884-CC Liberty double eagle claims a mintage of 81,139 pieces, a small production total in absolute terms, but fairly generous in the context of the series. The 1884-CC is reasonably available in circulated grades, and lower Mint State specimens can be located with a little patience, making the issue a popular choice with branch mint type collectors. The issue becomes elusive at the MS62 grade level, however, and finer coins are condition rarities.

The coin offered here is a Plus-graded MS62 specimen, with sharply detailed design elements and pleasing peach-gold surfaces that show the expected number of minor contact marks for the grade. Vibrant mint luster adds to the outstanding eye appeal. Population: 79 in 62 (7 in 62+), 7 finer (12/18). NGC ID# 26BK, PCGS# 9001

1889-CC Twenty, AU53
Solid Quality for the Grade

- 3928** 1889-CC AU53 NGC. Variety 1-A. Only 30,945 pieces were produced in 1889; yet there are a surprising number of high-grade examples available, most probably from recent repatriations from Europe. This is a bright yellow-gold example that displays a number of small, but individually insignificant abrasions. Slight swathes of mint luster can still be seen around some of the devices. NGC ID# 26BV, PCGS# 9011

1890-CC Liberty Twenty, MS61
Popular CC-Mint Type Issue

- 3931** 1890-CC MS61 PCGS Gold Shield. Variety 1-A. From a mintage of 91,209 pieces, the 1890-CC is a relatively available Type Three issue and a popular choice of branch mint type collectors. This impressive MS61 specimen is sharply detailed, from an early state of the dies, with complete definition on the tailfeathers. The lustrous orange-gold surfaces are lightly marked for the grade. NGC ID# 26BY, PCGS# 9014

1889-CC Liberty Twenty, AU58
Type Three CC-Mint Issue

- 3929** 1889-CC AU58 PCGS Gold Shield. Variety 1-A. From a mintage of 30,945 pieces, the 1889-CC Liberty double eagle is surprisingly available, due to a significant hoard that surfaced in the mid-1990s. This impressive near-Mint specimen exhibits sharply detailed design elements, with just a trace of friction on the high points. The lightly abraded orange-gold surfaces retain traces of original mint luster. NGC ID# 26BV, PCGS# 9011

1889-S Twenty Dollar, MS64+
Semiprooflike, Dazzling Mint Luster

- 3930** 1889-S MS64+ PCGS. The availability of the 1889-S double eagle was significantly increased by the discovery of the Saddle Ridge Hoard in February 2013, but its conditional scarcity at the Choice grade level should not be written off. The Hoard about doubled the supply of MS64-graded coins at PCGS, though that service still only shows 82 examples in this grade (18 in 64+), and only five finer (12/18). The present coin, with noticeable semiprooflike mirroring and dazzling apricot-gold luster, rivals the Saddle Ridge Hoard coins in eye appeal, which is significant considering how the latter are among the most eye-appealing examples of this issue known to collectors. The strike is sharp and only a few tiny marks on the cheek preclude a full Gem grade. NGC ID# 26BW, PCGS# 9012

1891-S Twenty Dollar, MS64+
High-End for the Grade

- 3932** 1891-S MS64+ PCGS. CAC. The 1891-S is one of the more frequently encountered pre-1900 issues. It is also an issue that can be found with more pleasing surfaces, grade-for-grade, than other S-mints from this era. While it is reasonably available up to and including MS63, coins at the MS64 grade level are infrequently offered. When they are available, they invariably represent good value, as seen with this piece. This is an especially attractive coin whose surfaces display subtle orange-gold and lilac patina. Each side is remarkably clean with no mentionable abrasions, and the mint luster is thick and frosted. NGC ID# 26C4, PCGS# 9018

1892-CC Liberty Double Eagle, AU55
Attractive CC-Mint Type Coin

- 3933** 1892-CC AU55 NGC. **Variety 1-A.** Although the 1892-CC Liberty double eagle claims a relatively modest mintage, the issue is surprisingly available, due to the repatriation of a significant number of specimens from foreign holdings in recent times. This sharply detailed Choice AU specimen is lightly worn and lightly abraded and the orange-gold surfaces retain traces of original mint luster. NGC ID# 26C6, PCGS# 9020

1892-CC Liberty Double Eagle, AU55
Popular Type Three Issue

- 3934** 1892-CC AU55 NGC. **CAC. Variety 1-A.** An attractive Choice AU specimen of this popular branch mint issue, with just a touch of wear on the high points of the strongly impressed design elements. The lightly abraded orange-gold surfaces retain significant amounts of original mint luster and overall eye appeal is quite strong for the grade. The 1892-CC has become more available in recent years, due to discoveries in foreign holdings.. NGC ID# 26C6, PCGS# 9020

1892-CC Double Eagle, MS60
Appealing for the Grade

- 3935** 1892-CC MS60 NGC. **Variety 1-A.** Liberty's curls and the eagle's feathers (wing, neck, and tail) all show razor-sharp detail. Lightly marked reddish-gold surfaces exhibit complementary hints of orange color along with blue and rose alloy spots around the reverse border. Mint luster is vibrant, and the eye appeal is much better than expected for a coin in this grade. The 1892-CC double eagle is scarce across all Mint State levels. NGC ID# 26C6, PCGS# 9020

1892-CC Liberty Double Eagle, MS61
Nice Strike and Luster

- 3936** 1892-CC MS61 PCGS Gold Shield. **Variety 1-A.** The 1892-CC Liberty double eagle claims a mintage of 27,265 pieces, a minuscule production total in absolute terms, but not unduly small in the context of the series. The 1892-CC was once considered extremely rare in high grade, but a significant number of high-quality specimens have surfaced in European holdings in recent years, making it reasonably available in most grades.

The present coin is an attractive Mint State example, with sharply detailed design elements and pleasing orange-gold surfaces that are lightly marked for the grade. Vibrant mint luster adds to the considerable eye appeal of this specimen. Population: 69 in 61, 64 finer (12/18). NGC ID# 26C6, PCGS# 9020

1893-CC Twenty Dollar, MS60
Lustrous Final-Year CC Coin

- 3937 1893-CC MS60 NGC. Variety 1-A.** Cracks appear through the lower part of the date and (S)TAT(ES) on this lustrous final-year Carson City double eagle. Colorful violet and blue alloy spots accompany the orange-gold color that defines each side. Small abrasions are peppered throughout, but they pose little distraction. Only 18,402 1893-CC twenties were manufactured. NGC ID# 26C9, PCGS# 9023

1899 Liberty Double Eagle, MS65
Popular Turn-of-the-Century Issue

- 3939 1899 MS65 NGC.** Fully struck devices over smooth orange-gold surfaces make this a highly desirable twenty dollar gold piece from the final year of the 19th century. Frosty mint luster shines throughout, and each side of this Gem double eagle lacks singularly distracting abrasions. There are only two numerically finer examples graded at NGC, and one at PCGS (12/18). NGC ID# 26CM, PCGS# 9035

1897-S Liberty Double Eagle, MS65
Extremely Rare Any Finer

- 3938 1897-S MS65 PCGS Gold Shield.** From a substantial mintage of 1.4 million pieces, the 1897-S Liberty double eagle is readily collectible in grades up to the MS63 level, but finer coins are elusive, and Gem specimens are rare. Many examples were used to settle large accounts in foreign trade at the time of issue. A number of those specimens have been repatriated over the years, but rough storage and transport limits the grade of most examples seen.

The present coin is a spectacular Gem, with razor-sharp definition on all design elements and well-preserved orange-gold surfaces that display vibrant mint luster throughout. Overall eye appeal is terrific. Population: 14 in 65 (1 in 65+), 2 finer (12/18). NGC ID# 26CJ, PCGS# 9032

1902-S Liberty Twenty, MS64
Condition Rarity in Finer Grades

- 3940 1902-S MS64 PCGS.** The 1902-S Liberty double eagle is more available than its P-mint counterpart, but it becomes scarce at the MS64 grade level, and finer coins are condition rarities. This attractive Choice example offers well-detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster throughout. Population: 85 in 64 (8 in 64+), 6 finer (12/18). NGC ID# 26CV, PCGS# 9042

1906-D Double Eagle, MS64+
A High-End Denver Type Coin

- 3941 1906-D MS64+ PCGS Gold Shield. CAC.** The 1906-D is a numismatically significant issue, the first double eagle from the Denver Mint and one of only two Liberty Head D-mint twenties. Satiny, sun-gold surfaces show excellent preservation for the grade. The impression is crisp. PCGS has graded 19 finer submissions. CAC: 38 in 64, 4 finer (12/18). NGC ID# 26D5, PCGS# 9050

1906-D Liberty Double Eagle, MS64+
First Denver Mint Issue

- 3942** 1906-D MS64+ PCGS. CAC. The 1906-D Liberty double eagle claims a mintage of 620,250 pieces, and the issue is moderately available in MS64 condition, but examples in finer grades are rare. This Plus-graded Choice example exhibits well-detailed design elements and vivid orange-gold surfaces, with only minor signs of contact. Vibrant mint luster enhances the outstanding eye appeal. PCGS has graded 19 finer examples (12/18). NGC ID# 26D5, PCGS# 9050

HIGH RELIEF DOUBLE EAGLES

1907 High Relief Twenty Dollar
Wire Rim, Choice XF

- 3943** 1907 High Relief, Wire Rim XF45 NGC. High Relief double eagles are usually seen in Mint State. They carried a premium from their first day of issue and never really entered into general circulation. This XF45 example was likely carried as a pocket piece. It exhibits light blending and peppered abrasions. Still, the reddish-gold surfaces are eye-appealing, and the partial Wire Rim remains. NGC ID# 26F2, PCGS# 9135

MCMVII High Relief Twenty Dollar, AU55
Wire Rim

- 3944** 1907 High Relief, Wire Rim AU55 PCGS. CAC.

"I have written my work, not as an essay which is to win the applause of the moment, but as a possession for all time."
— Thucydides

Just as Thucydides viewed his *History of the Peloponnesian War* as a timeless work, so did Augustus Saint-Gaudens take a timeless, long-term view of all his sculptural works as well as his smaller works on the ten and twenty dollar gold pieces. History has proved each correct in their long-term vision. Each labored for many years on their works, but each has stood the test of time; and it is not premature to state that Saint-Gaudens' work on the High Relief double eagle will remain a collectible coin because of its sculptural quality for as long as Thucydides has been appreciated for his meticulous *History*. Even at the AU55 level, the striding figure of Liberty evokes the preeminent leadership role of America in the 20th century. The bright yellow-gold surfaces show just a trace of reddish patina, and there are only occasional contact marks present. Slight friction can be seen over the high points of the design, as one would expect from the grade. NGC ID# 26F2, PCGS# 9135

1907 Wire Rim Twenty Dollar, MS61
Deep Reddish Patina

- 3945** 1907 High Relief, Wire Rim MS61 NGC. When one looks at the result of the sculptural excellence seen on the High Relief double eagle, it should not come as a surprise that the figure of Liberty was the result of many reworked versions. Saint-Gaudens often borrowed from his previous commissions, and that is the case with the figure of Liberty on the High Relief. The head was modeled after his Nike. That bust was in turn taken from his Sherman group with Liberty leading General Sherman. The work on the initial figures of Victory (later Liberty) and General Sherman went through many generations of changes. Louise Hall Tharp wrote that while Saint-Gaudens was in Paris in the late-1890s and working on this commission, his wife Augusta wrote to friends that Augustus was “doing the Sherman cloak all over again and she was ‘making lots of little cloaks’ for him to put on small experimental models, arranging the folds differently on each. When he finally found the right effect, no one would ever dream that such simple lines could have cost him so much time and trouble to achieve.” The same meticulous attention to detail also went into the drapery folds on the High Relief double eagle. This is a more-affordable example of this beautifully designed coin. The surfaces show deep reddish patina and one notable scuff is located in the right obverse field; otherwise, there is just the normal slight signs of coin-to-coin contact one would expect of an MS61. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty Dollar, MS62
Wire Rim Example

- 3946** 1907 High Relief, Wire Rim MS62 NGC. A persuasive case could be made that what characterized the 20th century in America did not begin until Theodore Roosevelt took office as president in 1901, after the assassination of William McKinley. Roosevelt took vigorous action against the lions of industry and advocated for the average worker in this country. Roosevelt's entrance into the arts began in a small way with his membership on the board of the D.C. Park Commission. But that membership led to his introduction to Augustus Saint-Gaudens, which led in turn several years later to Saint-Gaudens' commission to redesign some of the nation's coinage. The newness, vibrancy, and 20th century appearance of Saint-Gaudens' designs had an immediate appeal to both collectors and the population at large. This is a bright example whose mint luster is interrupted by the numerous small contact marks that explain the MS62 grade. NGC ID# 26F2, PCGS# 9135

1907 Wire Rim High Relief Twenty, MS63
Rich, Satin-Like Surfaces

3947 1907 High Relief, Wire Rim MS63 PCGS Gold Shield. Augustus Saint-Gaudens' painter-friend, Will Low, wrote a criticism of Saint-Gaudens' *Amor Caritas*, a masterwork that others had criticized as "not sculpture." His comments apply equally to Saint-Gaudens' later work on the High Relief double eagle:

"Here is a gallery filled with modern sculpture, some of it living, and some of it dead. The greater part shows technical ability of a high order, but how infrequently the quality of expression is of equal import, and how few that we cannot trace back to some previous work. Here is a work pregnant with meaning; of a symbolism that appeals to all; that is novel and personal in its presentation; whose *facture* we hardly consider, so appropriate are the technical methods suited to its theme. Our friend denies that it is sculpture, it may be something better; it is individual, it is beautiful, beyond dispute it is Art."

That is certainly how the design of the twenty dollar High Relief has been regarded over the past century: "beyond dispute it is Art." The sculptural intention of the design is fully evident on this piece with no obvious surface defects. The mint luster is thick and satiny, as always. A remarkable example of Saint-Gaudens' best-known work. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty Dollar, MS64
Satiny, Well-Preserved Surfaces

3948 1907 High Relief, Wire Rim MS64 PCGS. In 1887, Augustus Saint-Gaudens had the Scottish poet Robert Louis Stevenson do a series of sittings for what was ultimately a bas-relief medal and later a plaque of the poet. The artist Will Low was also present during these sittings. During one of these sessions, the conversation came around to the nude in sculpture. Saint-Gaudens said he never had done a nude, but would if he had the chance. At that point in the conversation Will Low quoted Emerson:

"The sinful painter drapes his goddess warm
Because she still is naked, being dressed;
The God-like sculptor will not so deform
Beauty, which limbs and flesh enough invest."

This quote provided Stevenson the perfect opportunity to nickname Saint-Gaudens the "God-like sculptor." The striding figure of Liberty that Saint-Gaudens used on the obverse of the High Relief double eagle is not nude, but he did employ an artistic technique borrowed from Hellenistic Greece, that of covering the figure in what appeared to be wet drapery. The result was to accent the underlying human body while still covering the figure.

This is an especially well-preserved example of Saint-Gaudens highly respected design. The figures on each side show their intended three-dimensional design, and the surfaces display soft, glowing satiny mint luster. There are no obvious contact marks on either side. NGC ID# 26F2, PCGS# 9135

1907 High Relief Double Eagle, MS64
Popular Wire Rim Variant

- 3949** 1907 High Relief, Wire Rim MS64 NGC. An impressive Choice example of Augustus Saint-Gaudens' iconic design, with exquisitely detailed central design elements that stand out in sculptural relief against the basined fields. Like most High Relief twenties, this coin displays a high fin, or Wire Rim, around the circumference of the coin. The well-preserved orange-gold surfaces show no mentionable distractions and vibrant mint luster adds to the outstanding visual appeal. Most examples of this low mintage and distinctive introductory subtype were saved, but demand has remained high for more than a century. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty Dollar, MS64
Wire Rim Example With CAC Endorsement
In High Demand for More Than 100 Years

- 3950** 1907 High Relief, Wire Rim MS64 NGC. CAC. In *Striking Change*, Michael Moran's 2008 book on the collaborative efforts of President Theodore Roosevelt and sculptor Augustus Saint-Gaudens, the author describes the frenzied demand for these High Relief double eagles upon their release in late 1907:

"The coins were shipped to the sub-treasuries and then allocated to the banks. Banks and individuals were limited to five coins. Boston received an allocation of 500 coins or two bags, and they were dispersed in a single day. In response to the demand, the Mint continued striking these coins well past Roosevelt's goal of 5,000 to 6,000, ultimately, upon Leach's instructions, the Mint worked throughout December, striking some 11,000 to 12,000 of these high-relief \$20 pieces."

In all, 12,367 examples were struck, with roughly 70% of that total comprising Wire Rim coins such as this. Warm orange-gold color combines with satiny mint luster over the entirety of this near-Gem. Undeniably clean for the grade, as affirmed by CAC, with the sole exception being a mark in the left obverse field. NGC ID# 26F2, PCGS# 9135

1907 Saint-Gaudens Twenty, MS65
High Relief, Wire Rim

1907 High Relief Double Eagle, MS65
Wire Rim Variant

3951 1907 High Relief, Wire Rim MS65 NGC. Only 12,367 High Relief double eagles were struck in 1907, from a design by esteemed American sculptor Augustus Saint-Gaudens. Fortunately, the issue enjoyed a high survival rate, as the coins were never released into circulation. Although most of the mintage was sent to Subtreasuries for regular distribution, Mint and Treasury officials snapped up the coins as soon as they were shipped and sold them to VIPs and coin dealers at a steep markup. Roger W. Burdette estimates the surviving population at about 8,000 examples in all grades today.

This delightful Gem exhibits a wire rim, or fin, around much of the circumference of the coin. This feature is seen on the majority of the High Reliefs and was initially considered a liability, but present-day collectors find it interesting and attractive. The design elements show razor-sharp detail on the central devices, and the reddish-gold surfaces are free of mentionable distractions. Vibrant mint luster adds to the outstanding eye appeal. NGC has graded 32 numerically finer examples (12/18). NGC ID# 26F2, PCGS# 9135

3952 1907 High Relief, Wire Rim MS65 NGC. Noted sculptor Augustus Saint-Gaudens' design for the 1907 High Relief double eagle has often been called America's most beautiful regular-issue coin design. Difficulties with the high relief of the coins severely limited production. Although the relief was reduced considerably from the Ultra High Relief format originally proposed, every coin had to be struck three times on the medal press to bring up the details of the design, with the planchets annealed between each strike. By working overtime, with up to three medal presses in operation, a modest mintage of 12,367 acceptable examples was accomplished before the end of the year. Most survivors, including the coin offered here, have a fin, or wire rim, around the circumference of the coin.

This impressive Gem exhibits sharply detailed design elements, with three-dimensional sculptural relief on the central devices. The virtually flawless orange-gold surfaces radiate vibrant mint luster, with terrific eye appeal. This lot represents an important opportunity for the Saint-Gaudens specialist. NGC ID# 26F2, PCGS# 9135

1907 Saint-Gaudens Double Eagle, MS65
High Relief, Wire Rim

3953 1907 High Relief, Wire Rim MS65 NGC. The MCMVII High Relief Saint Gaudens double eagle is an iconic issue, with a limited mintage of 12,367 pieces. Two major varieties are known for the issue, one with a Flat Rim and another with a Wire Rim. Most survivors are of the Wire Rim variety, with a thin fin around the circumference of the coin. This feature was formed when metal was extruded through the tiny gap between the collar and the die as the coin was struck. The Wire Rim was initially considered undesirable, as it made it impossible to stack the coins correctly. Mint technicians worked hard to eliminate the fin, by adjusting the dimensions and milling of the planchets. They finally succeeded in eliminating the fin in December of 1907, when the Flat Rim coins were struck. Collector prize both varieties equally today.

This attractive Gem exhibits the high relief of the design to excellent effect, with razor-sharp definition on the central design elements. The Wire Rim is most prominent on the obverse. The well-preserved orange-gold surfaces are lustrous and appealing. NGC ID# 26F2, PCGS# 9135

1907 Flat Rim High Relief Twenty, MS61
The Design a Mixture of Real and Ideal

3954 1907 High Relief, Flat Rim, MS61 NGC. The figure of Liberty, which was derived from Liberty in the Sherman Group, was classically inspired. But it was also a mixture of the real and ideal. Augustus Saint-Gaudens' son, Homer, wrote in his *Reminiscences*: "He felt too deep an interest in this new combination of the real and the ideal to let the monument escape him." Meaning, once he was fully committed to the project Saint-Gaudens would see it through to completion. We see the mix of real and ideal in the figure on the coin as well. Based on what was probably a composite of three models, the figure had a physical grounding in actual women. Yet, he turned the figure into an idealized Liberty set in an equally idealized landscape on the obverse of the coin. The Flat Rim feature is only seen on an estimated 20% of High Relief twenties. Adjustments were made in the Mint in early December to close the gap between the die faces and collar that had created the fin, or so-called wire rim. This is a bright reddish-gold example. The grade is derived from the numerous small contact marks that are scattered across each side. NGC ID# 26F2, PCGS# 9136

**1907 High Relief Double Eagle, MS65
Scarcer Flat Rim Variant, Finely Textured**

- 3955 1907 High Relief, Flat Rim, MS65 PCGS Gold Shield.** Having grown impatient with the drawn-out process of implementing new designs for the ten and twenty dollar gold pieces, President Theodore Roosevelt wrote to Treasury Secretary George Cortelyou on August 24, 1907 demanding that the new coins appear by mid-September. According to Michael Moran in *Striking Change*, "he leveled a threat: if there were any further delays, he would call in Kunz, French, and Brenner to supervise the new coinage. Roosevelt's missive was a wrecking ball aimed directly at the Mint," whose officials detested having outsiders interfere with their operations. Ultimately, 12,367 of these High Relief double eagles were struck through the end of the year. Only a small proportion, roughly 30%, were of the Flat Rim variety, which corrected the fin of extruded metal found on the first coins issued. This beautiful, satiny Gem exhibits finely textured yellow-gold color and a marvelous High Relief impression. A single tick in the left obverse field is seen. NGC ID# 26F2, PCGS# 9136

SAINT-GAUDENS DOUBLE EAGLES

**1908 Twenty Dollar, MS67
No Motto, Swirling Mint Frost**

- 3956 1908 No Motto MS67 NGC.** Short Rays Obverse. This double eagle was struck before the motto IN GOD WE TRUST was reinstated after July 1, along with 4.2 million other examples. Many survive in impressively high grades like this gorgeous and strongly struck Superb Gem. Honey-gold and rose coloration melds with swirling mint frost. Void of noticeable abrasions. NGC ID# 26F6, PCGS# 9142

**1908 Saint-Gaudens Twenty, MS67
No Motto Specimen**

- 3957 1908 No Motto MS67 NGC.** Short Rays Obverse. A delightful Superb Gem representative of the short-lived No Motto design, with well-detailed design elements that show just a touch of softness on the eagle's belly. The impeccably preserved orange-gold surfaces radiate vibrant mint luster, with terrific eye appeal. The No Motto variant is still collectible at the MS67 grade level, but it becomes scarce in finer grades. NGC has certified 15 numerically finer examples (12/18). NGC ID# 26F6, PCGS# 9142

**1908 Saint-Gaudens Double Eagle, MS67
No Motto**

- 3958 1908 No Motto MS67 NGC.** Short Rays Obverse. A spectacular Superb Gem Saint-Gaudens double eagle from the final year of the short-lived No Motto design, this coin exhibits well-detailed design elements, with a touch of softness on the eagle's belly. The virtually flawless orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 26F6, PCGS# 9142

**1908 No Motto Double Eagle, MS67
Razor-Sharp Impression**

- 3959 1908 No Motto MS67 NGC.** Short Rays Obverse. The 1908 is a plentiful issue in high grades and an ideal candidate to represent the two-year No Motto type. Glistening mint frost radiates over each side. Warm orange-gold color includes pale rose and lilac accents. Razor-sharp and practically unmarked. NGC ID# 26F6, PCGS# 9142

**1908 Saint-Gaudens Double Eagle, MS67
Short-Lived No Motto Design**

- 3960 1908 No Motto MS67 NGC.** Short Rays Obverse. From a reported mintage of 4.2 million pieces, the 1908 No Motto double eagle is an available issue in high grade and a popular choice of type collectors. This magnificent Superb Gem exhibits sharply detailed design elements throughout and the virtually flawless surfaces radiate vibrant mint luster from both sides. The issue is somewhat scarce above the MS67 grade level. NGC has graded 15 numerically finer examples (12/18). NGC ID# 26F6, PCGS# 9142

**1908 No Motto Double Eagle, MS67
Ex: Wells Fargo Hoard**

- 3961 1908 No Motto, Wells Fargo Nevada, MS67 NGC.** Short Rays Obverse. The Wells Fargo Hoard is widely known for the quality and eye appeal of its contents. It contained multiple examples of high-grade No Motto double eagles, all the way up to the MS69 level. This spectacular Superb Gem is sharply detailed, aside from a touch of blending on the feathers on the eagle's belly. The virtually pristine surfaces radiate vibrant mint luster, with tremendous eye appeal. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

**1908-D No Motto Twenty, MS65
Rare Any Finer**

- 3962 1908-D No Motto MS65 PCGS.** Long Rays Obverse. The 1908-D is the scarcest No Motto, Arabic Numerals Saint-Gaudens double eagle in high grade. This Gem example represents the finest most collectors will have the chance to acquire, as higher-end pieces are distinctly rare. Liberty's figure and the eagle are boldly rendered, and the satiny surfaces yield soft honey-gold luster. No abrasions are worthy of mention. PCGS lists 15 Premium Gems finer (12/18). NGC ID# 26F7, PCGS# 9143

**1908-D Saint-Gaudens Twenty, MS65
Final No Motto Issue**

- 3963 1908-D No Motto MS65 PCGS. CAC.** Long Rays Obverse. This spectacular Denver Mint Gem represents the final year of the popular No Motto design. The design elements are well-detailed and the vivid orange-gold surfaces are lustrous and well-preserved. Overall eye appeal is outstanding. Housed in a green label holder. PCGS has graded 15 numerically finer examples (12/18). NGC ID# 26F7, PCGS# 9143

1908-S Double Eagle, MS62
Low Mintage, Scarce in Mint State

3964 1908-S MS62 PCGS. Only a single delivery of double eagles, amounting to 22,000 coins, was accomplished by the San Francisco Mint in 1908, delivered in August of that year. These were not released into circulation until September, according to recent findings by Roger Burdette. The 1908-S is an oddity in the series as a date for which there are more circulated pieces known than Mint State. Once a boom region for gold and silver mining, the Western states retained a preference for circulating gold even while Eastern states were becoming increasingly accustomed to paper currency, backed by gold in a government vault. The high-end Mint State coins known today are thought to have been acquired directly from the San Francisco Mint.

The present MS62 example displays a sharp strike and satiny yellow-gold luster. Scattered abrasions determine the grade, but none are individually distracting. Eye appeal is pleasing for the MS62 level. NGC ID# 26FA, PCGS# 9149

1911-D Twenty Dollar, MS66
Gleaming Honey-Gold Representative

3965 1911-D MS66 PCGS Gold Shield. CAC. According to Roger Burdette, "approximately 200,000 [1911-D twenties] were eventually shipped to Europe and 215,000 went to Central and South America in payment for wheat and other agricultural products." Many of these have since been repatriated, explaining the issue's availability. This strong honey-gold twenty with gleaming satin mint luster is impressively free of distracting bagmarks. Only 10 pieces are graded higher at PCGS (12/18). NGC ID# 26FK, PCGS# 9158

1913-D Twenty Dollar, MS65
Ex: Park Avenue Collection

3966 1913-D MS65 PCGS. Ex: Park Avenue Collection. Exquisite peach-gold toning dominates this lustrous and well-struck Gem. Glimpses of olive-green patina are also present. Marks are exceptionally few for the designated grade. The Park Avenue Collection, assembled by the dealership, was registered in 2005 and ranked that year by PCGS as the current finest set of Saint-Gaudens twenties. It is presently listed as #6 All-Time by PCGS. That grading service has certified just eight finer examples of this issue (12/18). NGC ID# 26FP, PCGS# 9162

1913-D Twenty Dollar, MS65
Rare in Finer Grades

3967 1913-D MS65 PCGS. Most Uncirculated 1913-D Saint-Gaudens double eagles grade no finer than MS64. We see Gems at auction on a much more limited basis than the certified population reports would suggest, and finer pieces are rare. This MS65 coin displays frosty wheat-gold luster and a bold strike. No major abrasions are observed. PCGS lists eight finer representatives (12/18). NGC ID# 26FP, PCGS# 9162

**1916-S Twenty Dollar, MS66
Orange and Lavender-Gold Color**

- 3968 1916-S MS66 PCGS Gold Shield.** The large production of 756,000 1916-S double eagles was “part of the Mint’s effort to convert large deposits of British sovereigns and Japanese yen coins into U.S. money as required by law,” according to Burdette. This Premium Gem ranks among the finest examples at PCGS, with only four MS66+ coins technically finer at that service (12/18). Gleaming orange and lavender-gold surfaces showcase uniformly strong detail without any significant marks. NGC ID# 34NJ, PCGS# 9169

**1922-S Double Eagle, MS64
Orange-Gold and Lavender Hues**

- 3969 1922-S MS64 PCGS.** With only a couple thousand 1922-S double eagles believed extant in all grades, this issue cannot be compared with the plentiful branch mint issues of the 1910s or the Philadelphia issues of the 1920s. It is much more difficult to locate. Deep orange-gold color dominates well-preserved, lustrous surfaces. Large swathes of pronounced lavender patina is also seen and eminently appealing. Tiny ticks on the drapery and in the fields define the grade. NGC ID# 26G4, PCGS# 9174

**1922-S Twenty Dollar, MS64+
Conditionally Elusive Branch Mint Issue**

- 3970 1922-S MS64+ PCGS Gold Shield.** Like other branch mint issues from the 1920s, the 1922-S is not nearly as available as its Philadelphia Mint counterpart. If fact, comparison between the two is absurd. Whereas more than 100,000 1922 twenties survive, there are an estimated 2,100 1922-S examples extant, according to Roger Burdette. This is the highest collectible grade for the issue, which becomes scarce any finer. Radiantly lustrous peach-gold surfaces display good detail on the devices. There are small ticks and grazes, but none worth singling out. PCGS reports 21 finer submissions (12/18). NGC ID# 26G4, PCGS# 9174

**1922-S Double Eagle, MS64+
Radiant Mint Luster**

- 3971 1922-S MS64+ PCGS Gold Shield.** The 1922-S has proven to be rare in Gem condition, heightening demand for high-end MS64 coins to the point that these pieces are sought-after in their own right. The present coin is remarkably lustrous and luminous with only occasional small abrasions. The top of the torch shows strong definition. PCGS has seen just 21 finer submissions (12/18). NGC ID# 26G4, PCGS# 9174

**1923-D Double Eagle, MS66+
Excellent Type Candidate**

- 3972 1923-D MS66+ PCGS Gold Shield.** The 1923-D trades at little premium over the Philadelphia Mint issues of this decade, yet has mintage and survival rates that are much lower. Even the elusive and valuable 1929 had a higher mintage than the 1923-D. This highly lustrous orange-gold Premium Gem offers outstanding eye appeal. PCGS has only certified 78 numerically finer examples (12/18). NGC ID# 26G6, PCGS# 9176

1925 Twenty, Highly Lustrous MS67
Doubled Die Reverse, FS-801
None Certified Finer

3973 1925 Doubled Die Reverse, FS-801, MS67 NGC. This is the only known doubled die for the 1925 twenty dollar. Doubling is prominent on the eagle's leg, talons and feathers, and the rays beneath the leg. Undoubtedly this is the finest known example of this variety. The 1925 Saint-Gaudens double eagle was produced in large quantities, with a mintage of 2.8 million pieces. As the large production figure suggests, the date is readily available today, even in high grades, and enjoys great popularity with type collectors. Of course, the population does thin out at higher Mint State levels, and coins in Superb Gem condition are rare. The issue is unknown above MS67 (12/18).

The present coin is a sharply detailed Superb Gem with pale rose-gold surfaces, and ample frosted mint luster. The fields are free of mentionable contact marks, and the eye appeal is quite strong. Census: 26 in 67 (1 in 67 ★), 0 finer (12/18).

Ex: *Long Beach Signature* (Heritage, 2/2011), lot 4737, where it realized \$25,300. NGC ID# 26GA, PCGS# 145743 Base PCGS# 9180

1926-D Saint-Gaudens Twenty, AU58
Elusive Branch Mint Issue

3974 1926-D AU58 PCGS. Despite the adequate mintage of 481,000 pieces, the 1926-D Saint-Gaudens double eagle was considered one of the rarest coins of the series in the 1940s. Most of the mintage was held in Mint or Treasury vaults as currency reserves and never released into circulation. Ultimately, the coins in government custody were melted after the Gold Recall of 1933, and stored as gold bars in the Fort Knox Bullion Repository. Fortunately, a small number of 1926-D twenties was exported to European destinations to settle accounts in foreign trade. These refugees were repatriated in later years, making the 1926-S somewhat more available than it was in the '40s. No large number of coins ever surfaced, however, and Roger W. Burdette estimates the surviving population at 600 examples in all grades today.

This attractive near-Mint specimen exhibits well-detailed design elements, with just a trace of friction on the high points of the devices. The pleasing orange-gold surfaces show only minor abrasions and retain almost all of their original mint luster. The eye appeal is outstanding. NGC ID# 26GE, PCGS# 9184

1926-D Double Eagle, MS64
Among the Top Five Series Rarities

3975 1926-D MS64 PCGS. The 1926-D Saint Gaudens issue remains a rare coin today, although it is more available in grades below Gem than it was at an earlier time, in the early 1950s when the first overseas hoards of 1926-D double eagles were discovered and repatriated. David Akers points out that two of the finest-known examples, the ex: Norweb and Duckor examples, never left domestic shores, adding:

“Prior to the discovery of the small hoards in Europe, the 1926-D was considered to be one of the three greatest rarities in the series, second only to the 1924-S and slightly more rare than the 1926-S. It was also thought to be more rare than the 1920-S, 1921, and 1927-D, the three most valuable regular issues of the series today. The discovery of the hoards in Europe changed all that in terms of population rarity but definitely not condition rarity. In gem and superb uncirculated condition the 1926-D is still considered one of the top five rarities in the Saint-Gaudens double eagle series today.”

The present Choice Mint State example is one of 24 submissions at PCGS in MS64 (including one in 64+), and only five pieces are finer (12/18). The surfaces show cartwheel luster over deep reddish-orange color with some greenish glints, and a loupe reveals numerous scattered marks on each side, more prominent on the obverse. Collectors will find the acquisition of any higher-graded example to be quite difficult.

Ex: *Chicago Signature* (Heritage, 8/2013), lot 5935, where it sold for \$44,062.50.

From *The Speechless Collection*. NGC ID# 26GE, PCGS# 9184

COMMEMORATIVE SILVER

1936 Albany Half Dollar, MS68
None Certified Numerically Finer

3976 1936 Albany MS68 NGC. The 1936 Albany commemorative half dollar claims a relatively generous distribution of 17,671 pieces, but examples in MS68 condition are prime condition rarities. This magnificent MS68 specimen exhibits well-detailed design elements and impeccably preserved lustrous surfaces, with highlights of sea-green and lavender toning. Census: 8 in 68 (2 in 68 ★), 0 finer (12/18). NGC ID# 23WZ, PCGS# 9227

1925-S California Half Dollar, MS68+ ★
Never Seen Finer

3977 1925-S California MS68+ ★ NGC. It doesn't get any better than this example that is tied with one other for the finest that NGC has examined. The surfaces are flawless with satiny silver luster and lovely peripheral rainbow toning around brilliant centers on the obverse and reverse. Census: 16 in 68 (5 in 68 ★, 2 in 68+ ★), 0 finer (12/18). NGC ID# BYGA, PCGS# 9281

1922 Grant Half Dollar, MS66
Scarcer With Star Variant

3978 1922 Grant With Star MS66 PCGS Gold Shield. The first 4,256 Grant Memorial half dollars produced and distributed in 1922 featured an incuse star in the obverse field above GRANT. The star eventually wore down and was lapped away before another 67,405 pieces were struck. The central obverse and nearly the entire reverse remain brilliant, with shades of crimson, golden-orange, and forest-green appearing elsewhere. There are only five finer examples at PCGS (12/18). NGC ID# BYPP, PCGS# 9307

**1928 Hawaiian Half Dollar, MS66
Satiny With Delicate Gold and Blue Hues**

- 3979 1928 Hawaiian MS66 PCGS Gold Shield. CAC.** The 1928 Hawaiian half dollar was distributed to the limited extent of 10,000 coins and is widely regarded as one of the cornerstone issues in the classic commemorative series. Each side exhibits satiny mint luster and remarkably clean surfaces for the grade. Strike detail is bold, with a touch of softness at the lower reverse. Hints of powder-blue and tan-gold patina appear throughout. PCGS reports four finer examples (12/18). NGC ID# BYGR, PCGS# 9309

**1951 Booker T. Washington Half Dollar
Top-Graded MS67+**

- 3981 1951 Booker T. Washington MS67+ PCGS. CAC.** Mixed shades of rose, lavender, blue, green, and orange paint this top-graded PCGS Registry candidate. Frosty mint luster shines through the toning. A single mark on the forehead is the only thing that stands in the way of an even higher grade. Population: 27 in 67 (6 in 67+), 0 finer. CAC: 21 in 67, 0 finer (12/18). NGC ID# BYK9, PCGS# 9424

**1935-S Texas Half Dollar, MS68
Tied for Finest Certified**

- 3980 1935-S Texas MS68 NGC.** From a total distribution of 10,000 pieces, the 1935-S Texas commemorative half dollar is a condition rarity at the MS68 grade level. This delightful MS68 example exhibits sharply detailed design elements and lustrous, impeccably preserved surfaces, under vivid shades of sea-green, lavender, and amber toning, with most of the color on the obverse. Census: 6 in 68, 0 finer (12/18). NGC ID# BYJD, PCGS# 9384

COMMEMORATIVE GOLD

1915-S Panama-Pacific Fifty, MS64
 Scarcer Round Version
 Only 483 Pieces Distributed

3982 1915-S Panama-Pacific 50 Dollar Round MS64 PCGS.

Numismatic entrepreneur Farran Zerbe conceived an ambitious five-coin commemorative program in conjunction with the 1915 Panama-Pacific Exhibition. The commemorative set included a silver half dollar, a gold dollar, a quarter eagle, and two fifty dollar slugs, one round and one octagonal. Both fifty dollar coins featured the same basic design, by New York sculptor Robert I. Aitken. The obverse features a helmeted bust of Minerva, the Greek goddess of wisdom, who also appears on the State of California coat of arms. The motto *IN GOD WE TRUST* is above the bust and the date in Roman numerals is below, all surrounded by the legend *UNITED STATES OF AMERICA/FIFTY DOLLARS*. The reverse exhibits an owl perched on a branch of Western pine next to the motto *E PLURIBUS UNUM*, all surrounded by the legend *PANAMA-PACIFIC EXPOSITION/SAN FRANCISCO*. The octagonal version also features dolphins in the angled corners outside the rest of the design.

The coins were initially sold either singly, or in sets, in velvet-lined black leatherette cases. Later in the program, other options were available, including single and double sets housed in glass covered copper frames from local jewelers Shreve & Co. The \$100 asking price for the fifty dollar pieces was too expensive for most contemporary collectors, so sales were slow. Only 483 examples of the Round version were eventually distributed, the lowest net production total of any U.S. commemorative coin.

The present coin is an impressive Choice specimen, with sharply detailed design elements throughout. The textured orange-gold surfaces are lustrous and appealing, with no mentionable distractions. Overall eye appeal is terrific. The 1915-S Panama-Pacific Round fifty dollar piece is one of the biggest “stoppers” in the U.S. commemorative series. This coin should find a home in a fine commemorative collection. PCGS has graded 34 numerically finer examples (12/18). NGC ID# BYHP, PCGS# 7451

1915-S Panama-Pacific Octagonal Fifty Dollar, MS64 Top-Notch Collector Appeal

3983 1915-S Panama-Pacific 50 Dollar Octagonal MS64 NGC. Mount Rushmore, in the Black Hills of South Dakota, enshrines four great American presidents' profiles in granite: George Washington, Thomas Jefferson, Teddy Roosevelt, and Abraham Lincoln. One might wonder, though, if President Roosevelt belongs in the same august company as the other three. Washington and Jefferson helped forge a new nation from a former British colony, and Lincoln helped preserve the Union during the disastrous, divisive Civil War.

Teddy Roosevelt, however, is perhaps a more problematic case. It is likely that many Americans could not pinpoint a major achievement of his administration, but the fact remains that, more than any other American president, Teddy Roosevelt presided over America's transformation into a global, oceangoing superpower. (Roosevelt, a lifelong student of naval history, served as assistant secretary of the Navy under President William McKinley, resigning from that post to form the fabled Rough Riders, heroes of the Spanish-American War of 1898.) The winning of the Spanish-American war was a part of that transformation, ending Spanish colonial rule in the Americas, but even more important to America's future, and to its present status, was the completion of the Panama Canal.

Roosevelt's connection with the Augustus Saint-Gaudens gold coinage designs has been well and thoroughly discussed. He had no known direct relation with the designs of the Panama-Pacific coinage; Woodrow Wilson was president when the new pieces debuted, and in any case, a great new war was brewing in Europe.

While the Saint-Gaudens gold pieces represent a new fashion, a new wave, a new style of coinage, the Panama-Pacific coinage is associated with two particular *events*: The opening of the leviathan Panama Canal, and the great exposition in San Francisco in 1915 that celebrated both the Canal's opening and the city's rebuilding.

It is fitting that the 1915-S Panama-Pacific fifties should be the largest commemorative gold coins ever struck by the United States during the classic era, as the Panama Canal was certainly the most ambitious engineering project undertaken by America during the first half of the 20th century.

The present octagonal example of the Pan-Pac fifty is favored by most collectors between the two variants for the issue, although the round version is, strictly speaking, slightly rarer. This near-Gem example displays the appropriately *immense* eye appeal on each side. The surfaces show a range of gold and amber hues along with a sharp strike and excellent preservation. The Gem grade is likely prevented by a couple of small marks — in the obverse field, on the cheek and helmet of Minerva on the obverse, and a small tick on the owl on the reverse — but overall, this is a coin of marvelous quality and top-notch collector appeal.

Ex: Chicago Signature (Heritage, 8/2013), lot 5946, where it sold for \$88,125.

From The Speechless Collection. NGC ID# BYHP, PCGS# 7452

TERRITORIAL GOLD

C. Bechtler Five Dollar, AU Details
RUTHERE, 128 G., K-23

- 3984** (1837-1842) C. Bechtler Five Dollar, RUTHERE, 128G., 22C. — Damaged — NGC Details. AU. K-23, R.5. An evenly struck example of this C. Bechtler issue, showing pleasing olive-gold patina and strong definition on the legends. NGC denies a numeric grade on account of damage to the lower obverse and reverse borders, as well as a rim bump above the C in BECHTLER. A couple of faint bends in the planchet are also detectable when rotated beneath a light. Otherwise, a pleasing territorial type coin. Listed on page 394 of the 2019 *Guide Book*.

August Bechtler Gold Dollar, MS62
Plain Edge, 27G., 21C., K-24

- 3985** (1842-50) A. Bechtler Dollar, 27G., 21C., Plain Edge MS62 NGC. K-24, R.3. This issue is scarce in MS62 and rare finer. The present coin is one of only four Prooflike pieces at NGC, including two in this grade and two in the lesser MS61 grade (12/18). In addition to its deep reflectivity, this piece is fully struck and shows only some stray hairlines that limit the grade. Each side has attractive olive-gold patina with tinges of deeper russet adjacent to the relief elements. Listed on page 394 of the 2019 *Guide Book*. Census: 44 in 62 (1 in 62+, 2 in 62 Prooflike), 9 finer (12/18). NGC ID# 2B99, PCGS# 10040

1850 Moffat & Co. Five Dollar, AU53
Problem-Free K-7 Example

- 3986** 1850 Moffat & Co. AU53 NGC. K-7, R.4. Small Eagle. The berry is over the F in FIVE, and the end of the olive branch is beneath the S in S.M.V. Moffat & Co. gold pieces were well-respected in the West and circulated extensively. This AU five dollar piece displays smooth olive-gold surfaces and little high-point wear. An entirely problem-free type coin. Listed on page 396 of the 2019 *Guide Book*. NGC ID# ANJ6, PCGS# 10243

1852/1 Humbert Ten, MS61
Kagin-8

- 3987** 1852/1 Humbert Ten Dollar MS61 NGC. K-8, R.5. A stunning example of this classic Territorial eagle. The surfaces retain the desired luster and the strike is sharp throughout. All known specimens show the die crack on the reverse. Struck over a brief four day period in early 1852. At the time these were coined, there was a desperate need for smaller change in early California. Most of the gold pouring out of the mines, mountains, and streams was converted into the large \$50 slugs. These were fine for transport, but didn't help with smaller purchases. No doubt these smaller eagles and double eagles were a welcome addition to the miners pouches, and could be used for a good meal, night on the town and whatnot, without creating a problem for the merchant that had to make small change. As nice as this date is ever found, NGC has graded four specimens this high with none seen finer (12/18). Listed on page 398 of the 2019 *Guide Book*. NGC ID# 342H, PCGS# 10190

1852 Wass Molitor Ten, XF40
K-4, Large Head (Short Neck), Wide Date
Ex: S.S. Central America

- 3988** 1852 Wass Molitor, Large Head, Wide Date, XF40 PCGS. K-4, R.5. Ex: S.S. Central America. SSCA 7149. A surprising quantity of 60 Wass Molitor & Co. ten dollar Territorial gold pieces were recovered from the S.S. Central America during the discovery and salvage operations by Columbus-America in 1988 and 1989. Among the first coins spotted in the shipwreck were private issue gold coins, as described by Q. David Bowers in his book, *A California Gold Rush History*:

"They saw early California privately minted coins with the imprints of legendary firms such as Moffat & Co., the United States Assay Office of Gold, and Wass, Molitor & Co. Not since the days of the Gold Rush had so many pieces been seen together in their original setting!"

The present coin is the K-4 variety of the Wass Molitor Large Head ten dollar gold piece, characterized by a "Short Neck," Pointed Bust, and a wide, uneven date. The coin retains nice detail and yellow-gold color, with an area of copper-orange stain at the date. As always, the reverse is slightly less detailed than the obverse on this popular, early California gold piece. Housed in its original gold-foil PCGS holder. Listed on page 405 of the 2019 *Guide Book*.

Ex: *Summer FUN Signature* (Heritage, 7/2014), lot 4077, where it realized \$11,162. NGC ID# 33ZM, PCGS# 10348

1854 Kellogg & Co. Twenty, AU50
Long Arrows, K-2

- 3989** 1854 Kellogg & Co. AU50 NGC. Long Arrows, K-2, R.4. The well-regarded firm of Kellogg & Co. issued gold coins in early 1854 to fill the gap between the closure of the United States Assay Office in December 1853 and the opening of the San Francisco Mint. This Impressive twenty dollar piece shows some light wear on the strongly impressed design elements and the moderately abraded orange-gold surfaces retain traces of original mint luster. Listed on page 407 of the 2019 *Guide Book*. NGC ID# ANHY, PCGS# 10222

1850 Mormon Five Dollar, VF Details
K-5, Popular Territorial Issue

- 3990** 1850 Mormon Five Dollar — Damage — PCGS Genuine Gold Shield. VF Details. K-5, High R.5. Don Kagin writes: "It is not certain when the new 1850 \$5 gold pieces were struck, but in Thomas Bullock's Journal entry dated March 15, 1850, the follow is written: 'B.Y. called in morning & gave orders about new dies.' It can probably be presumed that the new coins, varying somewhat in design, were issued soon after that entry." Bullock was director of the Deseret mint, and B.Y. refers to Brigham Young, the Mormon leader. Although well-worn and evenly abraded, this VF Mormon five retains good detail. Green-gold surfaces include red-gold accents. The noted flaw is a circular depression near 9 o'clock. It appears the coin was pressed with a clamp on the "clasped hands" side, which flattened the area opposite (on the "Eye of Providence" side). Listed on page 409 of the 2019 *Guide Book*.

S.S. CENTRAL AMERICA GOLD INGOTS

Blake & Co. Small-Sized Gold Ingot
Ex: S.S. Central America, 14.31 Ounces

3991 Blake & Co. Small-Sized Gold Ingot. 14.31 Ounces. CABG-029. Blake & Co. was one of the primary assayers in the Sacramento area in northern California, in close proximity to the gold fields along the American River. Gorham Blake arrived in San Francisco on May 22, 1852 after working the previous year as a superintendent in an iron mine in Vermont. He was soon employed as an express agent in the Placerville office of Wells, Fargo, and the following year he became an assayer. Blake & Co. company was established in 1855, and while there were numerous personnel changes over the years, Gorham Blake was a driving force, except for a short time, until the company finally went out of business in 1861. The productivity of Blake & Co. was impressive, especially for a firm of its size. By the end of 1856 the company had assayed 200,000 ounces of gold. The fineness of the raw gold varied considerably, thus underscoring the need for a local assayer rather than relying on “pinches” of gold dust for currency. The Michigan Bluff area yielded \$20.15 per ounce, while Carson Valley only yielded \$12.13 per ounce. The ingots of Blake & Co. were shipped to numerous destinations worldwide, but its most famous shipment is one that never arrived, the 33 ingots that went down in the Atlantic when a hurricane sank the *S.S. Central America* in September 1857.

This is one of the smaller-sized ingots from that transport that never arrived. This ingot was poured from Mold B-01, the so-called adjustable *Twix Bar* mold. This long, thin bar has information impressed into three of the long sides. One side has the BLAKE & CO. hallmark. The adjoining long side has: No 5229 [sideways] / 604 FINE / VALUE \$178.67. The next adjoining side has the assay chip out of one corner and states the weight: 14.31 Oz. This ingot is housed in a plastic case, but one of the long sides is partially broken, not affecting the ingot itself. The ingot measures 19 x 72 x 17 mm. The surfaces show slight polishing that is common to ingots from this firm. A few gas bubbles are evident on two of the long sides.

From The Marcello Collection, Part IV.

Blake & Co. Gold Ingot, 19.30 Ounces
Ex: S.S. Central America

3992 Blake & Co. Gold Ingot. 19.30 Ounces. CABG-011. Those who were not in the coin market 30 years ago may not know the reason there are such items as assay ingots. A highly readable explanation is given in Tommy Thompson's *America's Lost Treasure*:

"Although less common in the consumer marketplace than the coins, the ingots are as revealing of the era and are also more unusual in that they are all private issues. Many began as dust and nuggets in the pockets of miners, who brought the raw gold to private assayers for weighing and valuation. The assayers melted down gold, molded it into ingots, then shaved off a corner for their commission and to measure purity. Finally they would stamp the gold with unique identifying marks, indicating the weight, purity, and value, as well as their own maker's marks, and return the ingots to the owners. Gold in this form was the preferred type shipped to banks and other businesses, as well as to the U.S. government. Commercial shippers also brought their gold to private assayers, but did so in larger allotments."

Ingots were never intended to be a permanent record of California assayers, but the recovery of the enormous number of them from the *S.S. Central America* has made them just that. Little was previously known about the private assayers and their recovered gold 130 years after the catastrophic hurricane hit the ship sank it along with hundreds of passengers. Only 33 Blake & Co. ingots were recovered from the *S.S. Central America*, tying it for the smallest number recovered with the Henry Hentsch ingots. Many Blake ingots are relatively small in size when compared to, say, Kellogg & Humbert ingots. This piece shows all six surfaces polished, an indication that the company may have intended their gold bars for smaller commercial transactions. The top side is neatly laid out: BLAKE & CO / ASSAYERS / SACRAMENTO / .746 FINE / VALUE / \$297.62. The individual ingot number is impressed on the top side: No 5196. The weight is stamped into the bottom side: 19.30 Oz. The ingot measures: 39 x 50 x 16 mm.

Harris, Marchand & Co. Gold Ingot
 Unique Marysville's Attribution
 Very Large Size Ingot, 174.04 Ounces

3993 Harris, Marchand & Co. Gold Ingot, Marysville. 174.04 Ounces. CABG-137. The now well-known S.S. *Central America* was the previously named S.S. *George Law*. In a curious incident the year prior to the sinking of the *Central America*, the *George Law* underwent a near-catastrophe within sight of the Florida coast, and with the same captain, William Herndon. A riveting, first-hand account of this near-wreck was recounted by Peter H. Burnett, first governor of California, in *Recollections and Opinions of an Old Pioneer*. In the middle of the night, the ship ran aground on a coral reef.

"No one could sleep in our situation. I never saw a more solemn assemblage of people. Everyone seemed to have a clear perception of our extremely critical situation. There were no jests, no smiles, no witticisms. Those who were professors of religion seemed resigned, those who were confirmed infidels seemed indifferent, while dread sat upon the countenances of those who were halting between two opinions. We were a little world to ourselves, and our little world seemed near its end."

The ship was finally saved the next morning by the rising of the tide, but this incident was curiously not written about to any great extent. The following September, the same ship under the same captain would sink beneath the waves in a hurricane far off the coast of Cape Hatteras with the loss of hundreds of lives and an enormous wealth in gold.

Among the hundreds of gold ingots lost in the wreck of the S.S. *Central America*, those of Harris, Marchand & Co. were little known before the ship's salvage in the late-1980s. Altogether there were 37 Harris, Marchand ingots recovered from the S.S. *Central America*, but this is the only ingot from the Marysville branch office. All the others were from their main Sacramento office. There are distinct stylistic differences between this Marysville ingot and the Sacramento Harris, Marchand ingots. Almost a column and a half is taken up in Bowers' *A California Gold Rush History* on how this single ingot differs. For those who wish to dive deeper into the differences between these two offices of the same firm, we highly recommend reading page 996 of the Bowers reference. For a four-word summary: different offices, different punches.

This is classed as a Very Large Size Ingot, and would be unusual and highly collectible just for its layout, even if it were not unique. Because of its large size, it was possible to include all the necessary inscriptions on the top side; however, there are two columns. At the top and centered is the ingot number: No. 7095. Below and centered on the left side is the Harris, Marchand oval name punch with the coin-like hallmark below with 174.04. Oz. below the hallmark. On the right side and centered is the same curved company name with the hallmark below and below is the fineness: 942. FINE. Centered at the bottom of the top side is the ingot's 1857 value: \$3389.06. The back side was given a finished appearance by tapping. This ingot has a slightly trapezoidal shape, undoubtedly done to facilitate removal from the mold. The ingot measures: 65 x 177 x 25 mm. *From The Marcello Collection, Part IV.*

Justh & Hunter 50.50 Ounce Gold Ingot

Ex: S.S. Central America

3994 Justh & Hunter Gold Ingot. 50.50 Ounces. The California Gold Rush attracted individuals of many motivations and nationalities. A number of the Europeans who came to California at that time were refugees or exiles; in 1848, the same year gold was discovered in California, a series of revolts and revolutions struck European nations, with France, the German and Italian states (which had not yet unified), and parts of the Austrian Empire (most notably Hungary) affected. The case of the Hungarians is particularly relevant to the study of Territorial gold and assayers' ingots; without the turmoil and exile encountered by various Hungarian revolutionaries, there would be no Wass, no Molitor, no Justh (of Justh and Hunter).

Of course, numerous Americans also traveled to California. According to documents reprinted in *California Coiners and Assayers* by Dan Owens, Solomon Hillen Hunter traveled from Baltimore, Maryland to California in 1855, making the Atlantic leg of the trip on a ship named the S.S. George Law; in a touch of grotesque irony, that ship, renamed the S.S. *Central America*, sank in October 1857 with a number of assayers' ingots on board, including this one.

Like many assay offices' pairings, the firm Justh & Hunter made for a bit of an odd couple; Justh had been in California five years and had just left the employ of the U.S. Mint in San Francisco, while Hunter was fresh off the boat. Yet their partnership lasted a little more than three years, including the fateful year of 1857, when a shipwreck inadvertently preserved their legacy for future generations.

The firm of Justh & Hunter was little known before the salvage of the S.S. *Central America*. That changed radically once this fabulous treasure was brought to the surface. There were 86 ingots salvaged from this assayer. This is a medium-sized ingot, even though 50.5 ounces is still quite hefty. Justh ingots range from a low of 5.24 ounces to a whopping 866.19 ounces. This rectangular piece is imprinted on the top side: NO. 4335 / JUSTH & HUNTER / 50.50 OZS. / 883 FINE. / \$921.78. The sides show no imprinting, and the back has the batch number 35 at the top left. Two assay chips are out of opposite corners, as usually seen. The surfaces are orange-gold and show the normal depressions and gas bubbles inherent in the casting process. The ingot measures 43 x 74 x 24 mm.

Ex: Long Beach Signature (Heritage, 9/2011), lot 4572, where it sold for \$166,750.

Kellogg & Humbert Large Size Gold Ingot
97.19 Ounces, Ex: S.S. *Central America*

3995 Kellogg & Humbert Gold Ingot. 97.19 Ounces. CABG-724. The treasure recovered from the S.S. *Central America* between 1988 and 1991 represented a monumental discovery for numismatists and collectors. It also provided historians with an unparalleled time capsule to improve our understanding the Gold Rush economy and the wealth it provided a young United States.

The discovery of gold in California in 1848 had massive economic and demographic consequences that would permanently transform this country. Aside from the enormous waves of migration that took place from east to west, the discovery of gold had a significant impact on coinage production, one reflection of the country's newfound prosperity. In fact, more gold and silver was coined between 1848 and 1853 than had been produced during the preceding 55 years.

Despite the heightened output of federal coinage and the opening of another branch mint in San Francisco in 1854, production could not keep up with commercial demand, especially out West, where paper currency was generally not accepted and large quantities of gold dust needed to be converted into usable financial instruments. Bob Evans, chief scientist and historian for the *Central America* recovery project, wrote in an August 2008 *Numismatist* article:

"The coins salvaged from the S.S. *Central America* offer an interesting view of monetary practices of the late 1850s, but perhaps the gold ingots tell a more unusual and important story. Business during this period often involved large monetary transactions. The coin supply could not begin to meet this demand, even after the San Francisco Mint came into being in 1854. The widespread use of assayers' ingots compensated for this shortfall."

Assayers like Kellogg & Humbert provided an invaluable service, determining the fineness of a depositor's gold dust, pouring the gold into bars, and stamping the ingots with a clear weight and value. This was the only way to regulate large commercial transactions and to ensure widespread prosperity from West to East. This is a Large Size ingot that has surfaces that appear to have been polished, like most Blake & Co. ingots. However, Blake & Co. were for the most part small ingots and the surface polishing may have been to make them more attractive as currency. Weighing in at a whopping 97.19 ounces, it is difficult to imagine similar logic applying to this bar. The top side displays all the necessary information and is laid out vertically: No 981 / K&H hallmark / 971.19 Oz / 875 FINE / \$1757.96. The ingot number is reproduced on the back side in a different font. The ingot is bright yellow-gold overall with no traces of incrustation from the ship's iron hull. The ingot measures: 55 x 111 x 27 mm.

COINS OF HAWAII

1883 Hawaiian Dime, PR62 Cameo
Only 26 Proofs Minted

- 3996 1883 Hawaii PR62 Cameo PCGS.** As is the case with the 1883 Hawaii quarter, half dollar, and silver dollar, the 1883 Hawaii dime is a single-year type. Business strikes were coined in considerable quantity at San Francisco, but the proofs were struck in Philadelphia and are formidable rarities. According to the Medcalf-Russell standard reference, six proof sets were struck in 1883 sans the eighth-dollar denomination, and another 20 sets were struck in 1884 that included the eighth-dollar. The eighth-dollar, or hapawalu, was intended to ease transactions involving the Spanish-American real. With a mintage of just 26 pieces, the proof 1883 Hawaiian umi keneta or dime is a standout within any Hawaiian collection. This intricately struck specimen exhibits obvious contrast between the evenly frosted portrait and the glassy obverse field. Both sides display faint tan-gold and navy-blue toning. Careful examination reveals delicate hairlines that limit the numerical grade, but not the eye appeal. PCGS# 544157 Base PCGS# 10981

1883 Hawaii Dollar, MS64
Gold and Gunmetal-Blue Toning

- 3997 1883 Hawaii Dollar MS64 PCGS Gold Shield. CAC.** The mintage of 500,000 coins for the 1883 Hawaiian silver dollar is misleading. Many of those pieces struck at the San Francisco Mint were eventually melted, and coins this well-preserved are scarce and in high demand by collectors of Hawaiiana. Dappled olive-gold and gunmetal-blue toning covers each side with splashes of brilliance interspersed. Ticks are faintly visible beneath the original overlay, mostly on King Kalakaua's upper cheek. Population: 24 in 64 (3 in 64+), 22 finer. CAC: 9 in 64, 8 finer (12/18). NGC ID# 2TGD, PCGS# 10995

1880 Wailuku Plantation Token
Half Real, M. 2TE-7, Choice XF

- 3998 1880 Wailuku Plantation Half Real XF45 PCGS Gold Shield. Medcalf 2TE-7.** The Wailuku Plantation tokens were struck at the company blacksmith shop on Maui, but circulated as money throughout the islands. The 1880 half real tokens are rarer than the one real counterparts. This golden-brown token is evenly defined and minimally abraded. There is no evidence of the corrosion that often affects survivors. Listed on page 426 of the 2019 Guide Book. NGC ID# 2UBP, PCGS# 600509

PHILIPPINES

1906-S Philippines Peso, XF45
Rare Mass-Melted Issue

- 3999** 1906-S Philippines Peso XF45 PCGS. KM-168. Although the *Guide Book* reports a mintage of 201,000 pieces, most of the production was unissued, and eventually melted after the size and weight of the peso were reduced in 1907. The issue is rare in all grades, and key to the peso series under U.S. sovereignty. This steel-gray and caramel-gold example is minimally abraded and displays moderate wear on the eagle's breast. Population: 14 in 45, 26 finer (12/18). PCGS# 90386

PATTERNS

1870 Standard Silver Quarter in Silver
Judd-906, PR66 Cameo

- 4000** 1870 Standard Silver Quarter Dollar, Judd-906, Pollock-994, Low R.7, PR66 Cameo PCGS Gold Shield. This Standard Silver design depicts a bust of Liberty facing right on the obverse. Liberty's cap is ornamented with three stars and a ribbon with the inscription LIBERTY, the motto IN GOD WE TRUST is on a scroll at the lower periphery. The reverse depicts the denomination within a wreath of oak and laurel with STANDARD SILVER above and the date below. Struck in silver with a reeded edge. Approximately a dozen pieces are known with a reeded edge and a similar number are extant with a plain edge. Copper and aluminum examples were also struck from these dies. The fields are brightly reflective and toned golden-rose with centers that retain more brilliance. NGC ID# 29XD, PCGS# 61150

1880 Goloid Metric Dollar, PR66 Cameo
Judd-1645, Tied for Finest Certified
Ex: Woodin, Judd

- 4001** 1880 Metric Dollar, Judd-1645, Pollock-1845, High R.6, PR66 Cameo NGC. Ex: Lemus. On the obverse, the head of Liberty faces left and 13 stars encircle the rim with the motto above and date below the portrait. The reverse offers a wreath of cotton and wheat and an inner circle of dots enclosing the legends. Struck in goloid with a reeded edge. The High R.6 rarity rating makes this pattern, while nonetheless rare, among the more available goloid metric designs. USPatterns.com estimates that more than a dozen pieces are known. Silver-gold patina cover both sides with remarkable field-device contrast present throughout. The golden hues deepen near the rims into cinnamon and russet. A small patch of hazy ice-blue beneath Liberty's chin serves as a pedigree marker, along with a thin, curved lintmark in the obverse field between star 5 and the nose. Remarkably attractive. This is the finest example certified at NGC (with or without Cameo), tied with one non-Cameo PR66 coin at PCGS (7/14).

Ex: William H. Woodin; Dr. J. Hewitt Judd; *Stack's* (10/1986), lot 108; Lemus/Queller Collection, FUN Signature (Heritage, 1/2009), lot 1931; Long Beach Signature (Heritage, 9/2014), lot 3592, realized \$10,575. NGC ID# 2AJ3, PCGS# 62030

LESHER DOLLARS

1900 Leshar Dollar, MS63
A.B. Bumstead, Second Reverse
Z-3, HK-789

- 4002** 1900 Leshar Dollar, A.B. Bumstead, Serial #891, Type Two, Silver, Z-3, HK-789, R.5, MS63 PCGS Gold Shield. Leshar serial numbers range from 600 to 1000 for Zerbe-3, the "Bumstead Second Reverse" variety. A.B. Bumstead was Joseph Leshar's best customer, and a majority of surviving Leshar dollars bear his name. Bumstead's unexpected death on April 19, 1901, was a blow to Leshar's distribution plans. This well-struck representative displays rich sea-green and tan-gold toning. Close inspection reveals only minor marks, mostly on the upper reverse field. Listed on page 420 of the 2019 *Guide Book*. NGC ID# 2F6F, PCGS# 19002

1900 Leshar Dollar, MS64
A.B. Bumstead, Serial #838
Type Two, Z-3, HK-789

- 4003** 1900 Leshar Dollar, A.B. Bumstead, Serial #838, Type Two, Silver, Z-3, HK-789, R.5, MS64 NGC. A.B. Bumstead, a Victor, Colorado grocer, was the best customer of Joseph Leshar's one-ounce silver "referendum" dollars. The Type Two design omits the scrollwork and straight line that appears on Type One examples. The website LesharDollars.com/census lists the pedigree for #838 as "Gramberg - Cowell - Malmgren." Mehl's 1924 auction of the John A. Malmgren collection instead had a Boyd Park specimen, but the present lot participated in Mehl's auction of C.W. Cowell's Leshar dollars, where it was described as "Sharp beautiful uncirculated specimen, as perfect as the day it was struck." Pleasing gunmetal-gray toning drapes unblemished and evenly struck surfaces. Listed on page 420 of the 2019 *Guide Book*.
Ex: H.O. Granberg Collection (B. Max Mehl, 7/1919), lot 910, Charles W. Cowell Collection (B. Max Mehl, 12/1923), lot 953. NGC ID# 2F6F, PCGS# 19002

End of Session Two

SESSION THREE

EARLY HALF DOLLARS

1794 O-104 Half Dollar, VF Details
Even Wear, Attractively Toned

4004 1794 O-104, T-11, R.5 — Obverse Scratched — NCS. VF Details. Tompkins Die State 1/1. Although all 1794 varieties are scarce, the O-104 is moderately available in lower circulated grades. VF examples are seldom seen, and finer pieces are rare. No Mint State examples of the O-104 die pair are confirmed. This pleasing example has solid VF definition with medium-gray toning that deepens around the raised devices. Evenly worn, a loupe reveals numerous small marks and lines including some Mint-related adjustment marks along the obverse border. A vertical scratch to the left of 1 in the date is noted by NCS.

4005 1795/1795 3 Leaves, O-111, T-19, High R.4, VG8 PCGS. Tompkins Die State 2/3. A heavy die crack (as struck) journeys from the first S in STATES to the center of the eagle's breast. The legends and stars are inconsistent in detail, sometimes heavily worn and sometimes well defined. Population: 1 in 8, 7 finer (12/18). NGC ID# 24E7, PCGS# 39245 Base PCGS# 6053

4006 1795 2 Leaves, O-116, T-11, R.4, Fine 15 PCGS Gold Shield. Tompkins Die State 2/2. The usual die state with clash marks near LIBERTY and UNITED. Medium gunmetal-blue and honey-gold toning adorns the fields. The motifs are cream-gray. The reverse displays faint adjustment marks, as made, but post-strike abrasions are refreshingly few. NGC ID# 24E7, PCGS# 39232 Base PCGS# 6052

4007 1805 O-111, T-3, R.2, XF40 NGC. Faint traces of gold toning appear on the light gray surfaces of this piece that exhibits myriad surface marks on each side with trivial microscopic scratches. A plentiful variety, this piece is ideal for a date or type collection. NGC ID# 24EG, PCGS# 39285 Base PCGS# 6069

4008 1806/5 O-102, T-7, High R.3, VF35 PCGS Gold Shield. Tompkins Die State 2/2. An attractive and problem-free cream-gray example. Actually an 1806/05, with the flag of the 5 underdigit evident on both sides of the knob of the 6. Traces of luster accompany design elements. The usual die state with cracks through UNITED and a subtle clash mark above the forehead curls. NGC ID# 24EK, PCGS# 39298 Base PCGS# 6077

4009 1806 Knob 6, Small Stars, O-107a, T-3, High R.4, XF40 PCGS. CAC. Tompkins Die State 1/3. The high points are cream-gray, though deep gunmetal toning is otherwise prevalent. This nearly unblemished example shows softness of strike opposite the bust tip, as usual for this better die marriage. The reverse exhibits a hint of granularity. NGC ID# 24EJ, PCGS# 39308 Base PCGS# 6075

1806 O-115a Half Dollar, AU53
Attractively Toned

4010 1806 Pointed 6, Stem, O-115a, T-17, R.2, AU53 NGC. CAC. A readily encountered die marriage, but the condition and eye appeal of the current coin is anything but common. Light gray toning on the obverse is framed by a delicate array of blue, chartreuse and russet toning at the peripheries, while the lustrous reverse possesses a lovely amber iridescence. NGC ID# 24EJ, PCGS# 39318 Base PCGS# 6071

1806 O-120 Half Dollar, AU53
Pointed 6, Stem in Claw

4011 1806 Pointed 6, Stem, O-120, T-28, R.3, AU53 PCGS Gold Shield. CAC. Tompkins Die State 2/1. A relatively early die state of this popular variety, before any die breaks march across the shield center. This CAC-approved example is refreshingly unabraded and displays consistent original cream-gray toning. Evenly struck and highly appealing. NGC ID# 24EJ, PCGS# 39325 Base PCGS# 6071

1806 O-124 Half Dollar, VG10
Rare E Over A in STATES Variety

4012 1806 E Over A in STATES, O-124, T-22, R.6, VG10 PCGS. Tompkins Die State 1/1. The rare E Over A in STATES variety (Overton-124) is easily identified. None are known above the AU Details grade level, and probably no more than 25 or so piece exist. Most show various surfaces problems. This bright ivory-gray representative is well-worn with most of the finer details gone. The legends remain strong, and the E Over A is bold. Listed in the annual *Guide Book*. NGC ID# 24EJ, PCGS# 39330 Base PCGS# 6071

BUST HALF DOLLARS

- 4013 1808 O-102a, R.2, AU53 PCGS.** A late die state with the stars and UNITED drawn toward the rim. A partly lustrous and minimally toned example. Marks are few, though we note a scuff at the base of the throat, a line southwest of the ear, and an obverse rim disruption at 2:30. NGC ID# 24EP, PCGS# 39363 Base PCGS# 6090
- 4014 1810 O-101a, R.1, AU58 PCGS. CAC.** This lovely near-Mint example has extensive die cracking on the obverse and reverse. The obverse cracks are advanced, including one from the cap to star 8. This piece exhibits outstanding gold and iridescent toning over lustrous ivory surfaces. NGC ID# 24ET, PCGS# 39405 Base PCGS# 6095
- 4015 1810 O-105, R.2, AU58 NGC.** A pleasing and essentially brilliant near-Mint half dollar with unmarked surfaces and extensive cartwheel sheen. Light wear on the curls, cap, and drapery preclude a Mint State assessment. NGC ID# 24ET, PCGS# 39411 Base PCGS# 6095
- 4016 1811/10 O-101, R.1, AU50 PCGS.** Pearl-gray centers are framed by deeper gunmetal borders. The fields are practically unabraded and show a narrow area of minor granularity above the eagle's head. The surfaces are slightly glossy, and we note a few moderate marks on Liberty's neck. NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

1813 Capped Bust Half Dollar, MS63 Toned O-108 Representative

- 4017 1813 O-108, R.3, MS63 NGC.** A centering dot in the upper left portion of the shield confirms this unique reverse. Deep olive-gray patina overall includes iridescent glints of golden-orange, rose, and violet color that heighten the appeal. Marks are difficult to discern, and the central strike is crisp. Liberty's profile is widely strike doubled. NGC ID# 24EZ, PCGS# 39469 Base PCGS# 6103

1819 Half Dollar, MS62 Near Condition Census O-114

- 4018 1819 O-114, R.3, MS62 PCGS.** A lustrous example with traces of light tan patina over mostly brilliant and attractive surfaces. Sharply struck with needle-sharp obverse stars and strong definition on the drapery and cap folds, this O-114 shows only a few minor marks on the smooth and attractive surfaces. The 1819 date is somewhat elusive in Uncirculated grades regardless of variety, and this piece is close to the low end of the Condition Census for the variety. Population (non-overdate varieties): 33 in 62, 62 finer (12/18). Ex: Long Beach Signature (Heritage, 6/2004), lot 8388. NGC ID# 24FB, PCGS# 39553 Base PCGS# 6117

- 4019 1820/19 Square Base 2, O-101, R.2, AU50 PCGS.** Steel-gray and tan-brown toning encompasses this lightly abraded and moderately subdued representative. Wear is mostly confined to Liberty's curls and the eagle's claws and plumage. This die pair has its own *Guide Book* listing, since the other overdated variety (O-102) has a Curl 2 in the date. NGC ID# 24FE, PCGS# 39572 Base PCGS# 6125

- 4020 1821 O-103, R.2, MS62 ANACS.** Rich aquamarine, lemon-gold, and mauve-red toning dominates this satiny and lightly abraded half dollar. The strike is sharp save for a few star centers. O-103 is distinctive for the defective letters A and E within the reverse legend. Certified in a small-sized holder. NGC ID# 24FF, PCGS# 39578 Base PCGS# 6128

1822 O-106 Half Dollar, MS63 White and Lustrous

- 4021 1822 O-106, R.3, MS63 NGC.** The borders show a whisper of gold toning, but most observers would regard this lustrous Select half dollar as brilliant. The strike is crisp and the fields are smooth. The cheek displays minor grazes. Although just outside the Condition Census, the present example offers impressive eye appeal. NGC ID# 24FG, PCGS# 39591 Base PCGS# 6129

- 4022 1823 O-112, R.1, MS62 PCGS Gold Shield.** Dynamic luster and minimal marks ensure the eye appeal of this attractive Bust half dollar. Medium apple-green and golden-brown toning confirms the originality. The strike is sharp except on the upper stars. Liberty's profile is strike doubled. NGC ID# 24FJ, PCGS# 39618 Base PCGS# 6131

1825 Half Dollar, MS63 O-110, Lightly Toned

- 4023 1825 O-110, R.2, MS63 PCGS Gold Shield.** The I in PLURIBUS is under the juncture of AT in STATES, and the inner curl of the 2 points toward star 10. Overton-110 is a collectible variety and a good choice to represent the date. This well-detailed Select Uncirculated half dollar exhibits a brilliant central reverse, while the rest of the coin is lightly toned in gold, violet, and steel-blue patina. The stars are drawn solidly to the rims. NGC ID# 24FL, PCGS# 39657 Base PCGS# 6142

- 4024 1825 O-112, R.3, MS63 PCGS.** Possibly at the low end of the Condition Census, this Select Mint State half dollar has sharp central details with weak peripheries. The obverse exhibits ivory luster at the center, ceding to gold and steel near the border. The reverse changes from gold at the center to steel at the border. NGC ID# 24FL, PCGS# 39659 Base PCGS# 6142

1826 O-105 Half Dollar, MS64
Condition Census Quality

- 4025 1826 O-105, R.3, MS64 NGC. Vibrant rose-red, ocean-blue, and tan-brown toning drape this unblemished Choice half dollar. The left-side stars show incompleteness of strike. Luster is especially vivacious at the borders. Liberty's profile is lightly doubled. Within Herrman's Condition Census for the variety, which extends from MS63 to MS66. NGC ID# 24FM, PCGS# 39672 Base PCGS# 6143

1827 Capped Bust Half, AU55
Square Base 2, O-127

- 4026 1827 Square Base 2, O-127, R.5, AU55 PCGS Gold Shield. There is a small top serif on the 7 in the date and the center line of vertical stripe 5 extends through four crossbars, identifying the O-127 variety. This impressive Choice AU specimen shows just a touch of wear on the well-detailed design elements and the charcoal-gray surfaces are lightly abraded and attractive. NGC ID# 24FN, PCGS# 39726 Base PCGS# 6144

1827 Half Dollar, MS64
Square Base 2, O-142

- 4027 1827 Square Base 2, O-142, R.3, MS64 NGC. Concentric bands of forest-green and autumn-brown toning encompass this lustrous and unabraded near-Gem. A few of the stars are lightly brought up, but the eye appeal is nonetheless imposing. A Condition Census example of Overton-142, which is often attributed by a diagonal line in the wing near the right shield border. NGC ID# 24FN, PCGS# 39742 Base PCGS# 6144

- 4028 1828 Square Base 2, Small 8s, Large Letters, O-113, R.3, MS62 PCGS Gold Shield. Cobalt-blue, golden-brown, and plum-red patina encompass this unblemished and nicely struck Bust half type coin. Luster accompanies design elements, and the originality is undeniable. O-113 is often attributed by the sixth vertical shield stripe, which has an unusually crude appearance. NGC ID# 24FR, PCGS# 39767 Base PCGS# 6151

1830 O-114 Half Dollar, VF35
Large Letters Guide Book Variety

- 4029 1830 Large Letters, Small O, O-114, R.5, VF35 PCGS. This is the only Large Letters variety for the year and is a separately-listed Guide Book semikey. Overton-114 also features filling inside the upper curl of the 3. This richly toned Choice VF coin showcases deep olive-gold and cobalt-blue patina that lightens to medium gray over the high points. NGC ID# 24FU, PCGS# 39836 Base PCGS# 39835

1830 Capped Bust Half, MS64
O-122, Large O Subtype

- 4030 1830 Large O, O-122, R.1, MS64 PCGS Gold Shield. One of four Large O die marriages among the 23 1830 varieties, Overton-122 is the most readily available representative of the Large O type. This near-Gem example is lustrous and sharply struck, with vibrant blue toning accents at the margins and wisps of pale-gold patina through the centers. Several of the horizontal shield lines extend well into the right-side wing feathers to confirm the O-122 variety. There are no abrasions or marks of note visible on the smooth, frosted surfaces. NGC ID# 24FU, PCGS# 39833 Base PCGS# 6157

- 4031 1832 Small Letters, O-115, R.1, AU58 PCGS. CAC. A late die state with an orange-peel texture throughout the fields. The coruscating surfaces exhibit deep apple-green and gunmetal-gray toning. Marks are trivial save for a delicate diagonal line on the cheek. The PLUR in PLURIBUS is lightly brought up, as usual for Overton-115. NGC ID# 24FW, PCGS# 39874 Base PCGS# 6160

1834 O-114 Half Dollar, MS64
Small Date and Letters

- 4032** 1834 Small Date, Small Letters, O-114, R.1, MS64 PCGS. CAC. O-113 and O-114 are similar, but O-114 shows repunching on stars 3 and 4. This lustrous near-Gem exhibits medium apple-green and chestnut-gold toning. The portrait and eagle are well struck. The stars and the LUR in PLURIBUS are lightly impressed, as usual for the die marriage. For all Small Date, Small Letters varieties, CAC: 20 in 64, 14 finer (12/18). NGC ID# 24FY, PCGS# 39918 Base PCGS# 6166

- 4033** 1835 O-105, R.1, MS63 PCGS Gold Shield. A recut star 4 is the primarily pick-up point for the plentiful Overton-105. This satiny Bust half dollar is richly patinated peach-gold, apple-green, and stone-gray. Refreshingly devoid of marks, though selected peripheral elements lack a full strike, such as the IB in PLURIBUS. NGC ID# 24FZ, PCGS# 39931 Base PCGS# 6168

1835 O-106 Half Dollar, MS64+
Among Finest Certified

- 4034** 1835 O-106, R.1, MS64+ NGC. The upright of the 5 in the date is repunched. The present Overton-106 half dollar ranks high in the Condition Census for the die marriage. The lustrous and uncommonly smooth surfaces are toned peach-gold, with electric-blue iridescence near the rims. A good strike, though a few stars and the right (facing) claw show incompleteness. NGC ID# 24FZ, PCGS# 39932 Base PCGS# 6168

REEDED EDGE HALF DOLLARS

- 4035** 1836 Reeded Edge, GR-1, R.2 — Obverse Graffiti — NGC Details. VF. The scarce introductory reeded edge half dollar variety. Stone-white high points complement wheat-gold fields and jade-green borders. A few faint thin obverse field marks emerge beneath a glass, though they are less of a distraction than implied by the holder designation.

1836 Reeded Edge Half, GR-1, AU Sharpness
Low-Mintage, First-Year Issue

- 4036** 1836 Reeded Edge, GR-1, R.2 — Cleaned — NGC Details. AU. Mint Director Robert Patterson wrote to President Andrew Jackson in 1837, "On the 23rd of March last (1836), the first steam coinage in America was executed at this Mint; and the performance of the press, in which the power of the lever is substituted for that of the screw, has answered all our expectations." Powered by steam, the new coining press produced a reported mintage of 1,200 Reeded Edge half dollars dated 1836. This example shows signs of a light cleaning, with several shallow abrasions on both sides and nominal wear. Pale, iridescent toning drifts across silver-gray surfaces. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

1836 Half Dollar, AU Details
Reeded Edge, GR-1, Sole Die Pair

- 4037** 1836 Reeded Edge, GR-1, R.2 — Cleaned — NGC Details. AU. Slightly glossy from an old cleaning, this golden-gray example of the Reeded Edge half represents the Mint's first use of the Thonnelier steam press to strike half dollars. The press was improved by Franklin Peale for its initial run of reeded edge halves. A few tiny marks plus high-point wear indicate brief circulation of this still-attractive coin. The reported mintage of 1,200 pieces remains debatable, but there is no denying the ongoing popularity of this first-year type.

- 4038** 1838 GR-15, R.3, MS63 PCGS Gold Shield. An early die state with an unfinished surface below the ED in UNITED, undescribed in the Dick Graham reference. Rich sea-green and dove-gray patina blankets this coruscating and essentially unabraded example. Occasional peripheral elements lack a full strike, and a narrow vertical area of the shield is darkly toned. NGC ID# 24G5, PCGS# 531096 Base PCGS# 6177

- 4039** 1839-O GR-5, High R.4, XF40 NGC. A supermajority of '39-O half dollars are GR-1, but this is the very scarce GR-5 variety, distinguished by lengthy die cracks across star 8, the portrait, and ITED STATES. The Herrman Autumn 2018 Condition Census is 60-60-58-50-45 but includes two polished examples and another with altered surfaces. The present problem-free piece displays various shades of cream-gray, along with charcoal toning in protected regions. NGC ID# 24G7, PCGS# 531110 Base PCGS# 6181

SEATED HALF DOLLARS

- 4040** 1839 With Drapery, WB-102, Die Pair 6 MDS, R.3, MS61 NGC. Apple-green, autumn-brown, and russet-red toning grace the borders of this lustrous first-year Seated half. Field marks are fewer than anticipated. The eagle's left leg and fletchings are incompletely brought up.

Ex: Long Beach Signature (Heritage, 2/2005), lot 7029; FUN Signature (Heritage, 1/2006), lot 2705; Long Beach Signature (Heritage, 6/2007), lot 1105; Long Beach Signature (Heritage, 2/2016), lot 3955, which realized \$1,086.88. NGC ID# 24GL, PCGS# 572001 Base PCGS# 6232

- 4041** 1843 Repunched Date, WB-103, Die Pair 34, R.3, AU58 PCGS. A lightly toned near-Mint example with small gray freckles on the upper obverse. A later die state than listed in the Bugert reference, with a horizontal crack behind the eagle's neck and a series of narrow breaks along the lower obverse rim. The many cracks make Die Pair 34 highly distinctive, along with repunching on the crossbar of the 4 in the date. NGC ID# 24GX, PCGS# 572020 Base PCGS# 6243

1853 Arrows and Rays Half Dollar, MS63 Bright and Frosty Type Coin

- 4042** 1853 Arrows and Rays, WB-101, MS63 NGC. A popular single-year type, with Arrows and Rays added to signify a weight reduction employed to induce the circulation of silver coinage. This bright silver MS63 half dollar is well-struck from heavily clashed and cracked dies. Small abrasions are normal for the grade. Frosty type coin.

From *The Speechless Collection*. NGC ID# 24JJ, PCGS# 572085 Base PCGS# 6275

- 4043** 1856-O Repunched Date, WB-103, Die Pair 14, R.2, MS63 PCGS Gold Shield. The 5 and 6 are clearly doubled below, although PCGS makes no notation of the repunching on the holder. This Select Mint State piece exhibits light reddish-gold toning along the lower obverse border on otherwise brilliant and lustrous silver surfaces. PCGS# 572096 Base PCGS# 6288

- 4044** Three-Piece S.S. Republic Half Dollar Three-Government Set. Includes: 1860-O Type Two Reverse WB-103, Die Pair 12, R.3 — Shipwreck Effect (B) — NGC Details, Unc., struck by the United States; 1861-O, WB-101, Die Pair 7, R.2 — Shipwreck Effect (B) — NGC Details, Unc., struck by the state of Louisiana; and 1861-O Bisected Date, Speared Olive Bud, WB-103/104, Die Pair 14, R.4 — Shipwreck Effect (B) — NGC Details, Unc., struck by the Confederate States of America; All three NGC-certified items are housed in a mahogany presentation case with slipcover and certificate of authenticity. (Total: 3 coins) NGC ID# 2XWU, PCGS# 572139 Base PCGS# 6300

- 4045** 1866-S No Motto, Small Thin S, Die Pair 1, R.5, WB-101, VF30 NGC. With a mintage of 60,000 coins, the 1866-S No Motto half dollar is an important key issue among Seated half dollars. This Choice VF example has untuned light gray surfaces with trivial handling marks and hairlines. Census: 10 in 30, 29 finer (12/18). NGC ID# 5V4T, PCGS# 572170 Base PCGS# 6315

- 4046** 1871-CC WB-101, Die Pair 1, R.4 — Cleaned — NGC Details. XF. The sophomore-year Carson City half dollar is a much better date noted for its great rarity in Mint State. XF examples are very scarce, yet collectible. This powder-blue and lilac-red representative has a bold LIBERTY and pleasing design detail. Close inspection reveals parallel hair-thin marks above Liberty's foot, and a tooled area below star 7. NGC ID# 646D, PCGS# 572196 Base PCGS# 6331

- 4047** 1873-CC Arrows, Large CC, Die Pair 8, R.7, VF25 NGC. A rare misplaced date variety unlisted in the 1993 edition of Wiley-Bugert. The variety is an excellent candidate for a future *Cherry-pickers'* revision. A charming collector coin with steel-blue fields and stone-white high points. Wear is even, and no marks are noticeable. NGC ID# 24L8, PCGS# 572216 Base PCGS# 6344

1875 Half Dollar, MS65 Sharp Strike, Originally Toned

- 4048** 1875 WB-101 MS65 PCGS. CAC. Sea-green and autumn-brown toning embrace this lustrous and evenly struck Seated type coin. No marks are noticeable, and the eye appeal is undeniable. Both sides display spindly peripheral die cracks. A high-mintage issue, but nonetheless very scarce in the present quality. Population: 15 in 65 (1 in 65+), 5 finer. CAC: 10 in 65, 3 finer (12/18). PCGS# 572226 Base PCGS# 6349

- 4049** 1875-CC WB-101, Die Pair 4, R.4, AU50 PCGS. A couple of vertical die lines in the space below Liberty's chin aid in identifying this die variety, which shows the mintmark widely spaced. The present coin has satiny fields and only lightly worn design elements. A hint of wheat-gold toning graces predominantly slate-gray surfaces. Marks are limited to the reverse margin above the IC in AMERICA. PCGS# 572227 Base PCGS# 6350

1875-S Half Dollar, Frosted Gem 'Spiked 5' Variety

- 4050** 1875-S Very Small S, WB-101, Die Pair 17, R.3, MS65 PCGS Gold Shield. The "Spiked 5" variety. A small tine opposite the intersection of the bottom flag of the 5 in the date protrudes from the left upright and confirms the variety. The coin is struck from an early die state, before die clashing appears in Liberty's lap and before a faint crack develops above the reverse legend. This is a smooth and sharply struck Gem with scattered areas of almond-gray toning over lustrous, frosted silver surfaces. We note a hair-thin abrasion along Liberty's shoulder, accentuated by the toning. NGC ID# 24KF, PCGS# 572229 Base PCGS# 6351

4051 1876-CC Medium CC, WB-102, Die Pair 42, R.7, MS61 PCGS. A rare R.7 variety, struck from a die marriage unknown to Bill Bugert at the time of his 2010 register of Carson City Seated half varieties. Discovered by Mike Clark of Bozarth Coins, the new die marriage combines a previously known reverse with a new obverse die. Scattered die lumps on Liberty's head, neck, and gown include large, diagnostic lumps on the midsection and at the right obverse shield edge to define the obverse die. The reverse displays a widely spaced Medium CC mintmark. A few light, grade-consistent marks include a narrow vertical flaw that runs from the hairline to the neckline. This well struck Mint State example displays medium silver-gray toning. NGC ID# 645S, PCGS# 572239 Base PCGS# 6353

**1877 Half Dollar, Brilliant Gem
Closed Bud, Few Coins Graded Higher**

4052 1877 Closed Bud, WB-103, MS65 NGC. One of the usual variants for the collectible 1877 half dollar, which enjoys a generous mintage of 8.3 million pieces. Few examples, however, can compare to this totally brilliant, thickly frosted, and razor-sharp Gem. A few tiny marks occur on Liberty's breast and legs. The reverse is exceptionally clean. Census (all varieties): 27 in 65 (2 in 65+), 20 finer (12/18).
From The Speechless Collection. NGC ID# 24KK, PCGS# 572246 Base PCGS# 6355

4053 1877-CC Closed Bud, Medium CC, WB-103, Die Pair 13, R.2, MS63 NGC. Autumn-brown and jade-green toning accompanies the date area and reverse border. This lustrous Select Carson City type coin is well struck and refreshingly free from marks. A Wide CC die variety that shows repunching on the first C. The late die state with peripheral die cracks and prominent clash marks. NGC ID# 24KL, PCGS# 572250 Base PCGS# 6356

**1877-S Half Dollar, MS66
Rare Any Finer, Brightly Frosted**

4054 1877-S Closed Bud, Very Small S, WB-104, MS66 NGC. A die lump on the lower left loop of the 8 and the Very Small S mintmark centered high under the fletching confirm the die marriage. Every facet of Liberty and the eagle is razor-sharp. Just a hint of softness occurs on the lower stars, date, and reverse legends. Not a speck of color appears on either side of this bright, frosty Premium Gem half dollar. Census (all varieties): 16 in 66, 4 finer (12/18).
From The Speechless Collection. NGC ID# 24KM, PCGS# 572255 Base PCGS# 6357

4055 1879 Closed Bud, WB-102, MS63 PCGS. The fields of this Select 1879 Seated Liberty half dollar are deeply mirrored, fully prooflike. The strike is sharp, complemented by frosty luster on the devices. Both sides have amber-gold border toning that lights in the centers. Modest cameo contrast is apparent on each side. From a mintage of only 4,800 coins. NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

**1879 Half Dollar, MS66
Bright and Semireflective**

4056 1879 Closed Bud, WB-102, MS66 NGC. Type Two Reverse. With the Mint's silver purchases directed to the new Morgan dollar, production of smaller denominations slowed to token amounts produced at Philadelphia. This Premium Gem comes from an issue of just 4,800 business strikes. Golden peripheral tints give way to semireflective silver centers. Mint frost visits the central devices. Census: 33 in 66 (1 in 66+, 3 in 66 ★, 1 in 66+★), 12 finer (12/18).

From The Speechless Collection. NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

4057 1882 WB-101 MS64 Prooflike NGC. Faint honey-gold and mauve toning graces nicely struck and unmarked surfaces. A subtle ribbon-shaped alloy imperfection (as made) crosses the pole below the cap. The 1882 has a meager commercial mintage of 4,400 pieces, and Uncirculated examples of the earliest strikes display reflective fields. As of (12/18), NGC has certified eight pieces as Prooflike. Census: 1 in 64 Prooflike, 2 finer (12/18). NGC ID# 24KV, PCGS# 76364 Base PCGS# 6364

4058 1884 Repunched Date, WB-102, MS62 NGC. Areas of reflectivity remain visible on both sides of this half dollar. Subtle shades of orange and peach make an appearance. Hairlines appear primarily on the obverse. Census: 4 in 62, 75 finer (12/18).
Ex: Houston Signature (Heritage, 11/2012), lot 3680, which realized \$1,116.25. NGC ID# 24KX, PCGS# 572269 Base PCGS# 6366

4059 1888 WB-101 MS63 NGC. The Philadelphia Mint managed to strike more than 19 million silver dollars during 1888, but commercial half dollar production was limited to 12,001 pieces. This brilliant Select representative offers smooth, lustrous surfaces. Incompleteness of strike is limited to the upper stars and Liberty's hair. NGC ID# 24L3, PCGS# 572273 Base PCGS# 6370

4060 1888 WB-101 MS64 PCGS. As expected, this near-Gem 1888 half dollar displays semiprooflike fields. The devices are mostly sharp and modestly frosted, and neither side has mentionable toning. No major abrasions are seen — only some light hairlines in the fields prevent Gem classification from PCGS. NGC ID# 24L3, PCGS# 572273 Base PCGS# 6370

4061 1889 WB-101 MS63 NGC. Faint ice-blue and butter-gold toning accompanies this well struck and surprisingly unmarked late-date Seated half. Only 12,000 pieces were coined for commerce, likely because Mint resources were allocated to the 34 million Morgan dollars struck that year. PCGS# 572274 Base PCGS# 6371

PROOF SEATED HALF DOLLARS

1860 Half Dollar, PR65 Low Survival Rate

- 4062 1860 PR65 NGC.** Two years after the Mint began offering proofs to the public, a small fee of 13 cents was added to the cost of proof coinage. This reduced demand, resulting in many if not most of the 1,000 proof half dollars struck in 1860 being melted as unsold at the close of the year. This bright silver Gem enjoys a typical full strike and minimal contact marks. A few spots of gold color appear on each side, notably on the reverse rim at 2:30.
From The Speechless Collection. NGC ID# 27TK, PCGS# 6414

- 4063 1866 Motto PR64 NGC.** This attractive Choice proof exhibits razor-sharp definition on all design elements and the well-preserved surfaces include deeply mirrored fields, under shades of pale gold toning. Census: 30 in 64, 22 finer (12/18). NGC ID# 27TZ, PCGS# 6424

1867 Half Dollar, Richly Toned PR65 Boldly Detailed, Excellent Eye Appeal

- 4064 1867 PR65 PCGS.** Ex: Dick Osburn Collection. Richly toned in dappled shades of blue, lavender, and reddish-gold, this fully struck proof displays glassy-smooth surfaces that are free of any hairlines or marks of any consequence. Vibrant coloration glows beneath what appears to be the original proof set toning. Scarce at this grade level and challenging to find any finer. Population: 12 in 65, 8 finer (12/18). NGC ID# 27U2, PCGS# 6425

1871 Half Dollar, Gem Proof Flashy Fields, Attractive Patina

- 4065 1871 PR65 NGC.** The Mint produced 960 proof half dollars for collectors in 1871, the same year it struck 1.2 million coins for circulation. This expectedly pinpoint-sharp Gem shows light olive and red-gold patina with blue and green accents. The fields flash when the coin is rotated under a lamp, and there are no significant contact marks to report. Census: 20 in 65, 10 finer in non-Cameo (12/18). NGC ID# 27U6, PCGS# 6429

- 4066 1878 PR64 Cameo NGC. WB-101.** This spectacular Choice proof exhibits sharply detailed, frosty design elements and deeply mirrored fields that create bold cameo contrast on both sides. The surfaces are well-preserved and show faint highlights of pale gold toning. Census: 32 in 64 Cameo (1 in 64+, 1 in 64 ★), 26 finer (12/18). NGC ID# 27UD, PCGS# 86439

- 4067 1881 PR63 PCGS. CAC.** Warm sun-gold toning and pale sky-blue hues adorn the mirrored fields of this Select proof, CAC endorsed for outstanding quality. Appreciable field-device contrast on each side barely misses a Cameo designation. The only mentionable strike weakness is seen on the eagle's left (facing) talons. CAC: 5 in 63, 25 finer (12/18). NGC ID# 27UG, PCGS# 6442

- 4068 1881 PR64 Cameo NGC.** The sharply detailed design elements of this attractive Choice proof exhibit a rich coat of mint frost, creating bold cameo contrast with the deeply reflective fields. Census: 32 in 64 Cameo (1 in 64+, 1 in 64 ★), 39 finer (12/18). NGC ID# 27UG, PCGS# 86442

- 4069 1882 PR64 NGC.** Attractive ocean-blue, violet, and rose-gold hues adorn the surfaces of this near-Gem proof 1882 Seated half dollar. The strike is sharp and any grade-limiting hairlines are hidden beneath the rich patina. Eye appeal is outstanding for the grade. NGC ID# 27UH, PCGS# 6443

1883 Seated Half Dollar, PR66 1,039 Proofs Minted

- 4070 1883 PR66 NGC.** The raised devices are minimally toned on this eye-appealing Premium Gem proof half dollar from a mintage of 1,039 coins. The surrounding fields maintain partial reflectivity but are richly patinated in melded orange-gold, violet, blue, and green color. Only 8,000 circulation strikes were struck in 1883, putting added pressure on high-end proofs. Census: 24 in 66 (1 in 66 ★), 8 finer in non-Cameo (12/18). NGC ID# 27UJ, PCGS# 6444

- 4071 1884 PR64 PCGS. CAC.** A deeply reflective Choice proof with beautiful multicolor toning and fully struck design elements. Few proofs in this grade are CAC endorsed as this piece is. Bands of rainbow color in the margins surround golden-red interior hues on the obverse, while the reverse is lilac-blue across the center and golden at the borders. NGC ID# 27UK, PCGS# 6445

- 4072 1885 PR64 PCGS.** Lovely sky-blue and lilac border toning frames dusky golden and stone-gray interiors on this originally toned near-Gem proof. A well-struck coin with no bothersome contact marks. The fields are deeply reflective beneath a light. NGC ID# 27UL, PCGS# 6446

- 4073 1885 PR64 PCGS. CAC.** Vivid peripheral gold and lilac toning appears on both sides and diminishes to ivory near the centers of this lovely Choice proof that has noticeable contrast. Faint grade-limiting hairlines are only visible with magnification. NGC ID# 27UL, PCGS# 6446

- 4074 1885 PR64 Cameo NGC.** Just a trace of light golden toning appears on this gleaming proof Cameo, allowing stark field-device contrast to prevail on each side. Aside from a touch of softness on Liberty's temple and the eagle's left (facing) talons, the strike is sharp. Only a few faint hairlines in the fields preclude a full Gem grade from NGC. Census: 21 in 64 Cameo (1 in 64 ★), 33 finer (12/18).
Ex: New York Signature (Heritage, 10/2015), lot 4578, which realized \$1,762.50. NGC ID# 27UL, PCGS# 86446

1886 Half Dollar, PR66
Blue, Violet, and Gold Patina

- 4075 1886 PR66 NGC.** Ocean-blue patina around the edges turns to progressively lighter shades of violet color, blending with golden toning at the centers. The effect is entirely natural and readily appealing, and it allows for a partial degree of contrast between the fully struck motifs and glassy, contact-free fields. Census: 22 in 66 (1 in 66 ★), 6 finer in non-Cameo (12/18). NGC ID# 3EN3, PCGS# 6447

- 4076 1886 PR63 Cameo NGC.** The Philadelphia Mint coined 5,000 circulation-strike half dollars in 1886, adding another 886 proofs. This Select Cameo proof exhibits splashes of gold and iridescent toning on its brilliant silver surfaces. Census: 8 in 63 Cameo (1 in 63+), 31 finer (12/18). NGC ID# 27UM, PCGS# 86447

- 4077 1886 PR64 Cameo PCGS.** A splendid Choice Cameo proof, the obverse exhibits champagne toning with deeper peripheral iridescence. The reverse is mostly brilliant with a few splashes of gold toning. Nice contrast appears between the fields and devices. Population: 27 in 64 (1 in 64+) Cameo, 20 finer (12/18). Ex: *New York Signature (Heritage, 3/2012)*, lot 3441, realized \$2,185. NGC ID# 27UM, PCGS# 86447

- 4078 1886 PR64 Cameo NGC.** The 1886 Seated Liberty half dollar is a rare issue in all formats, as only 886 proofs were struck to accompany a small business-strike mintage of 5,000 pieces. The present coin is a sharply detailed Choice example, with delightful green, golden-brown, and violet patina. The fields display the usual reflectivity under the toning, contrasting boldly with the frosty devices. Census: 11 in 64 Cameo, 20 finer (12/18). NGC ID# 27UM, PCGS# 86447

- 4079 1887 PR62 NGC. CAC.** A run of 710 proof half dollars supplemented a production of 5,000 Seated halves struck for circulation in 1887. The low mintage results in heightened demand for proofs bearing the 1887 date. This example offers violet toning over the obverse with rose hues in the centers and deeper peripheral blue-green. The reverse is tab-toned with a circular area of lavender color surrounded by a crescent of ice-blue patina. The surfaces are smooth and devoid of singular flaws. Ex: *Gardner Collection, Part IV (Heritage, 10/2015)*, lot 99193, which realized \$1,116.25. NGC ID# 27UN, PCGS# 6448

- 4080 1887 PR63 NGC.** Strong demand is due to the rarity of circulation strikes for this issue. This Select proof has dusky gold toning on otherwise brilliant surfaces with trivial hairlines that limit the grade. NGC ID# 27UN, PCGS# 6448

1890 Half Dollar, PR66
Toned With a Modest Cameo Effect

- 4081 1890 PR66 PCGS Gold Shield.** Each side showcases attractive medium gold, lilac, and blue coloration. The fields beneath the toning are nicely mirrored, generating a modest cameo effect for this lovely Premium Gem proof. However, PCGS has not formally acknowledge that trait. The 1890 is a popular, low-mintage date with only 12,000 circulation strikes plus 590 proofs. NGC ID# 27US, PCGS# 6451

- 4082 1890 PR64 Cameo NGC.** Iridescent rainbow toning colors the rims. Hues include cobalt-blue, rose, violet, and golden-orange. Brilliant centers on each side feature lightly frosted devices over watery fields. Proof 1890 Seated halves are scarce with cameo contrast. Census: 7 in 64 Cameo, 26 finer (12/18). Ex: *FUN Signature (Heritage, 1/2016)*, lot 3269, which realized \$1,827.13. NGC ID# 27US, PCGS# 86451

BARBER HALF DOLLARS

- 4083 1893-O MS64 NGC.** From a mintage of 1.3 million pieces, the 1893-O Barber half dollar is a scarce issue at the MS64 grade level. This attractive Choice example offers well-detailed design elements, with a touch of the usual softness on the eagle's claw, and well-preserved, lustrous surfaces. Census: 37 in 64, 7 finer (12/18). *From The Speechless Collection.* NGC ID# 24LL, PCGS# 6466

1898-S Half Dollar, MS63
Few Saved in Mint State

- 4084 1898-S MS63 PCGS Gold Shield.** A typical 1898-S half dollar is apt to be found in VF30 to XF40 condition. These coins circulated extensively in the West, and relatively few were saved in Mint State. This razor-sharp example displays mixed gold, crimson, and blue patina around light, silvery centers. Frosty with minor slide marks on the cheek. NGC ID# 24M5, PCGS# 6482

- 4085 1902 MS65 PCGS. CAC.** An attractive Gem, with well-detailed design elements that show a touch of the usual softness at the junction of the shield and the eagle's wing on the right. The lightly marked surfaces are blanketed in shades of golden-brown and lavender toning. Population: 20 in 65 (1 in 65+), 6 finer. CAC: 7 in 65, 3 finer (12/18). NGC ID# 24MF, PCGS# 6492

**1908-O Half Dollar, MS66
Sharply Struck**

- 4086 1908-O MS66 PCGS.** An incredible Premium Gem, and rarely seen so fine, this lovely Barber half dollar has an unusually sharp strike, especially for a New Orleans issue. Both sides have frosty silver mint luster with hints of peripheral gold toning that enhances the eye appeal. Population: 21 in 66 (3 in 66+), 16 finer (12/18). *From The Speechless Collection.* NGC ID# 24N6, PCGS# 6514

- 4087 1911 MS65 NGC.** A few faint dusky hues complement softly frosted surfaces that are largely brilliant and wonderfully free of overt imperfections. The impression is crisp, save for incompleteness on the usual shield corner and right talon. Census: 20 in 65 (1 in 65 ★), 11 finer (12/18). NGC ID# 24ND, PCGS# 6521

- 4088 1911-D MS65 NGC.** The highly lustrous surfaces of this D-mint Gem half dollar are visited by dapples of russet and electric-blue at the margins, and the strike is strong, save for minor softness in the upper-right corner of the shield. A couple of grade-consistent marks are noted on the cheek. Census: 16 in 65, 7 finer (12/18). NGC ID# 24NE, PCGS# 6522

- 4089 1911-D MS65 NGC.** Sharply detailed in most areas, this impressive Gem displays just a touch of softness on the eagle's claw and star 3. The well-preserved surfaces radiate vibrant mint luster and eye appeal is outstanding. Census: 16 in 65, 7 finer (12/18). *From The Speechless Collection.* NGC ID# 24NE, PCGS# 6522

- 4090 1912-D MS64 PCGS Gold Shield. CAC.** The 1912-D Barber half dollar is somewhat scarce at the MS64 grade level. This attractive Choice example exhibits well-detailed design elements, with a trace of the usual softness on the eagle's claw. The lightly marked, lustrous surfaces show highlights of lavender-gray toning. NGC ID# 24NH, PCGS# 6525

- 4091 1912-D MS65 PCGS. CAC.** An important opportunity is presented to the advanced collector to obtain this condition rarity that survives from a mintage of 2.3 million coins. This lovely Gem is fully brilliant and untuned with frosty ivory surfaces. Population: 66 in 65, 19 finer. CAC: 18 in 65, 13 finer (12/18). *From The Speechless Collection.* NGC ID# 24NH, PCGS# 6525

**1912-D Barber Half, MS66
Seldom Seen This Nice
From the Gardner Collection**

- 4092 1912-D MS66 PCGS.** Shimmering mint luster illuminates a thin veil of golden toning on each side of this Premium Gem 1912-D half. The eagle's right (facing) talons and shoulder are a smidgen weak, as can be expected for this branch mint issue, but the stars and Liberty's hair curls are sharp. A few faint luster grazes on Liberty's cheek and the adjacent field are all that preclude an even finer grade.

The 1912-D Barber half, with a mintage of more than 2.3 million coins, is a recognized common date in the series. Examples are readily obtainable in just about any grade desired up through Gem Uncirculated. In MS66, however, this issue joins its peers as a notable condition rarity. Population: 18 in 66 (4 in 66+), 1 finer (12/18).

Ex: Eugene Gardner Collection (Heritage, 5/2015), lot 98538. NGC ID# 24NH, PCGS# 6525

- 4093 1912-S MS64 PCGS.** A Choice half dollar that shows somewhat muted luster due to rich brown toning found primarily around the borders. This well struck example shows only the slightest number of ticks. Population: 68 in 64 (6 in 64+), 35 finer (12/18). NGC ID# 24NJ, PCGS# 6526

- 4094 1912-S MS64 NGC. CAC.** This lustrous near-Gem from the San Francisco Mint is virtually as sharp as one could hope to find for a Barber half dollar circulation strike. The stars, forecurls, shield-wing juncture, talons, and fletchings all show crisp detail over brilliant surfaces. Hints of gold appear faintly across the reverse. NGC reports 15 finer submissions (12/18).

From The Speechless Collection. NGC ID# 24NJ, PCGS# 6526

**1915 Barber Half Dollar, MS65
Vivid Multicolor Toning**

- 4095 1915 MS65 PCGS Gold Shield.** From a low mintage of 138,000 pieces, this impressive Gem exhibits sharply detailed design elements in most areas, with just a touch of softness at the junction of the shield and eagle's wing. The well-preserved surfaces are blanketed in shades of magenta toning, with a few hints of champagne-gold at selected angles. Population: 19 in 65 (1 in 65+), 6 finer (12/18). NGC ID# 24NR, PCGS# 6532

PROOF BARBER HALF DOLLARS

- 4096 1892 PR65 PCGS.** The 1892 Barber half dollar enjoyed a large proof mintage of 1,245 pieces and many examples were saved as first-year type coins. The issue is definitely scarce at the Gem level today, and attractive specimens are popular with type collectors and series enthusiasts alike. The present coin exhibits reflective fields and sharply struck, frosty devices. Population: 29 in 65, 44 finer (12/18).

From The Speechless Collection. NGC ID# 24NU, PCGS# 6539

- 4097 1892 PR63 Cameo NGC.** This attractive Select proof represents the first year of the design, with sharply detailed design elements and deeply reflective fields that contrast boldly with the frosty devices. The brilliant surfaces are well-preserved and appealing. NGC ID# 24NU, PCGS# 86539

- 4098 1893 PR63 Cameo NGC.** This piece borders on deep contrast and offers excellent eye appeal despite faint hairlines that are consistent with the grade. Both sides are brilliant and untuned. NGC ID# 6UKV, PCGS# 86540

1893 Half Dollar, PR66 Cameo High Degree of Field-Device Contrast

- 4099 1893 PR66 Cameo NGC.** Proof production returned to normal levels in 1893 after a spike in 1892 with the introduction of the new Barber design. This is one of 792 proof half dollars minted. Aside from a dark toning spot over LA in DOLLAR, this Premium Gem is totally brilliant, allowing for a heightened degree of Cameo contrast between the fields and devices.

From The Speechless Collection. NGC ID# 6UKV, PCGS# 86540

- 4100 1894 PR65 Cameo NGC.** The design elements of this impressive Gem proof are sharply detailed, aside from a trace of the usual softness on the shield point. The deeply reflective fields contrast boldly with the frosty devices and show a few hints of pale gold toning. Census: 18 in 65 Cameo, 28 finer (12/18).

From The Speechless Collection. NGC ID# 24NW, PCGS# 86541

- 4101 1895 PR65 Cameo NGC.** The central devices are thickly frosted, especially the eagle, standing out starkly against glassy fields. Hints of golden patina appear around the reverse periphery, while the interior of that side and nearly the entire obverse remain brilliant. A total of 880 proofs were struck in 1895. The majority of coins lack comparable contrast. Census: 11 in 65 Cameo, 43 finer (12/18). NGC ID# 24NX, PCGS# 86542

1896 Half Dollar, Brilliant PR66 Cameo

- 4102 1896 PR66 Cameo PCGS.** Sparkling, bright and completely untuned. Close examination reveals a tiny imperfection on Liberty's nose, and a couple of slidemarks on the cheek. The devices present a nicely frosted appearance resulting in the assigned the Cameo designation. A worthwhile Gem example. Population: 15 in 66 (2 in 66+) Cameo, 5 finer (12/18).

From The Speechless Collection. NGC ID# 24NY, PCGS# 86543

1897 Barber Half, PR64 Ultra Cameo Surfaces

- 4103 1897 PR64 Ultra Cameo NGC.** The 1897 proof Barber half dollar claims a mintage of only 731 pieces. Aside from the slightest touch of softness on the shield point, this impressive Choice example displays razor-sharp definition on all design elements. The well-preserved surfaces include deeply mirrored fields that contrast profoundly with the richly frosted devices. Census: 3 in 64 Ultra Cameo, 36 finer (12/18). NGC ID# 24NZ, PCGS# 96544

1898 Barber Half, PR65 Cameo Only 735 Examples Struck

- 4104 1898 PR65 Cameo PCGS. CAC.** The design elements of this delightful Gem proof exhibit razor-sharp definition throughout and the frosty devices contrast boldly with the deeply mirrored fields. The mostly brilliant surfaces are virtually flawless, with a few hints of pale gold toning. From a proof mintage of 735 pieces. Population: 12 in 65 (1 in 65+) Cameo, 21 finer. CAC: 6 in 65, 14 finer (12/18). NGC ID# 24P2, PCGS# 86545

- 4105 1899 PR63 Cameo NGC.** An outstanding Select Cameo proof, this 1899 Barber half dollar has brilliant and deeply mirrored fields around frosty silver devices with excellent eye appeal despite light hairlines that limit the grade. NGC ID# 24P3, PCGS# 86546

1899 Half Dollar, PR66 Cameo
Mintage of 846 Proofs

- 4106** 1899 PR66 Cameo NGC. This Barber half dollar derives from a mintage of 846 proofs. It features total brilliance on each side, appearing as it must have the day it was struck. The motifs are unsurprisingly razor-sharp and thickly frosted. Reflective fields lack any overt evidence of contact. A gorgeous Premium Gem Cameo representative.
From The Speechless Collection. NGC ID# 24P3, PCGS# 86546

- 4107** 1900 PR64 Cameo NGC. This brilliant, untuned Choice Cameo proof borders on deep cameo quality with bold design motifs. Fully and deeply mirrored fields frame the lustrous devices. Census: 22 in 64 Cameo (1 in 64+), 50 finer (12/18). NGC ID# 24P4, PCGS# 86547

- 4108** 1901 PR63 Cameo NGC. While a few hairlines limit the numerical grade, this lovely Select Cameo proof offers full brilliance with nice field-to-device contrast on both sides. NGC ID# 24P5, PCGS# 86548

- 4109** 1902 PR65 NGC. Beginning in 1902, the Mint used a format with brilliant devices, rather than the traditional frosty design elements. The surfaces of this attractive Gem are deeply toned in shades of green, blue, and lavender. Reflective fields glimmer under the toning, highlighting the dazzling array of colors.
From The Speechless Collection. NGC ID# 24P6, PCGS# 6549

1902 Barber Half Dollar, PR65
Rare Cameo Example

- 4110** 1902 PR65 Cameo NGC. Only 777 proof Barber half dollars were struck in 1902 and the Mint switched to an all-brilliant proof finish that greatly reduced cameo contrast on most examples seen. This impressive Gem is a welcome exception to that rule, as the sharply detailed design elements have enough mint frost to contrast boldly with the deeply mirrored fields. Census: 1 in 65 Cameo (1 in 65+), 3 finer (12/18). NGC ID# 24P6, PCGS# 86549

- 4111** 1904 PR65 NGC. From a small mintage of 670 pieces, this attractive Gem proof exhibits sharply detailed design elements and deeply mirrored fields, with outstanding eye appeal. The mostly brilliant surfaces are virtually flawless. Census: 38 in 65, 50 finer (12/18).
From The Speechless Collection. NGC ID# 24P8, PCGS# 6551

1904 Half Dollar, PR66
Reflective Fields

- 4112** 1904 PR66 NGC. Splashes of dusky gold patina complement otherwise untuned silver surfaces. Field reflectivity is significant, however, contrast is minimal; The Mint moved away from heavily frosted devices in 1902, switching to an all-brilliant finish. This Premium Gem is one of 670 proof half dollars struck in 1904.
From The Speechless Collection. NGC ID# 24P8, PCGS# 6551

1905 Half Dollar, PR66
Richly Toned

- 4113** 1905 PR66 PCGS. Classic deep blue, violet, and gold tones cover nearly the entirety of this Premium Gem proof, save for a wedge of brilliance on the obverse. Limited contrast is the norm for this period. Pristine fields remain flashy beneath the overlay. One of 727 proof halves minted in 1905. NGC ID# 24P9, PCGS# 6552

- 4114** 1906 PR65 NGC. From a small mintage of 675 pieces, this attractive Gem proof exhibits sharply detailed design elements and well-preserved, brilliant surfaces, with deeply mirrored fields. Census: 45 in 65 (1 in 65+), 62 finer (12/18). NGC ID# 24PA, PCGS# 6553

- 4115** 1910 PR64 NGC. Dots of deep gold-green toning visit faintly yellow-patinated surfaces on this near-Gem proof. Strongly mirrored with considerable contrast for a non-Cameo coin. Census: 65 in 64 (3 in 64+), 90 finer (12/18).
From The Speechless Collection. NGC ID# 26A4, PCGS# 6557

- 4116** 1910 PR64 Cameo NGC. This impressive Choice proof Barber half dollar exhibits cameo contrast between the sharply detailed, frosty design elements and the deeply mirrored fields. The brilliant surfaces are well-preserved and eye appeal is terrific. Census: 4 in 64 Cameo, 27 finer (12/18). NGC ID# 6UPF, PCGS# 86557

- 4117** 1910 PR65 Cameo PCGS. From a small mintage of 551 pieces, the 1910 Barber half dollar is seldom encountered with any degree of Cameo contrast. This sharply detailed Gem displays a surprising amount of mint frost on the devices that provides bold contrast with the reflective fields. A few wisps of green and blue toning accent the peripheries. Population: 8 in 65 Cameo, 12 finer (12/18).
Ex: Long Beach Signature (Heritage, 5/2012), lot 3893, realized \$2,990. NGC ID# 6UPF, PCGS# 86557

- 4118** 1911 PR64 Cameo NGC. This spectacular Choice proof Barber half dollar exhibits sharply detailed, frosty design elements that create intense cameo contrast with the deeply mirrored fields. Census: 10 in 64 Cameo, 26 finer (12/18). NGC ID# 6UPG, PCGS# 86558

4119 1913 PR65 NGC. Proofs enjoy great demand due to the low-mintage total for circulation strikes. This Gem proof exhibits a slight haze in the left obverse on otherwise perfect surfaces. Delicate gold toning graces the obverse and reverse surfaces. Census: 25 in 65, 44 finer (12/18). NGC ID# 24PH, PCGS# 6560

4120 1913 PR65 NGC. This spectacular Gem proof Barber half dollar exhibits sharply detailed design elements throughout and the well-preserved surfaces include deeply reflective fields, under delicate shades of pale jade toning. Census: 25 in 65, 44 finer (12/18). NGC ID# 24PH, PCGS# 6560

WALKING LIBERTY HALF DOLLARS

4121 1916 MS65 PCGS. A frosty Gem, this first-year Walking Liberty half dollar is sharply struck and displays brilliant silver luster with untuned surfaces, showing Adolph Weinman's design to its full advantage. An attractive example for the Walking Liberty collector or first-year type collector. NGC ID# 24PL, PCGS# 6566

4122 1916-D MS65 PCGS. Splashes of gold and iridescent toning visit the brilliant and highly lustrous surfaces of this frosty Gem that represents the first year of the design. PCGS has certified just 80 numerically finer examples (12/18). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

**1916-D Walker Half Dollar, MS66
Dappled Toning**

4123 1916-D MS66 NGC. The 1916-D is a popular first-year issue and an example of the short-lived Obverse Mintmark type that can still be found without too much difficulty all the way through MS66. Dappled crimson, russet, and gunmetal toning covers much of the obverse but clings mainly to the border regions on the reverse. Well-struck and satiny under the patina and wonderfully clean. Census: 40 in 66 (3 in 66+, 1 in 66 ★), 9 finer (12/18). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

4124 1916-D/D FS-501 MS65 PCGS. Although unmentioned on the PCGS insert, the mintmark is repunched southwest. Despite a mintage well in excess of the 1916, this introductory D-mint issue is only moderately scarcer in high grades. The 1916-D tends to come with strong strike detail, and this satiny Gem does not disappoint. Each side is lightly toned with faint accents of pale color. NGC ID# 4R6D, PCGS# 145780 Base PCGS# 6567

**1916-S Half Dollar, MS64
Mauve Patina and Original Brilliance**

4125 1916-S MS64 PCGS. In the first year of issue for the series, just 508,000 Walking Liberty half dollars were struck at the San Francisco Mint. They all feature the popular, short-lived obverse mintmark placement. Mauve patina and original brilliance color this frosty near-Gem. Well-detailed and minimally marked. NGC ID# 24PN, PCGS# 6568

**1916-S Walking Liberty Half Dollar, MS64
Low-Mintage Early Series Issue**

4126 1916-S MS64 PCGS. From a small mintage of 508,000 pieces, the 1916-S Walking Liberty half dollar is not too difficult to locate in MS64 condition, but the issue becomes scarce in finer grades. This impressive Choice example is sharply detailed in most areas, with just a touch of localized softness on the eagle's leg. The lightly marked surfaces are lustrous and appealing. NGC ID# 24PN, PCGS# 6568

4127 1917 MS66 PCGS. The 1917 Walking Liberty half dollar is scarce in MS66 condition, and finer coins are prime condition rarities. This impressive Premium Gem is well-preserved and lustrous throughout. Sharply detailed in most areas, Liberty's head shows a touch of the usual softness. PCGS has graded three numerically finer examples (12/18). NGC ID# 24PP, PCGS# 6569

4128 1917-D Obverse Mintmark MS64 PCGS. CAC. A softly struck but pleasingly lustrous near-Gem example of this popular Obverse Mintmark Walking Liberty half. Hints of golden color visit the margins, while the textured interiors are mostly silver.
Ex: FUN Signature (Heritage, 1/2011), lot 5736, where it sold for \$1,840. NGC ID# 24PR, PCGS# 6570

4129 1917-D Reverse Mintmark MS64 PCGS. Satiny luster illuminates golden toning on this near-Gem, with deep russet accents in the recesses. The strike is strong and abrasions are minimal. The coin is attractive for the grade. The 1917-D Reverse Mintmark half dollar is occasionally available in this grade, but PCGS has seen just 56 numerically finer representatives (12/18). NGC ID# 24PS, PCGS# 6571

4130 1917-D Reverse Mintmark MS64 PCGS. The earliest Walking Liberty half dollars had the mintmark on the obverse, and part way through the second year of production, the mintmark was moved to the reverse, creating additional varieties for collectors. This Choice Mint State example has typically weak central details. The surfaces are frosty and highly lustrous with no evidence of toning. PCGS has only certified 56 finer examples (12/18). NGC ID# 24PS, PCGS# 6571

**1917-S Walking Liberty Half, MS64
Reverse Mintmark**

- 4131 1917-S Reverse Mintmark MS64 PCGS.** The mintmark was moved to the reverse on the Walking Liberty half dollar partway through the year in 1917. Examples with the Reverse Mintmark can be found with a little patience in grades up to MS64, but finer coins are scarce. This attractive Choice example shows a touch of the typical softness on the centers, but the lightly toned, lustrous surfaces are well-preserved and appealing. NGC ID# 24PU, PCGS# 6573

- 4132 1918 MS63 PCGS Gold Shield.** An impressive Select specimen of this early series issue, with lightly marked, lustrous surfaces and sharply detailed design elements. Highlights of lavender-gray toning add to the considerable eye appeal. NGC ID# 24PX, PCGS# 6574

- 4133 1918 MS64 NGC.** Luminous surfaces show minimal marks on this near-Gem 1918 half dollar, with a silvery-gray hue overall that yields olive and russet toning near the borders. The strike is sharp and eye appeal is pleasing.
Ex: Long Beach Signature (Heritage, 9/2011), lot 3485, which realized \$1,092.50. NGC ID# 24PX, PCGS# 6574

**1918 Walking Liberty Half, MS65
Elusive Issue in High Grades**

- 4134 1918 MS65 PCGS.** The 1918 Walking Liberty half dollar claims a large mintage of 6.6 million pieces, but the date is surprisingly elusive in higher grades. The coin offered here is a lustrous Gem, with brilliant, unmarked surfaces, and strong visual appeal. The coin is well-struck, with only the usual localized weakness apparent on the central devices. PCGS has graded 10 numerically finer examples (12/18).
Ex: FUN Signature (Heritage, 1/2011), lot 5744, realized \$3,450. NGC ID# 24PX, PCGS# 6574

**1918 Walker, Frosted MS65
Rare Any Finer**

- 4135 1918 MS65 PCGS. CAC.** This early Philadelphia date becomes challenging at the Gem level, and it is rare any finer. As such, the CAC endorsement is particularly meaningful, since fewer than two dozen numerically finer pieces have been certified by both services combined (12/18). This is a brilliant, frost-white example with coruscating mint luster and a sharp strike. Marks are limited to a few minuscule ticks.
From The Speechless Collection. NGC ID# 24PX, PCGS# 6574

**1918-D Walking Liberty Half, MS64
Conditionally Challenging in Finer Grades**

- 4136 1918-D MS64 PCGS.** Although the 1918-D Walking Liberty half dollar can be found in MS64 condition with some patience, the issue is quite elusive in higher grades. This attractive Choice example exhibits a typical strike, with some localized softness on the centers. The well-preserved surfaces are blanketed in shades of greenish-gold and lavender-gray toning, with satiny mint luster underneath. PCGS has graded 32 numerically finer examples (12/18). NGC ID# 24PW, PCGS# 6575

- 4137 1918-S MS64 PCGS.** Despite its huge mintage of more than 10 million pieces, the 1918-S Walking Liberty half dollar is not easy to locate in high grade. This example is sharply struck, highly lustrous and untuned with immaculate fields and only minor contact marks. An area of die-polish brilliance appears along the upper reverse on this near-Gem piece.
Ex: FUN Signature (Heritage, 1/2013), lot 4880, where it realized \$2,820. NGC ID# 24PX, PCGS# 6576

- 4138 1918-S MS64 PCGS Gold Shield. CAC.** Brilliant ivory luster shines through the dappled gold and iridescent toning that appears on both sides of this near-Gem. This is a highly attractive example of quality that is rarely exceeded. PCGS has only seen 37 numerically finer examples (12/18). NGC ID# 24PX, PCGS# 6576

1919 Half Dollar, MS63
Antique-Gold and Lilac Patina

- 4139 1919 MS63 PCGS.** Antique-gold toning is equally matched with lilac shades on the reverse. Typically well-defined for a P-mint issue, the surfaces are lustrous with only a few trivial abrasions. A spot of aqua residue has formed in the left obverse field. One of only 962,000 pieces produced. Housed in an old green label holder.
Ex: Long Beach Signature (Heritage, 6/2000), lot 7400, where it realized \$2,070. NGC ID# 24PY, PCGS# 6577

1919 Walking Liberty Half, MS63
Low-Mintage Philadelphia Issue

- 4140 1919 MS63 PCGS.** The 1919 Walking Liberty half dollar is a challenging Philadelphia Mint issue, from a low mintage of 962,000 pieces. This impressive Select example exhibits well-detailed design elements and lightly marked surfaces, under attractive shades of pale gold toning. Satiny mint luster shines through the patina. NGC ID# 24PY, PCGS# 6577

- 4141 1919-D AU53 PCGS.** The 1919-D is a notable strike rarity. Most coins, including the one offered here, exhibit incompleteness on the head, branch, hand, and skirt lines. This untuned AU representative has satiny, unabraded surfaces. A splendid example of this challenging Denver issue. NGC ID# 24PZ, PCGS# 6578

1919-S Walking Liberty Half, AU58
Difficult to Locate in High Grade

- 4142 1919-S AU58 PCGS. CAC.** From a smallish mintage of 1.5 million pieces, the 1919-S is the second-rarest Walking Liberty half dollar in Mint State grades. This attractive near-Mint example shows just a trace of wear on the well-detailed design elements and the lustrous surfaces are remarkably clean, with outstanding eye appeal for the grade. NGC ID# 24R2, PCGS# 6579

1920 Half Dollar, Vibrant MS65
Elusive in Top Grades

- 4143 1920 MS65 PCGS.** Near-brilliant and coruscated, this vibrantly lustrous 1920 is sharply struck for the issue. Liberty's facial features and cap folds are well-defined, with only minor blending of the hair definition framing the face. Both the branch hand and eagle's leg show about 70% sharpness, far above average for a 1920. Bits of deep-gray toning are widely spaced, especially along the reverse margins. This Gem coin exhibits exceptional eye appeal, and PCGS has seen just 23 numerically finer pieces (12/18).
From The Speechless Collection. NGC ID# 24R3, PCGS# 6580

- 4144 1920-D AU53 PCGS.** Some light wear shows on the well-detailed design elements of this attractive AU53 specimen, but the surfaces are remarkably clean for the grade. Highlights of lavender and golden-tan toning visit both sides, with original mint luster underneath. NGC ID# 24R4, PCGS# 6581

1920-S Walking Liberty Half, MS64

- 4145 1920-S MS64 PCGS.** The 1920-S Walking Liberty half dollar is seldom encountered in high grade, with a sharp strike. This attractive Choice example exhibits well-detailed design elements, with the typical softness on the wreath hand and eagle's leg. The well-preserved surfaces are lustrous and appealing, with highlights of golden-brown toning. PCGS has graded 62 numerically finer examples (12/18). NGC ID# 24R5, PCGS# 6582

1921-D Walking Liberty Half Dollar, XF40
Low-Mintage Series Key

- 4146 1921-D XF40 PCGS. CAC.** This pleasing key Walker has attractive light gray surfaces with tinges of champagne toning near the borders and some darker verdigris among the devices. This date is frequently encountered in heavily worn condition, but middle to upper-grade circulated pieces are elusive.
Ex: FUN Signature (Heritage, 1/2010), lot 2707, realized \$3,220; Long Beach Signature (Heritage, 6/2015), lot 4638, realized \$3,525. NGC ID# 24R7, PCGS# 6584

**1921-S Walking Liberty Half, XF40
Low-Mintage Key**

- 4147 1921-S XF40 PCGS.** A combination of low mintage and strong demand make the 1921-S the second most-challenging date of the series. The smooth, medium-gray surfaces of this example show only minor marks from circulation and grade-consistent wear. Much interior detail remains on all of the raised devices. Pleasing original, silver-gray fields retain some luster.
Ex: Long Beach Signature (Heritage, 9/2015), lot 4443, realized \$2,585. NGC ID# 24R8, PCGS# 6585

**1923-S Walking Liberty Half, MS62
San Francisco Better Date**

- 4148 1923-S MS62 PCGS.** The 1923-S was the only Walking Liberty half dollar produced from 1922 through 1926. High commercial demand ensured most of the coins struck at the San Francisco Mint in 1923 circulated heavily. As a result, the 1923-S is a better date in the series. This well-detailed MS62 example shows a touch of the usual softness on the branch hand, with lightly marked, lightly toned surfaces that radiate vibrant mint luster. NGC ID# 24R9, PCGS# 6586
- 4149 1927-S MS63 PCGS.** This impressive Select specimen exhibits sharply detailed peripheral design elements, with a touch of the typical softness on the wreath hand and eagle's leg. The lightly marked surfaces are lustrous and lightly toned. NGC ID# 24RA, PCGS# 6587

**1928-S Walking Liberty Half, MS64
Lightly Toned and Lustrous**

- 4150 1928-S MS64 PCGS.** This impressive Choice example is delicately toned in golden-lilac hues, with average, or better, sharpness over the central devices. The surfaces are lustrous and lightly marked. These workhorse issues from the late 1920s circulated extensively and very few were spared from the channels of commerce. NGC ID# 24RB, PCGS# 6588

- 4151 1929-D MS65 PCGS.** An attractive coin that boasts a sharp strike on Liberty's head, thumb, and skirt lines, with the only appreciable weakness seen on the eagle's thigh, an area that is almost never found sharp save for (later) proof coins of this design. Delicate gold peripheral toning, otherwise bright. Excellent, highly lustrous surfaces as expected for the grade. NGC ID# 24RC, PCGS# 6589

**1929-S Half Dollar, MS65
Seldom Seen Finer**

- 4152 1929-S MS65 PCGS. CAC.** Gem condition is about as fine as this San Francisco issue is typically seen, as Premium Gems are scarce and are proportionately more costly to acquire. This collector-grade example is well-struck with satiny luster that shows hints of light golden toning. Trivial contact marks on Liberty's thigh and on the high points of the eagle's feathers determine the grade. There are 62 numerically finer coins at PCGS (12/18). NGC ID# 24RD, PCGS# 6590
- 4153 1933-S MS64 PCGS.** Only the San Francisco Mint coined Walking Liberty half dollars in 1933. This Choice Mint State example has a strong strike and brilliant silver luster with frosty, untuned surfaces. An excellent example. NGC ID# 24RE, PCGS# 6591

Gem 1933-S Walking Liberty Half

- 4154 1933-S MS65 PCGS Gold Shield.** This delightful Gem Walking Liberty half dollar exhibits razor-sharp definition on all design elements and the virtually flawless surfaces are lustrous and appealing. Delicate shades of golden-tan toning add to the terrific visual appeal. The San Francisco Mint did not strike nickels, dimes, or quarters in 1933, the trough of the Great Depression. NGC ID# 24RE, PCGS# 6591

**1933-S Half Dollar, MS65
Brilliant and Fully Struck**

4155 1933-S MS65 PCGS. Aside from Lincoln cents, only the 1933-S half dollar was struck for “normal” circulation. Substantial mintages of eagles and double eagles — with a few exceptions — were never distributed, and headed straight to the Gold Recall melting pots. This is a dazzling Gem 1933-S half, with brilliant silver-white surfaces and vibrant mint luster. A sharp strike shows finger and thumb definition, and the eagle’s trailing leg shows full feathers. *From The Speechless Collection.* NGC ID# 24RE, PCGS# 6591

4156 1934-D MS66 PCGS. CAC. The 1934-D Walking Liberty half dollar is a condition rarity in grades above MS66. This delightful Premium Gem exhibits sharply detailed design elements and untuned, impeccably preserved surfaces, with vibrant mint luster throughout. PCGS has graded four numerically finer examples (12/18). NGC ID# 24RG, PCGS# 6593

4157 1934-S MS65 PCGS. Strike detail is impressively strong throughout this blazing, untuned Gem. Radiant mint frost glistens from well-preserved surfaces. There are a few scattered reeding marks on the obverse, but none are serious. A great example of this San Francisco issue. *From The Speechless Collection.* NGC ID# 24RH, PCGS# 6594

4158 1934-S MS65 PCGS. A delightful Gem Walking Liberty half dollar, with sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show subtle highlights of jade and lavender toning. NGC ID# 24RH, PCGS# 6594

4159 1934-S MS65 NGC. This delightful Gem exhibits well-detailed design elements, with just a touch of softness on the eagle’s leg. The well-preserved surfaces are blanketed in shades of sea-green and lavender-gray toning, with vibrant mint luster underneath. NGC ID# 24RH, PCGS# 6594

**1934-S Half Dollar, MS66
Elusive in Mint State**

4160 1934-S MS66 PCGS Gold Shield. This San Francisco Walker half dollar issue poses a challenge in Mint State, but collectors should still be able to locate an example in MS64 or MS65. Premium Gems are much scarcer and practically impossible to upgrade. Flashes of frosty brilliance shine through mottled golden-gray and steel-blue patina. Both sides are strongly struck, particularly on Liberty’s head and branch hand. Nine coins finer at PCGS (12/18). NGC ID# 24RH, PCGS# 6594

4161 1935-S MS65 PCGS. This attractive Gem exhibits well-detailed design elements, with a touch of the typical softness on the wreath hand. The well-preserved surfaces radiate vibrant mint luster, under subtle highlights of pale gold toning. NGC ID# 24RL, PCGS# 6597

**1935-S Half Dollar, MS66
Brilliant Mint Frost**

4162 1935-S MS66 PCGS Gold Shield. This impressive Premium Gem Walking Liberty half dollar has typical central weakness. A lovely example, this piece has frosty mint luster with brilliant silver surfaces and delicate peripheral gold toning. PCGS has certified only three numerically finer pieces (12/18). NGC ID# 24RL, PCGS# 6597

4163 1938-D MS65 PCGS. This Gem survives from a low mintage of just 491,600 coins at Denver in 1938. This piece has frosty mint luster and brilliant, untuned silver surfaces. NGC ID# 24RV, PCGS# 6605

4164 1938-D MS65 PCGS Gold Shield. CAC. The 1938-D is a better date Walker, coming from a limited mintage of 491,600 coins. Examples carry a premium in all grades, but the date is most heavily sought-after in Gem and finer condition, especially with a CAC label. This piece is brilliant and frosty. Strike weakness on Liberty’s branch hand and the eagle’s trailing leg is the only imperfection of note. NGC ID# 24RV, PCGS# 6605

4165 1938-D MS66 PCGS. The 1938-D is the key to the set of late-date Walkers, primarily because of its exceptionally low mintage of only 491,600 pieces. This is a brilliant and radiant example whose surfaces are essentially abrasion-free. The obverse has a slightly matte texture, as coined. *Ex: Dodson and Collier Collections (Bowers and Merena, 6/1984), lot 4156.* NGC ID# 24RV, PCGS# 6605

4166 1938-D MS66 PCGS. From a low mintage of 491,600 pieces, the 1938-D Walking Liberty half dollar is an elusive issue in grades above MS66. This impeccably preserved, lustrous Premium Gem exhibits well-detailed design elements, with a touch of the typical softness on the wreath hand. PCGS has graded 51 numerically finer examples (12/18). NGC ID# 24RV, PCGS# 6605

4167 1940-S MS66+ PCGS. CAC. The 1940-S Walking Liberty half dollar is a condition rarity in grades above MS66. This Plus-graded Premium Gem exhibits some of the typical softness on the central design elements, but the lightly toned, lustrous surfaces are impeccably preserved. PCGS has graded 14 finer examples (12/18). NGC ID# 24S2, PCGS# 6610

4168 1941-D MS67+ NGC. The 1941-D is readily found through MS67, but coins with an added Plus designation are truly rare. Most collectors would consider finer examples unattainable. Daubs of golden-tan patina adorn brilliant, satiny surfaces. Well-struck with good central detail, though full thumb separation is unseen. NGC reports four coins finer (12/18). *From The Five Generations of Eby Collection, Part II.* NGC ID# 24S4, PCGS# 6612 Base PCGS# 6612

1942-D Half Dollar, MS68
Beautiful Toning, Unimprovable Quality

- 4169 1942-D MS68 PCGS Gold Shield.** Powder-blue and lavender patina covers most of each side, with arcs of sun-gold and crimson toning along the borders. Aside from two ticks between the rays and another on Liberty's arm, this gorgeous Superb Gem is flawless. Awash in satiny mint luster and well-struck. Population: 6 in 68, 0 finer (12/18). NGC ID# 24S7, PCGS# 6615

- 4170 1946-S MS67 PCGS Gold Shield.** Knob S. Dappled golden-brown and forest-green toning is prevalent throughout the obverse border. The reverse displays similar shades, but only on the rim. This lustrous Superb Gem is well preserved and displays full skirt lines, though the fingers of the branch hand are mostly merged. NGC ID# 24SL, PCGS# 6629

**PROOF WALKING LIBERTY
 HALF DOLLARS**

- 4171 1936 PR64 PCGS Gold Shield.** A lovely Choice proof Walking Liberty half dollar, this piece represents the first year of brilliant proof production for the design. Subtle gold toning appears along the obverse border of this otherwise bright and untuned proof. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, Brilliant PR65
Modest Obverse Contrast

- 4172 1936 PR65 PCGS. CAC.** An untuned, CAC-approved Gem example of the scarcest proof Walking Liberty half dollar. The figure of Liberty is modestly frosted, delivering a hint of cameo contrast on the obverse. Both sides are fully struck and beautifully preserved. The first proof Walking Liberty halves were struck in 1936, to the tune of just 3,901 pieces. High-end examples of this issue are highly sought-after. NGC ID# 27V4, PCGS# 6636

- 4173 1939 PR68 NGC.** Gold and iridescent toning masks the brilliant silver surfaces of this Superb Gem proof. Both sides are fully mirrored with a hint of cameo contrast between the fields and the devices. The NGC insert is hand-signed by *Guide Book* Editor Emeritus Ken Bressett. Census: 98 in 68 (1 in 68+, 20 in 68 ★), 1 finer (12/18). NGC ID# 5ESU, PCGS# 6639

- 4174 1940 PR68 NGC.** Subtle hints of lime-green and magenta toning visit the impeccably preserved surfaces of this spectacular PR68 specimen, with razor-sharp definition on all design elements and deeply mirrored fields underneath. Census: 59 in 68 (4 in 68 ★), 0 finer (12/18). NGC ID# 27V8, PCGS# 6640

- 4175 1942 PR68 NGC.** The NGC label is hand signed by *Guide Book* editor Ken Bressett. A stunning Superb Gem proof, this 1942 Walking Liberty half dollar exhibits sensational mint brilliance with deeply mirrored fields and sharply defined, satin devices. Ex: *Houston Signature* (Heritage, 11/2012), lot 4100; *FUN Signature* (Heritage, 1/2015), lot 5173, which realized \$2,820. NGC ID# 282G, PCGS# 6642

1942 Half Dollar, PR68
Vivid Peripheral Toning

- 4176 1942 PR68 NGC. CAC.** Exquisitely preserved for this final year of proof Walking Liberty half dollar production. Most of each side has semi-translucent patina with a gray base and pale gold, blue, and lavender elements, while intense gold-orange and crimson patina appears in crescents centered at the left. NGC has graded just eight numerically finer representatives (12/18). NGC ID# 282G, PCGS# 6642

FRANKLIN HALF DOLLARS

- 4177 1949 MS67 PCGS. CAC.** Traces of champagne toning accent the satiny mint luster of this Superb Gem 1949 example. The strike is well-executed, and eye appeal is pleasing. None are finer at either service. Population: 36 in 67, 0 finer (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# 24ST, PCGS# 6653 Base PCGS# 6653

- 4178 1949-D MS66 Full Bell Lines PCGS.** A spectacular Premium Gem, with sharply detailed design elements that show Full Bell Lines definition. The impeccably preserved, lustrous surfaces are blanketed in shades of lavender and sea-green toning. Population: 94 in 66 (10 in 66+) Full Bell Lines, 0 finer (12/18). NGC ID# 5HWE, PCGS# 86654

- 4179 1952-S MS66 Full Bell Lines PCGS Gold Shield.** Ex: Chesapeake Collection. The 1952-S is an elusive issue with Full Bell Lines. This example, undoubtedly from a Mint Set, features rich golden-brown and iridescent toning over frosty mint luster. Population: 63 in 66 (8 in 66+) Full Bell Lines, 3 finer (12/18). NGC ID# 24T5, PCGS# 86663

PROOF FRANKLIN HALF DOLLARS

- 4180 1952 PR68 NGC.** An incredible Superb Gem, this 1952 half dollar is fully brilliant with nicely mirrored fields and reflective, sharply defined devices. There is no evidence of toning, nor of cameo contrast. Census: 93 in 68 (15 in 68 ★), 0 finer (12/18). NGC ID# 27VC, PCGS# 6693

- 4181 1952 PR67 Cameo NGC.** Cameo proofs among the early Franklins are infrequently encountered. This Superb Gem Cameo proof has excellent contrast with brilliant, untuned silver surfaces. Census: 115 in 67 Cameo (1 in 67+, 7 in 67 ★, 1 in 67+★), 12 finer (12/18). NGC ID# 27VC, PCGS# 86693

- 4182 1954 PR69 NGC.** The impeccably preserved, completely brilliant surfaces of this remarkable Franklin half dollar are just one tick away from perfection and the design elements are fully struck. Deeply mirrored fields add to the outstanding eye appeal. Census: 57 in 69 (8 in 69 ★), 0 finer (12/18). NGC ID# 27VE, PCGS# 6695

- 4183 1954 PR68 Cameo PCGS Gold Shield. CAC.** This majestic PR68 specimen is among the finest certified examples at PCGS. The design elements are razor-sharp throughout and the deeply mirrored fields contrast boldly with the frosty devices. Population: 81 in 68 (1 in 68+) Cameo, 0 finer. CAC: 52 in 68, 0 finer (12/18). NGC ID# 6L9R, PCGS# 86695

KENNEDY HALF DOLLAR

- 4184 1967 MS67 NGC.** A condition rarity, this Superb Gem circulation strike is among the finest 1967 Kennedy halves certified. A few light marks on the President's cheek are masked by vivid cottonwood-green and amber-red toning that covers much of the obverse. The reverse is pearl-white and satiny. An important Registry Set acquisition in this lofty grade. Census: 12 in 67 (1 in 67+, 1 in 67 ★), 0 finer (12/18). NGC ID# 24WJ, PCGS# 6710

PROOF KENNEDY HALF DOLLAR

- 4185 1973-S PR70 Deep Cameo PCGS.** A perfect proof preserved from a 1973 proof set, this piece has deeply mirrored fields that frame the satiny devices. As the grade suggests, not a blemish is to be found. Population: 62 in 70 Deep Cameo (12/18). NGC ID# 27WM, PCGS# 96809

EARLY DOLLARS

- 4186 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3 — Repaired — PCGS Genuine Gold Shield. VF Details.** Bowers Die State I. Liberty's cheek displays subtle indications of smoothing, but most observers will be pleased with this nicely detailed and minimally abraded wheat-gold and gunmetal-gray Flowing Hair silver dollar. A moderately better die variety that features a repunched E in AMERICA.
- 4187 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Plugged — NCS. VG Details.** A hole is plugged near 12 o'clock. The ER in LIBERTY is re-engraved with moderate skill, and the reverse exergue also shows signs of smoothing. The surfaces are hairlined and microgranular, but lack mentionable marks. The centers are stone-gray and the borders are walnut-brown. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853
- 4188 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Scratch — PCGS Genuine Gold Shield. VF Details.** Bright hair-thin marks on Liberty's cheek appear more recent than the rich dove-gray toning. No other abrasions are readily apparent across the cloudy surfaces. The eagle's wings exhibit ample detail. A specialist-familiar variety with a narrow die flaw or "bar" behind the highest neck curl.
- 4189 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Obverse Graffiti — NGC Details. VF.** Bowers Die State I, with the curl at the forehead showing three arcs. Some thin, cross-hatched pinscratches show in the right obverse field, but this still-attractive example is otherwise lightly abraded, with pleasing blue-steel and lavender-gray surfaces. The design elements show moderate wear, with much interior detail in the hair still intact.

1797 B-2, BB-72 Dollar, Fine 15 Small Letters Reverse

- 4190 1797 9x7 Stars, Small Letters, B-2, BB-72, R.4, Fine 15 NGC.** There was a time that this variety was considered a major rarity among early silver dollars, with speculation that only about 20 examples were known. We have offered 92 of these in our auctions dating back to 1993, hardly a statistic that would apply if only 20 are known. The 1876-CC twenty cent piece is a rarity with a known population of about 20 pieces, and we have handled five of those over the last 25 years. Both sides show scratches and adjustment marks, and exhibit blue, violet, and tan patina over light gray surfaces. NGC ID# CAUT, PCGS# 40005 Base PCGS# 6866

1798 B-23, BB-105 Dollar, VF35 Large Eagle, Pointed 9, Wide Date

- 4191 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, VF35 NGC. CAC.** Bowers Die State III. Liberty's highest and lowest curls are lapped. The 8 firmly touches the bust (same obverse used for BB-104), and the leaf tip points under the left foot of the 1 in AMERICA (same reverse used for BB-106). Strike detail is usually soft at the centers for BB-105 representatives, among the most collectible Early dollars. Steel-gray patina dominates, with olive-gold and gunmetal-blue accents. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

1798 B-15, BB-112 Bust Dollar, VF35 Lapped Obverse Die

- 4192 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, VF35 NGC.** Bowers Die State III, Bolender-15a. The obverse die was lapped, reducing the size of the stars. Bolender lacked knowledge of the die making process (as did most in the middle 20th century) and wrote that coins of this die state were "struck before the die was finished." Faint gold toning appears on the light gray surfaces of this pleasing piece. Both sides exhibit grade-consistent circulation marks. NGC ID# 24X6, PCGS# 40029 Base PCGS# 40018

4193 1800 B-13, BB-193, R.3 — Cleaned — NGC Details. VF. Bowers Die State III. Light tan-gold toning adorns this partly lustrous and well-defined Heraldic Eagle type coin. Faintly hairlined, as are many early dollars, but there are no distracting abrasions. A small edge flaw on the reverse at 5:30 appears to be of mint origin. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

4194 1800 10 Arrows, B-15, BB-195, R.4, VG10 NGC. Pale gray-gold toning appears on the obverse, while the reverse has gray fields and lavender devices. A pleasing example of a scarce variety with slight die bulging that results in blunt details. NGC ID# 24X9, PCGS# 40080 Base PCGS# 6891

4195 1800 12 Arrows, B-17, BB-196, R.1, VF20 PCGS Gold Shield. Bowers Die State IV. A radial crack through obverse star 4 is present, but not described in the Bowers reference. The die flaw west of the base of the 1 in the date is diagnostic for B-17. This charming and problem-free Very Fine Heraldic Eagle dollar has dove-gray fields and stone-white high points. NGC ID# 24X9, PCGS# 40079 Base PCGS# 6890

SEATED DOLLARS

4196 1840 AU55 NGC. OC-1, R.1. Ex: Dick Osburn and the Osburn-Cushing Reference Collections. OC Die State c/c. Rich patina is largely blue-to-gray with significant golden elements. Isolated high-point wear appears on Liberty's figure, while small marks in the fields and on peripheral devices contribute to the Choice About Uncirculated grade. This is a sharply struck example with soft mint luster remaining beneath pleasing, natural toning for strong, original eye appeal. NGC ID# 24YA, PCGS# 6926

4197 1841 AU58 NGC. OC-2, R.1. Ex: Dick Osburn and the Osburn-Cushing Reference Collections. OC Die State b/a. Pale-gold toning deepens to golden-gray on the high points of this sharply struck near-Mint example. Mint luster remains across the lightly abraded surfaces, which show only tiny marks and a few light hairlines. This is the plate coin for the 1841 OC-2 die marriage in the Osburn-Cushing Register of Die Varieties. NGC ID# 24YB, PCGS# 6927

4198 1844 — Questionable Color — PCGS Genuine Gold Shield. Unc. Details. OC-1, R.2. A Top 30 Variety. The Quad Stripes variety with prominent die doubling on the obverse shield. All examples struck for commerce were OC-1, as the production of 20,000 pieces required only one die pair. A couple of dozen proofs were coined from a different die pair, probably at a later date. This well-struck example displays moderately marked surfaces beneath comprehensive forest-green and lavender-gray toning.

4199 1846 — Questionable Toning — PCGS Genuine Gold Shield. Unc. Details. OC-2, R.1. Vivid blue-green patina fills the borders, while the centers are deep lavender. This well-struck silver dollar displays minor marks on the upper reverse field, but the majority of the coin is surprisingly devoid of contact.

1848 Silver Dollar, AU58 Scarce, Low-Mintage Issue

4200 1848 AU58 NGC. OC-1, R.2. Ex: Dick Osburn and the Osburn-Cushing Reference Collections. OC Die State a/a. Powder-blue and pale golden-gray toning frequents this richly detailed example, which has its share of subtle satin luster despite a brief stay in circulation. The right obverse and the field near UNITED display some wispy marks. Only 15,000 pieces were struck, ranking the 1848 issue among the scarcer Seated dollar dates. Census: 17 in 58, 10 finer (12/18).

Ex: Long Beach Signature (Heritage, 9/2007), lot 1914. NGC ID# 24YK, PCGS# 6935

4201 1849 — Artificial Toning — NGC Details. Unc. OC-2, Die State a/c. Ex: Dick Osburn and the Osburn-Cushing Reference Collections. This fully defined dollar displays satin luster through a rich palette of forest-green and golden-brown patina. Visible marks are absent except for shallow obverse rim dings at 5 o'clock and 7:30. A sharply struck example with slightly reflective fields and swirling die polish lines alongside light hairlines beneath the toning.

1850-O Seated Dollar, AU53 Second of Four O-Mint Issues

4202 1850-O AU53 NGC. OC-1, R.3. Ex: Dick Osburn and the Osburn-Cushing Reference Collections. OC Die State b/c. The New Orleans Mint produced Seated silver dollars in just four years, 1846, 1850, 1859, and 1860. While the latter two issues are common in Mint State grades, the 1846 and 1850 issues are rare in higher grades. This attractive AU shows light-gray surfaces with splashes of olive-gray toning near the obverse border, and dappled pale-blue shades on the reverse. A scattering of light marks dot the surfaces. Census: 13 in 53, 51 finer (12/18).

Ex: Long Beach Signature (Heritage, 2/2013), lot 3601. NGC ID# 24YN, PCGS# 6938

4203 1853 — Cleaned — NGC Details. Unc. OC-1, R.2. Osburn-Cushing Die State b/b, with faint clashing below Liberty's right (facing) arm. An impressive specimen of this slightly better date, with well-detailed design elements and lightly marked surfaces that show highlights of lavender toning. The luster is somewhat dimmed by the noted cleaning. NGC ID# 24YS, PCGS# 6941

**1857 Seated Liberty Dollar, AU50
Scarce, Heavily Exported Issue**

- 4204 1857 AU50 PCGS. OC-2, R.3.** Ex: Dick Osburn and the Osburn-Cushing Reference Collections. OC Die State a/b. Mint records indicate 94,000 Seated Liberty dollars were struck in 1857, but the great majority of the mintage was used in overseas trade and the date is scarce-to-rare in all grades today. This lightly circulated example shows just a trace of wear on the well-detailed (for the issue) design elements, with mellow gold and lavender patina and traces of prooflike reflectivity in sheltered areas. Population: 13 in 50, 97 finer (12/18).
Ex: *Summer FUN Signature* (Heritage, 7/2012), lot 3851. NGC ID# 24YW, PCGS# 6945

**1857 Silver Dollar, AU53
Partially Lustrous, Untoned**

- 4205 1857 AU53 NGC. OC-2, R.3.** Die lines near OF and Liberty's foot confirm the Osburn-Cushing variety. This untoned and inoffensively abraded silver dollar displays luster through the legends and devices. A good strike except on the stars and Liberty's hair. A decidedly better No Motto date with a mintage of only 94,000 pieces. NGC ID# 24YW, PCGS# 6945

**1857 Seated Dollar, Choice AU
Underrated, Elusive in All Grades**

- 4206 1857 AU55 PCGS Gold Shield. OC-2, R.3.** Two die lines appear in an unfinished area below Liberty's foot, as usual. Dick Osburn and Brian Cushing estimate 400 1857 Seated dollars survive from a mintage of 94,000 coins. This Choice AU example presents typical strike softness on the head and stars, but the lower part of the eagle is strong. Areas of red-violet and gold patina complement otherwise brilliant surfaces that show a bit of field reflectivity and minor hairlines on each side. NGC ID# 24YW, PCGS# 6945

- 4207 1859 AU58 NGC. OC-3, High R.3.** Ex: Dick Osburn and the Osburn-Cushing Reference Collections. OC Die State a/a. This is a plate coin for the OC-3 variety in *Liberty Seated Dollars, A Register of Die Varieties*. The large mintage of 255,700 pieces is deceptive, because the 1859 is a scarce issue in About Uncirculated and finer grades. Many coins went to the Orient, where they were melted for their silver content. Rich lilac-gray and tan patina bathes this well-struck near-Mint dollar. Some wispy pin scratches outline the eagle device and crisscross over a small planchet flaw in the upper left reverse field. Census: 10 in 58, 34 finer (12/18). NGC ID# 24YZ, PCGS# 6946

**1859-S Seated Dollar, Brilliant AU55
Scarce S-Mint Issue, 20,000 Pieces Struck**

- 4208 1859-S AU55 NGC. OC-1, R.2.** Ex: Dick Osburn and the Osburn-Cushing Reference Collections. OC Die State c/d. Struck from a late die state, with repunching at the base of 1 and 8 in the date removed by die lapping. A faint die crack at the base of the date signifies the late obverse die stage, while several reverse die cracks surround the reverse legend and connect leaves 1 and 2. This is a brilliant, Choice About Uncirculated example with light, high-point wear and partially prooflike fields. Surface marks and abrasions are grade-consistent. Plated in the Osburn-Cushing *Register of Die Varieties*. Census: 18 in 55, 39 finer (12/18). NGC ID# 24YZ, PCGS# 6948

- 4209 1860 — Artificial Toning — NGC Details. Unc. OC-3, High R.4.** A diagonal die line in the gown right of the Y in LIBERTY is an important identifier for OC-3. While this piece is sharply defined and shows no wear, it exhibits cleaning lines beneath artificial heather and iridescent toning.

- 4210 1860-O AU58 PCGS Gold Shield. OC-1, R.1.** The borders exhibit light butter-gold toning, but this Borderline Uncirculated No Motto type coin is otherwise brilliant. The fields display abrasions customary for the loosely stored issue. A couple of sealed Treasury bags of '59-O and '60-O silver dollars were released to fortunate purchasers during the early 1960s, and were likely the source of the present piece. NGC ID# 24Z3, PCGS# 6950

- 4211 1860-O MS60 Prooflike NGC. OC-1, R.1.** The brilliant silver surfaces exhibit myriad small marks as expected for the grade, but the combination of mirrored fields and contrasting devices provides good eye appeal. NGC ID# 24Z3, PCGS# 86950

- 4212 1870 MS61 NGC. OC-2, Low R.3.** Wisps of magenta toning are barely evident on the brilliant, satiny, and lustrous surfaces of this pleasing Mint State Seated Liberty dollar. Minor contact marks and faint hairlines prevent a higher grade. NGC ID# 24ZD, PCGS# 6963

- 4213 1871 AU58 PCGS. OC-11, R.2.** The 1871 was the first of two Seated dollars with mintages that surpassed 1 million pieces. Nonetheless, near-Mint examples are scarce relative to demand from type collectors. This well-defined and partly lustrous representative is mostly untoned but shows areas of silver-gray patina. Scattered abrasions include a rim depression near 1:30 on the reverse. NGC ID# 5DNV, PCGS# 6966

- 4214 1872-S VF25 NGC. OC-1.** Just one die pair is known for the 1872-S Seated dollars, utilized for 9,000 strikes at the San Francisco Mint. This pleasing example scattered marks on its natural light gray surfaces. NGC ID# 24ZL, PCGS# 6970

PROOF SEATED DOLLARS

1860 Silver Dollar, PR63 Peripheral Pastel Patina

- 4215** 1860 PR63 PCGS Gold Shield. OC-P1, R.2. Moderate golden-brown toning deepens near the rims. The upper obverse displays glimpses of lilac-red and navy-blue. A Select specimen with pleasing surfaces. A narrow horizontal flan flaw west of star 13 is of mint origin. The strike shows minor blending on Liberty's hair and the eagle's left (facing) leg. NGC ID# 252E, PCGS# 7003

1861 Seated Dollar, PR62 About 350 Pieces Survive

- 4216** 1861 PR62 PCGS. OC-P2, Low R.4. The horizontal shield lines are doubled on the obverse, and the areas between the olive leaves are completely finished. Osburn and Cushing estimate 350 1861 proof Seated dollars survive. Although 1,000 pieces were struck, considerably fewer were sold because of a 13 cent proofing fee implemented the year before. This PR62 dollar is brightly untoned with reflective fields and moderate hairlines. NGC ID# 252F, PCGS# 7004

1872 Seated Dollar, PR62 Frosty Motifs, Glassy Fields

- 4217** 1872 PR62 PCGS Gold Shield. OC-P1, R.2. A Top 30 Variety, due to die doubling on IN GOD WE TRUST. Lovely peripheral golden-brown and navy-blue toning fills the borders of this flashy specimen. Liberty and the eagle are frosty and exhibit cameo contrast, though PCGS has not bestowed that designation. Minor field hairlines are commensurate with the grade. NGC ID# 252U, PCGS# 7020

- 4218** 1873 — Questionable Color — PCGS Proof Genuine Gold Shield. Unc Detail. OC-P1, R.3. All proofs are from a single die pair with strong doubling of the motto on the reverse. Questionable or not, the color on this lovely final-year Seated Liberty silver dollar is attractive with light silver centers, ceding to violet and blue closer to the borders.

TRADE DOLLARS

- 4219** 1873-S MS61 NGC. Light butter-gold toning graces the borders of this inoffensively abraded representative. Only a mark on the F in FINE merits mention. The right (facing) claw shows incompleteness, but most design elements are bold. A conditionally scarce first-year issue. Certified in a circa-2000 holder. NGC ID# 252Y, PCGS# 7033

- 4220** 1874-CC MS61 PCGS. Micro CC. No period after FINE. Highlights of lavender-gray and gold patina do not diminish the brilliance of the underlying surfaces and the design elements are well-detailed, with just a touch of softness on Liberty's head. Housed in a green label holder. NGC ID# 2532, PCGS# 7035

1874-S Trade Dollar, MS64 Uncollectible in Higher Grades

- 4221** 1874-S MS64 NGC. Large S. No period after FINE. This is an available Trade dollar issue through lower Uncirculated grades, including in MS63. It becomes conditionally scarce in MS64 and seems underappreciated at that level considering that finer coins are practically unobtainable. Antique golden-gray patina allows frosty mint luster to shine through. Incomplete at the upper obverse but strong elsewhere. Census: 21 in 64, 2 finer (12/18). NGC ID# 2533, PCGS# 7036

1875 Trade Dollar, MS62 Lustrous and Minimally Marked

- 4222** 1875 Type Two Reverse MS62 NGC. Period after FINE. The 1875 has a relatively low mintage, and is very scarce in Mint State. This lustrous representative has light straw-gold toning and is surprisingly free from abrasions. Several stars show a soft strike, and Liberty's hair and the eagle's right (facing) claw are also incompletely brought up. NGC ID# 2534, PCGS# 40107 Base PCGS# 7037

- 4223** 1875-CC Type One Reverse MS62 PCGS Gold Shield. Rich original forest-green, orange-red, and gunmetal-gray toning encompasses this satiny Carson City type coin. Scattered minor marks fail to distract. A good strike save for softness on the eagle's right (facing) leg. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

- 4224** 1875-CC Type One Reverse MS62 PCGS. A brilliant Carson City type coin that exhibits good luster and only a single mentionable mark, above the D in UNITED. The C in AMERICA displays a trace of struck-in grease. A nice strike despite the usual minor blending on Liberty's hair and the right (facing) claw. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

**1875-CC Trade Dollar, MS63
Nicely Toned, Semiprooflike**

- 4225 1875-CC Type One Reverse MS63 PCGS.** Bright lemon-gold patina graces this nicely struck and semiprooflike Trade Dollar. The obverse field has a few light handling marks, while the reverse is carefully preserved. As a rule, Carson City Trade dollars are considerably scarcer than their San Francisco Mint counterparts. A scarce issue in Select condition.
Ex: November Signature (Heritage, 11/2003), lot 8295. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

- 4226 1875-S Type One Reverse MS63 NGC.** Large S. Numerous peripheral die cracks appear on the reverse of this Select 1875-S Trade dollar, suggesting a late die state. Satiny luster has minimal abrasions but shows warm russet-gold toning. Mild strike softness is evident on Liberty's head and the eagle's right (facing) leg. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

- 4227 1875-S Type One Reverse MS63 PCGS Gold Shield.** Large S. Medium chestnut-gold, powder-blue, lilac, and stone-gray encompass this lustrous Select silver type coin. The slightly wavy surfaces are minimally abraded for the designated grade. The strike is good despite inexactness on Liberty's head and the right (facing) claw. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

- 4228 1875-S Type One Reverse MS63 PCGS.** Large S. Shades of golden-brown and lavender-gray toning blanket the lightly marked surfaces of this impressive Select specimen, with a typical strike that shows just a touch of softness on Liberty's head and some upper stars. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

- 4229 1875-S Type One Reverse MS64 NGC.** Large S. Despite a substantial mintage of 4.4 million pieces, the 1875-S Trade dollar is an elusive issue in grades above the MS64 level. This well-detailed, well-preserved Choice example offers lustrous, brilliant surfaces with outstanding eye appeal. NGC has graded 38 numerically finer examples (12/18).
From The Speechless Collection. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

- 4230 1875-S Type One Reverse MS64 PCGS.** Potent luster sweeps this well struck and minimally marked Choice silver type coin. A whisper of gold toning visits both sides. About 85% of 1875-S Trade dollars have a Type One reverse with a berry below the right (facing) claw. All such pieces have a Large S mintmark, though the Minute S mintmark is seen on a small minority of Type Two examples. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

- 4231 1876-CC Type Two Reverse — Cleaned — NGC Details. Unc.** Vivid shades of cobalt-blue, golden-brown, emerald-green, and slate-gray toning visit the lightly marked surfaces of this well-detailed Trade dollar, from a small branch mint production of 504,000 pieces. The surfaces have a slightly flat aspect, due to a previous cleaning. NGC ID# 4EML, PCGS# 40113 Base PCGS# 7042

- 4232 1876-S Type One Obverse, Type One Reverse, MS63 PCGS Gold Shield. CAC.** The usual variety, with a berry under the eagle's talons and the ribbon ends pointing to the left. This Select 1876-S Trade dollar is a pleasing type coin. Satiny luster cartwheels beneath a light, and the champagne-tinted surfaces do not show any severe abrasions. The CAC endorsement heightens the appeal. NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043

- 4233 1877-CC AU53 NGC.** An impressive AU53 example of this low-mintage branch mint issue, with some light wear on the well-detailed design elements and lightly abraded surfaces that retain much original mint luster. A few subtle hints of champagne-gold toning are evident on both sides. NGC ID# 253D, PCGS# 7045

- 4234 1877-S MS64 NGC.** Large S. The well-preserved surfaces of this attractive Choice example display a mix of vibrant satiny mint luster and prooflike reflectivity, under pleasing shades of sea-green and silver-gray toning. The design elements are well-detailed and eye appeal is outstanding. Certified in a circa-2000 holder. NGC has graded 32 numerically finer examples (12/18).
From The Speechless Collection. NGC ID# 253E, PCGS# 7046

- 4235 1878-CC — Scratch — PCGS Genuine. AU Details.** Two scratches on the obverse are mostly hidden in the seated figure of Liberty on this still lustrous, untoned AU Carson City Trade dollar. Just 97,000 were coined, and few of those survive today. This is an important opportunity for the Trade dollar enthusiast.

- 4236 1878-S MS64 PCGS Gold Shield.** Violet, gold, and pale blue toning appears on both sides of this impressive Choice Mint State Trade dollar, the last business strike issue of the design. With the passage of the Bland-Allison Act and the beginning of Morgan dollar coinage, the Mint was no longer concerned about production of Trade dollars. PCGS has certified only 49 finer examples (12/18). NGC ID# 253G, PCGS# 7048

PROOF TRADE DOLLARS

1879 Trade Dollar, PR64 Cameo Reflective Fields Beneath Pale Gold Patina

- 4237 1879 PR64 Cameo PCGS Gold Shield.** Trade dollars were struck in proof format only for the first time in 1879, one year after the denomination was abolished for commercial purposes. A total of 1,541 proofs constituted the entire production for the year. Pale golden patina fails to inhibit the overt Cameo contrast generated by the frosted motifs and reflective fields. Contact is trivial for the grade assessment. NGC ID# 27YR, PCGS# 87059

1880 Trade Dollar, PR64 Richly Toned, Proof-Only Issue

- 4238 1880 PR64 NGC.** This was the second year that Trade dollar production was restricted to proofs. A total of 1,987 pieces were minted. Contrast is limited on this near-Gem, but the fields still flash vibrantly under rich shades of violet, cobalt-blue, and peach-orange patina. Aesthetic appeal is impressive. NGC ID# 27YS, PCGS# 7060

1880 Trade Dollar, PR62 Cameo
Well Defined

- 4239 1880 PR62 Cameo PCGS. CAC.** Whispers of soft gold and violet patina are discernible only under magnification and the field-motif contrast confirms the Cameo designation. An above-average strike leaves strong definition on the design elements, including Liberty's head and the adjacent stars, areas that are often weak. Some wispy handling marks limit the grade but detract little from the pleasing overall eye appeal. NGC ID# 27YS, PCGS# 87060

- 4240 1881 — Questionable Color — PCGS Genuine Gold Shield. Unc Details.** An attractive specimen of this important proof-only issue, with razor-sharp definition on all design elements and only minor signs of contact in the deeply mirrored fields. Both sides are blanketed in dark shades of violet-blue toning.

1882 Trade Dollar, PR64 Cameo
Scarce, Proof-Only Issue

- 4241 1882 PR64 Cameo NGC.** From a proof-only mintage of 1,097 pieces, the 1882 Trade dollar is a challenging issue with a Cameo designation. The present coin is an attractive Choice example, with a full strike and brightly reflective fields. The dramatic field-device contrast is eye-catching. Census: 40 in 64 Cameo (2 in 64+, 1 in 64+★), 48 finer (12/18).
From The Speechless Collection. NGC ID# 27YU, PCGS# 87062

MORGAN DOLLARS

- 4242 1878 7/8TF 7/4 Strong, VAM-37, MS65 PCGS.** Strong detailing and frosty mint luster are attributes of this early Morgan dollar variety, in which four tailfeathers emerge from beneath the seven. The surfaces are smooth overall with a few grade-consistent marks that do not affect the eye appeal. Housed in an old green label holder. NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078

- 4243 1878 7/8TF 7/4 Strong, VAM-37, MS65 PCGS. CAC.** Light butter-gold toning visits this lustrous and nicely struck first-year Gem. Delightfully devoid of relevant marks. VAM-37 has a broken point on the right-side star 4 and a tine down from the fletchings. Certified in a green label holder. For all Strong 7/8TF die varieties, CAC: 49 in 65, 1 finer (12/18).
From The Speechless Collection. NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078

- 4244 1878 7TF Reverse of 1878, Doubled P, VAM-168, AU58 PCGS.** VAMworld states, "scarce in all grades, rare in AU, and unknown in BU." The pick-up point is strong die doubling on the P in PLURIBUS. 1878-dated Morgan dollars are the primary focus for many VAM specialists. This is a moderately prooflike near-Mint example with light tan-gold peripheral toning and a few unimportant abrasions. VAM-168 Population: 6 in 58, none finer (12/18).

Ex: FUN Signature (Heritage, 1/2011), lot 5834, which realized \$1,153.45. PCGS# 134046 Base PCGS# 7074

- 4245 1878 7TF Reverse of 1878 MS65 Prooflike NGC.** The parallel arrow fletching identifies the Reverse of 1878. This delightful Gem exhibits sharply detailed design elements and deeply reflective prooflike fields with only minor signs of contact. Census: 24 in 65 Prooflike, 4 finer (12/18). NGC ID# 253K, PCGS# 7075

- 4246 1878 7TF Reverse of 1879 MS65 PCGS.** This frosty Gem exhibits a sharp strike and brilliant silver luster with untuned surfaces. PCGS has certified a minimal quantity of 30 numerically finer examples (12/18). NGC ID# 253L, PCGS# 7076

- 4247 1878-CC MS65 PCGS Gold Shield.** The central design elements are thickly frosted on this Gem Carson City representative from the first year of Morgan dollar production. Strike detail is good, and a ring of faint golden patina surrounds brilliant, well-preserved surfaces. Thin roller marks appear on Liberty's chin. NGC ID# 253M, PCGS# 7080

- 4248 1878-CC MS65 PCGS.** A delightful first-year Gem Morgan dollar from the famous Carson City Mint, with sharply detailed design elements and well-preserved brilliant surfaces that radiate vibrant mint luster and outstanding eye appeal. NGC ID# 253M, PCGS# 7080

- 4249 1878-CC MS65 NGC.** An attractive first-year Morgan dollar from the Carson City Mint, with sharply detailed design elements and well-preserved brilliant surfaces that radiate vibrant mint luster throughout. Eye appeal is outstanding. NGC ID# 253M, PCGS# 7080

- 4250 1878-CC MS65 PCGS.** This spectacular Gem is sharply detailed in most areas but, like many examples of this issue, the eagle's claw lacks detail, possibly due to a clogged die. The well-preserved surfaces are lustrous and appealing, with highlights of lavender and pale gold toning. NGC ID# 253M, PCGS# 7080

1878-CC Morgan Dollar, MS66
Rarely Seen Finer

- 4251 1878-CC MS66 NGC.** From a first-year mintage of 2.2 million pieces, the 1878-CC Morgan dollar is still collectible in MS66 condition, but finer coins are condition rarities. This delightful Premium Gem exhibits sharply detailed design elements throughout. The well-preserved surfaces radiate vibrant mint luster, with a few highlights of lavender and speckles of silver-gray toning. NGC has graded nine numerically finer examples (12/18). NGC ID# 253M, PCGS# 7080

- 4252 1878-S MS66+ PCGS. CAC.** Diagonal roller marks appear across each side. This brilliant, partially prooflike dollar is strongly impressed with terrific visual appeal. The first-year 1878-S is collectible through Premium Gem, but examples are seldom found so nice. PCGS and CAC report 37 and 15 submissions finer, respectively (12/18). NGC ID# 253R, PCGS# 7082

4253 1879-CC XF45 NGC. A pleasing Choice XF specimen of this Carson City key, with some light wear on the well-detailed design elements and lightly abraded surfaces that show attractive highlights of lavender toning. NGC ID# 253U, PCGS# 7086

4254 1879-CC MS60 PCGS Genuine Gold Shield. Normal Mintmark. The 1889-CC and 1893-CC are the only two Carson City issues that prove more elusive in high grades than this second-year emission from a mintage of 756,000 coins. This lightly abraded MS62 example has slightly subdued mint frost, but central design detail is good. Lavender and peach-orange toning graces much of each side with splashes of brilliance on the obverse.

4255 1879-O MS65 PCGS Gold Shield. A superlative Gem, this 1879-O Morgan dollar exhibits a thin band of gold toning along the obverse border, with the reverse fully brilliant and untoned. Both sides are frosty and lustrous. PCGS has certified just 32 finer examples (12/18). NGC ID# 253X, PCGS# 7090

**1879-O Morgan Dollar, MS65+
Outstanding Quality for the Grade**

4256 1879-O MS65+ PCGS. CAC. The quality of this 1879-O Morgan dollar is absolutely outstanding for the assigned grade, and the additional Plus designation and green CAC approval sticker are well-earned. It is difficult to determine where this Gem lost the half point preventing a higher assessment. The obverse fields and cheek are remarkably unabraded. Only a reeding mark under the left (facing) wing is noticeable. Satiny luster cartwheels over brilliant, strongly defined surfaces with peripheral reddish-gold hues. PCGS reports 32 finer submissions, while CAC notes 80 pieces in this grade and only five finer (12/18). NGC ID# 253X, PCGS# 7090

4257 1879-S Reverse of 1878, VAM-9, MS63 PCGS Gold Shield. A Top 100 Variety. The ball of the 9 is repunched at the lower left, with engraved feathers on the right (facing) wing and the upper tailfeathers. This attractive Select specimen is sharply detailed, with lightly marked lustrous surfaces that show a few hints of pale gold toning. NGC ID# 253W, PCGS# 133858 Base PCGS# 7094

4258 1879-S Reverse of 1878, VAM-9, MS64 PCGS. A Top 100 Variety. A lovely example of this scarce variety that exhibits the 1878 reverse style with a flat-breasted eagle. This Choice Mint State piece has a few too many trivial marks to earn a finer Gem grade. Both sides are brilliant and untoned with frosty silver luster. PCGS has certified only 63 numerically finer examples (12/18). NGC ID# 253W, PCGS# 133858 Base PCGS# 7094

4259 1879-S Reverse of 1878, VAM-43, MS64 PCGS. A Top 100 Variety. This Choice Mint State Morgan dollar features brilliant silver surfaces with no evidence of toning on either side. The surfaces are pleasing with light field-to-device contrast. NGC ID# 253W, PCGS# 133864 Base PCGS# 7094

4260 11-Piece Lot of Morgan Dollars MS65 PCGS. The lot includes 1879-S, 1880-S, (3) 1881-S; 1882-S; 1885-O; 1887; (2) 1898-O; and a 1904-O. All coins are housed in old green label holders. (Total: 11 coins)

4261 1879-S MS67+★ NGC. Nearly a Prooflike coin, this Plus-graded, Star-designated Superb Gem 1879-S Morgan dollar displays modest cameo contrast and is beautifully preserved. Both sides are untuned and the strike is razor-sharp. Available in this grade, the 1879-S is scarce numerically finer. NGC ID# 253X, PCGS# 7092

4262 1879-S MS67+ PCGS Gold Shield. CAC. This Plus-graded Superb Gem exhibits razor-sharp definition on all design elements and the virtually flawless surfaces show a mix of vibrant mint luster and prooflike reflectivity in the fields. A vivid arc of sea-green toning enhances the lower obverse. NGC ID# 253X, PCGS# 7092

4263 1879-S MS67 Prooflike PCGS Gold Shield. CAC. A stunning Superb Gem Morgan dollar, with sharply detailed, richly frosted design elements that contrast boldly with the deeply reflective prooflike fields. The brilliant surfaces are virtually flawless. Population: 55 in 67 (5 in 67+) Prooflike, 3 finer. CAC: 21 in 67, 2 finer (12/18). NGC ID# 253X, PCGS# 7093

4264 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS. A Top 100 Variety. The last two digits in the date are punched over an undertype 79 and the parallel arrow flenching identifies the Reverse of 1878. This attractive Gem is well-detailed and well-preserved, with lustrous, lightly toned surfaces.

From The Speechless Collection. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

**1880-CC Dollar, MS66+
VAM-5, 8 Over High 7**

4265 1880-CC 8 Over High 7, VAM-5, MS66+ PCGS Gold Shield. CAC. A Top 100 Variety. The remains of a previously punched 7 are clear beneath the second 8 in the date. This magnificent Premium Gem is incredibly clean and attractive, well-deserving of the Plus designation and green CAC approval sticker. Frosty, untuned surfaces display bold central detail. The cheek is void of contact. Rare any finer. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

4266 1880-CC 8/7, Reverse of 1878, VAM-7, MS65 PCGS. Ex: GSA. A Hit List 40 Variety. Housed in a standard PCGS holder labeled GSA, this Gem features a reverse from a left-over die showing the flat-breasted eagle of 1878. This piece is frosty and fully lustrous with brilliant, untuned silver surfaces. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110

4267 1880-CC 8/7, Reverse of 1878, VAM-7A, MS65+ PCGS. A Hit List 40 Variety. The double-clashed die state of the popular VAM-7, one of two 1880-CC die marriages with an obsolete Second Reverse. Lustrous and crisply struck with delicate golden toning and generally smooth surfaces. One small mark noted above Liberty's eye. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110

4268 1880-CC MS66 PCGS Gold Shield. VAM-3. An impressive Premium Gem, this 1880-CC Morgan dollar has highly lustrous surfaces with brilliant mint frost on both sides. PCGS has only certified 36 in higher numeric grades (12/18). NGC ID# 2542, PCGS# 7100

4269 1880-CC MS65 Prooflike NGC. CAC. VAM-10. An attractive Gem Morgan dollar from the Carson City Mint, this coin exhibits sharply detailed design elements and reflective prooflike fields with only minor signs of contact. Certified in a prior generation holder. NGC has certified 21 numerically finer Prooflike specimens (12/18). NGC ID# 2542, PCGS# 7101

- 4270 1880/79-O MS63 Prooflike PCGS Gold Shield. VAM-4.** A Top 100 Variety. The remnants of an undertype 79 are visible beneath the final two digits in the date, identifying the popular VAM-4. This well-detailed Select specimen offers lightly marked surfaces with deeply reflective prooflike fields. Population: 20 in 63 (1 in 63+) Prooflike, 22 finer (12/18). NGC ID# 2544, PCGS# 7117
- 4271 1880-O MS64 PCGS Gold Shield. Micro O.** Dazzling luster, a crisp strike, and smooth fields confirm the quality. Brilliant save for a minute spot on the left reverse field. The '80-O is fairly plentiful in bagmarked Mint State, but Gems are surprisingly rare, and even Choice examples are desirable. NGC ID# 2543, PCGS# 7114
- 4272 1880-O Hangnail, VAM-48, MS64 PCGS.** A Top 100 Variety. Micro O. The "Hangnail" variety has a broad vertical die gouge through the leftmost tail feather. Lustrous and lightly toned with clean fields and minor portrait grazes. A mint-made edge flaw on the reverse at 2 o'clock may be of interest to the error specialist. Ex: *Central States Signature (Heritage, 4/2013)*, lot 4715, which realized \$1,410. NGC ID# 2543, PCGS# 133879 Base PCGS# 7114
- 4273 1880-S MS67+ PCGS. CAC. Medium S.** Moderate golden-brown toning visits the fields of this lustrous and virtually pristine Superb Gem. A brief, narrow streak of struck-in grease is at 7:30 on the reverse. A crisply struck and desirable Morgan type coin. *From The Five Generations of Eby Collection, Part II.* NGC ID# 2544, PCGS# 7118

**1880-S Dollar, MS68
Untoned and Unabraded**

- 4274 1880-S MS68 NGC. Medium S.** Brightly frosted and completely uninhibited mint luster coruscates over entirely untoned, silvery surfaces. The centers are essentially fully struck, and not a mark of note appears on either side of this Superb Gem 1880-S Morgan dollar type coin. The NGC insert is autographed by *Guide Book* editor Ken Bressett. NGC ID# 2544, PCGS# 7118

**1880-S Silver Dollar, MS68
Only Five Numerically Finer at NGC**

- 4275 1880-S MS68 NGC. Large S.** The 1880-S Morgan silver dollar is a plentiful issue in all grades, and it is an ideal candidate for a type collection. This piece is pristine, with brilliant and untoned silver surfaces. The strike is bold and the fields are slightly reflective. An extraordinary Superb Gem for the connoisseur. NGC and PCGS have each certified just five numerically finer examples (12/18). *From The Dr. Joseph A. Murphy Collection, Part II.* NGC ID# 2544, PCGS# 7118

- 4276 1880/9-S VAM-11, Medium S, MS66 Prooflike NGC.** A Hot-50 variety, per the NGC label, this Premium Gem has fully mirrored fields that contrast nicely with the lustrous devices. Both sides are brilliant and untoned. NGC ID# 2544, PCGS# 7123
- 4277 1880/9-S VAM-11, Medium S, MS67 PCGS Gold Shield.** A Hot 50 Variety. Some die fill in the upper right portion of the 0 in the date is the pick-up point for this popular VAM variety. A J-shaped die line on Liberty's neck confirms the attribution. This Superb Gem example displays a sharp strike and frosty devices. The fields are semiprooflike, and neither side has mentionable toning. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122
- 4278 1881-CC MS66 PCGS. CAC. VAM-2.** Dynamic cartwheel luster, a bold strike, and well-preserved fields are the calling cards of this low mintage and high grade Carson City dollar. The portrait displays only minor marks. VAM-2 has die fill within the upper loop of the second 8 in the date. Housed in a first generation "rattler" holder. *From The Dr. Joseph A. Murphy Collection, Part II.* NGC ID# 2549, PCGS# 7126
- 4279 1881-CC MS66 PCGS. CAC.** A spectacular Premium Gem representative of this low-mintage Carson City issue, with sharply detailed design elements and vibrant mint luster throughout. The lightly toned surfaces are impeccably preserved. Housed in a green label holder. NGC ID# 2549, PCGS# 7126
- 4280 1881-CC MS66+ PCGS Gold Shield. CAC. VAM-3.** A delightful Plus-graded Premium Gem from the famous Carson City Mint, with sharply detailed design elements and impeccably preserved surfaces that radiate vibrant mint luster throughout. Eye appeal is terrific. NGC ID# 2549, PCGS# 7126

**1881-CC Morgan Dollar, MS67
Pristine Lustrous Surfaces**

- 4281 1881-CC MS67 NGC. VAM-2.** The 1881-CC Morgan dollar is slightly scarce in MS67 condition, and finer coins are prime condition rarities. This spectacular Superb Gem exhibits sharply detailed design elements and virtually flawless surfaces, with vibrant mint luster on both sides. NGC has graded only four numerically finer examples (12/18). NGC ID# 2549, PCGS# 7126
- 4282 1881-CC MS64 Deep Mirror Prooflike PCGS Gold Shield. VAM-2.** An attractive Choice CC-mint dollar, with sharply detailed, frosty design elements that contrast boldly with the deeply reflective prooflike fields. The brilliant surfaces show only minor signs of contact and eye appeal is outstanding. NGC ID# 2547, PCGS# 97127
- 4283 1881-S MS67 PCGS Gold Shield.** The quintessential type coin of the Morgan silver dollar series, the 1881-S is plentiful, even in MS67 or finer grades. However, this Superb Gem exhibits rarely encountered rainbow toning over much of the obverse with delicate peripheral iridescence on the brilliant reverse. NGC ID# 2549, PCGS# 7130
- 4284 1881-S MS67 PCGS Gold Shield. CAC.** Vivid shades of golden-tan and violet toning blanket the obverse of this delightful Superb Gem, while the reverse remains essentially brilliant. Sharply detailed and impeccably preserved, with terrific eye appeal. NGC ID# 2549, PCGS# 7130

4285 1881-S MS67+★ NGC. A Plus-graded Superb Gem representative of this popular type issue, with sharply detailed design elements and vibrant mint luster throughout. Highlights of emerald-green and cobalt-blue toning enhance the impeccably preserved surfaces. The outstanding eye appeal is attested by the Star designation.
From The Five Generations of Eby Collection, Part II. NGC ID# 2549, PCGS# 7130

4286 1881-S MS67+ PCGS. CAC. The quintessential type coin for the Morgan dollar design, the 1881-S dollars were well produced and are always extremely attractive in high grades. This Superb Gem has frosty silver luster with full untuned brilliance. NGC ID# 2549, PCGS# 7130

**1881-S Dollar, MS68
Toned Obverse, Brilliant Reverse**

4287 1881-S MS68 PCGS Gold Shield. The obverse shows an array of colors that transition east to west from golden-orange and rose-violet to sea-green and powder-blue. The reverse remains almost entirely brilliant, save for blushes of thin patina mostly along the borders. This razor-sharp 1881-S Morgan dollar is in nearly pristine, as-struck condition. Two coins are graded finer at PCGS (12/18). NGC ID# 2549, PCGS# 7130

**1881-S Dollar, MS68
One Coin Finer at NGC**

4288 1881-S MS68 NGC. Like other early S-mint Morgan dollars, the 1881-S is collectible in grades as high as MS68. This sharp Superb Gem is expectedly pristine with a totally brilliant obverse and delicate peach-gold hues over the reverse. Cartwheel mint frost washes over each side. The NGC insert bears the signature of Guide Book authority Kenneth Bressett. NGC ID# 2549, PCGS# 7130

**1881-S Silver Dollar, MS68
A Flawless Beauty**

4289 1881-S MS68 NGC. A stunning Superb Gem, this 1881-S Morgan dollar exhibits brilliant silver luster at the centers, within a ring of peripheral gold, violet, and blue toning on the obverse, and delicate peripheral gold toning on the reverse. NGC and PCGS, combined, have certified just three examples of this issue in a finer numerical grade (12/18). NGC ID# 2549, PCGS# 7130

4290 1882 MS64 Deep Mirror Prooflike PCGS. CAC. Outstanding reflectivity with champagne border-toning deepening to peach on the reverse. Light frost over well-struck devices adds to the contrasted appearance of this near-Gem. PCGS has graded just 31 numerically finer Deep Mirror Prooflike pieces (12/18).
Ex: Central States Signature (Heritage, 4/2011), lot 5662; Chicago Signature (Heritage, 8/2011), lot 4521; ANA Signature (Heritage, 3/2016), lot 4223. NGC ID# 254A, PCGS# 97133

Ex: Central States Signature (Heritage, 4/2011), lot 5662; Chicago Signature (Heritage, 8/2011), lot 4521; ANA Signature (Heritage, 3/2016), lot 4223. NGC ID# 254A, PCGS# 97133

4291 1882-CC MS66+ PCGS Gold Shield. The 1882-CC Morgan dollar becomes scarce in grades above MS66. This Plus-graded Premium Gem exhibits sharply detailed design elements and vibrant mint luster, with virtually flawless brilliant surfaces. NGC ID# 254S, PCGS# 7134

4292 1882-CC MS66+ PCGS. CAC. An attractive, well-struck high-end Premium Gem example, this piece displays toning in several shades of green and tan on the obverse with faint gold toning on the brilliant reverse. NGC ID# 254S, PCGS# 7134

4293 1882-CC MS66 Prooflike PCGS. A spectacular Premium Gem from the famous Carson City Mint, with sharply detailed design elements and much prooflike reflectivity in the fields. No mentionable distractions are evident and eye appeal is terrific. PCGS has graded two numerically finer Prooflike specimens (12/18).
From The Five Generations of Eby Collection, Part II. NGC ID# 254B, PCGS# 7135

4294 1882-CC Clashed Die, VAM-2A, MS65+ Deep Mirror Prooflike PCGS. A Hit List variety, as noted on the PCGS holder. This lovely Carson City dollar has brilliant and untuned silver surfaces with fully and deeply mirrored fields behind the frosty and lustrous devices. PCGS# 413027 Base PCGS# 97135

**1882-O Morgan Dollar, MS66
Reflective Fields**

4295 1882-O MS66 PCGS Gold Shield. Although this piece carries no designation from PCGS, it deserves to be labeled as a Prooflike dollar, in our opinion. A hint of toning appears on Liberty's portrait, with the balance of this brilliant silver Premium Gem exhibiting no toning. The fields are reflective, and contrast with the lustrous devices. Population: 86 in 66 (9 in 66+), 7 finer (12/18). NGC ID# 254C, PCGS# 7136

**1882-O Morgan Dollar, MS65
Brilliant, Deep Mirror Prooflike**

4296 1882-O MS65 Deep Mirror Prooflike PCGS. Conditionally scarce in any format at the Gem grade, the 1882-O is rare with Deep Mirror Prooflike surfaces. This exceptional Gem combines mirrorlike fields with thickly frosted devices for standout contrast. Liberty's cheek is free of marks, while a few wispy field ticks visit both sides to define the assigned grade. Despite its New Orleans origin, the strike is sharp including over the ear, showing only a few light marks in the hair from the original planchet. Population: 29 in 65 Deep Mirror Prooflike, 1 finer (12/18). NGC ID# 254C, PCGS# 97137

4297 1882-O/S Flush, VAM-3, MS64 PCGS. A Top 100 Variety. Well struck for a New Orleans product, especially on the hair above the ear. This lustrous overmintmarked silver dollar displays rich golden-brown, lavender, and forest-green toning. Minor facial contact determines the grade. VAM-3 Population: 8 in 64, 0 finer (12/18). *Ex: Central States Signature (Heritage, 4/2014), lot 4727, which realized \$1,880.* NGC ID# 254D, PCGS# 133889 Base PCGS# 7138

4298 1882-O/S Recessed, VAM-4, MS64 NGC. A Top 100 Variety. Light tan toning graces this highly lustrous Choice dollar. The portrait and eagle display myriad minute die lumps, as coined from rusted dies. Incorrectly designated on the NGC holder as the "Flush" VAM-3 overmintmark variety. Both VAM-3 and VAM-4 are often certified as "O/S Strong," relative to the VAM-3 "O/S Weak" variety. NGC ID# 254D, PCGS# 133891 Base PCGS# 7138

4299 1882-O/S Recessed, VAM-4, MS64 NGC. A Top 100 Variety. The diagonal of the errant S is visible within the primary O mintmark on this variety. Faint die lines in Liberty's ear confirm the attribution. The current near-Gem example is brilliant and vibrantly lustrous. Although slight soft on the eagle's breast and the hair above Liberty's ear, the strike is generally above average for this New Orleans issue.

From The Dr. Joseph A. Murphy Collection, Part II. NGC ID# 254D, PCGS# 133891 Base PCGS# 7138

4300 1882-S MS67+ PCGS Gold Shield. CAC. A Plus-graded Superb Gem Morgan dollar that exhibits sharply detailed design elements and virtually flawless brilliant surfaces, with vibrant mint luster throughout. Overall eye appeal is terrific. NGC ID# 254F, PCGS# 7140

4301 1882-S MS67+ PCGS. CAC. This high-end Superb Gem exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces radiate vibrant mint luster throughout. Overall eye appeal is terrific. NGC ID# 254F, PCGS# 7140

4302 1883-O MS67 NGC. A frosty, lustrous Superb Gem 1883-O dollar, ideal for either the date or type collector. Both sides have brilliant silver interiors with attractive russet and blue toning along the borders. The preservation is spectacular. Housed in a prior generation holder and among the finest pieces certified at NGC. Census: 47 in 67 (4 in 67 ★), 0 finer (12/18).

Ex: FUN Signature (Heritage, 1/2007), lot 7021, which realized \$2,645.

From The Dr. Joseph A. Murphy Collection, Part II. NGC ID# 254J, PCGS# 7146

4303 1883-S MS62 PCGS. An impressive MS62 example of this popular S-mint issue, with sharply detailed design elements and lustrous surfaces that show the expected number of minor contact marks for the grade. Subtle highlights of lavender-gray and golden-tan toning visit both sides. NGC ID# 254K, PCGS# 7148

4304 1883-S MS62 NGC. An impressive MS62 example of this popular branch mint issue, with sharply detailed design elements and vibrant mint luster throughout. The brilliant surfaces show the expected number of minor contact marks for the grade. NGC ID# 254K, PCGS# 7148

4305 1883-S MS63 NGC. Pleasing shades of sea-green and lavender-gray toning visit the lightly marked surfaces of this attractive Select specimen. The design elements are sharply detailed and vibrant mint luster radiates from both sides. NGC ID# 254K, PCGS# 7148

4306 1883-S MS63 PCGS. The 1883-S is famously a better date in Uncirculated condition, and Choice-Gem examples are frequently out of reach for the budget-restricted collecting majority. This Select coin may be more obtainable. The strike is sharp, and each side yields vibrant cartwheel luster. Scattered light abrasions come along with the grade but are not severely obtrusive as they might be on lower-grade Uncirculated coins. NGC ID# 254K, PCGS# 7148

4307 1884-S AU58 NGC. While a trace of rub appears on the highest design points, this piece has full cartwheel luster that shines through its light gold toning. An important opportunity to acquire an 1884-S Morgan dollar that will fit nicely in a Mint State collection. NGC ID# 254P, PCGS# 7156

4308 1884-S AU58 PCGS Gold Shield. Speckled highlights of sea-green and lavender-gray toning enhance the lightly abraded surfaces of this attractive near-Mint specimen, with vibrant mint luster underneath. The design elements are well-detailed throughout. NGC ID# 254P, PCGS# 7156

4309 1884-S AU58 PCGS Gold Shield. CAC. The term "two beer" dollar was coined to explain a Morgan dollar that was used in commerce just long enough to buy two beers at the local watering hole. A trace of rub appears on the high points of this brilliant and lustrous example of the conditional key-date issue. NGC ID# 254P, PCGS# 7156

4310 1884-S AU58 PCGS. CAC. A scarce Morgan dollar in Mint State, the 1884-S top the want list for many collectors. This near-Uncirculated piece would fit well into a Mint State set at a fraction of the cost of an MS62 or MS63 coin. Essentially all of the luster remains on silver-white surfaces that show just a hint of rub on the high points.

Ex: Chicago Signature (Heritage, 8/2011), lot 4579, where it brought \$1,840. NGC ID# 254P, PCGS# 7156

4311 1885 MS67 NGC. The NGC label is hand signed by *Guide Book* editor Ken Bressett. This Superb Gem exhibits brilliant and frosty silver luster with untuned surfaces. The design motifs are typically sharp. NGC has only certified seven numerically finer examples of this issue. NGC ID# 254R, PCGS# 7158

4312 1885 MS67 NGC. A pristine 1885 Morgan dollar aside from a faint, curving graze in the left obverse field. This Superb Gem is brilliant and well-struck with outstanding eye appeal. NGC has seen only seven finer non-Prooflike examples (12/18).

From The Dr. Joseph A. Murphy Collection, Part II. NGC ID# 254R, PCGS# 7158

4313 1885 MS66 Deep Mirror Prooflike NGC. The Deep Mirror Prooflike surfaces of this P-mint Morgan dollar showcase thickly frosted, fully struck design elements surrounded by glassy, jet-black mirrors. Each side is wholly brilliant and carefully preserved. This Premium Gem would make a great addition to any specialized set. Census: 56 in 66 (2 in 66+ Deep Mirror Prooflike, 2 in 66 ★, 1 in 66+ ★)

From The Five Generations of Eby Collection, Part II. NGC ID# 45WM, PCGS# 97159

- 4314 1885-CC MS66 PCGS. VAM-3.** A lightly toned Premium Gem from the famous Carson City Mint, this coin exhibits sharply detailed design elements and well-preserved surfaces, with vibrant mint luster throughout. The low mintage 1885-CC is seldom seen any finer. NGC ID# 254S, PCGS# 7160
- 4315 1885-CC MS66+ PCGS Gold Shield. VAM-2A.** Orange-gold toning is significant on the obverse but has only a peripheral presence on the reverse. The lower obverse margin exhibits sea-green shades. Lustrous and well preserved with only minor central inexactness. VAM-2A is a "clashed N" variety with a portion of the N in UNUM apparent in front of Liberty's neck. NGC ID# 254S, PCGS# 7160
- 4316 1885-CC MS64 Deep Mirror Prooflike PCGS. VAM-3.** An increasingly popular CC-mint issue, here with deeply contrasting surfaces and a decent strike, despite the light roller marks appearing on the chin. Overall eye appeal is outstanding. Certified in a green-label holder. NGC ID# 254S, PCGS# 97161
- 4317 1885-CC MS64 Deep Mirror Prooflike NGC. VAM-3.** Dazzling field reflectivity and attractive peripheral peach patina combine for excellent eye appeal. The strike is fairly sharp, though the centers display faint roller marks, as made. Light grazes on Liberty's face and neck decide the grade. A popular, low mintage Carson City issue. NGC ID# 254S, PCGS# 97161
- 4318 1885-CC Doubled Dash, VAM-4, MS66 NGC.** A Hot 50 Variety. The variety is undesignated by NGC. A delightful Premium Gem representative of this low-mintage, branch mint issue, with sharply detailed design elements and impeccably preserved brilliant surfaces. Overall eye appeal is terrific. NGC ID# 254S, PCGS# 133999 Base PCGS# 7160
- 4319 1885-O MS67 PCGS. CAC.** An essentially brilliant example of this plentiful New Orleans issue, showing uncommonly frosty, vibrant mint luster and sharp design elements. There are almost no signs of contact. PCGS has graded two numerically finer examples (12/18). NGC ID# 254T, PCGS# 7162
- 4320 1885-O MS67 PCGS. CAC.** The top of the 5 is repunched. A brilliant Superb Gem with bright mint luster and a sharp strike. Nearly pristine aside from a tick on the reverse rim at 5 o'clock. Practically unobtainable any finer.
Ex: Orlando Signature (Heritage, 7/2013), lot 4263, which realized \$1,997.50. NGC ID# 254T, PCGS# 7162
- 4321 1885-O MS67 NGC. CAC.** The strike is uncommonly sharp for an '85-O, and the lustrous surfaces are beautifully undisturbed. Brilliant aside from light golden toning along the right reverse margin. NGC ID# 254T, PCGS# 7162
- 4322 1885-O MS67+ NGC. CAC.** This virtually untuned Superb Gem boasts booming luster and has uncommonly clean surfaces. The strike is good by the standards of the New Orleans Mint of the era. NGC has only certified 11 finer examples (12/18). NGC ID# 254T, PCGS# 7162
- 4323 1885-S MS65 PCGS Gold Shield.** Wisps of gold toning appear along part of the reverse border of this otherwise brilliant and untuned Morgan dollar that exhibits frosty mint luster and strong design details. NGC ID# 254U, PCGS# 7164
- 4324 1885-S MS65 PCGS.** This brilliant Gem Morgan dollar has full cartwheel luster and excellent design definition with frosty and untuned silver surfaces. PCGS has only certified 83 finer examples (12/18). NGC ID# 254U, PCGS# 7164
- 4325 1885-S MS65 PCGS Gold Shield. VAM-2.** The 5 is repunched north. The obverse is brilliant and prooflike. The reverse exhibits vivacious cartwheel luster, and displays pastel powder-blue and straw-gold patina. A nicely struck Gem that boasts impressive eye appeal. NGC ID# 254U, PCGS# 7164
- 4326 1885-S MS65 PCGS.** Well struck aside from the hair curl above the ear of Liberty. A lustrous and carefully preserved Gem that has a brilliant reverse and a blush of golden-brown color on Liberty's cap. A conditionally rare issue. PCGS has examined only 83 numerically finer examples (12/18).
From The Speechless Collection. NGC ID# 254U, PCGS# 7164
- 4327 1885-S MS65 NGC.** A few highlights of sea-green and magenta toning visit the peripheries of this impressive Gem Morgan dollar. The design elements are sharply detailed and the well-preserved surfaces radiate vibrant mint luster. NGC ID# 254U, PCGS# 7164
- 4328 1886 MS67+ PCGS. CAC.** A common date, but hardly available this fine. This Superb Gem 1886 Morgan showcases seemingly flawless, brilliant surfaces that are fully deserving of the coveted Plus designation. Satiny luster is uninhibited. Only 15 coins are numerically finer at PCGS (12/18). NGC ID# 254V, PCGS# 7166
- 4329 1886-O MS61 PCGS.** Although circulated examples are plentiful, the 1886-O Morgan dollar is a surprisingly elusive issue in higher Mint State grades. This impressive MS61 example exhibits well-detailed design elements and lustrous surfaces that show the expected number of minor contact marks for the grade. NGC ID# 254W, PCGS# 7168
- 4330 1886-O MS62 NGC.** A touch of the usual softness is evident on the hair above the ear, but the design elements of this attractive MS62 example are sharply detailed in other areas. The brilliant surfaces are lightly marked for the grade and radiate vibrant mint luster throughout. NGC ID# 254W, PCGS# 7168
- 4331 1886-O MS62 PCGS.** The 1886-O is an important condition rarity in the Morgan silver dollar series. More than 10 million coins were minted, but nearly all entered circulation, and few remained in the Treasury vaults during the early 1960s. This lovely piece has brilliant silver surfaces with frosty devices and reflective fields, bordering on a prooflike appearance. NGC ID# 254W, PCGS# 7168
- 4332 1886-O MS63 NGC.** Wispy gold toning appears on the obverse of this Select Mint State 1886-O Morgan dollar, a high-mintage condition rarity that is rarely seen in finer Mint State grades. Few marks are noted on the lustrous surfaces of this attractive piece. NGC has only certified 83 finer examples (12/18). NGC ID# 254W, PCGS# 7168
- 4333 1886-O MS63 PCGS Gold Shield.** Delicate gold toning is confined to the outer borders of this otherwise brilliant and untuned condition rarity. Trivial marks on both sides are inconsequential. NGC ID# 254W, PCGS# 7168

**1886-O Dollar, MS63+
All-Brilliant and Satiny**

- 4334 1886-O MS63+ NGC. CAC.** Of the 10.7 million Morgan dollars struck at the New Orleans Mint in 1886, a majority likely ended up being melted under the Pittman Act. A few million were released into circulation, while a few bags remained in storage. The 1886-O is surprisingly scarce any finer than this high-end Select coin. All-brilliant, satiny surfaces are typically struck with a single copper toning spot Liberty's cap and roller marks on the chin. Seldom offered with CAC approval. NGC ID# 254W, PCGS# 7168
- 4335 1886-S MS65 PCGS.** The 1886-S Morgan dollar is an elusive issue above the MS65 grade level. This well-detailed Gem exhibits well-preserved, lustrous surfaces, under shades of magenta and pale gold toning. Most of the color is on the obverse. Housed in a green label holder. NGC ID# 254X, PCGS# 7170

- 4336 1886-S/S VAM-2 MS65 PCGS.** A Top 100 Variety. The centers display slight inexactness of strike. Lustrous and close to brilliant with a clean cheek and a smooth reverse. The mintmark serifs are repunched. The variety is not indicated on the holder.
From The Speechless Collection. NGC ID# 254X, PCGS# 133906 Base PCGS# 7170
- 4337 1886-S/S VAM-2 MS65 PCGS.** A Top 100 Variety. Undesignated as such by PCGS, but this is the popular repunched mintmark variety. The early die state with chips inside the 6. Of course, any Gem 1886-S is desirable, since the low mintage issue is typically encountered in MS61 to MS63 grades. A lightly toned and thoroughly lustrous Gem with lightly abraded surfaces.
From The Speechless Collection. NGC ID# 254X, PCGS# 133906 Base PCGS# 7170
- 4338 1886-S/S VAM-2 MS65 PCGS.** A Top 100 Variety. The mintmark shows repunching near the serifs, easily seen on this attractive Mint State example. The surfaces are brilliant and highly lustrous with excellent preservation and minor central incompleteness of strike.
Ex: West Palm Beach Signature (Heritage, 7/2009), lot 906; Dallas Signature (Heritage, 10/2009), lot 991; Long Beach Signature (Heritage, 9/2014), lot 4743, which realized \$2,232.50. NGC ID# 254X, PCGS# 133906 Base PCGS# 7170
- 4339 1887/6 VAM-2 MS65 PCGS.** A Top 100 Variety. A wisp of butter-gold patina visits the left obverse margin, but the remainder of this lustrous overdated dollar is brilliant. The strike is bold, the fields are smooth, and the cheek shows only wispy post-strike contact. The curve of the bottom of a 6 bookends the base of the 7 to confirm the scarce *Guide Book* variety.
From The Speechless Collection. NGC ID# 2552, PCGS# 133908 Base PCGS# 7174
- 4340 1887/6-O VAM-3 MS63 PCGS.** A Top 100 Variety. A whisper of gold toning accompanies lustrous and moderately marked surfaces. On its own, the reverse has the appearance of a higher grade. The centers show softness of strike, usual for the variety. The 1887/6-O was first reported in February 1973, 15 months after the November 1971 discovery of its Philadelphia cousin, the 1887/6. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178
- 4341 1887/6-O VAM-3 MS63 PCGS Gold Shield.** A Top 100 Variety. The curve of the base of a 6 appears near the bottom of the 7. A lovely Select example, this coin displays lustrous, lightly toned surfaces. The design elements exhibit a touch of the usual softness on the centers. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178
- 4342 1887/6-O VAM-3 MS63 PCGS.** A Top 100 Variety. A lightly toned and thoroughly lustrous Select example of the elusive New Orleans overdate. The centers show softness usual for the variety. The underdigit closely resembles its Philadelphia counterpart, evident as a slender curve east of the base of the 7.
Ex: Long Beach Signature (Heritage, 9/2007), lot 2551, which realized \$1,725. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178
- 4343 1887-O MS65 PCGS Gold Shield.** This brilliant Gem, while showing slight weakness over Liberty's ear, is sharper than usual for a New Orleans issue, with lustrous, untuned silver surfaces that exhibit light field-to-device contrast and nearly qualifies as prooflike. PCGS has certified only 15 numerically finer examples (12/18). NGC ID# 2547, PCGS# 7176
- 4344 1887-O MS65 PCGS.** A tinge of gold appears along the right reverse border, while this Gem is otherwise brilliant and untuned with impressive mint frost. Aside from merging of a few hair strands over Liberty's ear, the design definition is sharp. PCGS has certified just 15 numerically finer examples (12/18).
From The Speechless Collection. NGC ID# 2547, PCGS# 7176
- 4345 1887-O MS65 NGC.** This impressive Gem exhibits a sharp strike for a New Orleans issue, with just a touch of the usual blending on the hair above the ear. The brilliant surfaces are well-preserved and lustrous. Census: 83 in 65 (2 in 65+, 1 in 65 ★), 4 finer (12/18). NGC ID# 2547, PCGS# 7176
- 4346 1887-O MS65 PCGS.** This satiny Gem shows a clean cheek and well-defined design elements. The 1887-O is challenging in this grade, and PCGS has seen only 15 numerically finer coins (12/18). This example is essentially brilliant. NGC ID# 2547, PCGS# 7176
- 4347 1887-S MS65 PCGS.** A whisper of olive toning visits this lustrous and well struck Gem. The fields are clean and the portrait displays only minor marks. Only a scant percentage of Uncirculated examples are comparable in quality with the present piece. Housed in a green label holder. PCGS has graded 34 numerically finer examples (12/18).
Ex: Chicago Signature (Heritage, 8/2014), lot 4778, realized \$2,115. NGC ID# 2554, PCGS# 7180
- 4348 1887-S MS64 Prooflike PCGS Gold Shield.** This impressive Choice Morgan dollar exhibits sharply detailed design elements and lightly marked surfaces that include deeply reflective prooflike fields. Population: 41 in 64 (1 in 64+) Prooflike, 0 finer (12/18). NGC ID# 2554, PCGS# 7181
- 4349 1887-S MS62 Deep Mirror Prooflike PCGS.** An impressive example for the grade, this brilliant and untuned Morgan dollar has fully mirrored fields that frame its satiny silver devices. Population: 21 in 62 Deep Mirror Prooflike, 53 finer (12/18). NGC ID# 2554, PCGS# 97181
- 4350 1887-S/S VAM-2 MS65 PCGS.** A Top 100 Variety, showing the mintmark repunched within the loops of the S. The 1887-S Morgan is scarcely seen finer than MS65. This Gem example displays bold definition and satiny luster. Orange-gold, violet, and ocean-blue toning surrounds the obverse periphery and blankets the entire reverse. Population: 15 in 65 (1 in 65+), 1 finer (12/18).
Ex: Dallas ANA Signature (Heritage, 3/2016), lot 4279, which realized \$1,645. NGC ID# 2554, PCGS# 133915 Base PCGS# 7180
- 4351 1888-O MS66 PCGS Gold Shield.** A top-grade Premium Gem, this Registry Set candidate displays sharp design elements and frosty, radiant cartwheel luster. The coin is brilliant aside from a short crescent of deep green and lilac-russet toning along the lower-left obverse and upper-left reverse rims. No distracting abrasions are seen. NGC ID# 2556, PCGS# 7184
- 4352 1888-S MS65 PCGS.** A lower mintage issue, the 1888-S carries a premium in all grades. Most Uncirculated examples grade MS61 to MS64. This essentially brilliant Gem has booming luster and a good strike. Mentionable contact is limited to the arrowheads and nearby claw. Certified in an old green label holder.
From The Speechless Collection. NGC ID# 2557, PCGS# 7186
- 4353 1888-S MS65 PCGS.** Frosty, lustrous, and generally untuned save for a single spot on the eagle's right wing and a touch of green-gold "edging." A well-preserved Gem, softly struck over Liberty's ear but without serious abrasions. NGC ID# 2557, PCGS# 7186
- 4354 1889-CC VF30 PCGS.** Golden-brown and steel-blue toning reside on the surfaces of this Choice VF 1889-CC Morgan dollar that has hidden hairlines and marks beneath the toning as expected for an example at this grade level. An important opportunity to acquire the key Carson City issue. NGC ID# 2559, PCGS# 7190
- 4355 1889-CC XF40 NGC.** A lightly circulated example of this Carson City key with deep golden-russet and gray patina over each side. Scattered abrasions accompany light wear, and remnants of luster are faint. A pleasing collector coin. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, XF45
Challenging Series Key

- 4356 1889-CC XF45 PCGS.** The Carson City Mint got a late start on coinage operations in 1889, as the facility only reopened in October of that year. A small mintage of 350,000 Morgan dollars was accomplished by the end of the year, but few examples were saved for numismatic purposes or held in government storage for future release. Accordingly, the 1889-CC is the most challenging issue of the CC-mint series today. This lightly worn, lightly abraded example retains traces of original mint luster and exhibits highlights of lavender-gray and golden-tan toning. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, XF45
Desirable CC-Mint Issue

- 4357 1889-CC XF45 NGC.** The 1889-CC Morgan dollar is the acknowledged key to the Carson City series, from a low mintage of 350,000 pieces. This pleasing Choice XF specimen shows only light wear on the well-detailed design elements and the lightly abraded surfaces retain traces of original mint luster. A few hints of lavender toning add to the attractive presentation. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, XF45
The Key Carson City Issue

- 4358 1889-CC XF45 NGC. CAC.** The mintage was small — just 350,000 pieces — and most survivors have visited one or more of the grading services, inflating the certified population numbers beyond expected levels for such a rare issue. Original silver-gray color and minimally marked surfaces set this Choice XF example apart from other 1889-CC silver dollars. CAC endorsement confirms the surface quality and eye appeal. NGC ID# 2559, PCGS# 7190

1889-O Silver Dollar, MS65
Above Average Strike

- 4359 1889-O MS65 PCGS Gold Shield.** A few hairstrands over Liberty's ear are poorly defined, but the strike is above average for this issue. Both sides have frosty silver luster and no hint of toning. This is an exceptional example of the 1889-O Morgan silver dollar. PCGS has only certified 13 numerically finer examples (12/18). NGC ID# 255A, PCGS# 7192

- 4360 1889-S MS65 PCGS.** Only 700,000 1889-S Morgan dollars were struck. The typical certified example grades just shy of MS61. This well-struck Gem enjoys clean fields and thick frost over brilliant surfaces. Faint roller marks (as made) appear on the chin. *From The Speechless Collection.* NGC ID# 255B, PCGS# 7194

- 4361 1889-S MS65 PCGS.** This spectacular Gem Morgan dollar exhibits sharply detailed design elements in most areas, with just the slightest trace of blending on the hair above the ear. Vibrant mint luster radiates from the virtually flawless surfaces. NGC ID# 255B, PCGS# 7194

1890-CC Morgan Dollar, MS65
Rare Issue in Finer Grades

- 4362 1890-CC MS65 PCGS.** The 1890-CC Morgan dollar is still collectible at the MS65 grade level, but finer coins are rare. This impressive Gem offers sharply detailed design elements, with some spidery peripheral die cracks on both sides. The well-preserved, lustrous surfaces show delicate highlights of golden-tan and lavender toning. PCGS has graded 17 numerically finer examples (12/18). NGC ID# 255D, PCGS# 7198

**1890-CC Dollar, Frosty Gem
Rarely Seen Finer**

- 4363 1890-CC MS65 PCGS. CAC.** A heavy crack runs through the bottom of the date, the tip of Liberty's bust, and the first star. Others are seen throughout the reverse. Both sides are fully struck and wholly brilliant, awash in thick mint frost typical of the popular Carson City Mint. The population of 1890-CC dollars declines markedly in grades higher than this CAC-approved Gem. For example, PCGS has only certified 17 finer submissions out of the 14,090 coins it has encountered (12/18).
From The Speechless Collection. NGC ID# 255D, PCGS# 7198

**1890-CC VAM-4 Dollar, MS64
Top 100 'Tail Bar' Variety**

- 4364 1890-CC Tail Bar, VAM-4, MS64 PCGS.** A Top 100 Variety. The broad vertical die scratch below the fletchings allows attribution of VAM-4 at arm's length. A brilliant and lustrous Choice Carson City dollar with smooth fields and a good strike. The cheek displays grazes corresponding to the grade. A famous die variety within a better CC-Mint issue. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

**1890-CC Morgan Dollar, MS64
Popular Tail Bar Variety, VAM-4**

- 4365 1890-CC Tail Bar, VAM-4, MS64 PCGS.** A Top 100 Variety. A wide die line caused by a gouge in the working die connects the wreath to the intersection of the fletchings and tail feathers. This essentially brilliant example is one of the finer '90-CC Tail Bar Dollars we have seen, with sharply detailed design elements and vibrant mint luster throughout. Population: 88 in 64 (4 in 64+), 5 finer (12/18).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 10139, realized \$6,670. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

- 4366 1890-O MS65 Prooflike PCGS.** The mirrored fields and frosty devices provide attractive cameo contrast. This is a brilliant Gem whose surfaces exhibit an uncommon lack of abrasions for this O-mint issue. Well-struck motifs further enhance the eye appeal. Population: 37 in 65 (2 in 65+) Prooflike, 3 finer (12/18).
Ex: Central States Signature (Heritage, 5/2005), lot 9739.
From The Five Generations of Eby Collection, Part II. NGC ID# 2XU9, PCGS# 7201

- 4367 1890-S MS66 PCGS.** This frosty Premium Gem 1890-S Morgan offers rolling cartwheel luster amid top-notch preservation and excellent eye appeal. The surfaces are largely untuned. A coin that would not easily be improved upon, boasting a great strike. NGC ID# 255F, PCGS# 7202

- 4368 1891 MS65 PCGS.** *Ex: Jack Lee 2.* The 1891 Morgan dollar is virtually unobtainable in grades above MS65. This delightful Gem is sharply detailed and well-preserved, with vibrant mint luster and outstanding eye appeal. PCGS has graded three numerically finer examples (12/18).
From The Speechless Collection. NGC ID# 255G, PCGS# 7204

- 4369 1891-CC MS64 PCGS. CAC. VAM-2.** Light straw-gold toning visits the reverse border, but this lustrous Carson City dollar is mostly brilliant. The fields are remarkably smooth, and the portrait shows only delicate contact. The strike is good though shy of complete. Encapsulated in an old green label holder. NGC ID# 255H, PCGS# 7206

- 4370 1891-CC MS64+ PCGS Gold Shield. CAC.** This Plus-graded Choice Morgan dollar exhibits sharply detailed design elements and well-preserved, brilliant surfaces that radiate vibrant mint luster on both sides. Overall visual appeal is outstanding. NGC ID# 255H, PCGS# 7206

- 4371 1891-CC MS65 ANACS.** Once upon a time, back in the 1970s, quality like this was assigned the special term of semi-prooflike, meaning it has reflective surfaces that are lightly mirrored. Both sides are brilliant with a hint of cameo contrast between the satiny fields and frosty devices. NGC ID# 255H, PCGS# 7206

**1891-CC Morgan Dollar, MS65
Vivid Obverse Toning**

- 4372 1891-CC MS65 PCGS. CAC.** Vivid shades of violet and sea-green toning visit the well-preserved surfaces of this attractive Gem, with most of the color on the obverse. Vibrant mint luster shines through the patina. The design elements are well-detailed, with just a touch of the usual softness on the hair above the ear. PCGS has graded 42 numerically finer examples (12/18). NGC ID# 255H, PCGS# 7206

1891-O Silver Dollar, MS65
None Numerically Finer at PCGS

- 4373 1891-O MS65 PCGS Gold Shield.** This important Gem 1891-O Morgan dollar has brilliant, frosty, and untuned silver surfaces with extraordinary eye appeal due to the full cartwheel luster. The strike is typical, with weak hair detail over Liberty's ear. All other design elements are sharp. This piece is tied for the finest that PCGS has certified, with only three numerically finer (12/18). NGC ID# 255J, PCGS# 7208

1891-S Dollar, MS66
Thin Veil of Lavender Patina

- 4374 1891-S MS66 PCGS Gold Shield.** From a mintage of 5.2 million coins, the 1891-S dollar is plentiful in circulated grades through MS64. Gems are slightly more difficult to locate, but the issue only becomes scarce at this level. A thin veil of lavender patina blankets bright, frosty surfaces that are surprisingly unabraded for the issue. Well-struck, with merely eight pieces finer at PCGS (12/18). NGC ID# 255K, PCGS# 7210

1891-S Dollar, Dazzling MS66
'A Morgan Dollar as a Morgan Dollar Should Be'

- 4375 1891-S MS66 PCGS.** The 1891-S has long been a collector favorite. Its appeal was best summed up by Dave Bowers: " ... a Morgan dollar as a Morgan dollar should be." Meaning, swirling cartwheel mint luster, a full strike, and relative ease in finding a coin without burdensome production problems. Coins in MS66 are somewhat scarce, but still obtainable. Just the faintest hint of peripheral color can be found; otherwise the surfaces are brilliant. NGC ID# 255K, PCGS# 7210

- 4376 1892 MS64 PCGS.** An impressive Choice example of this popular date, with well-detailed design elements that show a touch of the usual softness on the hair above the ear. The lightly marked surfaces are lustrous and lightly toned. NGC ID# 255L, PCGS# 7212

Gem 1892 Silver Dollar

- 4377 1892 MS65 PCGS Gold Shield.** This Gem 1892 Morgan dollar has frosty silver luster and full brilliance with splashes of delicate blue and magenta toning. The strike is good, though slightly incomplete on the hair above the ear. PCGS has certified only nine finer examples of this issue (12/18). NGC ID# 255L, PCGS# 7212

1892 Morgan Dollar, Smooth MS65

- 4378 1892 MS65 PCGS.** The 1892 was generally kept out of circulation, explaining its former status as a rarity in the series. Bags were released during the middle part of the 20th century, but the issue remains scarce at the Gem level and is essentially unobtainable in higher grades. Smooth, frosty surfaces are brilliant with a hint of reddish-gold color near the left-hand stars. The centers show minor softness, as often encountered. PCGS reports nine numerically finer submissions (12/18). NGC ID# 255L, PCGS# 7212

1892 Morgan Dollar, MS65
Prime Condition Rarity in Finer Grades

- 4379 1892 MS65 PCGS.** A smallish mintage of just over 1 million Morgan dollars was accomplished at the Philadelphia Mint in 1892. Unfortunately, the issue was not well-produced and most Uncirculated examples seen today are in the lower ranges of Mint State, often with striking problems. This attractive Gem exhibits well-detailed design elements, with just a trace of blending on the hair strands above the ear. The impeccably preserved surfaces are lustrous and appealing. PCGS has graded nine numerically finer examples (12/18).
From The Speechless Collection. NGC ID# 255L, PCGS# 7212

**1892 Morgan Dollar, MS65
Seldom Seen Any Finer**

4380 1892 MS65 PCGS. From a mintage of just over 1 million pieces, the 1892 Morgan dollar is a better date, especially in high grade. This impressive Gem exhibits well-detailed design elements, with just the slightest blending in the hair strands above Liberty's ear. The well-preserved surfaces radiate vibrant mint luster and eye appeal is outstanding. PCGS has graded nine numerically finer examples (12/18). NGC ID# 255L, PCGS# 7212

4381 1892-CC MS61 NGC. While a several bags of 1892-CC dollars were distributed in the mid-1950s, the issue was not included in the GSA sales of the early 1970s. Only LaVeré Redfield's holdings supplied a substantial number of coins later in that decade. This is a brilliant example, with only a few bagmarks for the assigned grade. The strike is sharper than often seen, with a bit of central weakness but crisp detail throughout most of the devices. NGC ID# 255M, PCGS# 7214

4382 1892-CC MS62 PCGS Gold Shield. Most Mint State 1892-CC dollars were released during the 1940s and 1950s. This MS62 representative displays frosty and well-struck central devices against lustrous fields that show blushes of thin toning around the peripheral elements. Minor bagmarks are scattered over each side. NGC ID# 255M, PCGS# 7214

4383 1892-CC MS62 NGC. VAM-10. A misplaced date variety with the "top of [a] 9 or 2 showing in denticles ... between 9 and 2" per VAMworld.com. Double clashed, but not the triple-clashed VAM-10A. An essentially brilliant better-date Carson City dollar with a bold strike and minimal marks for the third-party grade. NGC ID# 255M, PCGS# 7214

4384 1892-CC MS62 PCGS. Radiant, frosty mint luster cartwheels freely around this eye-catching 1892-CC dollar. Moderate abrasions limit the grade, and there is considerable strike weakness in the centers. The 1892-CC is challenging to find well-struck. NGC ID# 255M, PCGS# 7214

4385 1892-CC MS62 PCGS. VAM-4A. Splashes of golden-brown and navy-blue toning enrich the borders of this lustrous and pleasing Carson City dollar. The fields are smooth, and the cheek displays only the expected quantity of delicate marks. A better issue that was mostly absent from the GSA auctions. NGC ID# 255M, PCGS# 7214

4386 1892-CC MS63 PCGS Gold Shield. VAM-4B. A virtually brilliant scarcer date Carson City dollar. The surfaces are lustrous and display no more than the expected number of minor marks. The centers lack a full strike, though other areas are bold. VAM-4B has a repunched mintmark and multiple sets of clash marks. NGC ID# 255M, PCGS# 7214

4387 1892-CC MS63 NGC. VAM-10A. The triple-clashed subvariety of the misplaced date VAM-10. Peach-red patina graces the UM in UNUM, but this lustrous and well struck silver dollar is mostly white. The fields are smooth, and the cheek displays only wispy marks. A scarcer Carson City Morgan issue. NGC ID# 255M, PCGS# 7214

4388 1892-CC MS63 PCGS Gold Shield. Faint traces of gold toning appear on the obverse of this Select Mint State Carson City Morgan dollar that has a brilliant and untuned reverse with excellent design definition. NGC ID# 255M, PCGS# 7214

4389 1892-CC MS63 NGC. Frosty, original mint luster cartwheels freely around minimally abraded surfaces on this Select 1892-CC Morgan dollar. The interiors are brilliant, while small tinges of copper-gold toning appear around the outer peripheries. Eye appeal is outstanding for the grade. NGC ID# 255M, PCGS# 7214

4390 1892-CC MS63 NGC. Variegated shades of lavender-gray and pale gold toning blanket the lightly marked surfaces of this impressive Select specimen. The design elements are sharply detailed and satiny luster shows beneath the patina. NGC ID# 255M, PCGS# 7214

4391 1892-CC MS63+ NGC. VAM-8. One year prior to shutting its doors for good, the Carson City Mint accomplished a production of 1.3 million Morgan dollars, examples of which grade AU55 on average. This Select coin is far better than what is usually encountered. The lightly toned surfaces are smooth aside from a field graze near the M in UNUM. The centers display faint roller marks, as struck.
Ex: FUN Signature (Heritage, 1/2017), lot 5161, which realized \$2,056.25. NGC ID# 255M, PCGS# 7214

4392 1892-CC MS63 PCGS. CAC. VAM-8. Golden-brown toning graces the borders of this attractive better-date Carson City dollar. The lustrous surfaces exhibit smooth fields and only wispy contact on Liberty's cheek and neck. Housed in a green label holder. NGC ID# 255M, PCGS# 7214

4393 1892-CC MS64 PCGS. Although it was not distributed during the GSA release of the 1970s, the 1892-CC remains available through MS64. Gems are elusive. Each side is brilliant and frosty with strong central definition. Minor chatter is in line with the grade. NGC ID# 255M, PCGS# 7214

4394 1892-CC MS64 PCGS Gold Shield. VAM-8A. Hints of straw-gold patina visit this lustrous and well struck Choice Carson City Morgan dollar. The portrait shows unimportant grazes, and the remainder of the coin is practically pristine. VAM-8A is a "Clashed N" variety also interesting for its die break within the 2 in the date. NGC ID# 255M, PCGS# 7214

4395 1892-CC MS64 PCGS Gold Shield. VAM-8A. A whisper of golden patina accompanies lustrous and lightly abraded near-Mint Morgan dollar. The hair above the ear shows softness, though peripheral elements are well struck. The 1892-CC is a better Carson City issue, and VAM-8A is a better die variety due to a clashed letter N in front of Liberty's neck. NGC ID# 255M, PCGS# 7214

4396 1892-CC MS64 PCGS. An attractive Choice specimen of this popular Carson City issue, with sharply detailed, frosty design elements and lightly marked, brilliant surfaces. Vibrant mint luster adds to the outstanding visual appeal. NGC ID# 255M, PCGS# 7214

4397 1892-CC MS64 PCGS. From a mintage of 1.3 million pieces, the 1892-CC Morgan dollar is readily collectible at the MS64 grade level. This impressive Choice example exhibits sharply detailed design elements throughout and the lightly marked surfaces radiate vibrant mint luster from both sides. A few subtle hints of golden-tan toning add to the considerable eye appeal. NGC ID# 255M, PCGS# 7214

4398 1892-CC MS64 PCGS. Splashes of gold toning appear at the central obverse on this brilliant and otherwise untuned Choice Mint State 1892-CC Morgan silver dollar. Slight weakness is noted over Liberty's ear as usual for this issue. NGC ID# 255M, PCGS# 7214

4399 1892-CC MS64+ NGC. Vivid shades of sea-green, lavender-gray, and magenta toning blanket the well-preserved surfaces of this Plus-graded Choice example, with vibrant mint luster and sharply detailed design elements underneath. NGC ID# 255M, PCGS# 7214

**1892-O Morgan Dollar, MS65
Famous Series Strike Rarity**

- 4400 1892-O MS65 PCGS.** Brilliant and frosted surfaces display bright cartwheel luster with a tinge of gold at the rims, while the Gem surfaces of this high-end 1892-O are smooth with just a few microscopic ticks. As always with the 1892-O, the strike is the real determinant of quality, and this piece passes with flying colors. Just a few strands over the ear lack definition, and the eagle's breast is as sharp as can be for the issue. PCGS has certified just eight finer examples (12/18).

From The Speechless Collection. NGC ID# 255N, PCGS# 7216

**1892-O Morgan Dollar, MS65
Conditionally Elusive**

- 4401 1892-O MS65 PCGS.** Untoned with noteworthy cartwheel luster in the fields, this shimmering Gem possesses an unusually high degree of eye appeal. Only the most trivial of contact marks are evident on either side. A flashy Gem example of this conditionally scarce New Orleans date, showing the inevitable softness of detail in the centers which Wayne Miller makes note of in his *Morgan and Peace Dollar Textbook*. PCGS has graded only five pieces eight finer (12/18).

From The Dr. Joseph A. Murphy Collection, Part II. NGC ID# 255N, PCGS# 7216

- 4402 1892-S AU50 NGC.** Luster remains in the fields of this About Uncirculated 1892-S dollar, complementing well-detailed design elements that show only slight high-point wear. The surfaces are smooth and appealing with virtually no toning. In Mint State, the 1892-S Morgan is one of the rarest dates in the series, but AU coins remain accessible for collectors. NGC ID# 255P, PCGS# 7218

- 4403 1892-S AU53 PCGS.** An important opportunity for the Morgan dollar collector to acquire an attractive, still lustrous example of this important issue. Trivial splashes of gold toning appear on the brilliant silver surfaces. NGC ID# 255P, PCGS# 7218

- 4404 1893 MS63 PCGS. VAM-3.** A hint of tan toning on Liberty's chin precludes full brilliance, but this Select silver dollar is lustrous and without any objectionable marks. The 1893 ranks among the lowest mintage Philadelphia Morgan issues, and is much rarer in Uncirculated grades than the 1899. NGC ID# 255R, PCGS# 7220

- 4405 1893 MS63 PCGS. VAM-3.** A blush of tan-gold toning crosses Liberty's hair, but this lustrous Select silver dollar is mostly brilliant. Smooth surfaces and a good strike testify to the quality. Upon cursory inspection, the coin appears to merit an even higher grade, though careful rotation reveals a few delicate slide marks on the cheek. Among the lowest mintage Philly issues. NGC ID# 255R, PCGS# 7220

- 4406 1893 MS64 PCGS Gold Shield. VAM-3.** The peak of the 3 is repunched, and the reverse displays minor die doubling near 9 o'clock. Light almond-gold patina precludes full brilliance, but potent luster and uncommonly smooth surfaces confirm the quality. The strike is good though shy of complete. A scarce low mintage issue. NGC ID# 255R, PCGS# 7220

- 4407 1893 MS64 PCGS.** A lack of severe abrasions complements the satiny, golden-toned surfaces of this Choice 1893 Morgan dollar. The strike is bold, and the eye appeal is pleasing. Boasting a mintage of 378,000 pieces, this semikey Philadelphia issue is seldom seen finer. NGC ID# 255R, PCGS# 7220

**1893 Dollar, Lustrous MS65
Low-Mintage Philadelphia Issue**

- 4408 1893 MS65 PCGS.** A Gem example of this scarce and popular, low-mintage dollar. This piece has bright, sparkling mint luster that races around the coin as it is tilted beneath a light. Brilliant throughout with a strong strike on each side. There are no mentionable abrasions on either side, just a few light luster grazes on the obverse.

Ex: Long Beach Signature (Heritage, 6/2001), lot 6556, where it realized \$4,945.

From The Speechless Collection. NGC ID# 255R, PCGS# 7220

**1893 Morgan Dollar, MS65
Conditionally Rare Any Finer**

- 4409 1893 MS65 PCGS.** From a small Philadelphia Mint production of 389,000 pieces, the 1893 Morgan dollar is extremely rare in grades above the MS65 level. This attractive Gem displays sharply detailed design elements and lustrous, well-preserved surfaces. A small scrape above the arrow heads is the only mark of note. PCGS has graded only six numerically finer examples (12/18). NGC ID# 255R, PCGS# 7220

**1893-CC Dollar, AU53
Slightly Prooflike Surfaces**

4410 1893-CC AU53 PCGS. CAC. Aside from a few short marks on Liberty's cheek and chin, this final-year Carson City dollar has excellent surfaces with considerable silver luster. The surfaces are brilliant and untoned, with a trace of high-point wear that prevents a finer grade. Both sides have faint field reflectivity and the overall presentation is most attractive. NGC ID# 255S, PCGS# 7222

4411 1893-O AU55 PCGS Gold Shield. Vivid shades of lavender-gray and pale jade toning blanket the lightly abraded surfaces of this impressive Choice AU specimen, with traces of mint luster underneath. Only light wear shows on the high points of the design elements. NGC ID# 255T, PCGS# 7224

4412 1893-O AU58 PCGS. A trace of rub appears on the high points of this brilliant and untoned Morgan dollar. The strike is typical for the New Orleans Mint with weakness evident over Liberty's ear. NGC ID# 255T, PCGS# 7224

**1893-S Morgan Dollar, VG10
Business-Strike Series Key**

4413 1893-S VG10 NGC. The 1893-S Morgan dollar is the low-mintage key to the series, from a meager production total of 100,000 pieces. This impressive VG10 example shows considerable wear on the design elements, but all lettering and the date remain clearly legible. Much interior detail in the eagle's wings remains intact. The surfaces are lightly abraded, under shades of pale pink toning. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Fine Details

4414 1893-S — Cleaned — PCGS Genuine Gold Shield. Fine Details. VAM-1. Chestnut-gold and silver-gray toning embraces this hairlined and moderately glossy representative. Dull marks are noted near Liberty's eye. At least three-quarters of the wing feathers are distinct. The '93-S is the rarest business issue of the Morgan dollar series, and survivors are coveted from the mintage of 100,000 pieces.

1893-S Morgan Dollar, VF Details

4415 1893-S — Cleaned — NGC Details. VF. Although NGC notes that this coin has been cleaned, and underlying evidence is visible, both sides exhibit pleasing pewter-gray surfaces with peripheral iridescence. The diagnostic obverse die markers are clearly visible on this pleasing piece. NGC ID# 255U, PCGS# 7226

**1893-S Morgan Dollar, VF20
Low-Mintage Key**

4416 1893-S VF20 NGC. An impressive mid-grade example of this sought-after key, from a series-low mintage of 100,000 pieces. This coin shows significant wear on the eagle's breast, but two thirds of the detail in Liberty's hair remain intact and the ear is well-defined. The lightly abraded surfaces show subtle hints of lavender and champagne toning. NGC ID# 255U, PCGS# 7226

**1893-S Morgan Dollar, XF40
Highly Collectible Grade**

4417 1893-S XF40 PCGS Gold Shield. The collector who seeks a compromise between quality and price might do well to consider this piece that PCGS grades XF40. A lovely example at this grade level, this 1893-S Morgan exhibits fully natural pewter-gray surfaces with darker steel toning along the borders. The obverse die characteristics are clearly visible. NGC ID# 255U, PCGS# 7226

4418 1894 AU55 PCGS Gold Shield. An impressive Choice AU specimen of this low-mintage Philadelphia Mint key, with just the slightest trace of friction on the design elements and lightly abraded surfaces, under attractive shades of lavender toning. NGC ID# 255V, PCGS# 7228

4419 1894 AU55 NGC. This issue saw only 110,000 pieces minted, making it the first Philadelphia key date of the Morgan dollar series. Elusive in all grades, this coin features plenty of luster and sharp detail, with just slight friction over the high points. NGC ID# 255V, PCGS# 7228

4420 1894 AU58 NGC. Morgan dollar collectors can choose the optimal grade for their collection as the present sale includes eight 1894 Morgan dollars grading AU55, AU58 (2), MS61 (2), MS62, and MS63 (2). This near-Mint example has nearly full brilliant mint luster with splashes of gold toning. NGC ID# 255V, PCGS# 7228

4421 1894 AU58 PCGS. CAC. This attractive near-Mint Morgan dollar exhibits just a trace of high-point wear and the lightly abraded surfaces are lustrous and appealing. A few hints of pale gold toning adds to the considerable eye appeal. From a low mintage of 110,000 pieces. NGC ID# 255V, PCGS# 7228

1894 Silver Dollar, MS61 Lowest Philadelphia Mintage

4422 1894 MS61 PCGS. The Philadelphia Mint recorded a mere 110,000 silver dollars in 194, the lowest circulation-strike mintage of that facility, and the second lowest of the series. This Mint State piece has brilliant silver luster with frosty surfaces and traces of pale gold toning along the borders. Minimal surface marks are apparent for the grade. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS61 Key P-Mint Issue

4423 1894 MS61 PCGS. The 1894 Morgan dollar is a low-mintage Philadelphia Mint key. Examples are elusive in all grades and most Uncirculated examples are in the lower ranges of Mint State. This attractive MS61 specimen is sharply detailed and lustrous, with the minimum number of minor contact marks for the grade. A few hints of sea-green toning enliven the peripheries. NGC ID# 255V, PCGS# 7228

1894 Dollar, Satiny MS62 Pleasing Uncirculated Example

4424 1894 MS62 NGC. A pleasing Uncirculated example of this conditionally scarce P-mint from the mid-1890s. Lightly toned, the underlying mint luster is bright and satiny, and the relief elements are strongly defined. From an ultra-low mintage of 110,000 coins. Housed in a circa-2000 holder.

Ex: Bullet Sale (Heritage, 11/2003), lot 1663, where it realized \$1,897.50. NGC ID# 255V, PCGS# 7228

1894 Silver Dollar, MS63 Minimally Marked

4425 1894 MS63 PCGS. Softly frosted surfaces are brilliant with the only spot of toning near star 5 on the obverse. The fields are impressively smooth for the MS63 grade, as is Liberty's cheek. Minor marks are concentrated above the eagle's head. The 1894 has the second-lowest mintage in the series (110,000 coins). NGC ID# 255V, PCGS# 7228

4426 1894-O MS61 NGC. A delicate golden hue emerges from the borders on this Mint State 1894-O dollar, lightening as it expands toward the centers. The coin is lustrous and frosty with minimal abrasions. The usual strike softness is noted on the eagle's breast and the hair above Liberty's ear. NGC ID# 255W, PCGS# 7230

4427 1894-O MS62 PCGS. Although both sides display scattered, grade-consistent marks, this lovely O-Mint dollar has brilliant and satiny mint luster with untuned silver surfaces. NGC ID# 255W, PCGS# 7230

**1894-O Dollar, Satiny MS63
Speckled Red-Gold Patina Around the Rims**

- 4428 1894-O MS63 PCGS Gold Shield.** Each side showcases soft, satiny mint luster and silver-gray color with speckled red-gold patina around the borders. Detail is characteristically deficient over the centers. However, this Select Uncirculated 1894-O dollar is more than 13 grade points higher than average. Conditionally challenging so fine. NGC ID# 255W, PCGS# 7230
- 4429 1894-S MS63 PCGS Gold Shield.** Minimal surface marks are consistent with the grade of this Select Mint State Morgan dollar that boasts a better than average strike. NGC ID# 255X, PCGS# 7232
- 4430 1894-S MS64 PCGS.** Reflective fields shine through the thin coating of pale gold toning on this Choice Mint State 1894-S dollar. The strike is sharp and eye appeal is excellent. NGC ID# 255X, PCGS# 7232
- 4431 1894-S MS64 PCGS.** The design elements of this attractive Choice Morgan dollar exhibit razor-sharp definition and the well-preserved surfaces radiate vibrant mint luster throughout. Subtle hints of lavender-gray and golden-tan toning visit both sides. NGC ID# 255X, PCGS# 7232
- 4432 1894-S MS64 PCGS. CAC.** The obverse of this Choice Mint State 1894-S dollar is brilliant and untuned with frosty mint luster. The reverse has light gold toning over mint frost. An attractive example for the advanced collector. NGC ID# 255X, PCGS# 7232
- 4433 1895-O AU55 PCGS Gold Shield.** Splashes of golden-brown toning appear on the lustrous obverse of this important Morgan dollar. The reverse is brilliant, showing nearly full luster. The 1895-O is an important condition rarity that is seldom encountered in Mint State. NGC ID# 255Y, PCGS# 7236
- 4434 1895-S AU50 NGC.** This low-mintage Philadelphia key shows some light wear on the well-detailed design elements and the lightly abraded surfaces are visited by attractive shades of lavender toning. Traces of original mint luster shine through the patina. NGC ID# 255Z, PCGS# 7238
- 4435 1895-S AU53 PCGS.** The 1895-S is a semikey Morgan dollar, boasting a minimal mintage of only 400,000 pieces. This About Uncirculated representative displays partial luster and a bold strike. Traces of russet toning over each side accompany a touch of high-point wear on the devices. NGC ID# 255Z, PCGS# 7238
- 4436 1896-O MS61 PCGS Gold Shield.** A pleasing lower-end Uncirculated example of this better-date New Orleans issue, showing brilliant luster and above-average strike sharpness. Grade-limiting abrasions are light and scattered, posing minimal distraction. NGC ID# 27ZU, PCGS# 7242
- 4437 1896-O MS61 NGC.** An attractive Mint State example of this popular branch mint issue, with sharply detailed design elements in most areas and just a trace of softness on the hair above the ear. The lustrous, lightly marked surfaces are suggestive of a higher grade. NGC ID# 27ZU, PCGS# 7242

4438 1896-O MS61 NGC. Golden-gray patina lightly colors each side of this scarce New Orleans dollar. The strike is strong for the facility, though the usual areas display typical softness. Scattered luster grazes fail to detract. The 1896-O circulated heavily, and even Select examples are out of reach for most series specialists. NGC ID# 27ZU, PCGS# 7242

4439 1896-O MS61 PCGS. VAM-11. The date is recut at the base of 1, and slightly recut at the lower outside loop of 8. The 1896-O is a well-known condition rarity of the Morgan dollar series. This example is weakly struck at the centers, but atones with attractive peripheral toning and few marks at the MS61 level. Shades of cobalt-blue and reddish-gold surround lustrous, silver central devices. NGC ID# 27ZU, PCGS# 7242

4440 1896-O MS62 PCGS Gold Shield. VAM-9. The 1 in the date is clearly repunched. The 1896-O is a well-known conditional rarity, plentiful in VF but increasingly rare with advancing Mint State grades. This lustrous and lightly toned representative has smooth fields and a moderately marked portrait. NGC ID# 27ZU, PCGS# 7242

4441 1896-S AU58 PCGS. The 1896-S Morgan dollar is seldom encountered in high grade. Just a trace of wear shows on the well-detailed design elements of this impressive near-Mint specimen and the lightly abraded surfaces retain much of their original mint luster. Highlights of lavender, golden-brown, and violet toning enhance the attractive overall presentation. NGC ID# 2564, PCGS# 7244

**1896-S Morgan Dollar, MS62
Vibrant Mint Luster**

4442 1896-S MS62 PCGS. Mint State 1896-S dollars are quite elusive in the context of San Francisco Mint Morgan issues. The MS62 presented here has flashy lustrous surfaces that are virtually untuned. The design features are adequately struck, showing just a trace of softness in the hair above Liberty's ear. A few light to moderate contact marks and luster grazes on Liberty's cheek and in the left (facing) obverse field limit the grade.
Ex: Central States Signature (Heritage, 5/2005), lot 9885, realized \$1,840. NGC ID# 2564, PCGS# 7244

4443 1897 MS66+ PCGS. CAC. Boldly struck and beautifully preserved with frosty, brilliant luster. This high-end Premium Gem 1897 silver dollar reveals only a few trivial grazes in the left obverse field that preclude a finer grade. PCGS lists 40 numerically finer examples (12/18). NGC ID# 27P5, PCGS# 7246

4444 1897 MS66 Prooflike PCGS Gold Shield. This Prooflike Premium Gem Morgan dollar has delicate champagne toning at the borders with nicely mirrored fields around satiny devices. Population: 20 in 66 (3 in 66+) Prooflike, 0 finer (12/18). NGC ID# 2565, PCGS# 7247

4445 1897-O MS62 PCGS. Attractive shades of golden-brown and lavender-gray toning blanket the lustrous surfaces of this impressive MS62 Morgan dollar. The design elements are well-detailed and only minor signs of contact are evident. NGC ID# 2565, PCGS# 7248

4446 1897-O MS62 PCGS Gold Shield. This impressive MS62 Morgan dollar displays well-detailed design elements, with just a trace of blending on the hair above the ear. The lustrous surfaces are lightly marked, with highlights of pale gold toning. NGC ID# 2565, PCGS# 7248

4447 1897-O MS62 NGC. An attractive MS62 Morgan dollar from the famous New Orleans Mint, this coin offers well-detailed design elements and lustrous surfaces that are lightly marked for the grade. Faint highlights of lavender and pale gold toning enhance the considerable eye appeal. NGC ID# 2565, PCGS# 7248

4448 1897-O MS62 PCGS. The 1897-O dollar is most often seen in XF to AU condition, becoming a serious challenge in lower Mint State grades and downright rare in MS64. This well-struck MS62 representative boasts complete brilliance and vibrant frost. Scattered marks define the grade. NGC ID# 2565, PCGS# 7248

4449 1897-O MS62 PCGS. An attractive MS62 Morgan dollar, with sharp definition on the design elements and lustrous surfaces that show a scattering of minor contact marks, none worthy of individual mention. A few hints of greenish-gold and lavender toning enliven the surfaces. NGC ID# 2565, PCGS# 7248

1897-O Silver Dollar, MS63 High-End for the Grade

4450 1897-O MS63 PCGS. The 1897-O is a better date in Uncirculated condition, collectible in MS63 for a price but genuinely scarce finer, with only 60 such pieces reported by PCGS (12/18). This coin displays above-average central sharpness and satiny, mostly untoned mint luster. Remarkably, no major abrasions are present, and only light lines on Liberty's cheek appear to limit the grade. NGC ID# 2565, PCGS# 7248

4451 1898 MS67 PCGS. An extraordinary Superb Gem, the 1898 Morgan dollar is seldom encountered so fine, and this piece is tied for the finest numerically graded (12/18). Both sides are highly lustrous with brilliant and frosty silver surfaces that show no evidence of toning. NGC ID# 2568, PCGS# 7252

4452 1898-O MS67 PCGS. Characteristically satiny luster prevails on each side of this Superb Gem 1898-O dollar, illuminating wisps of pale champagne color. The design elements are well-defined, and there are no mentionable abrasions. None are numerically finer at PCGS (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# 2569, PCGS# 7254

4453 1898-O MS67 PCGS. CAC. The 1898-O is one of the most popular, late-date Morgan dollars. This Superb Gem displays excellent, satiny mint luster. The surfaces are untoned, sharply struck, and impeccably preserved.
Ex: ANA World's Fair of Money Signature (Heritage, 3/2010), lot 1628, where it brought \$1,667.50. NGC ID# 2569, PCGS# 7254

4454 1898-O MS67 PCGS. CAC. Pleasing hints of golden-tan toning visit the impeccably preserved surfaces of this delightful Superb Gem, with vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is terrific. NGC ID# 2569, PCGS# 7254

4455 1898-S MS65 PCGS. An exceptional Gem that boasts vibrant luster, exemplary preservation, and light straw-gold toning. The centers show slight incompleteness, and minor roller marks (as produced) cross Liberty's chin. Certified in an old green label holder.

From The Speechless Collection. NGC ID# 256A, PCGS# 7256

4456 1898-S MS65 PCGS. A brilliant Gem with satin luster, this lovely Morgan dollar lacks toning on either side. The fields are reflective and provide a nice backdrop for the design motifs. The 1898-S becomes scarce in grades above the MS65 level.

Ex: New York Signature (Heritage, 10/2014), lot 3916, realized \$1,762.50. NGC ID# 256A, PCGS# 7256

4457 1898-S MS65 PCGS. *Ex: Jeffrey M. Cohen.* Lightly toned and highly lustrous with nearly pristine fields and only minor facial marks. The central strike is good though shy of complete. A conditionally scarce issue. The Jeffrey M. Cohen Morgan Dollar collection was apparently privately sold in 2015. NGC ID# 256A, PCGS# 7256

4458 1898-S MS64 Deep Prooflike NGC. The mirrors on this near-Gem Morgan dollar appear depthless. Thickly frosted devices stand out in stark contrast, delivering the eye-catching Deep Prooflike cameo effect. Minor ticks and roller marks appear on the portrait. The reverse is clean and strongly defined. Brilliant with specks of faint gold color. Census: 17 in 64 (1 in 64 ★) Deep Prooflike, 1 finer (12/18).

From The Speechless Collection. NGC ID# 256A, PCGS# 97257

1899-O Dollar, MS67 Terrific Quality for the O-Mint

4459 1899-O MS67 PCGS Gold Shield. This Superb Gem has vastly better eye appeal and technical preservation than most New Orleans Morgan dollars. Both sides exhibit strong central strike definition, and mint luster is vibrant and satiny over all-brilliant surfaces. Interesting die cracks appear around the rims, particularly on the reverse. There are no marks to report. A single example is graded finer at PCGS (12/18). NGC ID# 256C, PCGS# 7260

1899-O Silver Dollar, MS67 Only One Piece Finer at PCGS

4460 1899-O MS67 PCGS. Splashes of blue and tan-gold color decorate both sides of this otherwise brilliant and frost-smooth 1899-O dollar. Struck to the tune of more than 12 million pieces, a number of high-grade examples exist for the 1899 New Orleans issue — but only one numerically finer piece at PCGS and none finer at NGC (12/18). The strike on this Superb Gem is extra-sharp, with eye appeal that will attract the most particular Morgan dollar enthusiast. NGC ID# 256C, PCGS# 7260

- 4461 1899-O MS66 Prooflike PCGS.** This spectacular Premium Gem exhibits deeply reflective fields and well-detailed design elements that show considerable contrast on both sides. The surfaces are impeccably preserved, aside from a few tiny nicks on the cheek, and some subtle highlights of pale gold toning add to the outstanding eye appeal. Population: 23 in 66 (3 in 66+) Prooflike, 0 finer (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# 256C, PCGS# 7261

- 4462 1899-S MS65 PCGS.** This attractive Gem Morgan dollar exhibits sharply detailed design elements and well-preserved lustrous surfaces with outstanding eye appeal. A few hints of golden-tan toning enhance the overall presentation. Housed in an old green label holder.

From The Speechless Collection. NGC ID# 256D, PCGS# 7262

- 4463 1899-S MS65 PCGS.** A spectacular Gem Morgan dollar, with sharply detailed design elements and well-preserved surfaces that radiate vibrant mint luster on both sides. Subtle highlights of golden-tan, sea-green, and lavender toning add to the outstanding eye appeal. NGC ID# 256D, PCGS# 7262

1900 Silver Dollar, MS67 Conditionally Important

- 4464 1900 MS67 PCGS.** The 1900 is a popular date for type sets, although not a particularly rare or even scarce one in the lower grades of Uncirculated. This is a significant coin in MS67 as it represents one of the finest examples available (none have been graded higher). The cheek of Liberty is smooth and rounded with no obvious abrasions there or anywhere else on the coin. Brilliant throughout, this dollar shows thick, creamy mint luster and the striking details are well defined in all areas. Population: 85 in 67 (5 in 67+), 0 finer (12/18). NGC ID# 256F, PCGS# 7264

1900-O Silver Dollar, MS67 Among the Finest at NGC

- 4465 1900-O MS67 NGC.** The 1900-O Morgan dollar is scarce in Superb Gem condition, and none are numerically finer than this MS67 coin at NGC (12/18). Luster is satiny and untuned as it cartwheels across nearly flawless surfaces. Only a couple of faint grazes in the left obverse field are discernible with a loupe. An important Registry Set candidate. Census: 83 in 67 (4 in 67+, 2 in 67 ★, 1 in 67+★), 0 finer; 2 in 67 Prooflike, 0 finer (12/18). NGC ID# 256F, PCGS# 7266

1900-O Dollar, MS67 Brilliant and Satiny

- 4466 1900-O MS67 PCGS.** Even for a 1900-O, this is a remarkable dollar. Examples are invariably satiny, rather than the usual soft mint frost seen on most Philadelphia products, but the satin luster is especially bright and vibrant on this coin. The strike just could not be sharper, every detail on the hair over the ear and the eagle's breast feathers is fully articulated. The surfaces are brilliant throughout. There are no numerically finer examples certified at either of the grading services. NGC ID# 256F, PCGS# 7266

- 4467 1900-O MS66 Prooflike PCGS.** Razor-sharp detail is uncommon among New Orleans dollars, but this Prooflike Premium Gem boasts bold hair and breast feather definition. The motifs stand out against reflective, carefully preserved fields. Population: 33 in 66 (2 in 66+) Prooflike, 0 finer (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# 256F, PCGS# 7267

- 4468 1900-O/CC VAM-8 MS65 NGC. CAC.** A Top 100 Variety. A lovely Gem of this popular overmintmark variety. Apparently dies left over from the Carson City Mint after that facility closed were sent to New Orleans who used those dies in an emergency measure, cutting an O over the old CC mintmark. According to VAMWorld, the stop-gap measure involved five different reverse dies. This lovely Gem exhibits brilliant, satin mint luster and untuned silver surfaces. NGC ID# 256G, PCGS# 133960 Base PCGS# 7268

- 4469 1900-O/CC VAM-11 MS65 PCGS.** A Top 100 Variety. One wonders whether any of the several 1900-O/CC reverse dies struck silver dollars at Carson City circa-1893 before, years later, they were overmintmarked and directed to New Orleans as an economy measure. This crisply struck and highly lustrous Gem has exemplary surfaces and peripheral orange-red toning. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

- 4470 1900-O/CC VAM-11 MS65+ PCGS. CAC.** A Top 100 Variety. Several left over Carson City reverse dies were repunched with the New Orleans mintmark for coinage in 1900, resulting in the varieties that are collectively known as the 1900-O/CC Morgan. This high-end Gem displays the diagonal die crack below the shoulder curl that confirms its VAM-11 status. The lustrous surfaces are well struck and display faint straw-gold patina. A mark on the eagle's belly determines the grade.

Ex: Central States Signature (Heritage, 4/2016), lot 5331, which realized \$1,997.50. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

- 4471 1900-S MS65 PCGS.** A sharply struck Gem, this Morgan dollar is untuned, although a minuscule gold toning spot is noted on the eagle's breast. A few trivial marks are consistent with the grade. This issue is elusive in higher grades. NGC ID# 256H, PCGS# 7270

- 4472 1900-S MS66 PCGS.** Liberty's cheek and neck, as well as the surfaces overall, are notably free of mentionable abrasions on this Premium Gem 1900-S dollar. The satiny surfaces are sharply struck and show only slight accents of rim color. PCGS reports only four finer examples of this S-mint issue (12/18). NGC ID# 256H, PCGS# 7270

4473 1901 AU58 PCGS. CAC. This attractive near-Mint Morgan dollar exhibits well-detailed design elements with just a trace of high-point wear and lightly abraded surfaces that retain much of their original mint luster. Conditionally scarce in Uncirculated grades. NGC ID# 256J, PCGS# 7272

1901 Dollar, Bright MS61

4474 1901 MS61 PCGS Gold Shield. The famous Philadelphia Mint condition rarity from a mintage approaching 7 million coins. This bright and untoned example is unquestionably Mint State, with luminous luster and well-detailed, unworn devices. A touch of softness on the eagle's breast is normal. We note a couple of prominent abrasions on the cheek, but the fields are relatively smooth. NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, MS61 Elusive in Uncirculated Grades

4475 1901 MS61 PCGS Gold Shield. Nearly 7 million Morgan dollars were struck at the Philadelphia Mint in 1901, but the issue was not well-made, as the new C4 reverse hub produced coins with flat, weakly defined devices. Many examples were released into circulation at the time of issue and most of the coins held in government storage were later melted under the provisions of the Pittman Act of 1918. Accordingly, the 1901 is one of the most challenging issues of the series in high grade. This well-detailed MS61 example shows the typical softness on the eagle's breast and the hair above the ear. The surfaces are toned in shades of golden-brown and lavender-gray, with the expected number of minor contact marks for the grade. NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, MS61 Challenging Issue in High Grade

4476 1901 MS61 PCGS. CAC. Despite a substantial mintage of 6.9 million pieces, the 1901 Morgan dollar is one of the most challenging issues of the series in high grade. This attractive Mint State example offers sharply detailed design elements and lustrous surfaces that are lightly marked for the grade. Hints of sea-green and lavender toning enhance the considerable eye appeal. NGC ID# 256J, PCGS# 7272

1901 Silver Dollar, MS62 Appealing for the Grade

4477 1901 MS62 PCGS. A blush of yellowish champagne toning warms the softly lustrous surfaces of this Mint State 1901 Morgan dollar. The strike lacks complete sharpness above Liberty's ear, although there are no other faults. Scattered handling marks limit the grade but none are individually obtrusive. The 1901 is a famous condition rarity in Uncirculated grades. NGC ID# 256J, PCGS# 7272

4478 1901-S MS64 PCGS. A lustrous, champagne-tinted near-Gem example of this better San Francisco issue, showing a vibrant cartwheel effect when rotated beneath a light. Some light marks on Liberty's cheek prevent Gem classification, and the usual touch of strike softness is evident above the ear and on the eagle's breast. NGC ID# 256L, PCGS# 7276

4479 1901-S MS64 PCGS. The design elements of this attractive Choice specimen are well-detailed, with a touch of the usual softness on the hair above the ear. The well-preserved, lustrous surfaces show a russet alloy spot at the first L in DOLLAR. Overall eye appeal is strong. NGC ID# 256L, PCGS# 7276

4480 1901-S MS65 PCGS. A conditionally elusive Morgan dollar, exceeded numerically by just 41 examples at PCGS (12/18). This Gem has frosty silver luster and excellent design definition with no evidence of toning on either side.
From The Speechless Collection. NGC ID# 256L, PCGS# 7276

4481 1902 MS66+ PCGS Gold Shield. CAC. This impressive Premium Gem features a decent strike, showing some weakness over Liberty's ear as usual, and brilliant silver luster with no toning on either side. Trivial marks on the frosty surfaces are inconsequential. PCGS has only certified 37 numerically finer examples (12/18). NGC ID# 256M, PCGS# 7278

4482 1902-S MS65 PCGS. The 1902-S Morgan dollar is an elusive issue in grades above MS65. This attractive Gem exhibits sharply detailed design elements and lustrous, lightly toned surfaces that show no mentionable distractions. Housed in a green label holder. PCGS has graded 61 numerically finer examples (12/18).
From The Speechless Collection. NGC ID# 256P, PCGS# 7282

4483 1902-S MS65 PCGS. An attractive Gem Morgan dollar, with just a touch of the usual softness on the central design elements and well-preserved surfaces that radiate vibrant mint luster, with outstanding eye appeal. PCGS has graded 61 numerically finer examples (12/18). NGC ID# 256P, PCGS# 7282

4484 1903 MS66+ PCGS Gold Shield. CAC. With just one microscopic tick on the cheek, this Premium Gem silver dollar appears nearly flawless. Each side exhibits total brilliance and cartwheel luster. The 1903 is plentiful through MS66, but the population declines substantially in MS67. NGC ID# 256R, PCGS# 7284

4485 1903 MS66 Prooflike NGC. The 1903 is rare with mirrored fields. Most 1903 Morgan dollars tend to be satiny, and few examples are available that have designated Prooflike fields. This Premium Gem is expectedly high-end with silvery surfaces and a thin overlay of dusky gold color. Marks are limited to a few light, grade-consistent abrasions. Census: 6 in 66 (1 in 66+) Prooflike, 0 finer (12/18). NGC ID# 256R, PCGS# 7285

**1903-O Morgan Dollar, MS67
Among the Finest Certified**

- 4486 1903-O MS67 NGC.** The 1903-O is a better 20th century date in the Morgan dollar series despite the flood of mint-fresh coins that spewed from a Philadelphia Mint vault in the early 1960s. This is a scarce Superb Gem example that likely originated from that storage vault. The preservation is outstanding, and the satiny surfaces display a blush of light golden toning. The obverse is well-struck, but the reverse shows minor softness on the eagle's breast. Census: 52 in 67 (3 in 67+), 0 finer (12/18).
Ex: Long Beach Signature (Heritage, 6/2016), lot 5133, which realized \$3,525.
From The Five Generations of Eby Collection, Part II. NGC ID# 256S, PCGS# 7286

- 4487 1903-O MS65 Prooflike PCGS Gold Shield.** The 1903-O Morgan dollar was a famous rarity before it surfaced in large numbers in the Treasury Releases of the 1960s. Examples in MS65 condition, with prooflike surfaces, are still rare today. This sharply detailed, impeccably preserved Gem exhibits deeply reflective fields and outstanding eye appeal. Population: 26 in 65 (1 in 65+) Prooflike, 5 finer (12/18). NGC ID# 256S, PCGS# 7287

- 4488 1903-S AU55 PCGS.** A virtually brilliant better-date Morgan dollar that has pleasing peripheral luster and refreshingly unmarked surfaces. The design elements are typically struck, with a touch of wear on the high points of the design.
Ex: Palm Beach Signature (Heritage, 3/2005), lot 6369, realized \$2,070. NGC ID# 256T, PCGS# 7288

- 4489 1903-S Micro S, VAM-2, XF45 PCGS.** A Top 100 Variety. This lightly worn, lightly abraded specimen exhibits the micro S mintmark, from the punch that may have been intended for use on the quarter. VAMWorld notes, "VAM-2 coins are very hard to find in XF and above." NGC ID# 256T, PCGS# 133967 Base PCGS# 7306

- 4490 1904 MS65 PCGS Gold Shield.** Frosty mint luster and complete mint brilliant define this Gem 1904 dollar. Slight duskiness occurs at the lower reverse border. As usual, strike detail is somewhat lacking, though the curls over Liberty's ear are relatively crisp. There are 44 finer submissions at PCGS (12/18). NGC ID# 256U, PCGS# 7290

- 4491 1904 MS65 PCGS.** Blended multicolor toning covers both sides of this Gem 1904 silver dollar, masking any minor imperfections that prevent an even finer grade. Slight strike weakness is seen only on the eagle's breast and the hair above Liberty's ear. Eye appeal is pleasing. NGC ID# 256U, PCGS# 7290

- 4492 1904 MS65 NGC.** The 1904 is a conditionally scarce late-date issue and a noted strike rarity. This is the highest collectible grade level, with only 10 coins finer at NGC (12/18). Each side is totally brilliant and clean with cartwheel luster, though we note a few specks on the cheek. Softness is most noticeable around the rims. The NGC insert is autographed by well-known *Guide Book* authority Ken Bressett. NGC ID# 256U, PCGS# 7290

- 4493 1904 MS65 PCGS.** An exceptional Gem of this unheralded but conditionally challenging issue. Light to medium apple-green and steel-gray toning embraces lustrous and nicely struck surfaces. A tick on the cheekbone but otherwise practically pristine. Housed in an old green label holder.
From The Speechless Collection. NGC ID# 256U, PCGS# 7290

- 4494 1904 MS65 PCGS.** Bright luster emanates from the nearly untuned surfaces of this adequately struck Gem. Scattered minute obverse marks are within the confines of the grade. This date is very elusive any finer. PCGS has graded 44 numerically finer examples (12/18). NGC ID# 256U, PCGS# 7290

- 4495 1904-O MS67 NGC.** This stunning Superb Gem exhibits needle-sharp definition on all design elements and the virtually pristine, brilliant surfaces radiate vibrant mint luster on both sides. Overall eye appeal is terrific and no mentionable distractions are evident. This coin is among the finest certified examples. NGC ID# 256V, PCGS# 7292

- 4496 1904-O MS67 PCGS Gold Shield.** This stunning Superb Gem is among the finest certified survivors of this popular branch mint issue, with impeccably preserved surfaces that radiate vibrant mint luster and sharply detailed design elements throughout. Eye appeal is terrific. Population: 52 in 67, 0 finer (12/18). NGC ID# 256V, PCGS# 7292

- 4497 1904-O MS66+ Prooflike PCGS. CAC.** A Plus-graded Premium Gem from the New Orleans Mint, this coin exhibits sharply detailed design elements and lightly marked surfaces that show considerable prooflike reflectivity. PCGS has graded two numerically finer Prooflike examples (12/18).
From The Five Generations of Eby Collection, Part II. NGC ID# 256V, PCGS# 7293

**1904-S Morgan Dollar, MS62
Challenging Issue in High Grade**

- 4498 1904-S MS62 PCGS.** *Ex: DCT Collection.* The 1904-S Morgan dollar claims a mintage of 2.3 million pieces, but the issue is more difficult to locate in high grade than that production total would suggest. This impressive MS62 example offers well-detailed design elements, with just a touch of blending on the hair above the ear. The lustrous surfaces are lightly marked for the grade and show highlights of pale gold toning. NGC ID# 256W, PCGS# 7294

**1904-S Dollar, MS63
Brilliant and Thickly Frosted**

- 4499 1904-S MS63 PCGS.** An average 1904-S Morgan dollar at one of the leading certification services will likely grade fractionally better than XF45. This piece is considerably finer, bright and frosty with relatively few abrasions aside from a mark below TR(UST). Incomplete over the centers, as usual. NGC ID# 256W, PCGS# 7294

1904-S Silver Dollar, MS63
Excellent Eye Appeal

- 4500** 1904-S MS63 PCGS. Wisps of gold toning appear over the satin surfaces of this Select Mint State 1904-S key Morgan dollar. This piece has the eye appeal of a much higher grade, and a glass is required to see the few grade-limiting marks on each side. An important opportunity for the Morgan dollar enthusiast. NGC ID# 256W, PCGS# 7294

1904-S Morgan Dollar, MS63
Conditionally Challenging S-Mint Issue

- 4501** 1904-S MS63 PCGS Gold Shield. Despite an adequate mintage of more than 2.3 million pieces, the 1904-S Morgan dollar is a challenging issue in higher Mint State grades. Most examples seen have mediocre strikes and suffer from excessive bag marks. This attractive Select specimen is sharply detailed in most areas, with just a touch of blending on the hair strands above Liberty's ear. The pleasing surfaces are lustrous and lightly marked. NGC ID# 256W, PCGS# 7294

1904-S Dollar, MS63
Reddish-Gold Rim Toning

- 4502** 1904-S MS63 NGC. CAC. Reddish-gold patina around the edges frames this frosty San Francisco dollar, one of 2.3 million examples struck during the final year of Morgan dollar production before what would be a long hiatus. A touch of softness over the centers is normal. Clean for the grade. Housed in a former generation holder. NGC ID# 256W, PCGS# 7294

- 4503** 1921-S MS65+ NGC. The mintmark is extremely weak on this example that possesses impressive aesthetic appeal with its frosty silver luster and brilliant, untuned surfaces. NGC has certified a mere 70 numerically finer examples. NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

1887 Dollar, Reflective PR65
Gold and Blue Accents

- 4504** 1887 PR65 NGC. The Philadelphia Mint manufactured 710 Morgan dollars in proof format in 1887, about 150 fewer coins than the year before. This Gem specimen presents minimal gold and blue hues over largely silver surfaces. Field reflectivity is unmistakable, although contrast against the fully struck devices falls just short of what is required for a formal Cameo designation. *From The Speechless Collection.* NGC ID# 272G, PCGS# 7322

1896 Morgan Dollar, PR64
Attractive Multicolor Toning

- 4505** 1896 PR64 PCGS Gold Shield. Only 762 proof Morgan dollars were struck in 1896, but the issue was extraordinarily well-produced. This attractive Choice proof specimen exhibits the sharply detailed design elements and deeply mirrored fields typical of the issue, with well-preserved surfaces that are blanketed in vivid shades of lavender, pale gold, and violet toning. The strike is good, though slightly incomplete above Liberty's ear. NGC ID# 272T, PCGS# 7331

- 4506** 1901 PR62 NGC. A hint of field-to-device contrast appears on the brilliant and untuned silver surfaces of this attractive proof Morgan dollar. Faint grade-limiting hairlines are evident in the fields as expected at this numeric level. NGC ID# 272Z, PCGS# 7336

1902 Morgan Dollar, PR64
First Year of All-Brilliant Finish

- 4507** 1902 PR64 PCGS. The Mint began using an all-brilliant finish for proofs in 1902, but this coin shows an unusual amount of mint frost for the date. The design elements are well-detailed, with just a touch of softness on the hair above the ear, and the fields are deeply mirrored. The surfaces are toned in shades of apple-green and champagne-gold. NGC ID# 2822, PCGS# 7337

4508 1903 PR62 NGC. A colorful, slightly contrasted proof, this Morgan dollar exhibits magenta and blue toning over its fully mirrored fields and satin devices. The mintage was limited to 755 proofs in 1903 and few of the survivors have any degree of contrast. NGC ID# 2823, PCGS# 7338

4509 1904 PR62 PCGS Gold Shield. A pleasing lower-end proof Morgan dollar, showing brilliant surfaces and liquidlike mirroring in the fields. The devices are satiny rather than frosted, producing little contrast — a normal characteristic of proofs struck during this period. This piece has faint hairlines that limit the grade but is otherwise pleasing. NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

4510 1921 MS65 NGC. The NGC *Guide Book* commemorative insert is hand-signed by Ken Bressett. This attractive High Relief Peace dollar has a silvery obverse and traces of gold and sky-blue on the reverse. Strong detail rarely seen for the issue. PCGS# 7356

4511 1921 MS65 NGC. VAM-1F1. An Elite 30 Variety. Although undesignated as such on the holder, the dies are the same as used to coin the rare matte proofs. The present high-grade pearl-gray example is a business strike, confirmed by the vibrant cartwheel sheen and typical central strike. The NGC insert is autographed by Kenneth Bressett of *Guide Book* fame. PCGS# 7356

4512 1921 MS65 PCGS. This frosty example of the single-year series key in High Relief is typically struck but much cleaner than the normal lower Mint State representative. Mostly brilliant with tinges of pale tan-gold color.
From The Speechless Collection. PCGS# 7356

4513 1921 MS65 NGC. The high relief of the design resulted in some incomplete detail on Liberty's hair, but the design elements of this attractive Gem are sharply detailed in other areas. The virtually flawless surfaces are lustrous and lightly toned. PCGS# 7356

4514 1921 MS65 PCGS. Delicate gold toning resides on the brilliant and highly lustrous surfaces of this lovely High Relief Peace dollar that features strong peripheral details. Slight central weakness is typical of this issue. PCGS# 7356

4515 1922-D MS66 NGC. Thousands of 1922-D Peace dollars survive through Gem condition, unsurprising with a mintage in excess of 15 million pieces. A splash of crimson color near (LIBERTY)Y is the only interruption of otherwise total brilliance. Satiny and sharp with a couple of large die breaks on the obverse. Seventeen coins are graded finer at NGC (12/18). NGC ID# 257D, PCGS# 7358

4516 1923-S MS65 PCGS. More than 19 million Peace dollars were struck at the S-mint in 1923. However, the issue is scarce in Gem condition and only three coins are finer at PCGS (12/18). This Registry-quality example is bright and frosty with specks of thin violet and gold color. Typically struck, but the fields are clean.
From The Speechless Collection. NGC ID# 257H, PCGS# 7362

4517 1923-S MS65 PCGS. The 1923-S Peace dollar is a scarce issue in MS65 condition and a prime condition rarity in finer grades. This impressive Gem exhibits well-detailed design elements and well-preserved lustrous surfaces with a few hints of lavender-gray and amber toning. PCGS has graded three numerically finer examples (12/18). NGC ID# 257H, PCGS# 7362

4518 1924 MS66+★ NGC. CAC. This delightful Plus-graded Premium Gem is a remarkably attractive piece with bold design features, frosty luster, pristine surfaces, and lovely iridescent toning. The exceptional eye appeal is attested by the Star designation.
From The Five Generations of Eby Collection, Part II. NGC ID# 257J, PCGS# 7363

4519 1924-S MS64+ PCGS Gold Shield. CAC. The 1924-S Peace dollar is available in MS64, but finer pieces are scarce. This Plus-graded, CAC-endorsed near-Gem is immensely appealing. A suggestion of golden color tints the otherwise brilliant, frosted surfaces, and the strike is sharp. No significant abrasions are noted. NGC ID# 257K, PCGS# 7364

4520 1925 VAM-5, Missing Ray MS66 PCGS Gold Shield. CAC. A Top 50 Variety. Excessive die polishing effaced the ray below the eagle's tail on this delightful Premium Gem, but the design elements are fairly sharp in other areas. The impeccably preserved surfaces are lustrous and appealing, with highlights of pale gold toning. Population: 1 in 66, 0 finer (12/18). NGC ID# 76LN, PCGS# 133770 Base PCGS# 7365

4521 1926 MS66 PCGS. Well-defined through the centers with vibrant luster and minimal patina over most of each side. Only an arc of thin orange and amber toning along the left obverse rim interrupts nearly complete mint brilliance. PCGS has graded no Superb Gems finer (12/18).
From The Five Generations of Eby Collection, Part II. NGC ID# 257N, PCGS# 7367

4522 1927 MS65 PCGS. Brilliant-white surfaces with an average strike and no individually mentionable distractions. With an original mintage of only 848,000 pieces, this P-mint issue is understandably scarce at the Gem level. PCGS has graded 16 numerically finer examples (12/18).
From The Speechless Collection. NGC ID# 257S, PCGS# 7370

1927 Peace Dollar, MS65+ Popular VAM-2, Doubled Motto

4523 1927 Doubled Motto, VAM-2, Top 50, MS65+ PCGS Gold Shield. CAC. A Top 50 Variety. Ex: California Collection. The motto IN GOD WE TRUST is lightly doubled, along with the designer's monogram, identifying the popular VAM-2. The 1927 Peace dollar claims a low mintage of 848,000 pieces. This Plus-graded Gem exhibits sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show hints of pale gold toning. Population: 6 in 65 (2 in 65+), 0 finer (12/18). NGC ID# 257S, PCGS# 133776 Base PCGS# 7370

4524 1928 MS64 PCGS Gold Shield. Attractive shades of pale jade toning blanket the well-preserved surfaces of this impressive Choice Peace dollar, with well-detailed design elements and vibrant mint luster underneath. Eye appeal is outstanding. NGC ID# 257V, PCGS# 7373

1928 Peace Dollar, MS65
An Outstanding Example

- 4525 1928 MS65 PCGS Gold Shield.** Satinlike surfaces of this Gem 1928 dollar show few signs of contact, while the strike is sharp for the issue. Just 360,649 pieces were struck — the lowest of the Peace dollar series — and it is a sought-after series key date as a result. While many 1928 dollars show unwanted gold toning, this example is a stately silver-gray coin with excellent eye appeal. PCGS reports just 20 numerically finer pieces certified (12/18). NGC ID# 257V, PCGS# 7373

1928 Dollar, MS65
Key Date in All Grades

- 4526 1928 MS65 PCGS.** With a low mintage of 360,649 coins, the 1928 is the singular key date in the Peace dollar series, although a couple of issues are rarer in high grades. Frosty mint luster shines from each side of this Gem, though it is more pronounced on the totally brilliant reverse. The obverse shows blushes of lilac and almond-gold patina mostly along the lower border. Well-struck for the type and beautifully preserved. PCGS reports 20 finer grading events (12/18).
From The Speechless Collection. NGC ID# 257V, PCGS# 7373

- 4527 1928-S MS64+ PCGS.** The slightest evidence of gold toning appears on both sides of this lovely near-Gem that features frosty silver luster. Although plentiful at the MS64 grade level, finer examples are rare. PCGS has certified only 67 numerically finer pieces (12/18). NGC ID# 257W, PCGS# 7374

- 4528 1928-S MS64 PCGS. CAC.** A brilliant and lustrous Choice silver dollar, held back in grade only by minor grazes in the left reverse field and by a mark on Liberty's nose. The 1928-S is famously costly to acquire as a full Gem, but MS64 examples are much more affordable. Only a small percentage of the certified population boasts a CAC seal. Hub-doubled on the designer's monogram and the TR in TRVST, characteristic of the issue. NGC ID# 257W, PCGS# 7374

- 4529 1934-S AU58 PCGS. CAC.** A pleasing near-Mint example of this key issue, featuring dusky gold toning that subdues the lustrous surfaces on each side. Scattered marks and a trace of wear are evident on both sides. NGC ID# 257Z, PCGS# 7377

- 4530 1935-S MS65+ PCGS Gold Shield. CAC.** Three Rays below ONE. This Plus-graded Gem Peace dollar exhibits well-detailed design elements and well-preserved, lustrous surfaces, under shades of speckled golden-tan toning. Overall eye appeal is quite strong. NGC ID# 2583, PCGS# 7379

1935-S Dollar, MS66
Prohibitive in Higher Grades

- 4531 1935-S MS66 PCGS Gold Shield.** Four Rays below ONE. This 1935-S dollar from a mintage approaching 2 million coins ranks among the highest collectible examples for the issue. Anything finer than this Premium Gem is prohibitively rare. Frosted surfaces appear even cleaner than the grade suggests, with just a single set of reeding marks in the upper-left reverse field. Mostly brilliant with faint wisps of dusky gold color and good strike detail. PCGS reports three finer submissions (12/18). NGC ID# 2583, PCGS# 7379

PROOF EISENHOWER DOLLAR

- 4532 1976-S Silver PR70 Deep Cameo PCGS.** Featuring the Type One reverse lettering as always for this issue, the present example is a perfect flawless Superb Gem Deep Cameo proof with deeply mirrored fields and satin devices. Population: 93 in 70 Deep Cameo (12/18). NGC ID# 64AW, PCGS# 97436

SACAGAWEA DOLLAR

- 4533 2000-P Wounded Eagle, FS-901, MS67 PCGS.** A die line through the eagle's flank inspires the nickname for this well-known *Cherry-pickers'* variety. The sun-gold surfaces are boldly struck with booming luster and minimal imperfections. Population: 29 in 67 (1 in 67+), 3 finer (12/18). PCGS# 147883 Base PCGS# 506153

GSA DOLLARS

- 4534 1878-CC GSA MS64 Prooflike NGC.** Unlike many 1878-CC dollars, this GSA Hoard coin is prooflike on both sides. Many others have one side prooflike and the other side frosty. This pleasing Choice Mint State example is brilliant and untuned with typical marks that are expected for the grade. NGC ID# 253M, PCGS# 7081

- 4535 1880-CC 8 Over Low 7, VAM-6, GSA, MS65 NGC.** A Top 100 Variety. Nearly a complete 7 is visible inside the loops of the second 8 in the date. This frosty Gem is brilliant and untuned with excellent eye appeal. More than 130,000 of these 1880-CC dollars were distributed by the GSA, the coins representing several varieties. NGC ID# 2542, PCGS# 518857 Base PCGS# 7104

- 4536 1883-CC GSA MS66+ NGC.** A plentiful date among Carson City Morgan dollars. The vast majority of coins that the GSA distributed in the 1970s were 1882-CC, 1883-CC, and 1884-CC dollars. More than 2.3 million examples of those three issues were distributed, representing 80% of the total distribution. This Premium Gem is exquisite, displaying satin luster on its brilliant and untuned silver surfaces. NGC ID# 254S, PCGS# 518869 Base PCGS# 7144

- 4537 1884-CC GSA MS66 ★ NGC. CAC. VAM-9.** Dramatic cherry-red, lemon-gold, and powder-blue toning dominates the obverse. The reverse is brilliant, and both sides display potent cartwheel sheen. Sharply struck and well preserved. VAM-9 has a small dash below the second 8 in the date, though the colorful obverse patina is of greater interest to most collectors. Accompanied by the box and certificate of GSA issue. NGC ID# 254L, PCGS# 518872 Base PCGS# 7152

4538 1885-CC GSA MS66 NGC. VAM-3. A splendid Premium Gem, this GSA dollar has brilliant silver surfaces and sharp design details with no evidence of toning on either side. Two-thirds of the original mintage of 1885-CC Morgan dollars were distributed by the GSA in the 1970s. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

4539 1885-CC GSA MS66 PCGS. VAM-3. A minimally abraded representative of the popular low mintage Carson City issue. The essentially untoned surfaces display potent luster and moderate mint-made roller marks over Liberty's ear. Population: 64 in 66 (15 in 66+), 1 finer (12/18). NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

1890-CC Silver Dollar, MS61 GSA Hoard

4540 1890-CC GSA MS61 NGC. A frosty and lustrous Mint State example housed in the GSA plastic holder, this piece is untoned and exhibits myriad marks that are consistent with the grade. There is no outer box or COA. The 1890-CC was a minor part of the GSA distribution, with less than 4,000 coins remaining in Treasury vaults in the early 1970s. NGC ID# 255D, PCGS# 518878 Base PCGS# 7198

1890-CC GSA Dollar, MS62

4541 1890-CC GSA MS62 NGC. This scarcer date Carson City dollar is close to brilliant, although the lower reverse displays faint olive-gold and silver-gray toning. A tick is noted on the rim beneath the O in DOLLAR, but the fields are well preserved, and the cheek displays grazes consistent with the grade. Lustrous and nicely struck. The 1879-CC and 1890-CC have similar GSA distributions, although more 1879-CC dollars were likely been broken out for submission to grading services. NGC ID# 255D, PCGS# 518878 Base PCGS# 7198

4542 1891-CC GSA Uncertified. This better-date Carson City Morgan remains uncertified in its original GSA holder and box with COA. In our opinion, it has the surfaces of an MS62 specimen, with abrasions mostly limited to the obverse. The coin is frosty and brilliant. Above-average sharpness occurs on the central devices. NGC ID# 255H, PCGS# 518881 Base PCGS# 7206

4543 1891-CC GSA MS62 NGC. VAM-3. A Top 100 Variety. This "Spitting Eagle" GSA dollar has moderate abrasions on the face but few notable flaws elsewhere. Silver luster is excellent. Band-certified in the black GSA holder of issue. A GSA box and certificate accompanies the lot.
Ex: Houston Signature (Heritage, 11/2012), lot 4659, which realized \$2,350. NGC ID# 255H, PCGS# 518881 Base PCGS# 7206

REDFIELD DOLLARS

4544 1883 MS62 NGC. Ex: Redfield Collection. Housed in the original red MS65 plastic holder as issued by Paramount International Coin Corporation in the 1970s. The NGC label is affixed to the back with a disclaimer that it is not an official NGC holder, so the NGC guarantee does not apply. A brilliant Mint State example, the obverse exhibiting numerous small handling marks, and the reverse pristine. Delicate gold toning follows the obverse border. NGC ID# 254G, PCGS# 7142

4545 1892-CC MS62 NGC. Ex: Redfield Collection. Housed in the original red MS65 plastic holder as distributed by Paramount International Coin Corporation in the 1970s. The NGC label is affixed to the back with a disclaimer that it is not an official NGC holder, so the NGC guarantee does not apply. The obverse of this brilliant and lustrous Carson City dollar exhibits myriad marks while the reverse is nearly mark free and at least two grade points finer than the obverse. NGC ID# 255M, PCGS# 7214

CERTIFIED MODERN PROOF SETS

4546 Five-Piece 1936 Proof Set, PR64 to PR65 NGC. The coins are individually certified in holders from the same submission. The set includes: **cent** — **Satin Finish** — **PR64 Red and Brown**, a sharply detailed Choice specimen, with well-preserved surfaces that show a mix of original red and light brown patina; **nickel** — **Satin Finish** — **PR65**, razor-sharp devices and impeccably preserved brilliant surfaces; **dime PR64**, sharply detailed, with well-preserved brilliant surfaces; **quarter PR64**, brilliant surfaces with deeply mirrored fields; and a **half dollar PR64**, razor-sharp design elements and deeply reflective fields. (Total: 5 coins) NGC ID# 22L2, PCGS# 904750

4547 Five-Piece 1937 Proof Set NGC. The coins are separately housed in holders bearing consecutive certification numbers. The set includes: **cent PR63 Red and Brown**, scattered powder-blue and russet freckles; **nickel** — **Environmental Damage** — **NGC Details, Proof**, several white spots on obverse; **dime PR66**, brilliant and fully struck; **quarter PR66**, stone-white and well preserved; and a **half dollar PR64**, myriad pinpoint obverse tan freckles. (Total: 5 coins) PCGS# 904751

End of Session Three

SESSION FOUR

GOLD DOLLARS

1849 Gold Dollar, MS65 No L, Open Wreath

- 4548** 1849 No L, D-1, MS65 PCGS. Both stars below the bust are widely repunched, diagnostic for the introductory No L variety. The peach-gold surfaces teem with luster and are free from detractors. The strike is bold throughout. Breen (1988) reported a mintage of 1,000 pieces, but a few hundred are known in Mint State. Gems, though, are highly elusive. Population: 36 in 65, 12 finer (12/18). NGC ID# 25B7, PCGS# 521670 Base PCGS# 7501

1849 Open Wreath Gold Dollar, MS65 D-4, Close Stars, Cracked Reverse

- 4549** 1849 Open Wreath, D-4, Close Stars, MS65 NGC. The date numerals are thin and the lower obverse stars are spaced close to the bust truncation. This first-year gold dollar type coin delivers satiny yellow-gold mint luster and sharp design elements. A few faint marks are not bothersome. On the reverse, a die crack stretches from the rim through the I in UNITED, into DOLLAR. Finer 1849 gold dollars are scarce. Census: 42 in 65 (1 in 65+), 10 finer (12/18). NGC ID# 25B9, PCGS# 521671 Base PCGS# 7502

1849-O Gold Dollar, MS63 Debut New Orleans Issue

- 4550** 1849-O Open Wreath MS63 NGC. Variety 1. The R in DOLLAR is doubled on this reverse. Although the 1849-O gold dollar is not a great rarity, examples are always in demand as the first issue of the denomination from the New Orleans Mint. This well-detailed Select specimen displays vibrant mint luster and pleasing yellow and rose-gold surfaces, with outstanding eye appeal. Census: 49 in 63 (1 in 63+), 45 finer (12/18). NGC ID# 25BE, PCGS# 7508

- 4551** 1850 MS64 PCGS Gold Shield. CAC. Shimmering yellow-gold luster illuminates well-preserved surfaces on this CAC-endorsed near-Gem. The strike is sharp and eye appeal is outstanding for the grade. An excellent type coin, although rarely found finer. Population: 47 in 64 (6 in 64+), 24 finer. CAC: 8 in 64, 7 finer (12/18). NGC ID# 25BF, PCGS# 7509

- 4552** 1850-C AU50 ANACS. Variety 1. A rare Charlotte issue with a meager mintage of 6,966 pieces. The slightly glossy canary-gold surfaces show surprisingly few marks, and definition is bold aside from minor wear on Liberty's curls. NGC ID# 25BG, PCGS# 7510

1853 Gold Dollar, MS66 Exceptional Type Coin, CAC Endorsed

- 4553** 1853 MS66 PCGS. CAC. With a mintage that exceeds 4 million pieces, the 1853 gold dollar is always a quintessential choice for gold type and date collectors. The 1853 is available in all grades including a few remarkable MS69 coins. While this Premium Gem is marginally below that level, it would be no surprise to see it creep up a notch on the grading scale. CAC-endorsed in a previous generation blue label holder, the coin's finely textured and comprehensively frosted surfaces approach the Superb category. A pinpoint-sharp strike adds to the appeal. Population: 72 in 66 (9 in 66+), 12 finer. CAC: 29 in 66, 5 finer (12/18). NGC ID# 25BU, PCGS# 7521

- 4554** 1853-O MS63 NGC. Variety 1. This attractive Select specimen offers well-detailed design elements, with just a trace of softness on Liberty's hair. Some die lines extend from the rim to the tops of ITE in UNITED. The lightly marked yellow and rose-gold surfaces radiate vibrant mint luster. NGC has graded 56 numerically finer examples (12/18). NGC ID# 25BX, PCGS# 7524

1855-O Gold Dollar, AU58 Essential Type Two Issue

- 4555** 1855-O AU58 NGC. Variety 2. The reverse is in its later, lapped die state, as usual. The 1855-O is an essential and in-demand issue — the only Type Two gold dollar struck at the New Orleans Mint. A total of 55,000 pieces were produced. This example enjoys good detail on the headdress and lower wreath with light yellow-gold color and remaining luster. Minimally marked, save for a few hairlines on the obverse. NGC ID# 25C7, PCGS# 7535

1856-S Gold Dollar, AU55
Lone Type Two S-Mint Issue

4556 1856-S Type Two AU55 PCGS Gold Shield. The 1856-S is the only San Francisco issue of the Type Two design, and it is the final Type Two issue struck at any mint. This Choice AU example is clashed with spindly die cracks on the obverse. On the reverse, the mintmark is low and centered with no repunching, and the date is low, slanting up to the right. Original orange-gold color adorns the smooth, lightly circulated surfaces. The 1856-S gold dollar is scarce any finer. NGC ID# 25C8, PCGS# 7536

4557 1858 MS64 PCGS Gold Shield. An attractive Choice specimen of this popular issue, which is surprisingly elusive in higher grades. The design elements are well-detailed and the lustrous orange-gold surfaces show a few minor marks in the reverse field, near the 1. Population: 31 in 64, 16 finer (12/18). NGC ID# 25CH, PCGS# 7548

1858 Gold Dollar, MS65
Small High-Grade Population

4558 1858 MS65 PCGS. CAC. The obverse of this brilliant and frosty Gem exhibits splendid orange-gold color while the reverse is lighter yellow-gold with delicate orange highlights. Both sides have weak clash marks that are typical of the issue and the denomination. This Gem has only a few peers, with a combined PCGS and NGC population of 11 and 11 finer. Population: 7 in 65 (1 in 65+), 9 finer. CAC: 4 in 65, 4 finer (12/18). NGC ID# 25CH, PCGS# 7548

4559 1861 MS64 PCGS Gold Shield. This Choice 1861 gold dollar is sharp and frosty with original yellow-gold coloration. Light surface grazes prevent Gem classification but are not overly bothersome. This issue is plentiful in the current grade as a type coin, and finer examples become elusive. NGC ID# 25CU, PCGS# 7558

4560 1861 MS64 PCGS Gold Shield. CAC. This early Type Three issue is scarce finer than MS64, and CAC-approved coins are in the minority. This Choice example displays frosty wheat-gold luster and only a few faint surface grazes. The strike is sharp throughout. An excellent type coin. NGC ID# 25CU, PCGS# 7558

4561 1862 MS65 PCGS Gold Shield. Gold dollar mintages were only adjusted downward in 1863. Even as the Civil War raged in 1862, the Mint still managed a production of 1.3 million coins, making this a popular date with collectors. Nearly full motifs reside over smooth yellow-gold surfaces. A frosty Gem with just 45 finer submissions at PCGS (12/18). NGC ID# 25CW, PCGS# 7560

1862 Gold Dollar, MS66
Attractive Surfaces

4562 1862 MS66 PCGS Gold Shield. CAC. The mintage of 1.3 million pieces ensured that the 1862 gold dollar would be a survivor and available to later generations of collectors. That comparison does not hold up so well when the 1862 is compared to later dates that are many times more available than the 1862. This bright yellow-gold coin shows an appealing combination of semiprooflikeness and mint frost. Location of any post-strike marks will require a magnifier to locate. Population: 38 in 66 (3 in 66+), 7 finer. CAC: 19 in 66, 9 finer (12/18). NGC ID# 25CW, PCGS# 7560

4563 1874 MS66 PCGS Gold Shield. Although plentiful overall, the 1874 gold dollar becomes conditionally scarce finer than MS66. This Premium Gem is a shimmering, lustrous collector coin with well-struck design elements and attractive wheat-gold color. No mentionable abrasions are apparent. NGC ID# 25DC, PCGS# 7575

1879 Gold Dollar, MS66
Low Mintage of 3,000 Coins

4564 1879 MS66 NGC. About 20% of the 3,000 gold dollars struck in 1879 are believed extant, mostly in Mint State grades. Scarcely are examples seen in MS66, and they are rare in MS67. Hallmarks of this Premium Gem include a full strike, gleaming mint frost, and attractive rose-gold color. Census: 22 in 66 (2 in 66 ★), 15 finer (12/18). NGC ID# 25DH, PCGS# 7580

1880 Gold Dollar, MS65 Prooflike
Low-Mintage Issue

4565 1880 MS65 Prooflike NGC. Because only 1,600 circulation-strike gold dollars were coined in 1880, the dies retained their original die polish until the entire production was completed. The result was a fairly large percentage of survivors today have mirrored fields. This piece has a bold strike, brilliant yellow luster, and excellent field-to-device contrast. Census: 6 in 65 Prooflike, 34 finer (12/18). NGC ID# 25DJ, PCGS# 77581

1887 Gold Dollar, MS67
Full Strike

- 4566** 1887 MS67 PCGS Gold Shield. The 1887 ranks among the late-date, low-mintage gold dollar issues that can still be readily found in upper-Uncirculated grades. This delightful Superb Gem enjoys a full strike and glistening mint frost over lively peach-gold surfaces. Population: 33 in 67 (3 in 67+), 4 finer (12/18). NGC ID# 25DS, PCGS# 7588

CLASSIC QUARTER EAGLES

- 4567** 1834 AU55 NGC. **Variety 1, R.1.** The introductory Small Head subtype, seen only on the present die pair. This intricately struck Choice AU example displays olive-green toning with peach-tinged luster in protected regions. Smooth aside from three faint hair-thin marks beneath the eagle's beak. NGC ID# 25FS, PCGS# 7692

1834 Classic Head Quarter Eagle, MS62
Uniformly Strong Definition

- 4568** 1834 MS62 NGC. **Breen-6138, Variety 1, R.1.** Small Head. The two upper left curls below stars 6 and 7 are flat on this plentiful Classic Head, No Motto quarter eagle. Definition is uniformly strong, and the lightly abraded yellow-gold fields exhibit a trace of semireflectivity. We note a small rim nick above TE in UNITED. NGC ID# 25FS, PCGS# 7692

- 4569** 1836 Block 8 AU58 NGC. **Breen-6144, Variety 15, R.2.** A caramel-gold Borderline Uncirculated Classic type coin. The centers show incompleteness of strike, but peripheral elements are sharp, and luster dominates the margins and motifs. Marks are inconsequential for the grade. NGC ID# 25FU, PCGS# 97694

LIBERTY QUARTER EAGLES

- 4570** 1843-C Large Date, Plain 4 — Reverse Graffiti — NGC Details. **AU. Variety 1.** The Large Date and Small Date varieties are each described as Variety 1, creating slight confusion. The Large Date, offered here, has a Plain 4, and the Small Date has a Crosslet 4. The mintmark is repunched. Attractive rose toning appears on the yellow-gold surfaces of this Charlotte quarter eagle, with scratches in both wings that NGC describes as graffiti.

1843-C Quarter Eagle, AU55
Large Date, Plain 4 Variety

- 4571** 1843-C Large Date, Plain 4, AU55 NGC. **Variety 1.** The Large Date variant outnumbers the Small Date type by a margin of nearly 10 to 1, yet both varieties of this Charlotte date are scarce from a total mintage of 23,075 pieces. Choice About Uncirculated examples such as the current coin are scarce by condition as well. Partially reflective fields surround centrally weak motifs as usually seen for the issue. Light marks are scattered across the green-gold surfaces, with slight high-point wear. Both the date and mintmark are noticeably recut. Census: 29 in 55, 40 finer (12/18). NGC ID# 7HLG, PCGS# 7728

- 4572** 1846-O AU55 NGC. **Variety 1.** The O mintmark nearly touches the claw, as usual. A total of 62,000 quarter eagles were struck at the New Orleans Mint in 1846. This Choice AU representative has deep olive-gold color that lightens around the design elements, where original luster remains. Typically defined. NGC ID# 25H4, PCGS# 7743

- 4573** 1847 AU58 NGC. From a mintage of 29,800 pieces, the 1847 Liberty quarter eagle is scarce in all grades today. This attractive near-Mint example exhibits lightly abraded lemon-yellow surfaces that retain much of their original mint luster. Census: 43 in 58, 23 finer (12/18). NGC ID# 25H5, PCGS# 7744

- 4574** 1849-D VF35 PCGS. **CAC. Variety 11-N.** The present lot is one of just two VF35 examples with a CAC seal. It is a green-gold and orange piece with partial curl and plumage definition. No marks are of any interest, and hints of luster fill the legends and outline the motifs. A challenging Dahlonga issue with a mintage of just 10,945 pieces.

Ex: Central States Signature (Heritage, 4/2016), lot 5673, which realized \$2,585. NGC ID# 25HR, PCGS# 7754

- 4575** 1852 MS64+ PCGS Gold Shield. Gold coin production at the Philadelphia Mint took off in the early 1850s. In 1852, more than 1.1 million quarter eagles were struck. A number of die cracks appear near the upper stars. The obverse is yellow-gold, while the reverse is a deeper shade of orange-gold. Fully struck with small abrasions. Population: 53 in 64 (4 in 64+), 16 finer (12/18). NGC ID# 25HR, PCGS# 7763

- 4576** 1854 MS64 PCGS Gold Shield. Although the mintage of 596,258 quarter eagles at Philadelphia in 1854 is seemingly substantial, this is an important condition rarity that is elusive in any grade finer than MS63. The present coin has brilliant yellow luster and sharp design details, creating excellent eye appeal. Population: 35 in 64 (1 in 64+), 10 finer (12/18). NGC ID# 25HX, PCGS# 7769

- 4577** 1856 MS63 PCGS. This attractive Select specimen is sharply detailed on the obverse, but the reverse shows some of the usual softness on the eagle's leg and some clash marks in the field. The orange-gold surfaces are lustrous and lightly marked. Population: 44 in 63 (1 in 63+), 31 finer (12/18). NGC ID# 25J7, PCGS# 7777

- 4578** 1861 Old Reverse, Type One, AU53 PCGS. The three arrowheads are joined together on the Old Reverse style with the transition occurring from 1859 until 1861. The old reverse is scarcer for all three issues from the Philadelphia Mint. This piece has scattered marks on its light yellow surfaces. NGC ID# 25JX, PCGS# 97794

- 4579 1861 New Reverse, Type Two, MS63 PCGS Gold Shield.** Long, thin arrows identify the plentiful Type Two — New Reverse variety. Clashing occurs in the fields around the central design elements, which are boldly detailed. The strike softens a bit around the margins. A highly lustrous yellow-gold example with minor field chatter. NGC ID# 25JX, PCGS# 7794
- 4580 1861 New Reverse, Type Two, MS63 PCGS. CAC.** This is the usual variety for the date with a round O in OF and thin, widely spaced arrowheads. Warm yellow-gold surfaces exhibit frosty luster, strong detail, and few marks for the Select Uncirculated grade. A lovely original example with CAC approval. NGC ID# 25JX, PCGS# 7794
- 4581 1861 New Reverse, Type Two, MS63 NGC. CAC.** The thin, separated arrow heads identify the New Reverse. This attractive Select specimen exhibits well-detailed design elements, with some of the usual softness on the stars. The lustrous yellow and rose-gold surfaces are lightly marked and appealing. NGC ID# 25JX, PCGS# 7794
- 4582 1863-S VG8 PCGS. LIBERTY** is full and a few hair and feather details remain visible on the completely outlined devices of this attractive rarity. Only a small percentage of the 10,800 minted coins survive today. NGC ID# 25K3, PCGS# 7799
- 4583 1872-S AU58 PCGS.** An important condition rarity in the Liberty quarter eagle series, this 1872-S survives from a mintage of only 18,000 coins. Faint hairlines are evident on the light yellow-gold surfaces of this sharply defined quarter eagle. Population: 17 in 58 (1 in 58+), 9 finer (12/18). NGC ID# 25KL, PCGS# 7816
- 4584 1894 MS63 Prooflike NGC. CAC.** A sensational Select Mint State piece, this low mintage 1894 quarter eagle has brilliant yellow surfaces with fully prooflike fields and exceptional eye appeal. This important date is rare with mirrored surfaces. Census: 3 in 63 Prooflike, 3 finer (12/18). NGC ID# 25LJ, PCGS# 77846
- 4585 1898 MS66 PCGS Gold Shield.** The run of Liberty quarter eagle dates from 1880 through 1899 had mintages that never exceeded 30,000 coins in any year, and there were no branch mint issues during that period. The Philadelphia Mint coined 24,000 circulation strikes in 1898. This Premium Gem survives in pristine condition from that coinage production, and features a full strike with frosty light yellow gold surfaces and brilliant luster. Population: 52 in 66 (4 in 66+), 14 finer (12/18). NGC ID# 25LN, PCGS# 7850
- 4586 1904 MS67 NGC. CAC.** This spectacular Superb Gem exhibits sharply detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster on both sides. NGC has graded eight numerically finer examples (12/18). NGC ID# 25LV, PCGS# 7856
- 4587 1905 MS66+ PCGS. CAC.** The Philadelphia Mint was the only facility that coined Liberty quarter eagles from 1880 through the end of the design in 1907, and the 1905 had the second highest mintage of any issue during that period, yet only 217,800 were coined. This Premium Gem exhibits brilliant and frosty yellow-gold luster, pristine surfaces, and sharp design definition. NGC ID# 267S, PCGS# 7857
- 4588 1907 MS67 PCGS Gold Shield.** The 1907 Liberty quarter eagle is an available issue in high grade and an excellent choice for type purposes. This sharply detailed Premium Gem exhibits virtually flawless orange-gold surfaces with vibrant mint luster and terrific eye appeal. One coin is graded finer at PCGS (12/18). NGC ID# 2688, PCGS# 7859

PROOF LIBERTY QUARTER EAGLES

1900 Two and a Half, PR61 Affordable, Entry-Level Example

- 4589 1900 PR61 PCGS. CAC.** The mintage for this turn-of-the-century year was 205 pieces. Examples can usually be located with some searching as an estimated 100 pieces are believed extant today. But this piece represents an unusual opportunity for the collector since the coin is in a relatively low grade and thus, more affordable (compared to other proof gold). The fields are brightly reflective and the rims squared off. There are, however, a number of small contact marks on each side and haziness in the fields, explaining the PR61 grade. A piece worthy of consideration for the collector wanting an entry-level piece of proof gold. NGC ID# 288P, PCGS# 7926

1900 Quarter Eagle, PR61 Cameo Attractive for the Grade

- 4590 1900 PR61 Cameo NGC.** A pleasing lower-end proof quarter eagle, showcasing outstanding cameo contrast and bright yellow-gold color. The strike is needle-sharp. Hairlines and a few light marks limit the numeric grade, but they are not overly obtrusive. The 1900 proof is popular as a type coin, and affordable pieces are always in demand. NGC ID# 288P, PCGS# 87926

1905 Two and a Half, PR58 Collector-Grade Proof

- 4591 1905 PR58 PCGS Gold Shield.** A pleasing collector-grade proof quarter eagle, showing glimmers of mirroring in the fields and sharp design elements. Handling friction on each side is all that prevents a finer grade, leaving this orange-gold proof with pleasing eye appeal. Proof Liberty quarter eagles of any date are rarely offered in this condition, where casual type collectors can acquire a piece. NGC ID# 7KG5, PCGS# 7931

**1906 Quarter Eagle, PR61
Affordable Quality**

- 4592 1906 PR61 PCGS.** Approximately two-thirds of the 160 proof quarter eagles struck in 1906 are still extant in various grades. This is one of the more affordable examples. The fields show undeniably deep proof reflectivity, even through light hairlines (which undoubtedly accounts for the grade). A few other shallow marks are seen on the obverse, but almost none are noted on the reverse. NGC ID# 288W, PCGS# 7932

INDIAN QUARTER EAGLES

- 4593 1908 MS64 PCGS Gold Shield. CAC.** Satiny straw-gold luster engulfs this near-Gem, revealing few noticeable abrasions. The strike is sharp on the headdress feathers, and softness on the eagle's wing is due to incomplete engraving of the hub, not inadequate die pressure. The CAC endorsement is seen on a minority of 1908 Indian Head quarter eagles. NGC ID# 288Y, PCGS# 7939
- 4594 1908 MS65 NGC.** This spectacular Gem exhibits well-detailed design elements, with just a trace of softness on the eagle's shoulder, and well-preserved orange-gold surfaces with vibrant mint luster on both sides. Eye appeal is outstanding. NGC ID# 288Y, PCGS# 7939
- 4595 1909 MS64 PCGS.** An attractive Choice example of this popular issue, with sharply detailed design elements and vivid orange-gold surfaces that radiate vibrant mint luster on both sides. Only minor signs of contact are evident. NGC ID# 288Z, PCGS# 7940
- 4596 1909 MS64 PCGS Gold Shield.** This Philadelphia quarter eagle issue remains collectible through MS64, but its population declines significantly in MS65. Premium Gems are scarce. A razor-sharp strike, honey-gold color, and glittering luster contribute to the overall appeal. Well-preserved. NGC ID# 288Z, PCGS# 7940
- 4597 1909 MS64 PCGS Gold Shield.** The well-preserved orange-gold surfaces of this attractive Choice example display vibrant mint luster throughout, with a single dark alloy spot at 4 o'clock on the obverse rim. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 288Z, PCGS# 7940

**1909 Quarter Eagle, MS65
Marvelous Quality**

- 4598 1909 MS65 PCGS Gold Shield. CAC.** Gem condition is the highest accessible grade level for the 1909 quarter eagle. This example displays marvelous quality for the grade and is endorsed by CAC for that very reason. Glittering mint frost, warm orange-gold color, and a razor-sharp strike are hallmarks. A coin that will satisfy any discerning collector. PCGS reports 22 finer submissions (12/18). NGC ID# 288Z, PCGS# 7940

**1911-D Quarter Eagle, AU55
Diagnostic Partial Wire Rim**

- 4599 1911-D AU55 NGC.** The faint outline of a softly impressed mintmark confirms this is an example of the famous low-mintage key date, one of 55,680 pieces struck. A partial wire rim is also diagnostic. Yellow-gold surfaces exhibit well-struck, lightly worn motifs and shallow field marks. There are some faint hairlines and minor rim bumps, but nothing significant. NGC ID# 7KR7, PCGS# 7943
- 4600 1912 MS64 NGC.** The 1912 Indian quarter eagle becomes scarce in grades above the MS64 level. This attractive Choice specimen offers sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 7KR8, PCGS# 7944
- 4601 1912 MS64 PCGS.** Although a significant number of 1912 quarter eagles have earned the Choice Mint State (MS64) grade at PCGS and NGC, only 91 have received a higher numerical grade at PCGS (12/18). This frosty Mint State piece has excellent eye appeal with brilliant yellow surfaces. NGC ID# 7KR8, PCGS# 7944
- 4602 1912 MS64 PCGS.** The 1912 Indian quarter eagle is a collectible issue at the MS64 grade level, but finer examples are scarce. This attractive Choice specimen is sharply detailed and lustrous, with well-preserved orange-gold surfaces. NGC ID# 7KR8, PCGS# 7944
- 4603 1912 MS64 NGC. CAC.** A frosty near-Gem, this lovely Indian quarter eagle exhibits an excellent strike and pristine surfaces. A condition rarity, NGC has only certified 70 finer examples, and CAC has only approved 10 finer pieces (12/18). NGC ID# 7KR8, PCGS# 7944
- 4604 1914 MS63 NGC.** The semikey 1914 ranks second rarest in the series behind the 1911-D. The upper part of the headdress and the entire eagle show sharp detail. There is a bit of softness on the central and lower headdress. Orange-gold surfaces radiate softly frosted mint luster. NGC ID# 7KRA, PCGS# 7946

1914 Quarter Eagle, MS64
Attractive Orange-Gold Surfaces

4605 1914 MS64 NGC. The 1914 quarter eagle — the second most challenging issue in the series — is only marginally more available than the 1911-D. That is to say it is elusive in MS64 and scarce any finer. This well-struck representative enjoys scintillating mint luster and pleasing orange and rose-gold color. Each side is well-preserved. Just 50 pieces are finer at NGC (12/18). NGC ID# 7KRA, PCGS# 7946

4606 1914-D MS64 PCGS. Indian quarter eagles were produced at Philadelphia from 1908 through 1915, and again from 1926 to 1929, while the design was also coined in Denver in 1911, 1914, and 1925. Only the second and third Denver issues are reasonably available in higher grades. This Choice Mint State example has frosty yellow luster and an excellent strike with strong eye appeal. NGC ID# 2899, PCGS# 7947

1915 Two and a Half, MS65
Frosty Original Luster

4607 1915 MS65 PCGS. CAC. This frosty Gem displays lovely rose-gold luster with none of the usual field marks that are seen at lower grades. Well-struck design elements further heighten the appeal. The 1915 is occasionally available in this grade, but PCGS reports only six finer submissions (12/18). NGC ID# 7KRC, PCGS# 7948

THREE DOLLAR GOLD PIECES

4608 1854 AU58 PCGS. The first year of issue for the denomination is also a one-year subtype with small letters in DOLLARS. This near-Mint representative exhibits frosty straw-gold luster and only a trace of rub on the high points as expected for the grade. NGC ID# 25M3, PCGS# 7969

4609 1854-O — Cleaned — NGC Details. XF. Variety 2. Variety 2 represents the lapped die state of the sole 1854-O die marriage. This example of the issue is well-detailed and has smooth olive-gold surfaces, save for an old dimple on Liberty's chin. Hairlines betray an old cleaning, although the coin remains attractive in-hand. NGC ID# 25M5, PCGS# 7971

4610 1855-S VF30 PCGS. This die pair was used to manufacture all 6,600 business strike and the unique proof. With high-end examples being generally out of reach, this VF30 representative is a perfect collector-grade coin. The legends are strong, and each side shows rich red-gold color. A mark between the chin and the U identifies this piece. NGC ID# 7K5D, PCGS# 7973

4611 1855-S XF40 NGC. Smooth, problem-free surfaces display a blend of olive-gold and orange hues on this lightly circulated S-mint coin. The 1855-S three dollar gold piece boasts a mintage of only 6,600 pieces. Mint State coins are rare, but attractive circulated pieces such as this are obtainable. NGC ID# 7K5D, PCGS# 7973

1856-S Three Dollar, AU55
Green CAC Sticker

4612 1856-S AU55 PCGS Gold Shield. CAC. Scarce Small S variety. Approximately 15% of the surviving population of 450 to 575 coins feature this mintmark. Bowers writes that many are "found in lower grades." This is an attractive, minimally circulated example with partial luster. Strike detail is strong over the lightly abraded yellow-gold surfaces. A popular branch mint issue from a production of 34,500 coins. NGC ID# 25M9, PCGS# 7975

4613 1857 AU50 PCGS. Some light wear is evident on the design elements of this impressive AU specimen, but most interior detail remains intact. The lightly abraded orange-gold surfaces show a few traces of original mint luster. NGC ID# 7K5G, PCGS# 7976

4614 1857 AU53 NGC. Only light wear shows on the high points of the design elements and this impressive AU53 three dollar gold piece exhibits lightly abraded orange-gold surfaces that retain traces of original mint luster. From a mintage of 20,891 pieces. NGC ID# 7K5G, PCGS# 7976

4615 1857-S XF40 NGC. Bowers and Winter estimate 160 to 225 circulated examples of the 1857-S survive, plus three or four in Mint State from a production of 14,000 pieces. Spots of deep gunmetal color appear occasionally within the lettering, but the rest of each side is light yellow-gold. Strongly detailed despite obvious blending. NGC ID# 7K5H, PCGS# 7977

4616 1862 XF40 PCGS. This attractive XF specimen exhibits some light wear on the well-detailed design elements, but the lightly abraded orange-gold surfaces retain traces of original mint luster in sheltered areas. Housed in a green label holder. NGC ID# 7K5P, PCGS# 7983

1863 Three Dollar Gold, XF45
Outstanding Color and Surfaces

4617 1863 XF45 PCGS Gold Shield. A collector-grade Choice XF example of this scarce Philadelphia issue, surviving from a mintage of only 5,000 pieces. The smooth, problem-free surfaces have rich orange-gold color and produce strong eye appeal for the grade. This issue is scarce in high grade, having been issued during a period when low-mintage three dollar gold pieces were not widely saved for numismatic purposes, as was the case in the 1880s. NGC ID# 7K5R, PCGS# 7984

4618 1869 AU53 NGC. Probably fewer than 20% of the 2,500 three dollar coins struck in 1869 survive. That amounts to roughly 500 coins, although PCGS and NGC show fewer than 400 submissions. Lightly hairlined with scattered marks, this AU53 example shows strong detail, especially on the reverse. Red-gold accents. NGC ID# 25MR, PCGS# 7990

4619 1871 VF30 NGC. With a low mintage of 1,300 coins, the 1871 is a difficult issue to locate in any condition. This is a collector-grade example that saw a surprising amount of circulation, though it may have been carried as a pocket piece. The high points of the portrait and wreath are worn, but good detail remains over the reddish-gold surfaces. NGC ID# 25MU, PCGS# 7993

4620 1878 AU58 PCGS. Brilliant honey-gold luster is evident on both sides, masked by faint blue toning and splashes of vibrant rose patina along part of the obverse border, creating a dramatic appearance. An excellent type set candidate. NGC ID# 25MZ, PCGS# 8000

4621 1878 AU58 PCGS. An attractive near-Mint representative of this popular type issue, with just a trace of friction on the high points of the design. The lightly abraded reddish-gold surfaces retain traces of original mint luster. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, MS63 Lustrous Type Coin

4622 1878 MS63 PCGS. CAC. From a mintage of 82,304 pieces, the 1878 three dollar gold piece is an available issue (in the context of the series) and a popular choice of type collectors. This attractive Select specimen exhibits lightly marked yellow-gold surfaces with especially vibrant mint luster on both sides. The design elements are well-detailed, with a touch of the typical softness on the ribbon knot. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar, MS64 Scintillating Peach-Gold Example

4623 1878 MS64 PCGS. No other date in the three dollar series is better suited to represent this popular type. The 1878 was struck to the extent of 82,304 coins, many of which were never distributed for commerce. This scintillating near-Gem has frosty peach-gold surfaces and a lack of severe abrasions. Well-struck overall with a few areas of trivial softness. Housed in a green label holder. NGC ID# 25MZ, PCGS# 8000

4624 1879 AU53 PCGS Gold Shield. Only 3,000 pieces were manufactured, but this remains a collectible date in the absolute sense. Semireflective orange-gold surfaces display moderate friction and wispy, inoffensive hairlines. The date and denomination are bold, as are the headdress elements. NGC ID# 25N2, PCGS# 8001

4625 1879 MS62 NGC. An attractive MS62 specimen, with sharply detailed design elements and lightly marked canary yellow surfaces that show a mix of vibrant mint luster and prooflike reflectivity. From a mintage of 3,000 pieces. NGC ID# 25N2, PCGS# 8001

1882 Three Dollar Gold, AU55 Attractive Coloration

4626 1882 AU55 PCGS Gold Shield. Only 1,500 three dollar gold pieces were struck for circulation in 1882. This issue was well-saved by contemporary collectors, making it accessible in most grades today. This Choice AU piece displays a sharp strike and slightly reflective fields. Rose-gold and tangerine coloration on each side accompanies a brush of high-point wear on the devices. NGC ID# 25N5, PCGS# 8004

EARLY HALF EAGLES

1805 BD-1 Half Eagle, AU Details

4627 1805 BD-1, High R.3 — Mount Removed — NGC Details. AU. This former jewelry piece has considerable evidence of repair from a mount that was removed. The edge reeding is flat at 10:30, and hairlines and scratches are visible at the upper left obverse, and on the reverse. There are also Mint adjustment marks at the upper right reverse. The surfaces are bright yellow with traces of orange, likely from heat applied during the repair process. The budget-conscious collector should find this coin appealing.

1806 BD-6 Half Eagle, AU Details Knobbed 6, 7x6 Stars

4628 1806 Knob 6, 7x6 Stars, BD-6, R.2 — Smoothed — PCGS Genuine. AU Details. The Knobbed or Round-Top 6 in the date is diagnostic for this variety, the most plentiful die marriage in the Draped Bust series of half eagles. Some Mint-caused adjustment marks are evident at the shield. The surfaces on both sides have been carefully tooled, creating a matte-like appearance on the yellow-gold surfaces, resulting in an unnatural sheen.

**1808/9 BD-1 Half Eagle, AU Details
Popular Low-Mintage Overdate**

- 4629** 1808/8 BD-1, High R.3 — Improperly Cleaned — NGC Details. AU. Bass-Dannreuther Die State a/b. Clashed reverse. The 1809/8 is always a popular issue with collectors — an early five dollar gold piece with a low official mintage of 33,875 coins, all of which feature a reported overdate. Dannreuther suggests the actual number of pieces struck may be as low as 20,000. This yellow-gold example is well-detailed with minimal high-point blending. However, the surfaces are bright from cleaning and show numerous hairlines. The artifact between the knob and loop of the 9 is clear.

**1811 Half Eagle, XF45 Details
Small 5, BD-2**

- 4630** 1811 Small 5, BD-2, R.3 — Mount Removed, Repaired, Whizzed — ANACS. XF45 Details. Bass-Dannreuther Die State d/a. A hairlined caramel-gold example that shows signs of smoothing on the left obverse field. Evidence of a former mount is elusive, though possible solder remnants are present within the dentils between stars 2 and 3. A collectible example of a challenging early gold type. NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

CLASSIC HALF EAGLES

- 4631** 1835 AU55 PCGS Gold Shield. Breen-6504, McCloskey 1-A, R.2. First Head. An early die state coin, without clash marks. The L in LIBERTY is boldly repunched on this variety, a Block 8 issue suitable for type purposes. This Choice AU coin is sharp and lustrous with natural yellow-gold color. Moderate surface chatter appears to be the chief preventative of a Mint State designation. NGC ID# 25RV, PCGS# 8173
- 4632** 1836 AU55 NGC. Breen-6509, McCloskey 6-E, R.4. Second Head, Large Date. A scarce die pair noted for its bold vertical obverse die crack from the ear to 6 o'clock. This original dusky peach-gold Classic five is refreshingly unmarked and displays only moderate wear. NGC ID# 25RY, PCGS# 8174

**1836 Half Eagle, Strong MS61
Bright Yellow-Gold Type Coin**

- 4633** 1836 MS61 NGC. Breen-6509, McCloskey 4-D, R.2. Second Head, Large Date. This is a perfect Classic Head, No Motto half eagle for type purposes. The 1836 claims a mintage of 553,147 pieces and is accessible through lower Uncirculated grade levels. This strong example presents bright yellow-gold surfaces with flashes of mint luster and original "crust" around the devices. Hairlines in the field explain the MS61 assessment, but they do not distract. NGC ID# 25RY, PCGS# 8174

**1838 Five Dollar, Near-Mint
Large Arrows, Small 5**

- 4634** 1838 AU58 NGC. CAC. Breen-6514, McCloskey 1-A, R.2. The Large Arrows, Small 5 variety. Only two marriages are known despite a sizeable reported mintage. A well-struck green-gold representative without any reportable abrasions. Luster dominates the borders and devices. Final year of the Classic type. CAC: 21 in 58, 18 finer (12/18). NGC ID# 25S4, PCGS# 8176

LIBERTY HALF EAGLES

- 4635** 1843 MS61 NGC. Always a popular No Motto issue from the 1840s because of its accessibility in high grades. A few splashes of violet color appear over this largely reddish-gold Mint State representative. Mint luster is bright within the design recesses. The exposed areas show small marks and hairlines. Bold at the centers. NGC ID# 94FD, PCGS# 8213
- 4636** 1843-C — Cleaned — NGC Details. AU. Variety 1. The scarcer of two die varieties. This piece has the appearance of the so-called "salt water" pieces, although recent discoveries have proven that the salt water likely didn't affect the appearance of treasure coins. The lightly cleaned surfaces exhibit a matte-like appearance from myriad microscopic marks. NGC ID# 429H, PCGS# 8214
- 4637** 1843-O Small Letters XF45 PCGS Gold Shield. Variety 2. There are two identified varieties of the 1843-O Small Letters half eagles, and one variety for the Large Letters variant. This Choice XF piece has scattered, grade-consistent marks on wheat-gold surfaces. NGC ID# 25T5, PCGS# 8217

**1844-C Half Eagle, Choice VF
Great Eye Appeal for the Grade**

4638 1844-C VF35 NGC. CAC. Variety 1. Doug Winter estimates 125 to 175 examples of the 1844-C survive, an issue he calls “among the scarcest half eagles from this mint.” A relatively generous total of 23,631 pieces were struck, but they saw extensive circulation in local commerce. This Choice VF representative is wonderfully appealing and strongly detailed for the grade with luster remaining within the protected areas. Small marks and blending are expected. CAC: 3 in 35, 8 finer (12/18). NGC ID# 25T8, PCGS# 8220

4639 1844-D XF40 PCGS Gold Shield. Variety 11-G. The top of the 1 is repunched on this variety. A plentiful issue from a mintage of nearly 90,000 coins, the 1844-D half eagle is an excellent choice for the collector that wants to add this Mint to a type set. This piece is nicely defined with scattered marks on its light greenish-gold surfaces. NGC ID# 25T9, PCGS# 8221

4640 1845-D VF35 PCGS Gold Shield. Variety 13-H. Lemon-gold accompanies protected areas, while the high points and open fields exhibit steel-blue tints. Less abraded than usual for the Choice VF level, and traces of luster linger in design crevices. The curls, fletchings, and eagle’s neck are lightly brought up, customary for this Dahlonega type issue. NGC ID# 25TC, PCGS# 8224

4641 1846-D XF40 PCGS. Variety 15-H. The 1846-D Liberty half eagle, with the Normal Mintmark, is one of the most challenging issues of the series in high grade. This impressive XF specimen is lightly worn and lightly abraded, with pleasing orange-gold surfaces that retain traces of original mint luster. Population: 20 in 40, 79 finer (12/18). NGC ID# 25TH, PCGS# 8228

4642 1846-D/D XF45 NGC. Variety 16-J. Although undesignated as such on the NGC insert, this is the “High Second D Over Mintmark” *Guide Book* variety, among the most prominent repunched mintmarks of the Federal gold series. A caramel-gold example with ample remaining luster within the curls, plumage, and legends. Mentionable marks are limited to a pair of thin lines on the eagle. NGC ID# 25TH, PCGS# 8229

4643 1848-C VF35 NGC. Variety 1. A honey-gold Charlotte Mint type coin. The curls are indistinct, but the wings exhibit pleasing plumage definition. Less abraded than is customary for the Choice VF level, though we note a flaw on the reverse rim near the second A in AMERICA. NGC ID# 25TT, PCGS# 8237

**1850-C Half Eagle, AU55+
Variety 3, Bold Mintmark**

4644 1850-C AU55+ NGC. Variety 3. While some 1850 Charlotte half eagles have extremely weak or nearly invisible mintmarks, popular examples like this one have a bold, clearly visible mintmark. This nicely detailed example has pleasing green-gold surfaces and minimal handling marks for the grade. Census: 33 in 55 (2 in 55+★), 35 finer (12/18). NGC ID# 25TZ, PCGS# 8244

4645 1851-D XF45 NGC. Variety 31-V. The 1 in the date is free from the bust tip, and the Strong D mintmark touches the branch stem. Out of the 62,700 half eagles struck at the D-mint in 1851, certainly fewer than 200 pieces are believed to survive. This lightly circulated pale gold example has moderately reflective fields, typically unevenly struck devices, and scattered ticks. NGC ID# 25U8, PCGS# 8248

4646 1852-D XF40 NGC. Variety 32-V. The 1852-D is among the most plentiful Dahlonega half eagles, popular among collectors seeking a single, affordable coin from this mint. The piece offered here has smooth olive-gold surfaces and no major abrasions. Considerable strike weakness around the borders obscures the dentils, a characteristic that is a mainstay of the 1852-D. NGC ID# 25UC, PCGS# 8252

**1853-D Half Eagle, XF45
Popular Dahlonega Issue**

4647 1853-D XF45 NGC. Variety 34-X. An apricot-gold Dahlonega type coin. The microgranular surfaces are only lightly abraded, though the left obverse field displays a thin line. The mintmark is entered further west than usual, primarily over the V in FIVE. Misaligned dies causes a much sharper strike on the right borders than on left-side elements. The curls, fletchings, and eagle’s neck are also lightly impressed, as made. NGC ID# 25UF, PCGS# 8255

**1854-D Large D Half Eagle, AU53
Well-Struck Dahlonega Representative**

4648 1854-D Large D AU53 NGC. **Variety 36-AA.** The mintmark exhibits slight repunching. With possibly more than 600 examples extant from a mintage of 56,413 coins, the 1854-D is firmly established as one of the most plentiful Dahlonega half eagles. This rich yellow-gold example displays an impressive strike on the stars, curls, feathers, talons, and olive leaves. Minimally abraded. NGC ID# 25UK, PCGS# 8258

4649 1854-O AU55 NGC. **Variety 3.** A previously unknown obverse shows the date positioned left and the 1 touching the neck truncation. The reverse is the same as Variety 1 with the mintmark low and left. The New Orleans Mint coined 46,000 half eagles in 1854. About 225 to 275+ pieces are known. Luster remains throughout the minimally abraded, yellow-gold surfaces. Relatively well-defined for a circulated O-mint coin from this period. NGC ID# 25UM, PCGS# 8259

4650 1859-S — **Cleaned** — NGC Details. **XF.** The 1859-S is inherently rare, boasting a mintage of only 13,220 pieces. PCGS estimates that fewer than 100 survivors are known in all grades. This lightly circulated piece has been cleaned in the past, but it is otherwise attractive with olive-gold patina and good detail. No significant abrasions are seen. NGC ID# 25VE, PCGS# 8283

4651 1860-C — **Cleaned** — NGC Details. **XF. Variety 1.** Only one die pair is known for this elusive Charlotte issue. The reverse was improperly annealed, with the result that all 1860-C half eagles have blurry detail on the eagle. Fewer than 200 examples of this issue likely survive. This lightly circulated coin has smooth olive-gold surfaces and pleasing eye appeal. An old cleaning is detected with a loupe. NGC ID# B2AC, PCGS# 8285

4652 1860-D Large D — **Cleaned** — NGC Details. **XF. Variety 46-EE.** This rare 1860-D half eagle variety shares its obverse with the other Large D variety, but on the reverse the mintmark is detached from the branch stem. This is a lightly circulated example with minor strike weakness apparent on the eagle's neck and legs and on the hair curls around Liberty's face. Obviously cleaned, but with remarkably smooth surfaces. NGC ID# 25VH, PCGS# 98286

4653 1861 MS62 NGC. The 1861 half eagle is among the most plentiful No Motto issues of this denomination, making it popular for type purposes. The present coin is Uncirculated, although scattered abrasions limit the numeric designation. Softness is seen on stars 1 and 13, although the remainder of each side is well-defined. Original straw-gold surfaces yield hints of peach and orange coloration. NGC ID# 25VK, PCGS# 8288

**1863-S Five Dollar, AU Details
Low-Mintage, High-Attrition Issue**

4654 1863-S — **Reverse Scratches** — NGC Details. **AU.** Like most gold pieces struck in the San Francisco Mint in the 19th century, the 1863-S five dollar was extensively used in the channels of commerce. So even though the mintage was a smallish 17,000 pieces, examples are just not likely to be encountered in anything approaching high grade and usually not with problem-free surfaces. This is a coin that presents well when only the obverse is viewed, but a number of shallow scratches are seen in the field above the eagle's head. Deeper reddish-gold patina covers each side with the occasional glimpse of luster around the devices.

**1875-CC Five Dollar, VF30
Elusive Carson City Issue**

4655 1875-CC VF30 PCGS Gold Shield. **Variety 2-C.** Smoothly worn with buff-gold coloration, this scarce 1875-CC is possibly one of a few circulated examples that emerged in the mid-1990s. The issue remains scarce from a mintage of 11,828 pieces — most of which circulated in the West. While the 1875-CC has a reputation for weak strikes, this piece shows only the expected wear for a mid-level VF coin. Pleasing surfaces emit glints of bright gold. Most abrasions and marks are muted by wear, with a short, angled cut below the mintmark, which is of little concern for the assigned grade. Population: 10 in 30, 49 finer (12/18). NGC ID# CFHH, PCGS# 8337

**1881 Half Eagle, MS65+
Two Coins Finer at PCGS**

4656 1881 MS65+ PCGS Gold Shield. More than 5.7 million half eagles were struck at the Philadelphia Mint in 1881. The issue is generally considered a type coin, but it is scarce in MS65 and rare any finer. Glistening peach-gold surfaces maintain clean fields and show good detail on the motifs. A single tick on the chin is seen. Population: 25 in 65 (1 in 65+), 2 finer (12/18). NGC ID# 25XD, PCGS# 8354

**1882-CC Half Eagle, AU55
Variety 1-A, The Only Dies**

- 4657 1882-CC AU55 NGC. CAC. Variety 1-A.** The 1882-CC Liberty half eagle is an available date, from a mintage of 82,817 pieces, all coined from a single die pair, although others may be awaiting discovery. This Choice AU example exhibits well-detailed design elements and trivial handling marks on its lustrous yellow-gold surfaces. NGC ID# 25XH, PCGS# 8359
- 4658 1885-S MS65 NGC.** Strong stars and bold detail on the eagle are indicative of a crisp overall impression. Mint frost glows from each side of this peach-gold Gem. There are a few minuscule field grazes, but not much else. NGC has seen 13 finer representatives (12/18). NGC ID# 2Y7X, PCGS# 8368
- 4659 1887-S MS64+ PCGS.** A pleasing Choice Mint State example of this conditionally rare issue as the PCGS population shows. This piece has brilliant lemon-yellow surfaces with scattered, grade-limiting marks. Excellent eye appeal. Population: 66 in 64 (4 in 64+), 4 finer (12/18). NGC ID# 25XW, PCGS# 8371
- 4660 1890-CC AU58 NGC. Variety 1-A.** Only a trace of wear shows on the well-detailed design elements of this attractive near-Mint specimen, and the lightly abraded orange-gold surfaces retain significant amounts of original mint luster. Only one die pair was used to strike the mintage of 53,800 pieces. NGC ID# C5XF, PCGS# 8376
- 4661 1891-CC AU58 NGC Details. Variety 1-A.** Two obverse dies and one reverse die were used to form two die marriages for the 208,000 coin mintage of 1891-CC half eagles. The mintage alone suggests the more varieties may be awaiting discovery. This near-Mint example retains nearly full luster on its rich honey-gold surfaces. NGC ID# 25Y5, PCGS# 8378

**1891-CC Five Dollar, MS62
Lustrous and Appealing for the Grade**

- 4662 1891-CC MS62 NGC. CAC. Variety 1-A.** In the late die state of this variety, with light peripheral cracks on each side. Bright yellow-gold luster illuminates sharp design elements, and grade-limiting abrasions are light and unobtrusive. The 1891-CC is an available Carson City issue, popular among collectors seeking a single coin from this mint. NGC ID# 25Y5, PCGS# 8378
- 4663 1893-O MS61 NGC. Variety 1.** A delicate die crack from the left border joins the 189 of the date, identifying this variety. This pleasing Mint State piece has above average design details, full luster, and minimal marks on its brilliant yellow surfaces. NGC ID# 25YC, PCGS# 8385

- 4664 1894 MS61 Prooflike NGC.** A sharply detailed Mint State example of this popular issue, with pleasing yellow-gold surfaces that show the expected number of minor contact marks and some chatter in the deeply reflective prooflike fields. NGC ID# 25YE, PCGS# 78387

**1901-S Five Dollar, MS66
Exceptional 20th Century Type Coin, CAC**

- 4665 1901-S MS66 PCGS. CAC.** Although always available from a mintage that exceeds 3.6 million pieces, the 1901-S becomes scarce at the Premium Gem level and rare any finer. This razor-sharp MS66 carries CAC endorsement and nearly impeccable surface quality one can expect from the assigned grade. Frosted and well-balanced medium-gold color emits strong cartwheel luster and dazzling eye appeal. Population: 82 in 66 (10 in 66+), 3 finer. CAC: 27 in 66, 5 finer (12/18). NGC ID# 25YX, PCGS# 8404
- 4666 1902-S MS65+ NGC.** A sharp, high-end Gem example of this moderately plentiful San Francisco issue, an excellent type coin for collectors. Radiant orange-gold luster shows only a few tiny, scattered marks when viewed beneath a loupe. Finer 1902-S half eagles are scarce. NGC ID# 25YZ, PCGS# 8406
- 4667 1904-S MS63 NGC. CAC.** Bright yellow-gold luster engulfs this CAC-approved Select 1904-S half eagle. The strike is sharp and few abrasions are present. The 1904-S is a better date in Uncirculated condition, and it is rarely offered this fine. Only a handful of coins in this and better grades are CAC endorsed. Census: 12 in 63, 4 finer. CAC: 2 in 63, 3 finer (12/18). NGC ID# 25Z5, PCGS# 8410
- 4668 1908 MS65 NGC.** A strongly struck final-year Liberty half eagle, this yellow-gold Gem radiates rich, frosty mint luster from each side. Ideal for the 20th century gold type collector. The 1908 becomes scarce in higher grades.
From The Speechless Collection. NGC ID# 25ZE, PCGS# 8418

INDIAN HALF EAGLES

- 4669 1909-D MS64 PCGS.** The vivid orange-gold surfaces of this impressive Choice example are lightly marked, with vibrant mint luster throughout. The design elements are sharply detailed and eye appeal is strong. Housed in a green label holder. NGC ID# 28DJ, PCGS# 8514
- 4670 1911-D AU55 NGC.** Profound red-gold color provides wonderful eye appeal to this Choice About Uncirculated half eagle. High-point friction occurs on each side, as do scattered marks, and the mintmark is somewhat difficult to discern, but these do not affect the desirability of this low-mintage key date. NGC ID# 28DR, PCGS# 8521

1911-D Five Dollar, AU58
Conditionally Scarce Semikey

4671 1911-D AU58 NGC. After the 1909-O and 1929, both famous rarities, the 1911-D provides one of the greatest challenges in this half eagle series. Only 72,500 coins were struck, and anything is Mint State is scarce. This well-defined, minimally worn representative enjoys light yellow-gold surfaces with soft, satiny luster remaining. Tiny marks pose no distraction. NGC ID# 28DR, PCGS# 8521

4672 1912 MS64 PCGS. An impressive Choice example of this early series date, with well-detailed design elements and well-preserved, vivid orange-gold surfaces that radiate vibrant mint luster on both sides. Eye appeal is outstanding. NGC ID# 28DS, PCGS# 8523

4673 1913 MS64 PCGS. A highly lustrous Choice Mint State Indian half eagle, this example features an excellent strike with minimal marks on the lustrous light yellow-gold surfaces. PCGS has examined only 60 numerically finer examples (12/18). NGC ID# 28DT, PCGS# 8525

4674 1913 MS64+ PCGS. CAC. The 1913 Indian half eagle is collectible in MS64 condition, but finer coins are elusive. This Plus-graded Choice example is sharply detailed and lustrous, with well-preserved orange-gold surfaces. PCGS has graded 60 numerically finer examples (12/18). NGC ID# 28DT, PCGS# 8525

4675 1913 MS64+ PCGS. CAC. The 1913 Indian eagle becomes scarce in grades above MS64. This attractive Choice specimen is sharply detailed and lustrous, with well-preserved orange-gold surfaces. PCGS has graded 60 numerically finer examples (12/18). NGC ID# 28DT, PCGS# 8525

4676 1914 MS64 PCGS. The 1914 Indian half eagle is elusive in grades above the MS64 level. This attractive Choice example offers sharply detailed design elements and lustrous orange-gold surfaces. A few minor marks in the upper-right reverse field prevent an even higher grade. PCGS has graded 34 numerically finer examples (12/18). NGC ID# 28DU, PCGS# 8527

4677 1914-D MS63 NGC. The 1914-D is the final half eagle struck at the Denver Mint, an important consideration for type purposes. This orange and rose-gold Select specimen offers well-detailed design elements and lustrous surfaces that show the expected number of minor scuffs and contact marks. NGC ID# 28DV, PCGS# 8528

1914-D Half Eagle, MS64
Rarely Offered Finer

4678 1914-D MS64 NGC. Satiny yellow-gold luster has delicate rose tints on this near-Gem 1914-D Indian half eagle. The strike is sharp and few abrasions appear in the fields. The 1914-D is a slightly better date, although it is still collectible in MS64. Finer pieces are rare, with only 15 such coins certified at NGC (12/18). NGC ID# 28DV, PCGS# 8528

1915-S Half Eagle, MS61
Scarce in Mint State

4679 1915-S MS61 NGC. The 1915-S Indian half eagle is scarce in Mint State, coming from a mintage of only 164,000 pieces. This MS61 coin is ideal for the casual collector, and it is uncommonly appealing for the grade. The strike is moderately weak on the headdress feathers as usual, but lightly abraded surfaces have pleasing straw-gold color and luminance. NGC ID# 25ZR, PCGS# 8531

4680 1916-S MS61 PCGS Gold Shield. A deep purple alloy spot on the L in LIBERTY is the only such marking on this otherwise straw-gold half eagle. Detail is better on the eagle than it is on the headdress. The 1916-S (240,000 pieces) becomes challenging above the MS61-MS62 level NGC ID# 28DY, PCGS# 8532

4681 1916-S MS61 NGC. David Akers attributed the accessibility of the 1916-S in grades below MS63 to a hoard of 200 coins that surfaced during the latter half of the 20th century. Red-gold color and soft mint luster appear over each side. Well-struck with minor chatter and slight buckling around the reverse border. NGC ID# 28DY, PCGS# 8532

4682 1916-S MS62 PCGS Gold Shield. An excellent example for the grade, much more appealing than many of the 1916-S half eagles we have seen in MS62. This piece displays satiny orange-gold and tangerine luster, and grade-limiting surface contact is not obvious to the unaided eye. NGC ID# 28DY, PCGS# 8532

**1916-S Five Dollar, MS63
Luminous and Attractive**

- 4683 1916-S MS63 PCGS Gold Shield.** The 1916-S is the last issue in the Indian half eagle series, save for the 1929, which is a melt rarity. The 1916-S circulated some, and attractive Mint State survivors are scarce. This Select example displays satiny luster and well-struck design elements. The sun-gold color is original. NGC ID# 28DY, PCGS# 8532

LIBERTY EAGLES

- 4684 1842 Large Date AU55 NGC.** The Crosslet 4 in the date quickly identifies the Large Date variety, while the Small Date has a Plain 4. This is an important condition rarity in the early Liberty eagle series, and the present Choice AU example has hints of peripheral orange patina on its green-gold surfaces. Census: 36 in 55 (6 in 55+★), 23 finer (12/18). NGC ID# 262M, PCGS# 8584

**1844-O Ten Dollar, AU55
Collectible New Orleans Eagle**

- 4685 1844-O AU55 NGC. Variety 3.** A mintage of 118,700 coins and a survivorship of 300 to 350+ pieces makes the 1844-O one of the more collectible New Orleans No Motto tens. However, the issue can be elusive in this high grade. Green-gold surfaces maintain partial luster around the devices and show small, undistracting marks in the open fields. Each side is well-struck for the facility and minimally worn. NGC ID# 554G, PCGS# 8591

- 4686 1846-O/O FS-301, Variety 3, XF45 NGC.** The rare early die state, showing repunching on the top of the mintmark. The FS-301 attribution applies only to this die state — later states with the repunching lapped away are common. This coin has partial luster in the fields and well-detailed devices. Straw-gold surfaces exhibit moderate chatter, as usual for the issue. PCGS# 145724 Base PCGS# 8595

- 4687 1847-O XF45 PCGS. CAC.** This Choice XF specimen exhibits only light wear on the well-detailed design elements and the lightly abraded orange-gold surfaces display a few hints of lilac. Some die cracks and clash marks are evident. Housed in a green label holder. NGC ID# 2632, PCGS# 8598

- 4688 1847-O AU55 PCGS Gold Shield. Variety 7.** More than half a million 1847-O eagles were coined, utilizing eight die pairs. There are two distinct mintmark positions, left of the feather tip over the EN in TEN, or right of the feather tip over the N D of the denomination. This Choice AU representative has considerable luster remaining on its frosty green-gold surfaces with minimal marks on either side. NGC ID# 2632, PCGS# 8598

- 4689 1851-O AU53 NGC. Variety 1.** An original green-gold No Motto New Orleans type coin. Luster dominates the margins and motifs, and noticeable marks are limited to the right shield corner and the field near the ME in AMERICA. The ring atop the second vertical shield stripe is always present on this issue. NGC ID# 263B, PCGS# 8607

- 4690 1851-O AU55 NGC. Variety 2.** This attractive Choice AU specimen shows only light wear on the design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. The curls on Liberty's upper neck are complete and the date is low, identifying Variety 2. NGC ID# 263B, PCGS# 8607

- 4691 1851-O AU55 NGC. Variety 1.** A yellow-gold New Orleans No Motto type coin with ample luster throughout the legends and devices. Marks are relatively few, though we note an obverse rim nick at 9 o'clock. As is the case with all '51-O tens, a shield ring is present atop the second vertical stripe. NGC ID# 263B, PCGS# 8607

- 4692 1851-O AU55 PCGS Gold Shield. CAC. Variety 1.** Partial luster remains in the fields of this Choice AU coin, complementing rich lemon-gold coloration with olive overtones. The strike is sharp and only light surface chatter is apparent. The 1851-O ten is scarce so fine with CAC endorsement. CAC: 28 in 55, 23 finer (12/18). NGC ID# 263B, PCGS# 8607

**1853-O Liberty Eagle, AU55
Vivid Color, Vibrant Luster**

- 4693 1853-O AU55 PCGS Gold Shield. Variety 7.** A rare die variety with a radial crack through star 13 and a shield ring at the top of the second group of vertical stripes. From a mintage of 51,000 pieces, the 1853-O Liberty eagle is an available issue in the context of the series, but it is still rare in high grade. This attractive Choice AU specimen is well-detailed, lightly worn, and lightly abraded. The vivid orange-gold surfaces are lustrous and appealing. Population: 19 in 55, 24 finer (12/18). NGC ID# 263F, PCGS# 8612

**1858-O No Motto Ten Dollar, AU55
CAC-Approved, Partly Lustrous**

- 4694 1858-O AU55 NGC. CAC. Variety 1.** The estimated survival rate for the 1858-O ten dollar is about 1.5% to 2%, or 300 to 400 pieces from a mintage of 20,000 coins. Part of the issue's high-grade accessibility is the result of a hoard discovered in Jackson, Tennessee in 1985. Red-gold color includes attractive, overtly original greenish accents. Soft on the stars but well-defined on the curls and feathers. Luster remains. CAC: 6 in 55, 6 finer (12/18). NGC ID# 55GX, PCGS# 8626

4695 1859 AU53 NGC. From a mintage of 16,013 pieces, the 1859 Liberty eagle is an elusive issue in all grades today. This attractive AU53 example displays lightly abraded orange-gold surfaces and well-detailed design elements, with just a trace of wear. Census: 29 in 53, 69 finer (12/18). NGC ID# 263Z, PCGS# 8628

4696 1861 AU55 NGC. Rounded Bun subtype. The 1861 mintage is only a tiny fraction of the 1881, yet exceeds the combined production of all other Philadelphia ten dollar issues from the 1860s. This moderately abraded peach-gold Civil War example displays substantial luster. The lower stars are incompletely impressed, but the strike is generally good. NGC ID# 2647, PCGS# 8633

**1868-S Ten Dollar, AU53
Likely Fewer Than 100 Coins Extant**

4697 1868-S AU53 PCGS Gold Shield. What most collectors would consider to be a low mintage (only 13,500 coins) was actually one of the more substantial production totals during the 1860s. The 1868-S ten dollar is scarcely seen in any AU grade, unknown in Mint State, and probably fewer than 100 pieces survive in all. Yellow-gold surfaces show myriad abrasions, including a hit on the cheek, and a hint of semiprooflikeness in the fields. Better-struck at the centers than around the borders. Population: 11 in 53, 11 finer (12/18). NGC ID# 264P, PCGS# 8654

4698 1877-S AU53 NGC. From a small mintage of 17,000 pieces, the 1877-S Liberty eagle is scarce-to-rare in all grades. This lightly worn orange-gold example retains a few traces of original mint luster and shows only minor abrasions. Census: 30 in 53, 45 finer (12/18). NGC ID# 265H, PCGS# 8679

4699 1883 MS63+ NGC. CAC. This Plus-graded Select specimen is well-detailed and lightly marked, with lustrous orange-gold surfaces and outstanding eye appeal. The 1883 Liberty eagle is a condition rarity in finer grades. NGC has graded only three numerically finer examples (12/18). NGC ID# 2666, PCGS# 8699

4700 1888-O MS61 NGC. CAC. Variety 1. The lime-green and orange-gold surfaces are typically struck and lack mentionable abrasions. Mint-made roller marks pass through TES OF. A New Orleans issue with a low mintage of 21,335 pieces. Most survivors are concentrated in AU55 to MS62 grades. CAC: 14 in 61, 24 finer (12/18). NGC ID# 266L, PCGS# 8713

4701 1888-O MS61 NGC. CAC. Variety 1. A crisply struck and minimally marked New Orleans example. The reverse displays a few small freckles of peach patina. Two die marriages are known despite a very low mintage. About 80% of survivors are Variety 1, readily identified by spindly peripheral die cracks across both sides. CAC: 14 in 61, 24 finer (12/18). NGC ID# 266L, PCGS# 8713

4702 1891-CC — Cleaned — NGC Details. AU. Variety 1-A. Five different varieties of 1891-CC eagles are known, perhaps not surprising due to the 103,732-coin mintage. This piece has been lightly cleaned with hairlines and myriad surface marks visible under magnification. Otherwise, it is an attractive example with peripheral light orange toning. NGC ID# 266U, PCGS# 8720

4703 1891-CC AU58 NGC. Variety 2-B. A momentarily circulated pumpkin-gold example that boasts extensive luster and a sharp strike. Small marks are scattered, but they are fewer than anticipated, and none are of singular consequence. The most available Carson City issue, but always in demand from Old West type collectors. NGC ID# 266U, PCGS# 8720

4704 1891-CC AU58 NGC. Variety 1-A. A plentiful Carson City issue, collectible near-Mint condition. This piece displays lustrous surfaces despite a brush of friction over the devices. The strike is sharp and only a few light marks appear under scrutiny. NGC ID# 266U, PCGS# 8720

4705 1891-CC MS60 NGC. Variety 1-A. An impressive Mint State specimen of this popular branch mint type issue, with well-detailed design elements and pleasing orange-gold surfaces that are lightly marked for the grade. Much original mint luster remains intact. NGC ID# 266U, PCGS# 8720

**1891-CC Ten Dollar, MS62
Collectible Mint State Example**

4706 1891-CC MS62 NGC. Variety 1-A. A hint of reflectivity in the fields amplifies radiant cartwheel luster on this Mint State 1891-CC ten. The strike is sharp, and each side displays original honey-gold mint luster. Scattered abrasions on each side determine the grade. Finer examples of this popular Carson City issue are scarce. NGC ID# 266U, PCGS# 8720

**1891-CC Eagle, MS62+
Frosty Peach-Gold Surfaces**

4707 1891-CC MS62+ NGC. Variety 1-A. The second C in the mintmark under the feathertip identifies Variety 1-A. There is no better issue to represent the Carson City Mint for the ten dollar denomination than the 1891-CC. Frosty peach-gold surfaces boast strongly detailed motifs and minimal field chatter for the grade. The 1891-CC is plentiful through MS62 but becomes scarce any finer. NGC ID# 266U, PCGS# 8720

4708 1892-CC Triple Die Reverse, FS-801, VF35 PCGS. Variety 1-A. This lightly worn Choice VF specimen shows tripling on the reverse and the pleasing orange-gold surfaces are lightly abraded for the grade. The tripling is most easily seen on the motto IN GOD WE TRUST. NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

**1892-CC FS-801 Eagle, AU58
Tripled Die Reverse**

- 4709 1892-CC Tripled Die Reverse, FS-801, AU58 NGC. CAC.** Mostly pale canary-gold with touches of deeper yellow. Broad and flashy luster with only minor rub and scant evidence of friction. IN GOD WE TRUST is die tripled, according to NGC and the *Cherrypicker's Guide*, or die doubled according to PCGS. CAC: 18 in 58, 8 finer (12/18).
Ex: FUN Signature (Heritage, 1/2012), lot 6560, which realized \$1,955. NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

- 4710 1892-O MS61 PCGS Gold Shield. Variety 1.** The design elements of this impressive Mint State specimen are sharply detailed in most areas, with just the faintest hint of softness on some star centers. The lustrous peach-gold surfaces are lightly marked for the grade. NGC ID# 266X, PCGS# 8723
- 4711 1893-O MS61 PCGS. Variety 1.** The only die pair identified for the 17,000 1893-O eagles minted in Louisiana. This pleasing Mint State piece is housed in a green-label PCGS holder and exhibits wisps of blue overtones on its honey-gold surfaces with minimal marks for the grade. NGC ID# 2673, PCGS# 8727
- 4712 1893-O MS62 PCGS.** From a mintage of 17,000 pieces, the 1893-O Liberty eagle is seldom encountered above the MS62 grade level. This attractive specimen offers well-detailed design elements and lustrous orange-gold surfaces with the expected number of minor contact marks for the grade. PCGS has graded 13 numerically finer examples (12/18). NGC ID# 2673, PCGS# 8727
- 4713 1898-S MS63 PCGS.** From a mintage of 473,600 pieces, the 1898-S Liberty eagle is surprisingly elusive in high grade. This attractive Select example exhibits sharply detailed design elements and lustrous, lightly marked orange-gold surfaces. Population: 45 in 63, 11 finer (12/18). NGC ID# 267H, PCGS# 8741
- 4714 1899 MS64+ PCGS. CAC.** The 1899 Liberty eagle is readily collectible at the MS64 grade level, but finer coins are elusive, making this Plus-graded Choice example a good balance of quality and value. This sharply detailed, lustrous example exhibits lightly marked orange-gold surfaces, with outstanding eye appeal. NGC ID# 267J, PCGS# 8742
- 4715 1899-S MS63 PCGS.** An impressive Select specimen of this popular turn-of-the-century issue, with well-detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster on both sides. Population: 82 in 63 (2 in 63+), 23 finer (12/18). NGC ID# 267L, PCGS# 8744
- 4716 1901-S MS64+ PCGS. CAC.** This Plus-graded Choice example exhibits sharply detailed design elements and vibrant mint luster on both sides. The pleasing orange-gold surfaces show only minor signs of contact and eye appeal is outstanding. NGC ID# 267S, PCGS# 8749

**1901-S Eagle, MS66
Radiant Cartwheel Luster**

- 4717 1901-S MS66 NGC.** With 2.8 million coins manufactured, the 1901-S is a quintessential With Motto issue for type purposes. Examples can be found through MS66, though anything finer is rare. Cartwheel mint luster radiates over warm yellow-gold surfaces, and the strike is nearly complete. Grazes and ticks are utterly insignificant. NGC reports 20 finer submissions (12/18). NGC ID# 267S, PCGS# 8749

**1904 Eagle, MS63 Prooflike
Sole Finest Certified**

- 4718 1904 MS63 Prooflike NGC.** NGC has graded six Prooflike submissions for the 1904 eagle: two in MS61, three in MS62, and this coin — the sole finest Prooflike representative (12/18). Both sides exhibit razor-sharp detail and dramatic orange-gold color with tremendous mirroring in the fields. Minor obverse chatter limits the grade. NGC ID# 267Y, PCGS# 78755
- 4719 1906-D MS62 Prooflike NGC.** Sharply detailed in most areas, this attractive MS62 example shows just a touch of softness on some star centers. The lightly marked greenish-gold surfaces show much prooflike reflectivity in the fields. NGC ID# 2685, PCGS# 78760

INDIAN EAGLES

- 4720 1907 No Motto MS62 NGC.** Luster glows from the protected areas of this 1907 No Motto eagle, while the lightly abraded fields and devices are slightly more subdued. Orange and khaki-gold color is eminently appealing, and none of the previously mentioned marks are singular in nature. Characteristically struck from a mintage of 239,406 pieces. NGC ID# 28GF, PCGS# 8852
- 4721 1907 No Motto MS62 PCGS.** *Ex: Philadelphia Gold Hoard.* Mint luster shines from the protected regions and is slightly subdued in the open fields, as expected for the grade. Each side displays orange and khaki-gold color with peppered abrasions. This 1907 No Motto eagle is a perfect first-year type coin. NGC ID# 28GF, PCGS# 8852
- 4722 1907 No Motto MS62 PCGS.** *Ex: Philadelphia Gold Hoard.* Saint-Gaudens' Indian Head design was inaugurated in late 1907, with all coins lacking the motto IN GOD WE TRUST. Reddish-gold surfaces show slight high-point incompleteness and myriad ticks and flecks. Still, this coin grades higher than the average MS61. NGC ID# 28GF, PCGS# 8852

4723 1907 No Motto MS62 PCGS. One of 239,406 Indian Head eagles manufactured at the Mint in 1907. The issue was well-saved, and many examples survive in lower Uncirculated levels. Strong rims frame this typically defined, light yellow-gold representative. Grazes limit the grade. NGC ID# 28GF, PCGS# 8852

4724 1907 No Motto MS62 PCGS. This was the first regular issue in the Saint-Gaudens ten dollar gold series. The type was only produced for a few months in 1907 and 1908 before being modified to include the motto IN GOD WE TRUST. Baggy, khaki-gold gold surfaces exhibit soft mint frost. Detail is slightly soft on the curls and shoulder tip, but there are no singular abrasions. NGC ID# 28GF, PCGS# 8852

4725 1907 No Motto MS64 PCGS. An impressive Choice specimen of this popular two-year design type, with a better-than-average strike that shows just a touch of the usual softness on Liberty's curls. The lightly marked orange-gold surfaces radiate vibrant mint luster and the overall presentation is attractive. From a large first-year mintage of 239,400 pieces, the 1907 ten dollar Indian is popular among date and type collectors alike. NGC ID# 28GF, PCGS# 8852

4726 1907 No Motto MS64 NGC. This satiny near-Gem displays rich brass-gold mint luster and is well-struck. A few faint slide marks are all that keep this piece from Gem classification. Eye appeal is outstanding for the MS64 level. The 1907 No Periods Indian eagle is the most plentiful No Motto issue, ideal for type purposes. NGC ID# 28GF, PCGS# 8852

4727 1908-D No Motto MS62 PCGS. Despite a mintage of 210,000 coins, this is the most conditionally challenging of the three No Motto ten dollar issues. Orange and reddish-gold color includes occasional rose accents. Generally smooth and satiny with minor ticks on the obverse and slight strike softness. NGC ID# 28GH, PCGS# 8854

4728 1908-D No Motto MS62 NGC. From a mintage of 210,000 pieces, this 1908-D Indian eagle represents the final year of the short-lived No Motto design. This attractive MS62 specimen exhibits well-detailed design elements, with just a touch of the usual softness on Liberty's hair. The lustrous orange-gold surfaces are lightly marked for the grade. NGC ID# 28GH, PCGS# 8854

4729 1908-D No Motto MS62 NGC. The surfaces of this example suggest long-term vault storage that has diminished the luster. Both sides have dark patina on lustrous light yellow surfaces. NGC ID# 28GH, PCGS# 8854

4730 1909-D MS62 NGC. While the Denver Mint struck a record number of Indian half eagles in 1909, their production of Indian eagles was extremely limited with only 121,540 pieces minted. This pleasing Mint State example has trivial marks on scattered wheat-gold surfaces with brilliant mint luster. NGC ID# 28GN, PCGS# 8863

4731 1909-D MS62 PCGS. Trivial marks on both sides are strictly consistent with the grade of this Mint State Denver Mint eagle. Wispy blue toning appears on the frosty yellow surfaces of this lustrous eagle. NGC ID# 28GN, PCGS# 8863

4732 1911 MS64 PCGS Gold Shield. This attractive Choice specimen exhibits well-detailed design elements, with just a touch of softness on the eagle's shoulder. The well-preserved orange-gold surfaces are lustrous and appealing. NGC ID# 28GT, PCGS# 8868

4733 1911 MS64 PCGS Gold Shield. A few insignificant marks appear in the fields of this frosty near-Gem that displays brilliant yellow-gold surfaces and excellent design details. An impressive example for the grade. NGC ID# 28GT, PCGS# 8868

4734 1911 MS64 NGC. Faint pinkish overtones appear on the lustrous yellow-gold surfaces of this attractive 1911 Indian eagle. Die erosion is evident on the surfaces of this late die state piece. NGC ID# 28GT, PCGS# 8868

4735 1911 MS64 PCGS. Bright yellow-gold surfaces appear on both sides of this piece, accompanied by dark high-point toning on the obverse. Minimal surface marks are evident on the reverse. NGC ID# 28GT, PCGS# 8868

1911-D Ten Dollar, AU55

Elusive Denver Issue

4736 1911-D AU55 NGC. Only 30,100 Indian eagles were struck at the Denver Mint in 1911, ensuring the scarcity of this issue in high grades today. Any 1911-D ten is scarce in the context of the series. This Choice AU coin displays substantial luster and bold design elements. Original honey-gold color is visually pleasing. NGC ID# 28GU, PCGS# 8869

4737 1912 MS64 PCGS. Brilliant and highly lustrous yellow surfaces suggest a higher grade. This sharply defined Indian ten has exceptional eye appeal. Conditionally rare, with only 65 numerically finer submissions certified by PCGS (12/18). NGC ID# 28GW, PCGS# 8871

1913-S Indian Eagle, AU58

Lustrous Fields, Rich Color

4738 1913-S AU58 PCGS. A limited mintage of 66,000 pieces ensures the scarcity of the 1913-S Indian eagle, a semikey date in the series and a rarity in Mint State. This nearly Uncirculated coin has just a brush of high-point friction, leaving the satiny fields lustrous. Both sides have rich honey-gold and orange color, with relatively smooth surfaces. NGC ID# 28GZ, PCGS# 8874

4739 1914-D MS63 PCGS Gold Shield. A crisp strike defines each side. The textured surfaces of this accessible branch mint eagle offer light wheat-gold color and mint luster that appears frosty rather than satiny. Tiny ticks are present throughout, but only one under the eye deserves mention. NGC ID# 28H3, PCGS# 8876

1914-D Indian Ten, MS64+

Important Condition Rarity

4740 1914-D MS64+ PCGS Gold Shield. This Choice Mint State 1914-D Indian eagle exhibits frosty mint luster and lovely orange overtones on its brilliant yellow-gold surfaces. This is one of 27 MS64 examples that have earned the PCGS Plus-designation, with a mere 46 finer examples (12/18). NGC ID# 28H3, PCGS# 8876

1915-S Ten Dollar, Unc Details
Only 59,000 Coins Struck

4741 1915-S — Cleaned — NGC Details. Unc. With only 59,000 pieces struck, the 1915-S is one of the scarcer Indian Head eagles. It is especially difficult to obtain in Mint State. This orange-gold example displays the sharpness of an Uncirculated coin. The obverse is fully struck, and softness is confined to the eagle's shoulder and talons on the reverse. The fine-grained matte surfaces are attractive, despite the NGC disclaimer. An obverse rim nick occurs near 5 o'clock. NGC ID# 28H6, PCGS# 8879

4742 1916-S MS62 PCGS Gold Shield. The finely granular surfaces of this 1916-S are softly lustrous beneath a freckled overlay of olive-gray patina. Tiny marks exist on the cheek, with others are scattered at wide intervals across the gleaming medium-gold surfaces. This popular branch mint example is sharply struck, and may be one of the hoard coins that appeared in the mid-to-late 1970s. NGC reports just 69 numerically finer pieces (12/18). NGC ID# 28H7, PCGS# 8880

4743 1916-S MS62 PCGS. As World War I loomed on the horizon the production of gold coins dwindled at the various mints. The 1916-S was the last eagle issued until the 1920-S. This pale yellow specimen has soft luster on both sides. A number of minuscule abrasions keep this piece from Select Mint State. NGC ID# 28H7, PCGS# 8880

4744 1926 MS64+ PCGS Gold Shield. The Plus designation points to the exceptional eye appeal of this lovely Choice Mint State Indian ten that exhibits trivial contact marks on each side. An ideal example for a 20th century gold type set. NGC ID# 28H9, PCGS# 8882

4745 1926 MS65 NGC. The well-detailed design elements of this attractive Gem exhibit just a touch of the usual softness on the hair and eagle's shoulder. The well-preserved orange-gold surfaces radiate vibrant mint luster with outstanding eye appeal. NGC ID# 28H9, PCGS# 8882

4746 1932 MS64+ PCGS Gold Shield. This highly lustrous Saint-Gaudens type coin enjoys lively yellow-gold surfaces and good detail. Two abrasions, one at the top of the headdress and another on the eagle's breast, are the only marks that prevent a full Gem assessment. NGC ID# 28HB, PCGS# 8884

4747 1932 MS64+ PCGS. The 1932 is a go-to type coin among Saint-Gaudens tens, and this glowing near-Gem would serve that purpose well. Luminous pale gold color and strong detail appear throughout. There are a couple of marks near Liberty's temple that preclude an even higher grade. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Twenty Dollar, AU50
Original Patina

4748 1850 AU50 PCGS Gold Shield. Hints of luster remain in the fields of this first-year Philadelphia double eagle. Light wear is apparent on the devices, but the major details are well-defined. Chatter in the fields accompanies the wear. This greenish-gold coin is original and visually pleasing, an excellent Gold Rush-era type coin. NGC ID# 268F, PCGS# 8902

1851 Double Eagle, AU58
Attractive Gold-Rush Era Twenty

4749 1851 AU58 NGC. Although the mintage topped 2 million pieces, 1851 twenties are scarce in high grades. The Gold Rush economy had a large appetite for coinage of all denominations, and even big gold coins circulated heavily. Mint State Type One double eagles, while available, are in-demand and pricey. This near-Mint example retains much of its original luster and sharp strike. Scattered marks exist, but they are small and infrequent. A tiny rim indent is noted between stars 5 and 6. Attractive wheat-gold color shows a few tan-gold accents on the finely granular surfaces. NGC ID# 268H, PCGS# 8904

1851-O Variety 1 Twenty, AU50
Popular O-Mint Issue

4750 1851-O AU50 NGC. Variety 1. The Heritage numismatic cataloging staff have identified four different varieties of the 1851-O double eagles, and others may exist, considering the 315,000-coin mintage. The obverse die seen here has a distinctive tear-drop die chip in front of Liberty's eye. This honey-gold representative has scattered handling marks with hints of mint luster in the protected areas. The 1851-O double eagle is a popular issue that was almost certainly coined from freshly mined gold shipped from California to Louisiana. NGC ID# 268J, PCGS# 8905

- 4751 1852 AU55 NGC.** Slight high-point rub is evident on both sides of this Choice AU double eagle. The surfaces exhibit grade-consistent marks, none of significance, and nearly full luster remains. NGC ID# 268K, PCGS# 8906

**1852 Double Eagle, AU58
Lustrous Original Surfaces**

- 4752 1852 AU58 NGC. CAC.** Orange-gold luster remains in the fields and design recesses of this near-Mint, CAC-endorsed 1852 double eagle. The small areas of wear and friction have natural olive-gold patina. Scattered abrasions on each side add character to the coin, reminiscent of its days circulating in the middle 19th century. This is a sharp and appealing Type One double eagle. NGC ID# 268K, PCGS# 8906

**1852-O Liberty Twenty, XF45
Collectible New Orleans Type Coin**

- 4753 1852-O XF45 NGC. Variety 1.** Only one die pairing is known for the 1852-O double eagle, despite a mintage of 190,000 coins. This piece is in a late die state, with a thin crack along the bottom of the eagle's tailfeathers. The bright yellow-gold surfaces have strong detail and are lightly abraded. Partial luster remains in the fields. NGC ID# 268L, PCGS# 8907

- 4754 1853 AU55 NGC.** An impressive Choice AU specimen of this popular Type One issue, with just a touch of wear on the high points of the design elements and pleasing orange-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 268M, PCGS# 8908

- 4755 1853 AU55 PCGS Gold Shield.** The stars feature full radials, while Liberty's curls show a touch of softness over the eye. Partial luster glows from the recesses, and rich shades of orange-gold provide color to each side. Small abrasions are peppered throughout, but the only singular mark is a thin depression across Liberty's upper cheek and a small rim bump above E in UNITED. NGC ID# 268M, PCGS# 8908

**1853 Liberty Double Eagle, AU58
Elusive Issue Any Finer**

- 4756 1853 AU58 PCGS Gold Shield.** This attractive near-Mint coin represents the popular Type One design, with just a trace of wear on the well-detailed design elements and lightly abraded orange-gold surfaces that retain elements of original mint luster. The 1853 is a scarce issue in Mint State grades, but circulated specimens can be found without much difficulty. NGC ID# 268M, PCGS# 8908

- 4757 1855-S XF45 NGC.** Myriad surface marks are evident on both sides of this Choice XF 1855-S double eagle. These large gold coins actively circulated in the contemporary Western commerce and survivors usually show numerous handling marks. The exception, of course, are the coins recovered from the two major shipwrecks. NGC ID# 268X, PCGS# 8916

- 4758 1855-S AU50 PCGS.** Medium S. Although the provenance of this lightly circulated early S-mint twenty is unknown, the die characteristics match one of the die pairs recovered from the S.S. *Central America*. A nicely defined lemon-gold example. Both sides display distributed minor to moderate abrasions. NGC ID# 268X, PCGS# 8916

- 4759 1855-S AU53 NGC.** A splendid double eagle from the second year of San Francisco Mint operations, this piece has brilliant yellow surfaces with scattered, grade-consistent marks, none of consequence. NGC ID# 268X, PCGS# 8916

**1856 Double Eagle, AU55
Scarce Type One Philadelphia Issue**

- 4760 1856 AU55 PCGS Gold Shield.** Partially reflective fields add flash to the brassy-gold surfaces of this Choice About Uncirculated Type One twenty. The 1856 Philadelphia issue is scarce in AU grades or finer, since few pieces were salvaged from any of the shipwreck discoveries. This is a sharp example, with considerable mint luster at the margins and a bold strike. Population: 42 in 55, 70 finer (12/18). NGC ID# 268Y, PCGS# 8917

**1857 Double Eagle, AU55
Luster Remains in the Fields**

- 4761 1857 AU55 NGC.** The 1857 double eagle is scarce in Mint State, rarely seen without heavy, unsightly abrasions. This Choice About Uncirculated coin is partially lustrous and shows only light wear. Abrasions are light and scattered, posing little distraction. An outstanding collector-grade example of this conditionally challenging Type One Philadelphia issue. NGC ID# 2693, PCGS# 8920

**1857 Double Eagle, AU55
CAC, Choice Surfaces and Color**

- 4762 1857 AU55 PCGS Gold Shield. CAC.** Rare in full Mint State, this Philadelphia issue is challenging at the Choice About Uncirculated grade level as well. Only a few dozen shipwreck recoveries were mixed in with thousands of 1857-S double eagles pulled from the S.S. *Central America* and S.S. *Republic* finds. This CAC-endorsed example displays natural greenish-gold color with glimpses of mint luster throughout both sides. It is a sharply struck, moderately abraded, and pleasing Type One representative of the scarce P-mint issue. NGC ID# 2693, PCGS# 8920

**1857-S Liberty Double Eagle, AU58
Vibrant Color and Nearly Full Luster**

- 4763 1857-S AU58 PCGS.** Like most Type One Liberty double eagles, the 1857-S was once very rare in high grade. Fortunately, the recovery of the treasure from the S.S. *Central America* yielded a large number of attractive specimens, making the 1857-S a favorite choice of type collectors. This slightly worn and lightly abraded near-Mint example offers pleasing medium-gold surfaces that retain much original mint luster.
Ex: *Central States Signature* (Heritage, 4/2016), lot 6023; *Dallas Signature* (Heritage, 10/2016), lot 4225. NGC ID# 2696, PCGS# 8922

- 4764 1859-S XF40 PCGS.** A lightly worn XF specimen of this popular Type One Liberty double eagle, with lightly abraded orange-gold surfaces that retain traces of original mint luster. Housed in a green label holder. NGC ID# 269C, PCGS# 8928

- 4765 1860 XF45 NGC.** This is a collectible No Motto issue, although it claims a much lower mintage than the 1861 and is not nearly as plentiful. Mint luster glows around the motifs on each side. The stars maintain clear radials, and the only singular mark is a scratch on the rim above ER in AMERICA. NGC ID# 269D, PCGS# 8929

- 4766 1860 XF45 PCGS.** This Choice XF Liberty double eagle exhibits only light wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain considerable amounts of original mint luster. Housed in a green label holder. NGC ID# 269D, PCGS# 8929

- 4767 1860-S AU53 PCGS.** An attractive AU53 Type One double eagle, this piece exhibits just a touch of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. NGC ID# 269F, PCGS# 8931

- 4768 1861 XF45 NGC.** Double eagles were coined in massive quantities in 1861, creating a popular No Motto type issue. This Choice XF survivor with red-gold color and hints of mint luster exhibits typical detail for a lightly circulated Type One twenty. Obviously original. NGC ID# 269G, PCGS# 8932

- 4769 1865-S XF45 PCGS.** The design elements of this impressive Choice XF specimen show only light wear on the high points and the vivid orange-gold surfaces are lightly abraded for the grade. Both sides retain much of their original mint luster. Housed in a green label holder. NGC ID# 269V, PCGS# 8944

- 4770 1867-S XF45 PCGS.** An impressive Choice XF specimen of this popular Type Two issue, with only light wear on the design elements and vivid orange-gold surfaces that retain much original mint luster. Housed in a green label holder. NGC ID# 26A2, PCGS# 8952

**1868 Double Eagle, AU50
Semiprooflike Fields**

- 4771 1868 AU50 NGC.** The 1868 is a scarce and often overlooked issue in the Type Two series, with only 98,575 pieces struck. It is also conditionally rare. One of the surface characteristics often seen on this issue is semiprooflike fields. Significant reflectivity remains on each side of this minimally circulated yellow-gold representative. Lightly abraded with a few milling marks scattered over the obverse. NGC ID# 26A3, PCGS# 8953

- 4772 1870-S XF45 NGC.** Considerable luster is still evident on this Choice XF Type Two double eagle. Both sides have myriad handling marks, none of any consequence. NGC ID# 26A9, PCGS# 8959

- 4773 1870-S AU55 NGC. CAC.** The well-detailed design elements of this impressive Choice AU specimen show just a touch of high-point wear and the lightly abraded orange-gold surfaces retain much of their original mint luster. NGC ID# 26A9, PCGS# 8959

4774 1870-S AU58 PCGS. This is a sharp example with bright yellow-gold luster. The 1870-S double eagle is scarce in Mint State, and high-end AU coins such as this offer a more affordable alternative for collectors. This piece exhibits heavy abrasions not uncommon on AU-level Type Two double eagles. NGC ID# 26A9, PCGS# 8959

4775 1870-S AU58 NGC. Well-detailed and lightly worn, with muted luster and numerous surface abrasions, particularly over the obverse, which shows several heavy milling marks. Hints of pink patina have collected in the protected areas of the obverse. The 1870-S double eagle is a scarce date in Mint State grades but remains collectible at the current AU level.

Ex: Long Beach Signature (Heritage, 9/2006), lot 4083, which realized \$2,530. NGC ID# 26A9, PCGS# 8959

1871 Twenty, AU53 Important Type Two Issue

4776 1871 AU53 NGC. Among double eagle types, the Type Two Liberty variant is the hardest to locate. This With Motto type has the denomination abbreviated TWENTY D. and examples were only coined during the 11 year period from 1866 to 1876. None have been found in treasure salvage operations. This pleasing light yellow-gold example, with myriad handling marks, retains considerable mint luster. NGC ID# 26AA, PCGS# 8960

4777 1872-S MS60 PCGS. This well-detailed Mint State Liberty double eagle exhibits pleasing orange-gold surfaces that show the expected number of minor contact marks for the grade. Vibrant mint luster adds to the strong overall eye appeal. NGC ID# 26AF, PCGS# 8965

4778 1873 Open 3 MS62 PCGS. CAC. Strike detail is strong for the type, which was used from 1866 through 1876. The 1873 Open 3 double eagle is the most collectible issue from that 10-year period. Varying shades of orange-gold and radiant mint frost adorn lightly abraded surfaces. NGC ID# 26AL, PCGS# 8967

4779 1873 Open 3 MS62 PCGS. CAC. Beautiful sun-gold surfaces shimmer with frosty luster. Occasional lilac accents further contribute to the appeal of this gorgeous and overtly original Type Two double eagle. Bagmarks and other abrasions are present on each side but minimally distracting. NGC ID# 26AL, PCGS# 8967

4780 1873 Open 3 MS62 NGC. CAC. An attractive MS62 representative of this popular Type Two issue, with sharply defined design elements and well-preserved peach-gold surfaces that radiate vibrant mint luster on both sides. Eye appeal is quite strong. NGC ID# 26AL, PCGS# 8967

4781 1873 Open 3 MS62+ PCGS. CAC. The Philadelphia Mint version of the Open 3 double eagle is more available than its Closed 3 counterpart (the situation is reversed with the San Francisco version). This Plus-graded MS62 specimen offers well-detailed design elements and lustrous orange-gold surfaces with the expected number of minor contact marks for the grade. NGC ID# 26AL, PCGS# 8967

4782 1873 Open 3, Doubled Die Obverse, FS-101, MS62 NGC. Frosty, attractive mint luster produces a strong cartwheel effect on each side of this Mint State 1873 Open 3 double eagle. Scattered abrasions are generally unobtrusive. This piece has strong die doubling on LIBERTY, which adds to its appeal. Few finer FS-101 coins have been attributed by the grading services. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

1873 Open 3 Double Eagle, MS63 FS-101, Doubled Die Obverse

4783 1873 Open 3, Doubled Die Obverse, FS-101, MS63 NGC. LIBERTY and the coronet beads are die doubled north. Only a small percentage of the issue is the present variety, although any Type Two twenty in Select Mint State is scarce relative to demand. The lustrous apricot-gold surfaces are nicely struck. The obverse has its share of minor abrasions. The reverse is minimally marked. Census: 9 in 63, 0 finer (12/18). NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

4784 1873-S Closed 3 — Cleaned — NGC Details. Unc. Struck before the new 3 punch arrived at the San Francisco Mint, this remarkable double eagle exhibits sharply detailed design elements and lightly marked orange-gold surfaces. The luster is slightly dimmed by the noted cleaning. NGC ID# 26AL, PCGS# 8969

4785 1873-S Open 3 AU58 NGC. The 3 in the date was modified because the old punch looked too much like an 8. This attractive near-Mint specimen shows just a trace of wear and the lightly abraded orange-gold surfaces remain lustrous and appealing. NGC ID# 26AM, PCGS# 8979

4786 1873-S Open 3 AU58 PCGS Gold Shield. The 1873-S Open 3 Liberty double eagle is more elusive than its Closed 3 counterpart. This impressive near-Mint example shows just a trace of wear on the well-detailed design elements and the lustrous orange-gold surfaces show a number of minor contact marks and chatter in the fields. NGC ID# 26AM, PCGS# 8979

1874-CC Double Eagle, XF45 Partly Lustrous Red-Gold Surfaces

4787 1874-CC XF45 PCGS. Variety 2-A. A small die chip appears on Liberty's temple behind the eye, and the mintmark is widely spaced. This eye-appealing double eagle has original reddish-gold color and substantial remaining mint luster around the stars, legends, and central motifs. The outer areas are well-struck, but softness occurs on the middle curls and the right side of the eagle. A series of linear abrasions are noted under Liberty's bun. Popular Carson City type coin. NGC ID# 26AP, PCGS# 8971

4788 1874-S AU58 PCGS Gold Shield. CAC. An attractive near-Mint representative of this popular Type Two issue, with well-detailed design elements and lightly abraded orange-gold surfaces that retain most of their original mint luster. Eye appeal is strong for the grade. NGC ID# 26AR, PCGS# 8972

**1875-S Twenty Dollar, MS62+
Vibrant Mint Luster, Great Eye Appeal**

- 4789 1875-S MS62+ PCGS Gold Shield.** The 1875-S is seldom seen above the lowest Mint State levels despite a large mintage exceeding 1.2 million pieces. Most of the mintage was used in foreign trade, and while many pieces have returned to collector hands, most pieces grade MS61 or less. This sharp and brilliant, rich-gold coin is highly lustrous with remarkably smooth and attractive surfaces for an 1875-S. A thick layer of mint frost somehow escaped any serious marks or luster grazes. Population: 15 in 62+, 29 finer (12/18). NGC ID# 26AU, PCGS# 8975

**1876 Double Eagle, Lustrous MS62
Short-Lived Light Motto Reverse Subtype**

- 4790 1876 MS62 PCGS. CAC.** Light Motto variant, seen only on some 1876 double eagles — a new hub, used only briefly at the Philadelphia Mint before returning to the old Heavy Motto hub. The changes between the two hubs are subtle but numerous, most easily seen by the size and positions of the rays in relation to each other and to the legend above. This MS62 example is lustrous and attractive with gleaming, rich-gold color and relatively few marks for the assigned grade. The coin is sharply struck and has CAC endorsement. PCGS reports just 53 numerically finer pieces (12/18). NGC ID# 26AV, PCGS# 8976

**1877 Liberty Double Eagle, MS62
Rarely Seen Any Finer**

- 4791 1877 MS62 NGC.** Ex: European Bank Crisis Gold. The 1877 Type Three Liberty double eagle is an elusive issue in grades above MS62. This coin was apparently repatriated to the United States when European central banks were forced to eliminate coins from their bullion reserves (in favor of bars) in recent years. This well-detailed example offers lustrous apricot gold surfaces, with the expected number of minor contact marks for the grade. NGC has graded 17 numerically finer examples (12/18). NGC ID# 2547, PCGS# 8982

**1877 Double Eagle, MS62
Frosty, Minimally Abraded Surfaces**

- 4792 1877 MS62 PCGS Gold Shield. CAC.** Frosty medium yellow-gold surfaces shimmer attractively when rotated under a lamp. Full centers and radials appear on the stars. Liberty's upper and lower curls are well-delineated, as are the wing feathers. Softness is limited to the centers. Small grazes and shallow abrasions are minimal for the MS62 grade level and far fewer in number than normally seen for the 1877. PCGS has graded 19 finer submissions (12/18). NGC ID# 2547, PCGS# 8982

- 4793 1877-S MS61 PCGS Gold Shield.** This impressive Mint State example represents the first year of the Type Three design, with well-detailed design elements and vibrant mint luster throughout. The pleasing orange-gold surfaces are lightly marked for the grade. NGC ID# 254B, PCGS# 8984

- 4794 1878 Doubled Die Reverse MS61 PCGS. Breen-7270. Variety 1.** Four different doubled die reverse varieties are known for the 1878. Among these, Variety 1 shows the strongest die doubling, most evident on TWENTY DOLLARS although other reverse legends are also affected. This lustrous and sharply struck peach-gold representative displays marks consistent with the MS61 level. NGC ID# 26B3, PCGS# 8985

- 4795 1878 Doubled Die Reverse MS62 PCGS. Variety 3.** Four different doubled die reverse varieties are known for the 1878 twenty. Variety 3 displays minor doubling on the reverse legends, most notably STATES OF. The present peach-gold example shows light steel-gray obverse toning across the high points and open field. Small marks are prevalent, and we note a line beneath the UNI in UNITED. NGC ID# 26B3, PCGS# 8985

- 4796 1878 MS62 NGC.** An impressive Type Two Liberty double eagle, with well-detailed design elements and pleasing orange-gold surfaces that show occasional highlights of lilac. Vibrant mint luster radiates from both sides and only grade-consistent signs of contact are evident. NGC has graded 36 numerically finer examples (12/18). NGC ID# 26B3, PCGS# 8985

- 4797 1879 MS61 PCGS.** A wonderful Mint State example, this 1879 double eagle is plentiful in MS61, but elusive in higher grades. PCGS has certified 79 finer examples (12/18), including only 17 that are two or more points above this frosty and lustrous twenty. The yellow-gold surfaces have myriad abrasions that are consistent with the grade. Dark toning appears on the high points. NGC ID# 26B6, PCGS# 8988

1879-S Twenty Dollar, MS61
Unexpectedly Scarce Any Finer

4798 1879-S MS61 PCGS. The moderately abraded fields retain areas of prooflike surface that was once complete throughout both sides of this gleaming, green-gold double eagle. Considerable field chatter and tiny marks have since settled on the coin, perhaps the result of a long stay in foreign banks, since many Mint State survivors come from European holdings. The 1879-S rates as the scarcest of all S-Mint Type Three twenties despite a mintage that exceeded 1.2 million pieces, and commands a premium as such. NGC ID# 26B9, PCGS# 8991

4799 1881-S AU58 NGC. Although myriad marks appear on both sides of this near-Mint piece, it is a stunning example for the grade with brilliant light yellow surfaces and full luster that shows a trace of wear on Liberty's cheek. NGC ID# 26BD, PCGS# 8995

1883-CC Twenty Dollar, AU50
Bright Luster Around the Devices

4800 1883-CC AU50 NGC. Variety 1-B. The obverse shows die lines near star 13, and the CC mintmark is positioned above the space between TWENTY DOLLARS. Bright mint luster shines from the device recesses of this lightly circulated yellow-gold double eagle. Both sides maintain strong detail with scattered abrasions. NGC ID# 26BH, PCGS# 8999

4801 1883-S MS62 NGC. A frosty and fully lustrous Mint State piece, this 1883-S double eagle exhibits brilliant orange-gold surfaces and minimal marks that are equal to a higher grade. NGC ID# 26BJ, PCGS# 9000

1883-S Double Eagle, MS63
Lovely Rose-Gold Hues

4802 1883-S MS63 PCGS. This Select Uncirculated 1883-S double eagle is sharp and has only light, scattered contact marks. Greenish-gold margins cede to warm rose-gold interiors, complementing the frosty cartwheel luster. The 1883-S is moderately plentiful in this grade, but PCGS has seen only 16 finer representatives (12/18). NGC ID# 26BJ, PCGS# 9000

4803 1884-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A. This orange-gold twenty dollar exhibits crisp detail and minimal friction, but the surfaces are slightly muted and unnatural from the noted cleaning. As far as we know, all 81,139 double eagles struck at the Carson City Mint in 1884 are from this die pair. NGC ID# 26BK, PCGS# 9001

1884-S Double Eagle, MS63
Original and Eye-Appealing

4804 1884-S MS63 NGC. Most Uncirculated 1884-S double eagles grade only MS61 or MS62. This Select example is scarce by comparison, and NGC has seen only nine finer coins (12/18). Sharp design elements and radiant cartwheel luster are hallmarks of this eye-appealing example. A few scattered abrasions are hardly bothersome. Wheat-gold coloration is original. NGC ID# 26BL, PCGS# 9002

4805 1885-S MS63 NGC. This is a sharply impressed orange-gold example with fully defined features and rich, frosty mint luster. The number of abrasions is consistent with the assigned grade, but none of the distractions are severe or prominent. We do note a series of reeding marks under the right (facing). An above-average representative of this otherwise collectible S-mint production. NGC has only certified 13 numerically finer examples (12/18). NGC ID# 26BP, PCGS# 9005

4806 1888 MS62 PCGS Gold Shield. An impressive MS62 representative of this popular Philadelphia issue, with well-detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster on both sides. Eye appeal is outstanding. PCGS has graded 37 numerically finer examples (12/18). NGC ID# 26BT, PCGS# 9008

**1888-S Liberty Double Eagle, MS63
Sharply Struck, Lustrous Example**

- 4807 1888-S MS63 PCGS.** From a mintage of 859,600 pieces, the 1888-S Liberty double eagle can be located in MS63 without too much searching, but finer coins are scarce. This impressive Select example offers sharp design elements and lightly marked orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 26BU, PCGS# 9009

**1889 Twenty Dollar, Scarce MS62
Rare in Finer Grades**

- 4808 1889 MS62 PCGS Gold Shield.** Just 44,070 1889 double eagles were struck at the Philadelphia Mint — a sleeper Type Three issue, challenging at the MS62 level and rare any finer. This is a richly frosted example with lilac and rose highlights across vibrant, orange-gold surfaces. Reverse die clashing shows the partial outline of Liberty's portrait among the central devices. Marks are limited to a few scattered field abrasions and bits of mint grime on the high points of Liberty's curls and cheek. PCGS reports only 33 numerically finer examples (12/18). NGC ID# 2695, PCGS# 9010

- 4809 1889-S MS63 PCGS.** The 1889-S is reasonably collectible in Mint State grades through the MS63 level, becoming progressively scarce in near-Gem or Gem conditions. This Select example is lustrous with lightly abraded, rich orange-gold surfaces and a needle-sharp strike. Small ticks and marks limit the grade, but they do little to diminish the eye appeal. NGC ID# 26BW, PCGS# 9012

- 4810 1889-S MS63 PCGS.** European Bank Crisis Gold specialty label. Although the mintage was substantial, and halted after 774,700 coins were made, survivors are elusive in higher grades, with only 87 certified at PCGS (12/18). This piece has minimal marks and an above average strike with lustrous yellow-gold surfaces. NGC ID# 26BW, PCGS# 9012

**1890-CC Double Eagle, XF40
Variety 1-A, Centered Mintmark**

- 4811 1890-CC XF40 NGC. Variety 1-A.** The CC mintmark is centered over the space between TWENTY and DOLLARS on this reverse die, while the other variety has the mintmark further right. The two die pairs contributed to a mintage of 91,209 double eagles. Both sides exhibit scattered handling marks on the light yellow-gold surfaces, although none of the marks are distracting. NGC ID# 26BY, PCGS# 9014

**1890-CC Twenty Dollar, AU50
Partially Lustrous Surfaces**

- 4812 1890-CC AU50 PCGS Gold Shield. Variety 1-A.** Hints of luster emerge from the protected areas when this About Uncirculated 1890-CC double eagle is rotated beneath a light. Light wear on the devices leaves most details intact, and the blend of olive-gold and brass-yellow hues attests to the originality of the patina. A collectible Carson City issue, although elusive in this grade with the present level of eye appeal. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, AU53
Appealing for the Grade**

- 4813 1890-CC AU53 PCGS Gold Shield. Variety 1-A.** The reverse is lapped, with portions of the eagle's tailfeathers effaced. The obverse does not have any noticeable lapping. This Carson City issue is plentiful, benefiting from a mintage of 91,209 pieces. About Uncirculated examples with original patina are popular as type coins. This piece retains elements of luster in the fields amid olive-gold and burnt-orange toning. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, AU53
Glowing Peripheral Mint Luster**

- 4814** 1890-CC AU53 PCGS Gold Shield. CAC. Variety 1-A. As usual, with lapped tailfeathers. This collectible Carson City double eagle showcases glowing peripheral mint luster and original orange-gold color with khaki accents. Well-detailed despite a bit of rub over the motifs. Small abrasions are more prevalent on the obverse, including a few on Liberty's neck. NGC ID# 26BY, PCGS# 9014

**1890-CC Liberty Twenty, AU55
Highly Lustrous and Appealing**

- 4815** 1890-CC AU55 NGC. The 1890-CC is one of the most readily available double eagles from the Carson City facility, but eye appeal is often lacking on coins in the XF and AU grade range. This piece is unusually attractive, with vibrant yellow-gold mint luster highlighting subtle orange-gold overtones in the recesses. The strike is sharp, with just a trace of friction over the high points of the design. Light, scattered surface ticks accompany the grade, but hardly inhibit the overall appeal.

Ex: *Beverly Hills Signature* (Heritage, 11/2014), lot 5306, realized \$4,700. NGC ID# 26BY, PCGS# 9014

1890-S Double Eagle, Attractive MS63

- 4816** 1890-S MS63 PCGS. This attractive double eagle features strong definition and attractive apricot and orange-gold color. A patch of abrasions on Liberty's cheek includes one long, thin scrape and some smaller blunt marks that account for the grade, but the surfaces elsewhere are well-preserved, particularly the reverse, which may very well grade finer on its own.

Ex: *Long Beach Signature* (Heritage, 1-2/2015), lot 3341, where it realized \$3,760. NGC ID# 26BZ, PCGS# 9015

- 4817** 1891-S MS63 PCGS. A sharply detailed Select specimen of this popular Type Three issue, with lightly marked orange-gold surfaces that display vibrant mint luster on both sides. Overall visual appeal is outstanding. NGC ID# 26C4, PCGS# 9018

- 4818** 1892-CC VF30 PCGS. Variety 1-A. The 1892-CC Liberty double eagle was a well-produced issue but most examples seen today are in circulated grades from VF-AU. This pleasing VF example shows moderate wear on the strongly impressed design elements, with most of the letters in LIBERTY still legible. The pleasing orange-gold surfaces are lightly abraded for the grade. NGC ID# 26C6, PCGS# 9020

**1892-CC Coronet Twenty, VF35
Late-Date Carson City Issue**

- 4819** 1892-CC VF35 PCGS. Variety 1-A. Liberty's curls maintain mostly clear delineation and many of the star radials are defined on this Choice VF example of the sought-after 1892-CC double eagle. The apricot-gold surfaces are moderately bright. Myriad abrasions populate each side. A lower mintage Carson City issue, though more available than the 1891-CC. NGC ID# 26C6, PCGS# 9020

**1892-CC Twenty Dollar, XF40
27,265 Coins Struck**

- 4820** 1892-CC XF40 PCGS. Variety 1-A. A blend of olive and red-gold color blankets this lightly circulated Carson City double eagle. The motifs show good detail for a large gold coin that clearly spent some time in the channels of commerce out West. Rim depressions above star 9, and opposite below the R in DOLLARS, serve as pedigree markers. The right obverse field displays horizontal hairlines. NGC ID# 26C6, PCGS# 9020

**1892-CC Double Eagle, XF45
Profound Red-Gold Color**

- 4821** 1892-CC XF45 NGC. CAC. Variety 1-A. Profound and blatantly original red-gold color adorns each side, delivering top-quality eye appeal for the grade. Olive-gold is seen in the fields, where small abrasions from a brief stint in circulation appear. Detail is good despite high-point merging. The feathers right of the shield border show evidence of lapping. One of 27,265 pieces struck. NGC ID# 26C6, PCGS# 9020

4822 1893 MS63 NGC. A frosty Select Mint State piece with the reverse a couple points finer than the obverse. Attractive pinkish-gold luster and sharp design details characterize this piece that has a few obverse marks, including a noticeable mark below Liberty's hair bun. NGC ID# 26C8, PCGS# 9022

4823 1893-S MS63+ PCGS Gold Shield. The Plus designation attests to the outstanding luster and original color of this attractive 1893-S double eagle. It is well-struck and frosty with yellow-gold margins that cede to warmer rose-gold interiors. Only a few light grazes on Liberty's cheek prevent a full MS64 designation. NGC ID# 26CA, PCGS# 9024

4824 1894 MS63 PCGS. CAC. Here is a splendid 1894 double eagle with frosty yellow-gold luster and pleasing surfaces. The few marks on each side are consistent with the grade. This issue is available at the MS63 grade level, but scarce in higher grades. NGC ID# 26CB, PCGS# 9025

**1894 Twenty Dollar, MS64
Fewer Than a Dozen Graded Finer**

4825 1894 MS64 PCGS. In some ways, the 1894 Philadelphia twenty is the embodiment of several Type Three double eagles from the 1890s — moderately available through the near-Gem grade, and rare any finer. This medium yellow-gold example is lustrous and sharply struck with a few light abrasions in the obverse fields. PCGS reports just three finer examples (12/18). NGC ID# 26CB, PCGS# 9025

4826 1894-S MS63 NGC. Brilliant yellow-gold surfaces and frosty mint luster characterize this Select Mint State double eagle that hosts trivial marks of no consequence. NGC ID# 26CC, PCGS# 9026

**1894-S Liberty Twenty, MS64
Rarely Seen Finer**

4827 1894-S MS64 NGC. The 1894-S Liberty double eagle claims a substantial mintage of more than 1 million pieces, but the issue is scarce in MS64 condition, and finer examples are rare. This impressive Choice specimen exhibits sharply detailed design elements and lustrous peach-gold surfaces, with only minor signs of contact. Census: 91 in 64 (2 in 64+), 8 finer (12/18). NGC ID# 26CC, PCGS# 9026

4828 1895 MS62 PCGS. his attractive Type Three double eagle displays sharply detailed design elements and vivid orange-gold surfaces with especially vibrant mint luster. Some light chatter on Liberty's cheek explains the grade. NGC ID# 26CD, PCGS# 9027

4829 1895 AU58 Prooflike NGC. CAC. Numerous handling marks are reflected in the mirrored fields of this lightly worn double eagle, showing a thin mark behind Liberty's eye. Both sides exhibit brilliant yellow-gold luster. NGC ID# 26CD, PCGS# 79027

4830 1895-S MS63 PCGS. European Bank Crisis Gold specialty label. A pleasing Select Mint State example, this piece features a bold strike and lustrous yellow-gold surfaces with trivial, scattered marks. NGC ID# 26CE, PCGS# 9028

4831 1895-S MS61 Prooflike NGC. A lovely Mint State example with nice contrast between the lustrous devices and mirrored fields, this double eagle exhibits trivial marks on each side, none of consequence. Census: 28 in 61 Prooflike, 18 finer (12/18). NGC ID# 26CE, PCGS# 79028

4832 1896 Repunched Date, FS-301, MS62 PCGS. The original date punch was slightly north of the second impression, creating this *Cherrypickers' Guide* variety. Remnants remain above all four date digits. Liberty's curls and the eagle's feathers show crisp definition. Luster glistens over lightly abraded yellow-gold surfaces. NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029

4833 1896 Repunched Date, FS-301, MS63 PCGS. The date numerals are noticeably repunched at the top on this in-demand *Cherrypickers' Guide* variety. This Select example displays a bold strike and yellow-gold luster with semiprooflike fields. Eye appeal is excellent. NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029

4834 1896 Repunched Date, FS-301, MS63 NGC. This Select Uncirculated P-mint double eagle enjoys vibrant, frosty luster and warm orange-gold color with glints of green and rose. Shallow grazes and ticks limit the grade, but this remains a strongly defined and appealing example with broad repunching above the date. NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029

4835 1897 MS63 NGC. A lovely Select Mint State 1897 double eagle, this piece has brilliant and frosty yellow-gold luster with sharp design definition and minimal surface marks. NGC ID# 26CH, PCGS# 9031

**1897-S Double Eagle, MS64+
Scarce This Fine**

4836 1897-S MS64+ PCGS Gold Shield. Frosty, luminous yellow-gold mint luster engulfs this high-end Choice 1897-S double eagle. The fields are clean, and only a few trivial marks on Liberty's cheek prevent Gem classification. The strike is sharp. On the reverse, a loupe reveals several microscopic die cracks and chips along the top of the rays. This San Francisco issue is rarely offered finer, with only 16 coins so graded at PCGS (12/18). NGC ID# 26CJ, PCGS# 9032

**1897-S Liberty Double Eagle, MS64
Vivid Color, Vibrant Luster**

4837 1897-S MS64 NGC. CAC. With a mintage of more than 1.4 million pieces, the 1897-S Liberty double eagle is not difficult to locate in MS64 condition, but finer coins are rare. This delightful Choice example exhibits sharply detailed design elements and well-preserved peach-gold surfaces, with vibrant mint luster and exceptional eye appeal. NGC has graded 26 numerically finer examples (12/18). NGC ID# 26CJ, PCGS# 9032

4838 1899 MS64+ PCGS Gold Shield. A Plus-graded Choice example of this popular issue, with sharply detailed design elements throughout and well-preserved orange-gold surfaces that radiate vibrant mint luster. PCGS has graded 69 numerically finer examples (12/18). NGC ID# 26CM, PCGS# 9035

4839 1899-S MS63 PCGS. The vivid orange-gold surfaces of this impressive Select specimen are lightly marked and vibrant mint luster radiates from both sides. The design elements exhibit razor-sharp definition, with exceptional eye appeal. NGC ID# 26CN, PCGS# 9036

**1899-S Liberty Double Eagle, MS64
Condition Rarity in Finer Grades**

4840 1899-S MS64 NGC. Given its high mintage of more than 2 million pieces — and the fact that it is a post-Saddle Ridge Hoard issue — it is a surprise so few Gem or finer coins exist. This is an intensely frosted near-Gem example, sharply struck throughout both sides including the high points of Liberty's hair and bun. Bagmarks are the bane of many 1899-S double eagles, but this coin shows few marks for the issue. There are no alloy spots to disturb the vivid, rich-gold coloration. PCGS has certified just four numerically finer examples (12/18). NGC ID# 26CN, PCGS# 9036

**1900 Double Eagle, MS65
Prohibitively Rare Any Finer**

4841 1900 MS65 PCGS. A luminous, frosty Gem example of this popular type coin issue, showing warm orange-gold interiors that cede to lighter yellow-gold hues in the margins. The design elements are sharp and only a few small contact marks are seen. PCGS lists only two numerically finer pieces, NGC just four (12/18). NGC ID# 26CP, PCGS# 9037

4842 1900-S MS63 PCGS. Easily collectible at the MS63 grade level, the 1900-S Liberty double eagle is slightly scarce in higher grades. This attractive Select specimen is sharply detailed and lightly marked, with lustrous orange-gold surfaces. NGC ID# 26CR, PCGS# 9038

4843 1900-S MS63 NGC. CAC. The population decline in higher grades is such that most collectors will want to target a nice MS63 example of the 1900-S double eagle, rather than a conditionally scarce near-Gem. Highly lustrous surfaces exhibit pleasing honey-gold color and bold detail. CAC: 24 in 63, 12 finer (12/18). NGC ID# 26CR, PCGS# 9038

4844 1901 MS62 PCGS. This attractive MS62 specimen exhibits sharply detailed design elements and pleasing orange-gold surfaces that are lightly marked for the grade. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 26CS, PCGS# 9039

4845 1902-S MS63 NGC. A charming branch mint Type Three double eagle, with well-detailed design elements and lightly marked, lustrous surfaces. Pale orange-gold interiors cede to wheat-gold margins. The 1902-S is a scarce issue in grades above the MS63 level. NGC has graded 43 numerically finer examples (12/18). NGC ID# 26CV, PCGS# 9042

**1903-S Double Eagle, MS64+
Richly Frosted and Well-Preserved**

4846 1903-S MS64+ PCGS Gold Shield. The 1903-S is a plentiful issue that only begins to command a real numismatic premium at the near-Gem grade level. However, coins finer than this are conditionally scarce and highly sought-after. This coin certainly has the look of an even higher grade. Orange-gold surfaces are richly frosted and well-preserved without any singularly distracting marks. A single tick on the nose could act as a pedigree identifier. There are 16 numerically finer examples at PCGS. CAC: 32 in 64, 1 finer (12/18). NGC ID# 26CX, PCGS# 9044

**1904 Double Eagle, MS61
Deep Prooflike Surfaces**

4847 1904 MS61 Deep Prooflike NGC. Myriad surface marks and trivial hairlines appear on both sides of this impressive yellow-gold double eagle that has brilliant, mirrored fields and reflective, sharply detailed devices. While the 1904 is the most common date in the Liberty double eagle series, fully mirrored Deep Prooflike examples are rarely encountered. NGC has certified just seven examples with that designation. Census: 2 in 61 Deep Prooflike, 5 finer (12/18). NGC ID# 26CY, PCGS# 9045

4848 1904 MS64+ NGC. CAC. On the cusp of an even higher assessment, this near-Gem type coin presents glowing, frosty luster that issues from eye-appealing honey-gold surfaces. Each side is smooth with just a couple of reeding marks on the chin. NGC ID# 26CY, PCGS# 9045

**1904 Twenty Dollar Liberty, MS65
High-End for the Grade, CAC-Endorsed**

4849 1904 MS65 PCGS. CAC. The original mintage of 6.2 million pieces ensures the availability of the 1904 twenty dollar Liberty. In addition to its abundant mintage it was also a well-produced issue, making it the go-to type coin for innumerable gold collectors. What separates one 1904 from another is the eye appeal within the given grade. In the case of this piece, that makes this a definite high-end coin. The surfaces are bright yellow-gold with a notable absence of the usually seen abrasions. Fully struck. NGC ID# 26CY, PCGS# 9045

4850 1904-S MS64+ PCGS. CAC. This Plus-graded Choice example is sharply detailed in most areas, but just a touch of softness shows on some star centers and the letters in LIBERTY. The vivid orange-gold surfaces display no mentionable distractions, with vibrant mint luster on both sides. NGC ID# 26CZ, PCGS# 9046

**1904-S Twenty Dollar, MS65
Only Two Coins Finer at NGC**

4851 1904-S MS65 NGC. The 1904-S, like its P-mint cousin, enjoys one of the highest mintages in the series. However, while the 1904 exists by the thousands in MS65 and by the hundreds in MS66, the 1904-S is scarce in Gem condition and rare at the Premium Gem level. A thick layer of mint frost blankets minimally abraded, well-defined surfaces. Attractive light orange-gold coloration. Only two finer examples have been certified at NGC (12/18). NGC ID# 26CZ, PCGS# 9046

4852 1904-S MS62 Prooflike NGC. CAC. The 1904 and 1904-S double eagles are the two highest mintage issues in the Liberty series, and they are ideal candidates for type collections. This piece would be a nice substitute in a proof type set, featuring light contrast, fully mirrored fields, and attractive orange-gold surfaces. Census: 53 in 62 (1 in 62 ★) Prooflike, 33 finer (12/18). NGC ID# 26CZ, PCGS# 79046

4853 1905-S MS63 PCGS. A radiantly lustrous Select Mint State example of this 20th century San Francisco issue, showing sharp design elements and only a few scattered contact marks. Mostly orange-gold surfaces yield tinges of rose, peach, and mint throughout. Eye appeal is outstanding. NGC ID# 26D3, PCGS# 9048

**1906 Double Eagle, MS62
Challenging in Better Grades**

4854 1906 MS62 PCGS Gold Shield. The Mint manufactured 69,596 double eagles in 1906. Like the 1905, this is a challenging issue to obtain in better Mint State grades. Anything finer than MS62 is scarce. This frosted peach-gold representative exhibits crisp detail. There are a predictable number of shallow ticks and grazes for the grade. NGC ID# 26D4, PCGS# 9049

4855 1906-D MS62 PCGS. The first year of operations at the Denver Mint included the production of 620,250 Liberty double eagles. This pleasing lemon-yellow example has scattered marks consistent with the grade. Both sides display frosty mint luster. NGC ID# 26D5, PCGS# 9050

4856 1906-S MS63 NGC. This attractive double eagle has a strong strike and vibrant luster with semiprooflike fields. The reddish-gold color is undisturbed by the minimal abrasions. Much finer than usually seen. NGC ID# 26F6, PCGS# 9051

**1907-D Twenty Dollar, MS64
Denver Liberty Head Type Coin**

- 4857 1907-D MS64 NGC.** This is a sharp near-Gem, struck from unlapped dies with bold devices and legends. Satiny yellow-gold luster is mostly without abrasion, although a faint graze in the left obverse field and a small mark behind Liberty's eye prevent Gem classification. The 1907-D is the final Liberty Head issue from this mint, which became operational in 1906. NGC ID# 26D8, PCGS# 9053

**1907-D Liberty Head Double Eagle, MS64
Luminous, Eye-Appealing Type Coin**

- 4858 1907-D MS64 PCGS.** Remarkably luminous, lustrous surfaces glisten with variegated sun-orange, yellow, and greenish-silver hues, producing incredible eye appeal for this near-Gem type coin. A few small marks on Liberty's cheek, seen with a loupe, are all that prevent an even finer grade. Outstanding in every respect. NGC ID# 26D8, PCGS# 9053

**1907-D Double Eagle, MS62
Prooflike Surfaces**

- 4859 1907-D MS62 Prooflike NGC.** Representing the last year of production for the Liberty double eagles, and only the second year of coinage operations at the Denver Mint, this piece is an excellent type set candidate. Both sides feature bold design definition with fully mirrored surfaces and extraordinary eye appeal from the brilliant yellow luster. NGC has certified just 19 Prooflike examples and only one Deep Prooflike piece. Census: 5 in 62 (1 in 62 ★) Prooflike, 9 finer (12/18). NGC ID# 26D8, PCGS# 79053

**1907-S Twenty Dollar Liberty, MS64+
Original Surfaces**

- 4860 1907-S MS64+ PCGS. CAC.** While the 1907-S is not especially rare, except in Gem condition, this is a noteworthy coin. The Plus designation and CAC endorsement translate into "as close to Gem as you can get." Most 1907-S twenties are heavily marked, which is one aspect that sets this piece apart with its nearly abrasion-free surfaces. The mint luster is also thick and frosted as well as retaining the original rose-gold and lilac patina seen on untreated gold. This is quite the coin and one worth reaching for. NGC ID# 26D9, PCGS# 9054

SAINT-GAUDENS DOUBLE EAGLES

**1908 Saint-Gaudens Twenty, MS67
Short Rays, No Motto Design**

- 4861 1908 No Motto MS66 PCGS. CAC.** Ex: Wells Fargo Nevada Gold. Short Rays Obverse. This delightful Premium Gem is from the famous Wells Fargo Hoard, which was discovered in the 1980s and contained many of the finest-known No Motto type coins. The design elements are sharply detailed and the well-preserved orange-gold surfaces are lustrous and appealing. Housed in a green label holder. NGC ID# 26F6, PCGS# 9142

- 4862 1909/8 — Obverse Rim Filed — NGC Details. Unc.** An impressive example of this famous *Guide Book* overdate, with the remnants of an undertype 8 below the second 9 in the date. This coin is sharply detailed and lustrous, with well-preserved orange-gold surfaces. Unfortunately, the obverse rim shows some minor filing. NGC ID# 26FC, PCGS# 9151

- 4863 1909 MS63 NGC.** Lustrous surfaces display pleasing luster and sharply struck design elements. A few minute marks are not detracting. The 1909 Saint-Gaudens double eagle is elusive in finer grades.
Ex: *New York Signature (Heritage, 2/2014)*, lot 4910, which realized \$1,762.50. NGC ID# 26FC, PCGS# 9150

- 4864 1909-S Repunched Mintmark MS64 PCGS.** While the mintmark is repunched, this is not the FS-501 variety listed in the *Cherrypicker's Guide*. As such, PCGS describes it as a "minor variety." This Choice Mint State piece has brilliant and lustrous orange-gold surfaces and sharp design motifs. NGC ID# 26FE, PCGS# 9153

- 4865 1910 MS63 PCGS.** An impressive Select specimen of this early series issue, with sharply detailed design elements and lightly marked yellow-gold surfaces that radiate especially vibrant mint luster. Overall visual appeal is outstanding. NGC ID# 26FF, PCGS# 9154

4866 1910 MS64+ PCGS Gold Shield. The availability of this issue declines rapidly in grades finer than MS64. The current Plus-designated piece displays satiny yellow-gold luster and well-struck design elements. Only a scattering of light, unobtrusive contact marks prevent Gem classification from PCGS. NGC ID# 26FF, PCGS# 9154

4867 1910-D MS65 PCGS. A pumpkin-orange Gem with hints of apple-green toning near the rims. Lustrous and well preserved with an above-average strike. Only a field graze west of the branch stem merits passing mention. A costly acquisition any finer. Certified in a green label holder. NGC ID# 26FG, PCGS# 9155

4868 1910-S MS62 PCGS. This impressive MS62 specimen displays well-detailed design elements with just a touch of softness on the torch. The lustrous orange-gold surfaces are lightly marked for the grade and overall eye appeal is excellent. NGC ID# 26FH, PCGS# 9156

4869 1911 MS63 PCGS. Sharply detailed and lustrous, with lightly marked, satiny surfaces. Faint rose-gold hues emerge from the yellow-gold cartwheel effect. The 1911 Saint-Gaudens twenty is a slightly better date in the finer Mint State grades, but this Select example remains accessible. NGC ID# 26FK, PCGS# 9157

4870 1911 MS63 PCGS Gold Shield. CAC. The 1911 Saint-Gaudens double eagle claims a smallish mintage of 197,250 pieces. This impressive Select specimen offers well-detailed design elements and lustrous, lightly marked orange-gold surfaces. NGC ID# 26FK, PCGS# 9157

4871 1913-D MS63 PCGS. Vibrant mint luster and vivid orange-gold color are the outstanding visual attributes of this impressive Select example. The design elements are sharply detailed and only minor signs of contact are evident. NGC ID# 26FP, PCGS# 9162

4872 1913-D MS64 NGC. The pleasing orange-gold surfaces of this attractive Choice example show a few mint-green accents, vibrant mint luster, and few signs of contact. The design elements are sharply detailed and the eye appeal is excellent.
Ex: Long Beach Signature (Heritage, 9/2015), lot 5320, where it brought \$1,938.75. NGC ID# 26FP, PCGS# 9162

4873 1913-D MS64 PCGS. Vibrant mint luster shines from rich, orange-gold surfaces of this sharply struck, Choice Uncirculated Denver double eagle. Lilac accents encircle the obverse, which shows a few tiny ticks but no heavy marks or abrasions. The strike is consistently sharp on both sides. Despite a reasonably preserved mintage of 393,500 pieces, Gem representatives are elusive, adding to the appeal of this near-Gem example. NGC ID# 26FP, PCGS# 9162

1914 Saint-Gaudens Twenty, MS64 Scarce Finer

4874 1914 MS64 PCGS. A softly frosted near-Gem with mainly orange-gold luster, save for an area of silvery-rose color in the upper-right obverse quadrant. Abrasions are light and minimal. The 1914 Saint-Gaudens double eagle is available in MS64, but PCGS lists only 44 finer pieces (12/18). This coin is housed in a green label holder. NGC ID# 26FS, PCGS# 9164

1914-D Double Eagle, MS65+ Few Plus-Graded Coins Known

4875 1914-D MS65+ PCGS Gold Shield. A plentiful issue in Gem condition, the 1914-D Saint-Gaudens double eagle becomes conditionally scarce in MS66. This MS65+ coin balances price and quality. It is sharp and incredibly lustrous, showing medium orange-gold luster without bothersome abrasions. Highly appealing for the grade. NGC ID# 26FT, PCGS# 9165

1914-D Saint-Gaudens Twenty, MS65 Lustrous Orange-Gold Surfaces, CAC

4876 1914-D MS65 PCGS. CAC. Recent research by Roger Burdette suggests approximately 13,500 1914-D double eagles survive from a mintage of 453,000 pieces. Nearly all of the survivors are repatriated coins from foreign holdings. High quality from the Denver Mint translates to about 10% of surviving examples in Gem or finer grades. This piece ranks high among the Gem population, with CAC endorsement and vibrant, orange-gold surfaces. The coin is sharply struck with gleaming rose highlights and no significant marks. NGC ID# 26FT, PCGS# 9165

1915 Double Eagle, MS64 Nearly Full Strike

4877 1915 MS64 NGC. A virtually full strike is arguably the defining feature of this near-Gem double eagle. Some might contend its pleasing orange-gold color and vibrant, frosty luster are hallmarks. The fields are clean, and there are just a couple of abrasions on the striding figure of Liberty that identify this particular coin, including one below the knee. The 1915 is scarce and largely out of reach in higher grades. NGC ID# 26FV, PCGS# 9167

4878 1915-S MS65 PCGS. The 1915-S Saint-Gaudens double eagle is readily collectible at the MS65 grade level, making it a popular type coin. This attractive Gem is sharply detailed and well-preserved, with lustrous orange-gold surfaces. NGC ID# 26FW, PCGS# 9168

4879 1915-S MS65 PCGS. This delightful Gem exhibits well-detailed design elements, with a touch of the usual softness on the Capitol. The virtually flawless orange-gold surfaces are lustrous and appealing. NGC ID# 26FW, PCGS# 9168

4880 1915-S MS65+ PCGS. This high-end S-Mint Gem twenty dollar features boldly struck design elements, including Liberty's fingers, the panes and pillars on the Capitol Building, and the eagle's plumage. Intense luster issues from the yellow-gold surfaces laced with traces of rose. A few light marks do not distract. NGC ID# 26FW, PCGS# 9168

4881 1916-S MS65 PCGS Gold Shield. This impressive Gem exhibits well-detailed design elements, with just a trace of softness on the torch hand and eagle's belly. The flawless orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 34NJ, PCGS# 9169

4882 1920 MS63 PCGS. An impressive Select Mint State example, the 1920 had a low mintage of 228,250 coins. This is the first collectible Saint-Gaudens twenty of the decade. Both sides have trivial, grade-consistent marks. A highly lustrous yellow-gold example. NGC ID# 26FY, PCGS# 9170

4883 1920 MS63 NGC. Research by Roger Burdette suggests the majority of 1920 double eagles were not released until 1926, when no longer needed as "reserve funds" held in the Philadelphia Mint's Vault F, Cage #2. This is a frosted, Select Uncirculated example with light abrasions and a generally bold strike. Numerous die cracks through LIBERTY, plus reverse die cracks through the eagle's beak and the sun suggest die stress. NGC ID# 26FY, PCGS# 9170

4884 1920 MS63+ PCGS. The 1920 Saint-Gaudens double eagle is an available Philadelphia mint issue, despite the smallish mintage of 228,250 pieces. This well-detailed, lightly marked example exhibits pleasing orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 26FY, PCGS# 9170

1922 Twenty, MS65 Conditionally Elusive

4885 1922 MS65 NGC. A pleasing near-Gem example of the 1922 can be found with minimal searching, and even Gems are relatively accessible compared to many other dates in the series. Anything finer will, however, prove exceedingly challenging, if not impossible to acquire for the vast majority of collectors. This resplendent peach-gold Gem is strongly rendered with bold die cracks on both sides. NGC has seen just nine finer submissions (12/18). NGC ID# 26G3, PCGS# 9173

4886 1924 MS66+ NGC. The Plus designation is an added appeal on this Premium Gem type coin, although the luminous, frosty mint luster is itself worthy of note. The strike is sharp and eye appeal is exceptional. The 1924 Saint-Gaudens double eagle is plentiful through MS66, but finer pieces are conditionally elusive. NGC ID# 26G7, PCGS# 9177

4887 1924 MS66 NGC. CAC. The orange-gold centers are bounded by lighter yellow-gold color. Crisply struck and thoroughly lustrous with nearly immaculate surfaces aside from minor contact on the sun. NGC ID# 26G7, PCGS# 9177

4888 1925 MS65+ PCGS. This plentiful issue is an excellent choice for 20th century gold type collectors. A splendid Gem, the present piece exhibits brilliant yellow and frosty surfaces that combine to form outstanding eye appeal. NGC ID# 26GA, PCGS# 9180

1925-S Double Eagle, AU55 Better San Francisco Issue

4889 1925-S AU55 PCGS Gold Shield. Despite a mintage of more than 3.7 million coins, the 1925-S double eagle is scarce in Mint State, prompting many budget-conscious collectors to seek attractive AU coins. This Choice About Uncirculated example is an ideal fit for the casual series collector. The orange-gold surfaces are smooth and satiny, showing only light wear on the devices. Eye appeal is pleasing. NGC ID# 26GC, PCGS# 9182

1926 Twenty Dollar, MS66 FS-101, Tripled Die Obverse

4890 1926 Tripled Die Obverse, FS-101, MS66 PCGS. A lens reveals interesting die tripling on the monogram and nearby rays and stars. The tail of the 9 is also tripled. An identical (though *Cherrypickers'*-unlisted) variety is known on the 1926-S, which suggests the tripling originated on a working hub. A nicely struck high-grade example with rich lime-green and orange-gold patina. Marks are minimal, and mostly confined to the Capitol building and the field west of the beak. FS-101 Population: 17 in 66 (2 in 66+), 0 finer (12/18). NGC ID# 26GD, PCGS# 145744 Base PCGS# 9183

1928 Double Eagle, MS66 Thickly Frosted Mint Luster

4891 1928 MS66 PCGS. The practiced eye can usually pick a high grade 1928 out of a group of double eagles from the 1920s. Mint luster is distinctive, being thick and heavily frosted. On this particular coin it also displays a richly variegated lilac and reddish-golden hues on the reverse that is most attractive. A minimally abraded coin with a high degree of eye appeal. Scarce any finer and housed in a green label holder. NGC ID# 34VK, PCGS# 9189

COMMEMORATIVE SILVER

1900 Lafayette Dollar, MS65 Sharp DuVall 2-C Type Coin

4892 1900 Lafayette Dollar MS65 NGC. DuVall 2-C. One of the more plentiful varieties of the Lafayette dollar, ideal for type collectors. The second S in STATES on the obverse is repunched. This Gem displays a trace of golden toning over radiantly lustrous surfaces and sharp design elements. Close scrutiny fails to reveal noteworthy abrasions. NGC ID# BYKW, PCGS# 9222

4893 1921 Alabama MS66 PCGS. This Premium Gem features a trace of gold toning on the high points of the obverse and in the reverse field, with otherwise brilliant and untuned silver surfaces. Full frosty mint luster remains on both sides. PCGS has certified only five finer submissions (12/18). NGC ID# BYF2, PCGS# 9224

4894 1939 Arkansas MS66 PCGS Gold Shield. Representing the final year of issue for the extensive Arkansas Centennial commemorative half dollar series, this Premium Gem displays splashes of gold toning on its brilliant and satiny silver surfaces. Population: 95 in 66 (14 in 66+), 4 finer (12/18). NGC ID# BYFJ, PCGS# 9249

4895 1935-S Boone MS67 PCGS Gold Shield. Only 5,000 1935-S Boone half dollars were distributed to the public. Another five coins were made for assay purposes. Melded khaki-gold, crimson, and bluish-violet patina covers much of this strongly struck Superb Gem. Mint luster is satiny rather than deeply frosted. Population: 44 in 67 (3 in 67+), 1 finer (12/18). NGC ID# BYFW, PCGS# 9260

4896 1936-D Boone MS67+ NGC. CAC. This Plus-graded Superb Gem exhibits well-detailed design elements and impeccably preserved surfaces that display vibrant mint luster on both sides. Attractive shades of lavender and sea-green toning add to the outstanding eye appeal. Census: 17 in 67 (3 in 67+, 1 in 67 ★), 0 finer. CAC: 23 in 67, 0 finer (12/18). NGC ID# BYFZ, PCGS# 9267

4897 1937-S Boone MS67 PCGS Gold Shield. CAC. Delicate shades of jade and lavender toning blanket the well-preserved surfaces of this spectacular Premium Gem, with sharply detailed design elements and vibrant mint luster underneath. Population: 50 in 67 (5 in 67+), 3 finer. CAC: 19 in 67, 0 finer (12/18). NGC ID# BYG5, PCGS# 9272

4898 1938-D Boone MS67+ PCGS. Blushes of pale gold, lavender, and powder-blue adorn this near-perfectly preserved Boone half dollar from the final year of the series. Only 2,100 pieces were distributed, and five examples are reported finer at PCGS (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# BYG7, PCGS# 9275

4899 1938-S Boone MS67 PCGS. CAC. The 2,100-coin mintage for the 1938-S stands as the lowest among all Boone half dollars from 1934 through the end of the series. This Superb Gem nearly ranks among the finest certified representatives, with smooth, untuned surfaces awash in scintillating luster. Population: 54 in 67 (5 in 67+), 4 finer. CAC: 20 in 67, 0 finer (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# BYG8, PCGS# 9276

4900 1925-S California MS67 PCGS Gold Shield. Lovely rainbow toning appears on the satiny and highly lustrous silver surfaces of this Superb Gem California half dollar that marks the 75th anniversary of California becoming a state. PCGS has certified a mere six numerically finer examples of this issue (12/18). NGC ID# BYGA, PCGS# 9281

4901 1936-D Cincinnati MS67 NGC. The 1936-D Cincinnati half dollar claims a low distribution of 5,005 pieces. This impressive Superb Gem offers well-detailed design elements and impeccably preserved surfaces with vibrant mint luster throughout. It is scarce in this grade, and finer examples are rare. Census: 41 in 67 (4 in 67+, 5 in 67 ★), 3 finer (12/18). NGC ID# BYCK, PCGS# 9284

4902 1936 Gettysburg MS67 NGC. This is one of those odd commemorative half dollars that marks the 73rd anniversary of the Battle of Gettysburg, issued in 1936 to remember the 1863 event. An amazing Superb Gem, this frosty and fully lustrous example has brilliant centers within a ring of gold toning on each side. Census: 74 in 67 (6 in 67+, 6 in 67 ★, 1 in 67+★), 4 finer (12/18). NGC ID# BYGM, PCGS# 9305

1922 With Star Grant Half Dollar Elusive Gem Example

4903 1922 Grant With Star MS65 PCGS. Scarce in MS65 or finer grades, the With Star Grant Memorial half was a marketing ploy to sell more coins. The tactic was only partially successful, with 15% of the 5,006-piece mintage melted as unsold. One of the scarce issues of the classic commemorative series was an unintended result, and today the Grant With Star halves are in demand in all grades. This Gem example is housed in a previous generation green label holder. The coin is brilliant and lustrous with a hint of gold patina at the rims. Slight weakness at Grant's upper hair is noted.

From The Speechless Collection. NGC ID# BYPP, PCGS# 9307

1928 Hawaiian Half Dollar, MS65 Scarce Any Finer

4904 1928 Hawaiian MS65 NGC. A lustrous Gem example of this classic commemorative key, showing dusky champagne toning over unabraded surfaces. The coin is well-struck and it earns points for originality — many other Hawaiian half dollars have been cleaned. This issue is scarce in finer condition and out of reach for many collectors. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, MS65
Old Blue Label Holder, Barcode on the Back**

4905 1928 Hawaiian MS65 PCGS. A faint dappling of golden-gray toning adds a subtle, natural hue to the otherwise brilliant surfaces of this Gem Hawaiian half dollar. Sharply struck, both the portrait of Captain James Cook and the Hawaiian Chieftain's figure display full details. Only a few tiny ticks are visible with a loupe. The issue was a complete sellout, with most of the coins distributed to the Bank of Hawaii's customers, creating a premier rarity in the U.S. commemorative series.

From The Speechless Collection. NGC ID# BYGR, PCGS# 9309

4906 1935 Hudson MS66 PCGS. The Hudson half dollar ranks among the lowest mintage commemorative issues and is elusive in higher grades than this Premium Gem. Attractive peripheral gold toning clings to the borders of this ivory beauty. PCGS has only certified 25 numerically finer pieces (12/18). NGC ID# BYGS, PCGS# 9312

4907 1935 Hudson MS66 PCGS. CAC. Brilliant satin luster adds to the visual appeal of this Premium Gem with freckles of tobacco-brown toning adorning the rims. PCGS has awarded higher numeric grades to only 25 examples (12/18). NGC ID# BYGS, PCGS# 9312

4908 1924 Huguenot MS67 NGC. CAC. Splashes of gold, russet, and iridescent toning appear on both sides of this important Superb Gem that features brilliant underlying silver luster and sharp design motifs. Census: 60 in 67 (5 in 67+, 4 in 67 ★, 1 in 67+★), 2 finer. CAC: 23 in 67, 1 finer (12/18). NGC ID# BYGT, PCGS# 9314

4909 1918 Lincoln MS67 NGC. This delightful Superb Gem exhibits razor-sharp definition on all design elements and the virtually pristine surfaces display vivid shades of sea-green and lavender toning. Vibrant mint luster adds to the outstanding eye appeal. Census: 83 in 67 (1 in 67+, 8 in 67 ★, 4 in 67+★), 6 finer (12/18). NGC ID# BYGU, PCGS# 9320

4910 1921 Missouri MS65 PCGS. Ex: Newman. This Gem Missouri Centennial half dollar displays bold motifs amid thick, satiny luster. Pale lavender-gray toning deepens to russet and amber around the peripheries. PCGS lists 53 numerically finer representatives (12/18). NGC ID# BYH2, PCGS# 9330

4911 1921 Missouri MS65 PCGS. An abrasion under the frontiersman's ear is the only apparent mark on this silvery Gem example of the marginally more available Plain variant. Fully struck and brightly lustrous with a couple daubs of thin golden color on the reverse. *From The Speechless Collection.* NGC ID# BYH2, PCGS# 9330

4912 1921 Missouri 2x4 MS65 PCGS. Daubs of golden patina reside over each side of this largely untuned Gem. Satiny surfaces are clean, with just a couple of small flecks on the portrait. Although the official distribution is disputed, this variety with "2x4" in the left obverse field is unquestionably the scarcer of the two Missouri half dollar variants.

From The Speechless Collection. NGC ID# 2FE9, PCGS# 9331

4913 1923-S Monroe MS65+ PCGS Gold Shield. CAC. This lovely Monroe Doctrine half dollar is highly lustrous with brilliant, untuned silver surfaces. Despite a few trivial marks on each side, this piece has a high degree of eye appeal as the CAC sticker suggests. NGC ID# BYH4, PCGS# 9333

4914 1923-S Monroe MS66 NGC. A high-end example of the 1923-S Monroe Doctrine Centennial half dollar. Mottled lilac-gray toning covers each side, with frosty luster shining through. No major abrasions are seen. Finer pieces are rare, despite a distribution in excess of 274,000 pieces. Census: 66 in 66 (5 in 66+, 1 in 66 ★, 1 in 66+★), 11 finer (12/18). *Ex: FUN Signature (Heritage, 1/2013), lot 13849.* NGC ID# BYH4, PCGS# 9333

4915 1923-S Monroe MS66 PCGS. The Monroe half dollar, commemorating the centennial of the Monroe Doctrine, is a difficult issue to find in high grade due to the low relief of the design. Any marks, no matter how trivial, appear significant on this issue. This piece has lovely ivory surfaces with traces of gold and slate toning. PCGS has only certified eight numerically finer examples (12/18). NGC ID# BYH4, PCGS# 9333

4916 1926 Oregon MS67+ PCGS. CAC. A Plus-graded Superb Gem representative of this always popular silver commemorative, with sharply detailed design elements and virtually flawless surfaces. Vibrant mint luster radiates from both sides. PCGS has graded three numerically finer examples (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# BYH6, PCGS# 9340

4917 1937-D Oregon MS68 NGC. A low-mintage key, this magnificent 1937-D Oregon Trail half dollar exhibits razor-sharp definition on all devices, with vibrant mint luster and attractive shades of champagne-gold and violet toning. Census: 83 in 68 (3 in 68+, 6 in 68 ★, 1 in 68+★), 1 finer (12/18). NGC ID# BYHG, PCGS# 9347

4918 1915-S Panama-Pacific MS65 PCGS. An attractive Gem representative of this popular silver commemorative, with well-detailed design elements and well-preserved, lustrous surfaces, under low-intensity shades of lavender-gray and golden-tan toning. *From The Speechless Collection.* NGC ID# BYHP, PCGS# 9357

**1915-S Panama-Pacific Half Dollar, MS66
Scarce Issue in Finer Grades**

4919 1915-S Panama-Pacific MS66 PCGS. CAC. The 1915-S Panama-Pacific half dollar is readily collectible, even at the MS66 grade level, but it becomes scarce in finer grades. This delightful Premium Gem exhibits well-detailed design elements and well-preserved, lustrous surfaces, with highlights of lavender-gray and sea-green toning. NGC ID# BYHP, PCGS# 9357

4920 1926 Sesquicentennial MS65 PCGS. The Sesquicentennial half dollar is plentiful in MS63 and MS64 condition. It becomes slightly more elusive in MS65 and rare in MS66. Softly frosted and mostly brilliant surfaces exhibit glints of golden color. Typically struck with minor marks on the central elements. Only 13 pieces finer at PCGS (12/18).

From The Speechless Collection. NGC ID# BYJ4, PCGS# 9374

4921 1935 Spanish Trail MS63 PCGS. Gold CAC. Housed in a first-generation PCGS holder, this Select Mint State Spanish Trail half dollar exhibits a sharp strike and brilliant satin mint luster. This is an exceptional example for the grade, as the gold CAC certificate suggests. Gold CAC: 2 in 63, 1 finer (12/18). NGC ID# BYJ5, PCGS# 9376

- 4922 1935 Spanish Trail MS66 PCGS. CAC.** An impressive Premium Gem example of this popular silver commemorative, with sharply detailed design elements and well-preserved, lustrous surfaces, under pleasing shades of pale gold toning. Overall eye appeal is outstanding. NGC ID# BYJ5, PCGS# 9376

**1935 Texas Half Dollar, Pristine MS68
Unknown in Better Condition**

- 4923 1935 Texas MS68 NGC.** This is a pristine, essentially immaculate Registry coin. Both sides exhibit satiny, unmarked fields with an overlay of undisturbed mint frost. Coppini's lauded design is fully raised. The second-year 1935 Texas Independence half dollar struck at the Philadelphia Mint was distributed to the extent of 9,996 coins, none of which are better-preserved than this example. Census: 15 in 68, 0 finer (12/18). NGC ID# BYJA, PCGS# 9382

**1935-D Texas Half, MS68 ★
Stunning Mint Brilliance**

- 4924 1935-D Texas MS68 ★ NGC.** Marking the centennial of the 1836 Texas independence, this series began in 1934 and continued through 1938. A large quantity was coined at Philadelphia in 1934, and small numbers were struck at all three mints during the following four years. This stunning Superb Gem is brilliant and untuned with amazing eye appeal. The strike is extraordinary for this issue that invariably shows central weakness. This example is tied for the finest certified. Census: 10 in 68 (3 in 68 ★), 0 finer (12/18). NGC ID# BYJC, PCGS# 9383

- 4925 1936 Texas MS67+ PCGS. CAC.** This Plus-graded Superb Gem exhibits well-detailed design elements, with just a trace of the usual softness on the centers. The virtually pristine surfaces radiate vibrant mint luster, under attractive shades of greenish-gold and lavender toning. PCGS has graded nine numerically finer examples (12/18).
From The Five Generations of Eby Collection, Part II. NGC ID# BYJE, PCGS# 9386

**1936 Texas Half, MS68
Golden-Brown Patina**

- 4926 1936 Texas MS68 NGC.** Pastel gold and iridescent toning appears on both sides of this satiny Superb Gem that features brilliant underlying mint luster and exceptional design definition. A pristine representative of the five-year statehood type, which is famous for its crowded array of Texas icons on the reverse. Census: 8 in 68 (2 in 68 ★, 1 in 68+★), 2 finer (12/18). NGC ID# BYJE, PCGS# 9386

**1936 Texas Half Dollar, MS68
Richly Toned, Among the Finest Known**

- 4927 1936 Texas MS68 NGC.** Though Cornelius Vermeule admired the Texas design, if for no other reason than its success at incorporating so many elements into one space, many numismatic scholars find the reverse far too chaotic for a half dollar. Nonetheless, most collectors today acknowledge the artistry of the coin. The vivid orange, magenta, and forest-green patina that covers the obverse and much of the reverse generates much of this 1936 example's eye appeal. Glints of brilliance appear beneath silver-gray toning over the lower half of Victory and the Alamo. Only two examples have been graded higher (12/18). NGC ID# BYJE, PCGS# 9386

- 4928 1936-D Texas MS67+ PCGS. CAC.** A Plus-graded Superb Gem, with completely brilliant surfaces and vibrant mint luster on both sides. The design elements are sharply detailed, aside from the usual softness on the eagle's breast. Overall eye appeal is terrific. PCGS has graded 14 numerically finer examples (12/18).
From The Five Generations of Eby Collection, Part II. NGC ID# BYJE, PCGS# 9387

1936-D Texas Half Dollar, MS68
None Graded Higher

- 4929** 1936-D Texas MS68 PCGS. Ex: Shepherd. This is a phenomenally toned Superb Gem from a mintage of 9,039 pieces, with crimson, violet, and golden-russet patina speckled over the obverse and reverse. Certified in an old green label holder. Population: 14 in 68 (1 in 68+), 0 finer (12/18).
Ex: *Central States Signature* (Heritage, 5/2007), lot 5366, where it realized \$4,887.50. NGC ID# BYJF, PCGS# 9387

1937 Texas Half Dollar, MS68

- 4930** 1937 Texas MS68 NGC. In an inversion of the usual pattern, the 1935, 1936, and 1937 Texas commemoratives have lower mintages for the Philadelphia issues than for their Denver or San Francisco counterparts. This near-perfectly preserved representative, one of just 6,571 pieces struck, displays vivid plum, orange-bronze, and violet-blue patina over each side, and a touch of silver-gray appears at the upper-left reverse. NGC has certified a mere seven other examples in MS68, none of which received the Star designation, and PCGS has awarded this grade to just five coins (12/18).
Ex: *Central States Signature* (Heritage, 5/2007), lot 2621, where it sold for \$4,025. NGC ID# BYJH, PCGS# 9390

1937-S Texas Half Dollar, MS68
Excellent Eye Appeal

- 4931** 1937-S Texas MS68 NGC. Light champagne toning appears on both sides of this Superb Gem Texas Centennial half dollar, with gold and iridescent toning along the left obverse and reverse borders. This piece has flawless surfaces and nearly complete design definition. Census: 8 in 68, 0 finer (12/18). NGC ID# BYJK, PCGS# 9392

1937-S Texas Half Dollar, MS68
Perfect for a Registry Set

- 4932** 1937-S Texas MS68 NGC. The Texas half dollar (1934-1938) features one of the most popular designs in the classic commemorative series. This Superb Gem example of the 1937-S (6,637 coins distributed) exhibits pale gold, orange, and green patina over much of the obverse, especially around the rims, while the reverse is entirely brilliant and frosty. A marvelous coin for a fine Registry Set. Census: 8 in 68, 0 finer (12/18). NGC ID# BYJK, PCGS# 9392

- 4933** 1938 Texas MS67 NGC. Lustrous surfaces are visited by deep maroon color around portions of the rims, framing light gray centers. Sharply struck, with no mentionable marks. Census: 57 in 67 (1 in 67+, 7 in 67 ★), 3 finer (12/18). NGC ID# BYJL, PCGS# 9394

- 4934** 1938 Texas MS67 PCGS. Ex: Richard Jewell. At the time of the present coin's appearance in the March 2006 ANR auction, the PCGS population was 26 in MS67 and 0 finer. This lustrous Superb Gem displays a hint of light obverse golden patina. The reverse is practically brilliant. Sharply struck and close to pristine.
Ex: *Richard Jewell Collection* (American Numismatic Rarities, 3/2006), lot 1949, which realized \$2,702.50. NGC ID# BYJL, PCGS# 9394

1938-S Texas Half Dollar, MS68
Tied for Finest Certified

- 4935** 1938-S Texas MS68 NGC. The Texas type ended its five-year run in 1938. As in the prior four years, PDS sets were issued, but reduced collector interest led to the lowest set mintages for the type. This lustrous and strongly struck Superb Gem has lovely light gold and ice-blue accents. Nearly imperceptible thin marks on the eagle's knees are the only signs of contact. Census: 13 in 68 (6 in 68 ★), 0 finer (12/18).

Ex: *Dallas Signature* (Heritage, 10/2006), lot 1879, where it brought \$3,737.50. NGC ID# BYJN, PCGS# 9396

- 4936** 1925 Vancouver, Doubled Die Obverse, FS-102, MS67 NGC. The date and WE TRUST are die doubled, with the strength decreasing from left to right. The variety is unlisted on the holder. Peripheral golden-russet and jade-green borders surround lightly toned tan-brown centers. Lustrous, well struck, and impeccably preserved. PCGS# 145749 Base PCGS# 9399

- 4937 1927 Vermont MS67 PCGS Gold Shield.** Ira Allen, the founder of Vermont, appears on the obverse of the Vermont half dollar that commemorates the sesquicentennial of the Battle of Bennington. At the time of the battle on August 16, 1777, Vermont was an independent Sovereignty and not part of the United States. This Superb Gem features frosty mint luster and wisps of peripheral gold toning on its brilliant ivory surfaces. Population: 62 in 67 (4 in 67+), 1 finer (12/18). NGC ID# BYJR, PCGS# 9401

**1927 Vermont Half, MS67+★
Amazing Luster and Toning**

- 4938 1927 Vermont MS67+★ NGC.** This satiny Superb Gem Vermont half dollar has exceptional luster and a bold strike with nearly perfect surfaces. The obverse has intermingled lemon-yellow, gold, and iridescent toning, while the reverse shows evenly distributed light gold toning. An amazing example for the connoisseur. Census: 27 in 67 (1 in 67+, 2 in 67 ★), 3 finer (12/18). NGC ID# BYJR, PCGS# 9401

- 4939 1948-S Booker T. Washington MS67 PCGS Gold Shield. CAC.** This spectacular Superb Gem exhibits sharply detailed design elements throughout, with impeccably preserved, brilliant surfaces that radiate vibrant mint luster on both sides. Population: 38 in 67 (3 in 67+), 0 finer. CAC: 45 in 67, 0 finer (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# BYK2, PCGS# 9414

- 4940 1950 Booker T. Washington MS67 PCGS. CAC.** A magnificent Superb Gem specimen of this popular silver commemorative, with sharply detailed design elements and virtually pristine, lustrous surfaces, under attractive shades of champagne-gold and lavender toning. Population: 27 in 67 (1 in 67+), 0 finer. CAC: 20 in 67, 0 finer (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# BYK6, PCGS# 9420

- 4941 1951-D Booker T. Washington MS67 PCGS. CAC.** A spectacular Superb Gem, from a distribution of 7,004 pieces, this coin exhibits sharply detailed design elements and impeccably preserved, lustrous surfaces. Highlights of greenish-gold and lavender-gray toning enhance the terrific eye appeal. Population: 44 in 67 (3 in 67+), 0 finer. CAC: 45 in 67, 0 finer (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# BYKA, PCGS# 9425

- 4942 1951-D Washington-Carver MS67 NGC.** An elusive commemorative issue from a 10,000-coin distribution, the 1951-D is rarely found in Superb Gem condition. PCGS has never certified an example in MS67, and the NGC census is low as well. This piece is brilliant and untuned with satiny silver luster. Census: 7 in 67, 1 finer (12/18).

From The Five Generations of Eby Collection, Part II. NGC ID# BYKZ, PCGS# 9431

COMMEMORATIVE GOLD

- 4943 1903 Louisiana Purchase, Jefferson Gold Dollar MS66 PCGS. CAC.** A delightful Premium Gem representative of the Jefferson variety, from a distribution of 17,500 pieces. This coin exhibits sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. NGC ID# BYLD, PCGS# 7443

**1903 Louisiana Purchase Gold Dollar, MS67
Jefferson Portrait**

- 4944 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 PCGS Gold Shield.** The portrait of Thomas Jefferson, who authored the Louisiana Purchase, is boldly brought up on this sharply struck gold dollar. Splashes of blue and violet toning appear on the orange-gold surfaces of this remarkable Superb Gem that is tied for the finest PCGS has certified (12/18). NGC ID# BYLD, PCGS# 7443

- 4945 1903 Louisiana Purchase, McKinley Gold Dollar MS66 PCGS. CAC.** This delightful Premium Gem representative exhibits well-preserved orange-gold surfaces that radiate vibrant mint luster from both sides, with outstanding eye appeal. The design elements are sharply detailed throughout. NGC ID# BYLE, PCGS# 7444

- 4946 1903 Louisiana Purchase, McKinley Gold Dollar MS66 PCGS. CAC.** This spectacular Premium Gem exhibits sharply detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster on both sides and outstanding eye appeal. NGC ID# BYLE, PCGS# 7444

- 4947 1903 Louisiana Purchase, McKinley Gold Dollar MS67 PCGS Gold Shield.** Superb preservation earns this McKinley dollar a lofty grade, wherein it is conditionally scarce. PCGS lists only three finer pieces (12/18). This coin displays sharp design elements and satiny yellow-gold luster, with outstanding eye appeal. NGC ID# BYLE, PCGS# 7444

- 4948 1904 Lewis and Clark Gold Dollar MS64 NGC.** The textured orange-gold surfaces of this attractive Choice example show a few highlights of lilac, with vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# BYLE, PCGS# 7447

**1904 Lewis and Clark Gold Dollar, MS65
Nice Color and Luster**

- 4949 1904 Lewis and Clark Gold Dollar MS65 NGC. CAC.** From a distribution of 10,025 pieces, the 1904 Lewis and Clark gold dollar is more available than its 1905 counterpart. This attractive Gem displays sharply detailed design elements and well-preserved lemon-yellow surfaces, with vibrant mint luster on both sides. Overall visual appeal is outstanding. NGC ID# BYLE, PCGS# 7447

- 4950 1904 Lewis & Clark Gold Dollar MS63 Prooflike NGC.** This is an outstanding Select Mint State piece with fully mirrored fields and sharp design motifs, displaying brilliant yellow luster. Trivial marks are only visible with a magnifier. Census: 7 in 63 Prooflike, 8 finer (12/18). NGC ID# BYLE, PCGS# 77447

4951 1905 Lewis and Clark Gold Dollar MS64 PCGS. An attractive Choice example of this popular gold commemorative, with sharply detailed design elements and lustrous orange-gold surfaces. A small dig in the field, below the P in PORTLAND, is the only mark of note. NGC ID# BYLG, PCGS# 7448

4952 1905 Lewis and Clark Gold Dollar MS64 PCGS Gold Shield. Despite an identical distribution of 10,000 pieces each, the 1905 Lewis and Clark gold dollar is more elusive in high grade than its 1904 counterpart. This impressive Choice example displays well-detailed design elements and lustrous orange-gold surfaces with no mentionable distractions. NGC ID# BYLG, PCGS# 7448

4953 1905 Lewis and Clark Gold Dollar MS64 PCGS. The well-preserved orange-gold surfaces of this attractive Choice example radiate vibrant mint luster at all angles and show a few hints of lilac. The design elements are well-detailed and eye appeal is outstanding. NGC ID# BYLG, PCGS# 7448

4954 1915-S Panama-Pacific Gold Dollar MS66 PCGS. Tinges of silvery-rose and peach accent mainly yellow-gold surfaces on this Premium Gem Pan-Pac gold dollar. The strike is sharp, and the satiny surfaces are nearly devoid of contact marks. Eye appeal is excellent. Finer examples of this popular Exposition commemorative are scarce. NGC ID# BYLH, PCGS# 7449

4955 1915-S Panama-Pacific Gold Dollar MS66 PCGS. Repunched Mintmark. Luminous satin surfaces display a blend of rose, gold, and peach-orange hues on this remarkably well-preserved Pan-Pac Exposition commemorative. Eye appeal is spectacular, exceeding expectations for the grade. NGC ID# BYLH, PCGS# 7449

**1915-S Panama-Pacific Gold Dollar
Beautiful MS67**

4956 1915-S Panama-Pacific Gold Dollar MS67 NGC. A beautifully preserved Superb Gem example of this Exposition commemorative, showing sun-orange, green-gold, rose, and peach hues throughout. Luster glistens in-hand, and the sharp design elements enjoy pristine surfaces. The 1915-S Pan-Pac gold dollar is scarce this fine, and no higher-grade examples are known (12/18). NGC ID# BYLH, PCGS# 7449

4957 1915-S Panama-Pacific Quarter Eagle — Reverse Cleaned — NGC Details. Unc. The reverse displays wispy vertical hairlines, but this caramel-gold representative offers a crisp strike and coruscating luster.

**1915-S Panama-Pacific Quarter Eagle, MS65
Well-Preserved, Lustrous Surfaces**

4958 1915-S Panama-Pacific Quarter Eagle MS65 NGC. CAC. From a small distribution of 6,749 pieces, the 1915-S Panama-Pacific quarter eagle was conceived and distributed by Farran Zerbe. This impressive Gem exhibits well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. Overall eye appeal is outstanding for this popular gold commemorative. NGC ID# BYLP, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS65
Popular Commemorative Series**

4959 1915-S Panama-Pacific Quarter Eagle MS65 PCGS. CAC. The series of gold and silver issues of the Panama-Pacific Exposition rank among the most popular of all commemorative issues. Contemporary collectors had the opportunity to buy individual coins of the various denominations, along with complete sets containing five or 10 pieces. The actual number of pieces distributed follows the denominations closely as one would expect, and just 6,749 of these quarter eagles were sold in 1915. This Gem has frosty light yellow-gold surfaces with inconsequential, grade-consistent marks. Both sides show myriad swirling die polishing lines. NGC ID# BYLP, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS66
Elusive Issue Any Finer**

4960 1915-S Panama-Pacific Quarter Eagle MS66 PCGS. CAC. The 1915-S Panama-Pacific quarter eagle is not difficult to locate in MS66 condition, but finer coins are elusive. This attractive Premium Gem exhibits sharply detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. PCGS has graded 49 numerically finer examples (12/18). NGC ID# BYLP, PCGS# 7450

- 4961 1916 McKinley Gold Dollar MS65 PCGS. CAC.** An attractive Gem representative of this popular commemorative issue, with well-detailed design elements and vibrant mint luster on both sides. The well-preserved orange-gold surfaces show a few highlights of lilac. NGC ID# BYLK, PCGS# 7454

**1919 McKinley Gold Dollar, MS67
None Numerically Finer**

- 4962 1917 McKinley Gold Dollar MS67 PCGS.** Reddish-gold surfaces are softly frosted and essentially void of obvious marks. As a Superb Gem, this well-struck offering is more than three full grade points higher than the typical 1917 McKinley gold dollar. The *Guide Book* reports an estimated distribution of 5,000 coins for this issue — one-third that of the 1916. Population: 89 in 67 (11 in 67+), 0 finer (12/18). NGC ID# BYLL, PCGS# 7455

- 4963 1922 Grant Gold Dollar, No Star, MS65 PCGS.** From a distribution of 5,000 pieces, this impressive Gem exhibits sharply detailed design elements and vivid orange-gold surfaces that radiate vibrant mint luster on both sides. Eye appeal is outstanding. NGC ID# BYLN, PCGS# 7458

- 4964 1922 Grant Gold Dollar, No Star, MS66 NGC.** A spectacular Premium Gem representative of the Grant gold dollar, with sharply detailed design elements and well-preserved orange-gold surfaces. Vibrant mint luster adds to the terrific eye appeal. NGC ID# BYLN, PCGS# 7458

- 4965 1922 Grant Gold Dollar, No Star, MS66 PCGS.** A delightful Premium Gem representative of this popular gold commemorative, with sharply detailed design elements and vibrant mint luster throughout. The well-preserved orange-gold surfaces show subtle highlights of lilac. NGC ID# BYLN, PCGS# 7458

- 4966 1922 Grant Gold Dollar, With Star, MS65 PCGS.** A delightful Gem example of the popular Grant With Star gold dollar, with well-detailed design elements and lustrous orange-gold surfaces that show no mentionable distractions. Overall eye appeal is outstanding. NGC ID# BYPS, PCGS# 7459

- 4967 1922 Grant Gold Dollar, With Star, MS65 NGC.** A sharply detailed Gem example of the Grant With Star commemorative gold dollar, with well-preserved orange-gold surfaces that show occasional hints of lilac. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# BYPS, PCGS# 7459

- 4968 1922 Grant Gold Dollar, With Star, MS66 PCGS. CAC.** A spectacular Premium Gem example of this popular gold commemorative, with well-detailed design elements and vivid orange-gold surfaces that show no mentionable distractions. Vibrant mint luster adds to the terrific eye appeal. NGC ID# BYPS, PCGS# 7459

- 4969 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** Trivial and inconsequential marks fail to diminish the grade of this lovely Gem that exhibits brilliant and satiny yellow gold luster with wisps of delicate orange and pale blue toning. NGC ID# 2FE9, PCGS# 7466

- 4970 1926 Sesquicentennial Quarter Eagle MS65 PCGS Gold Shield.** A frosty orange-gold Gem with exceptionally clean surfaces and attractive luster. The low-relief design elements are sharply detailed. Sesquicentennial quarter eagles were the last gold issues in the classic commemorative series. The Mint distributed 46,019 pieces. NGC ID# 2FE9, PCGS# 7466

- 4971 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** The 1926 Sesquicentennial quarter eagle is available in MS65, but any finer and it climbs out of reach for many collectors. This Gem is well-struck and frosty with bright yellow-gold luster. No singular abrasions are seen. NGC ID# 2FE9, PCGS# 7466

- 4972 1926 Sesquicentennial Quarter Eagle MS65 PCGS Gold Shield.** This impressive Gem representative exhibits sharply detailed design elements throughout, and the well-preserved orange-gold surfaces show a few hints of lilac. Vibrant mint luster enhances the outstanding eye appeal. NGC ID# 2FE9, PCGS# 7466

- 4973 1926 Sesquicentennial Quarter Eagle MS65 PCGS. CAC.** A delightful Gem representative of this popular gold commemorative, with well-detailed design elements and well-preserved orange-gold surfaces that show a few highlights of lilac. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 2FE9, PCGS# 7466

- 4974 1926 Sesquicentennial Quarter Eagle MS65 PCGS. CAC.** Commemorative half dollars and quarter eagles were issued to help finance a celebration in Philadelphia of the 150th anniversary of the Declaration of Independence. John R. Sinnock, who would later model the Roosevelt dime, designed these popular pieces. This apricot-gold Gem exhibits dazzling satiny luster with accents of rose and olive in the fields. Crisply struck and housed in a green label PCGS holder. NGC ID# 2FE9, PCGS# 7466

MODERN ISSUES

1995 and 1996 Atlanta Olympic Commemoratives Complete 32-Piece Set in Wooden Case

- 4975 Complete 32-Piece 1995-1996 Atlanta Olympics Commemorative Set in Wooden Case.** Every design, every metal, every coin from half dollars to half eagles: the complete 32-coin Uncirculated and Proof set of Atlanta Olympic commemoratives. All coins are housed in their original Mint plastic capsules, the whole contained in a two-tray setup mounted in an impressive wooden box. Comes with a certificate of authenticity.

MODERN BULLION COINS

- 4976 1989 Half-Ounce Gold Eagle MS69 NGC.** The combination of the American gold Eagle program, and the various registry sets, provides individuals with an ideal way to enjoy collection and benefit from the ownership of gold. Back in the 1930s, when gold ownership was deemed illegal, an exception was made for coin collectors who were allowed to own gold coins, but could only own one example of any given date or mintmark. This virtually perfect half-ounce gold Eagle exhibits brilliant yellow-gold surfaces and satin luster. NGC ID# 26NA, PCGS# 9832

- 4977 1995-W Silver Eagle PR69 Deep Cameo PCGS.** From a low mintage of 30,125 pieces, the 1995-W one-ounce Silver Eagle is the acknowledged key to the series. This virtually flawless example exhibits fully struck design elements and deeply mirrored fields that contrast profoundly with the frosty devices. NGC ID# CFWX, PCGS# 9887

TERRITORIAL GOLD

4978 (1831-1834) C. Bechtler Dollar, 30 G. — **Plugged** — NGC Details. AU. K-1, R.4. An early, old-tenor gold dollar from the private Southern coiners. Plugged on the O in DOLLAR and opposite on the colon after RUTHERF. The O and colon are re-engraved. The sun-gold surfaces are moderately bright, and a few thin marks are above ONE and below the HTE in BECHTLER. Listed on page 392 of the 2019 *Guide Book*.

4979 (1834-1837) C. Bechtler Dollar, 28 G High, Plain Edge — **Repaired, Whizzed** — NGC Details. AU. K-2a, R.8. This rare die marriage is usually encountered with a reeded edge (K-2, R.6). We have examined the edge as closely as is possible within its NGC holder, and there appear to be traces of reeding on the edge near the C in CAROLINA. The NGC insert asserts Plain Edge, and incorrectly designates it as the 28 G Centered variety (K-3). This moderately wavy peach-gold example has been whizzed, and portions of the fields are smoothed. The R in BECHTLER is re-engraved, as are dentils near the OL in DOLLAR. Listed on page 392 of the 2019 *Guide Book*. NGC ID# 2B95, PCGS# 10061

4980 (1837-42) C. Bechtler Dollar, N Reversed — **Graffiti** — NGC Details. AU. K-4, R.4. Arguably the best-known engraving blunder of the pioneer gold series. The N in ONE is reversed, and entered over another letter, apparently a lightly impressed N. An olive-gold example with a linear bend above ONE. Delicate, unreadable cursive letters are entered below ONE. Listed on page 393 of the 2019 *Guide Book*.

4981 (1842-50) A. Bechtler Dollar, 27G. 21C., Plain Edge — **Damaged** — NGC Details. AU. K-24, R.3. August Bechtler inherited the private gold coinage business founded by his father Christopher. K-24 is the most available Bechtler variety, ideal for those who collect by issuer. This is a lightly circulated apricot-gold example with bright luster about the legends. The central fields exhibit myriad marks. Listed on page 394 of the 2019 *Guide Book*.

4982 (1842-50) A. Bechtler Dollar, 27G. 21C., Plain Edge — **Obverse Scratched** — NGC Details. AU. K-24, R.3. The honey-gold surfaces are original and approach Mint State sharpness, but the denomination side displays two clusters of pinscratches, through the flag and base of the large 1. Last and lightest of the Bechtler gold varieties. Listed on page 394 of the 2019 *Guide Book*.

1849 Moffat & Co. Five Dollar
Very Fine, Kagin-4a

4983 1849 Moffat & Co. VF20 NGC. K-4a, R.4. Moffat & Co. was the most respected private coinier during the California Gold Rush. The firm initially issued \$16 ingots, then produced five and ten dollar pieces, prior to striking Assay Office pieces. This circulated five dollar example is mostly olive-gold but displays orange-red toning in protected areas. Marks are surprisingly absent, though we note a minor rim knock on the reverse at 5 o'clock. Listed on page 396 of the 2019 *Guide Book*. NGC ID# ANJ5, PCGS# 10240

1849 Moffat & Co. Ten Dollar, Fine 12
K-6a, 'TEN DOL.'

4984 1849 Moffat & Co., K-6a, "Ten Dol." Fine 12 NGC. Moffat & Co. was a highly respected private coinage concern that began operations in the early days of the California Gold Rush. The well worn condition of this piece indicates their ready acceptance in California commerce throughout the Gold Rush era. This example has pleasing orange-gold surfaces with darker patina outlining the devices. Myriad surface marks are consistent with the grade. Listed on page 396 of the 2019 *Guide Book*. NGC ID# ANJ8, PCGS# 10246

CALIFORNIA FRACTIONAL GOLD

4985 1856 Liberty Round 50 Cents, BG-434, Low R.4, MS64 PCGS Gold Shield. The sole 1856-dated round half dollar variety is represented here by an attractively toned Choice Mint State example that displays pale orange and blue toning on its light yellow-gold surfaces. Population: 11 in 64 (1 in 64 prooflike), 11 finer (12/18). NGC ID# 2BKS, PCGS# 10470

4986 1853 Liberty Octagonal 1 Dollar, BG-531, R.4, MS62 PCGS Gold Shield. Period One gold dollars were used in Gold Rush commerce, since the economy lacked small denominations prior to the advent of the San Francisco Mint. More than half of the PCGS-certified examples of BG-531 are in circulated grades. This sharply struck apricot-gold representative displays satin luster and minimal marks. The N initial indicates the maker as Antoine Louis Nouzillet. Population: 23 in 62, 8 finer (12/18). NGC ID# 2BLW, PCGS# 10508

4987 1872/1 Indian Octagonal 25 Cents, BG-790, R.3, MS66 Deep Mirror Prooflike PCGS Genuine Gold Shield. This delightful Premium Gem is one of just two examples awarded the Deep Mirror Prooflike designation at PCGS, and both carry the MS66 grade. That service has also certified eight undesignated MS66 examples, but none finer (12/18). This piece has amazing field-to-device contrast with brilliant yellow surfaces.

1867 BG-805 25 Cents, MS67
Round Liberty Head

4988 1867 Liberty Round 25 Cents, BG-805, Low R.5, MS67 PCGS Gold Shield. This is the only MS67 example of BG-805 that PCGS has certified and no equal pieces have been examined at NGC (12/18). This lovely Superb Gem has brilliant light yellow surfaces with satin luster and a hint of contrast between the fields and the devices. NGC ID# 2BST, PCGS# 10666

- 4989 1882 Indian Round 25 Cents, BG-892, High R.7, MS64 PCGS.** BG-892 is the final Period Two round quarter variety, and the only such variety bearing an 1882 date, a year of enforcement by Secret Service agents. The very rare die marriage is credited to Nast, Greenzweig & Co., a San Francisco jeweler with New York City origins. The second edition of Breen-Gillio lists six examples but notes "may include duplication." An attractive almond-gold near-Gem with peripheral russet toning. Portions of the left-side borders lack a full strike. Population: 5 in 64, 3 finer (12/18). NGC ID# 2BVU, PCGS# 10753

COINS OF HAWAII

- 4990 1847 Hawaii Cent AU58 PCGS. CAC. M. 2CC-2.** Crosslet 4, 15 berries. Cents were struck for the Kingdom of Hawaii only in 1847, by the Attleboro, Massachusetts private coiner H.M. & E.I. Richards. Generally medium brown, though glimpses of mint red linger in the legends. Close evaluation reveals minor obverse contact. Very scarce with a CAC seal. Listed on page 425 of the 2019 *Guide Book*. CAC: 9 in 58, 39 finer (12/18). NGC ID# 2C52, PCGS# 10965
- 4991 1847 Hawaii Cent MS62 Brown PCGS. M. 2CC-2.** Crosslet 4, 15 berries. The first M in the king's name is repunched. A well struck representative of the popular single-year type. Pink-red, orange-gold, and olive-brown toning embraces moderately marked surfaces. Certified in an old green label holder. Listed on page 425 of the 2019 *Guide Book*. NGC ID# 2C52, PCGS# 10965
- 4992 1847 Hawaii Cent MS62 Brown PCGS Gold Shield. M. 2CC-2.** Crosslet 4, 15 berries. A pleasing chocolate-brown example. Spots are inconsequential, the strike is even, and contact is essentially confined to the field below the ER in HANERI. The cent denomination was struck only in 1847. Listed on page 425 of the 2019 *Guide Book*. NGC ID# 2C52, PCGS# 10965
- 4993 1847 Hawaii Cent MS62 Brown PCGS Gold Shield. M. 2CC-5.** Plain 4, 13 berries. A crisply struck representative with glimpses of the initial fire-red color in protected regions. Medium brown overall with deeper patina on the upper reverse. HAPA HANERI was a mint blunder, translating as half hundred. Listed on page 425 of the 2019 *Guide Book*. NGC ID# 2C52, PCGS# 10965
- 4994 1847 Hawaii Cent MS62 Brown PCGS Gold Shield. M. 2CC-5.** Plain 4, 13 berries. A medium brown cent with noticeable remaining mint red. Smooth except for obverse rim contact at 1 and 6 o'clock. The Russell-Medcalf standard reference lists six reverse die varieties, but the obverses differ as well. On the obverse of the present piece, the H punch has a defective center, and the rim is crumbling between 11 and 3 o'clock. Listed on page 425 of the 2019 *Guide Book*. NGC ID# 2C52, PCGS# 10965
- 4995 1883 Hawaii Half Dollar MS63 PCGS Gold Shield.** Attractive gold, lilac, and russet toning appear on the brilliant, frosty silver surfaces of this sharply detailed Select Mint State Hawaii half dollar, or hapalua, identifying the denomination in the native tongue. NGC ID# 2C5B, PCGS# 10991
- 4996 1883 Hawaii Dollar AU55 PCGS Gold Shield. CAC.** A Choice AU example, this akahi dala, or one dollar, exhibits rich golden-brown toning with iridescent splashes on each side. The Hawaiian coins were struck at the San Francisco Mint on standard U.S. coinage blanks. NGC ID# 2TGD, PCGS# 10995
- 4997 1883 Hawaii Dollar AU58 PCGS Gold Shield.** The Hawaiian dollar is also known as the akahi dala, in the native tongue. This near-Mint example has light silver-gray surfaces with nearly full luster and traces of gold toning. NGC ID# 2TGD, PCGS# 10995
- 4998 1883 Hawaii Dollar AU58 PCGS Gold Shield. CAC.** This akahi dala, or one dollar, is an excellent example of the 1883 Hawaiian silver coinage struck at the San Francisco Mint using standard planchets for U.S. coinage production. When Hawaii became a U.S. territory in 1900, these coins lost their legal tender status and a large number were melted. This near-Mint example has lovely, original gold and gray surfaces with sharp design definition. NGC ID# 2TGD, PCGS# 10995

Circa-1860 Waterhouse Token, XF40
Honolulu, Hawaii, M. 2TE-1

- 4999 (1860) Waterhouse Token XF40 PCGS. M. 2TE-1.** Believed to be the first token issued in Hawaii, the John T. Waterhouse Honolulu store card was struck in a soft pewter alloy. Most examples show indistinct details on the face of King Kamehameha, although the eyes and curls are clear on the present piece. The gunmetal-gray surfaces are lightly abraded except near the E in IMPORTER. Listed on page 426 of the 2019 *Guide Book*.
Ex: Chicago ANA Signature (Heritage, 8/2015), lot 3807; Chicago Central States Signature (Heritage, 4/2016), lot 5535, which realized \$3,995. NGC ID# 2UBK, PCGS# 600500

- 5000 1871 Wailuku Plantation 12 1/2 Cents, Broad Starfish, VF20 PCGS.** The better "Broad Starfish" variety of this popular Wailuku Plantation token. Hawaiian Sugar cane plantations of the 1870s and 1880s dealt with a shortage of Spanish-American silver by striking their own tokens, typically with real or half-real denominations. All are rare today. The present example is evenly struck except for weakness on the 8 in the date. Chiefly golden-brown with glimpses of gray and mahogany in design recesses. No marks are apparent. Listed on page 426 of the 2019 *Guide Book*. PCGS# 412434

1880 Wailuku Plantation Token, XF40
1 Real, Medcalf 2TE-6

- 5001 1880 Wailuku Plantation Token, 1 Real, XF40 PCGS. M. 2TE-6.** Struck for the sugar plantation by a blacksmith, and probably used for payments to workers when Spanish-American silver was scarce. One real was equivalent to an eighth of a dollar. The tokens were recognized and accepted throughout the islands. This light golden-brown example is evenly struck and shows only a single hair-thin diagonal mark above the large P. The surfaces are permeated with tiny planchet imperfections, as made. Listed on page 426 of the 2019 *Guide Book*. NGC ID# 2UBN, PCGS# 600512

PHILIPPINES

1904 Philippines Peso, MS65 Scarce, Low-Mintage U.S. Issue

- 5002 1904 Philippines Peso MS65 PCGS.** The mintage of the 1904 Philippines peso was a far cry from nearly 2.8 million pieces struck in 1903. Just 10,000 1904 pesos were struck. This lightly toned Gem example displays lilac and gold highlights over lustrous, silver-gray surfaces, with bits of tan-brown toning at the rims. The strike is sharp throughout both sides, with only a few tiny, obscure marks visible under a loupe. Population: 20 in 65 (3 in 65+), 8 finer (12/18). NGC ID# 2CAF, PCGS# 90383

- 5003 1910-S Philippines Peso MS63 PCGS.** A lightly toned silver-gray representative that boasts booming luster and a sharp strike. The reverse is well preserved, while the obverse field displays the expected number of delicate marks. Population: 17 in 63 (1 in 63+), 24 finer (12/18). NGC ID# 36VH, PCGS# 90396

PATTERNS

- 5004 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4 — Environmental Damage — PCGS Genuine. Proof, Unc. Details.** The crook-necked flying eagle on the obverse is similar to the design for the regular-issue Flying Eagle cent. The 5s in the date are slanted. ONE CENT is in the center of the reverse, inside a floral wreath similar to the large cent. The diameter is quarter-sized, nearly midway between the large and small cents. Struck in bronze with a plain edge. This clashed walnut-brown specimen displays glimpses of charcoal patina and has a diagonal pincscratch between stars 6 and 7. A small dig is noted near star 7, and a flan flaw affects the IC in AMERICA.
Ex: Rich Ulrich Collection (Stack's, 2/2008), lot 1703, which realized \$1,265.

1859 Paquet Half in Silver, Judd-235, PR64

- 5005 1859 Half Dollar, Judd-235, Pollock-284, R.5, PR64 PCGS Gold Shield.** Paquet's obverse design features a left-facing Liberty, seated, supporting a fasces with her right hand and a shield with her left. Thirteen small stars surround the periphery with the date, 1859, in exergue. Arrows and olive branches lie at the base of the shield. The reverse is also by Paquet with a slightly disproportionate eagle, with wings spread, holding three slender arrows in its left claw and an olive sprig with its right talon. The "perfect" scroll is held in the eagle's beak and reads E PLURIBUS UNUM with UNITED STATES OF AMERICA occupying the upper periphery and HALF DOLLAR the lower. The vertical lines in the shield are in groups of four each, as opposed to three lines as found on the similar "broken ribbon" version of this pattern. Struck in silver with a reeded edge. The fields are deeply reflective. The center of the obverse shows only the slightest color while the margins are surrounded by rich golden-rose and blue. The reverse is more thoroughly and deeply toned in the same color palette. NGC ID# 29CE, PCGS# 11960

1859 Half Dollar Pattern, PR61 Judd-241, 'French Head of Liberty'

- 5006 1859 Half Dollar, Judd-241, Pollock-297, R.4, PR61 PCGS.** The Longacre design for the half dollar, often called the "French Head of Liberty." The letters in LIBERTY are ribbed, unusual within the pattern series. The reverse has 50 CENTS in the center bounded by a cereal wreath, similar to that of the issued 1860 half dime and dime. Struck in silver with a reeded edge. This sharply struck specimen is pearl-white save for light gray toning near OF AMERICA. The luster is moderately subdued, and no marks are remotely consequential. NGC ID# 29CM, PCGS# 11978

1869 Standard Silver Half Dollar, PR62 Popular Pattern Issue, Judd-755

- 5007 1869 Standard Silver Half Dollar, Judd-755, Pollock-839, High R.6, PR62 PCGS.** Standard Silver design for the half dollar with Liberty wearing a ribbon inscribed LIBERTY on the obverse. The ribbon is ornamented with a star, the legend UNITED STATES OF AMERICA is around the periphery, and the motto IN GOD WE TRUST is on a scroll below. On the reverse, the denomination 50 CENTS is positioned within a wreath of oak and laurel. STANDARD SILVER is above, the date, 1869, is below. Struck in silver with a plain edge.

As expected, this attractive PR62 specimen exhibits sharply detailed design elements and deeply reflective fields that show a minimum number of contact marks for the grade. Delicate shades of lavender and champagne-gold toning visit the surfaces of both sides. Less than a dozen examples are believed known of this pattern. Population: 3 in 62, 7 finer (12/18).

Ex: Central States Signature (Heritage, 4/2013), lot 5335, which realized \$1,527.50. NGC ID# 29T6, PCGS# 60985

**1870 Standard Silver Half Dollar in Copper
Judd-959, PR64+ Red and Brown**

- 5008** 1870 Standard Silver Half Dollar, Judd-959, Pollock-1110, R.7, PR64+ Red and Brown PCGS Gold Shield. CAC. A bust of Liberty faces right, wearing a headband decorated with a star and inscribed LIBERTY. Her hair is tied up in a bun. IN GOD WE TRUST is emblazoned on a scroll below, and UNITED STATES OF AMERICA surrounds the portrait. The reverse has the familiar wreath of corn and cotton, with 50 / CENTS / 1870 centered within. STANDARD is located above the wreath. Struck in copper with a reeded edge. Fewer than a half dozen examples are known, according to USPatterns.com. Fire-orange and golden-brown surfaces include tinges of pastel rose and blue color. Contact is difficult to discern without magnification. We note two small specks above S1 on the obverse and left of the 5 on the reverse. NGC ID# 29YR, PCGS# 71205

ERRORS

**1906 Indian Cent, Fine 15
Close Overlapping Triple Strike**

- 5009** 1906 Indian Cent — Close Overlapping Triple Strike — Fine 15 PCGS Gold Shield. Evidence of three strikes are clearly visible on this Indian cent, with each strike well centered but slightly rotated from the other strikes. All of the details on each side appear three times, close together, and more obvious away from the center of the coin. Pleasing light brown surfaces show minor circulation marks.

**1865 Three Cent Nickel, MS63
Struck 25% Off Center**

- 5010** 1865 Three Cent Nickel — Struck 25% Off Center — MS63 NGC. The first-year three-cent nickel was struck in great numbers, to replace silver coins hoarded during the Civil War. But off-center pieces are rare, particularly in Select Mint State. This lustrous and unmarked silver-gray example is off-center toward 2 o'clock, taking OF AMER off the flan, along with a lower right portion of the wreath. Other minor mint errors include prominent clash marks near the date, and lapped design elements on the upper left wreath.

**Clad Washington Quarter, MS64
Struck 75% Off Center**

- 5011** Undated P-Mint Washington Quarter — Struck 75% Off Center — MS64 PCGS Gold Shield. Struck widely off-center toward 8:30. All legends are off the flan, except for the TY in LIBERTY and the Philadelphia mintmark. The latter confirms a mintage between 1980 and 1998. The left border of the obverse exposes the reddish-brown copper core. The remainder of the coin, and the unstruck portion of the planchet, remain brilliant.

**Clad Washington Quarter, MS63
Struck 15% Off Center on a
Double-Clipped Blank**

- 5012** Undated Clad Washington Quarter — 15% Off Center on a 51% Double-Clipped Type I Blank — MS63 PCGS Gold Shield. The blank has a small curved clip at 2:30 and a much larger (and more dramatic) irregular clip from 3 to 9 o'clock. The date and any mintmark are absent, along with most of UNITED STATES OF AMERICA. Washington's portrait is present only from the nose up. An arc of unstruck surface is broad at 3 o'clock, then narrows toward a close at 10 o'clock. The clips on the blank likely interfered with any pass through the upset mill. An impressive cream-gray error, potentially struck anytime between 1965 and 1998.

BETTS MEDAL

1814 George III Indian Peace Medal Struck in Silver, Borderline Uncirculated

- 5013** 1814 George III Indian Peace Medal, Silver, AU58 NGC. BHM-844, Adams 12.1. 75 mm. Small hole (as issued) at 12 o'clock with a plain loop attached. Struck during the War of 1812 for distribution to Canadian Native American chiefs. This high relief specimen shows no indications of high point wear, though the fields display hairlines and minor abrasions associated with limited non-numismatic handling. Iridescently toned in aquamarine, peach, and lilac shades. The left obverse legends are strike doubled.

WASHINGTONIA

- 5014** 1797-Dated Halliday Medal AU50 NGC. Baker-70T, Musante GW-57. White metal, 55 mm. The variety with parallel lines throughout the rims, instead of plain rims. Thomas Halliday of Birmingham, England, issued this medal, which celebrates the two times that George Washington set the example of ceding power to other statesmen, in 1783 and 1797. The cream-gray surfaces display minimal high point wear and scattered minor marks associated with loose 19th century storage.

U.S. MINT MEDAL

U.S. Diplomatic Medal, SP62 Brown Made for U.S. Centennial, Julian-CM-15

- 5015** (circa 1876) U.S. Diplomatic Medal, Julian-CM-15, SP62 Brown PCGS. The PCGS holder dates the medal as (1776), but this is a striking from Charles Barber's circa-1876 copy dies. These are identified by the addition of DUPRE F. and C. BARBER. in small letters, and the placement of the left wingtip between the ES in STATES. Julian credits the engraver as Chief Engraver William Barber, but Charles Barber had been an assistant engraver for the U.S. Mint since 1869. A lovely mahogany-brown specimen. We note a small spot on the upper bale, and minor field granularity near the eagle's tail. PCGS# 521518

SO-CALLED DOLLARS

- 5016** 1882 Pennsylvania Centennial, Penn's House and City Hall, Bronze, HK-140a, R.5, MS65 Brown NGC. Also known as the Penn's House and City Hall dollar, this design was struck in white metal and bronze. The obverse features a profile of William Penn facing to the left, and the reverse illustrates Penn's house with the date 1682, and the Philadelphia City Hall with the date 1882. This lovely Gem exhibits mahogany surfaces with reflective fields and an area of dark toning in the right obverse field. NGC has certified 13 of these, including four graded MS65 Brown, and three finer (12/18). PCGS# 642375
- 5017** 1906 Pikes Peak Centennial, Southwest Expedition, Silver, HK-335, R.6, PR65 PCGS. The Southwest Expedition Centennial commemorated the 100th anniversary of Lt. Zebulon Montgomery Pike "discovering" Pikes Peak. The event was held at Colorado Springs in September 1906. The official medal, as offered here, was produced in gold, silver, and bronze. Mint records indicate that just 250 silver proofs were coined at the Philadelphia Mint. This Gem has brilliant silver surfaces with fully mirrored fields and attractive peripheral gold toning. PCGS has certified six silver proofs, including two graded PR65 and two graded PR66 (12/18). PCGS# 513233
- 5018** (1962) Continental Dollar, Bashlow Restrike, Silver, HK-852a, R.4, MS67 NGC. The small S outside the Delaware and Pennsylvania rings on the reverse identifies this as one of the circa-1962 Robert Bashlow silver restrikes. We have handled a few of these over the years, but never one as nice as this Superb Gem with its brilliant, untuned, and fully mirrored surfaces. Census: 8 in 67 Prooflike, 1 finer (12/18). PCGS# 643591

CIVIL WAR TOKEN

- 5019** (1861-1865) Ohio Sutler Token, OH S-34-5C, 34th Regiment OVM, MS63 Brown NGC. The 34th Regiment of the Ohio Volunteer Infantry was also known as Piatt's Zouaves. The unit was organized in the summer of 1861 under Colonel Abraham S. Piatt. The unit saw its first action in West Virginia in September 1861, and participated in numerous campaigns until February 1865 when they were consolidated with the 36th Ohio Infantry. This sutler token was produced by John Stanton in Cincinnati and offered five cents in goods. Considerable orange luster remains beneath its iridescent toning. An exceptional Mint State piece for the Civil War aficionado.

WESTERN SOUVENIR GOLD

- 5020** 1911 Parka Head, Alaska Gold One, 11 Stars, MS66 NGC. HK-850, AERD-1, R.6. Die State 2.0. An essentially pristine wheat-gold Premium Gem. The Parka, Eskimo, or Esquimo type is considered the most desirable within the "Coins of the Golden West" set, as priced on page 414 of the 2019 *Guide Book*. The set was sold in framed sets, and by mail, by "M.E. Hart" (probably a business name of Farran Zerbe) at the 1915 Panama-Pacific Exposition. Round Parka varieties are known denominated as ONE, 1/2, and 1/4. Their maker is unknown. Die Varieties listed at MEHartGold.com.

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., Heritage Auctions, Inc., Heritage Collectibles, Inc., Heritage Luxury Property Auctions, Inc., Heritage Numismatic Auctions, Inc., Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
 - For Domain Names & Intellectual Property Auction lots the Buyer's Premium is Fifteen percent (15%) subject to a minimum of \$19 per lot;
 - For Animation Art, Comic, Currency, Movie Posters, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots the Buyer's Premium is Twenty percent (20%) subject to a minimum of \$19 per lot, except for Sports Collectibles lots which are subject to a minimum of \$14 per lot;
 - For Wine Auction lots the Buyer's Premium is Twenty-three percent (23%) subject to a minimum of \$19 per lot;
 - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$250,000 subject to a minimum of \$49 per lot, plus twenty percent (20%) of any amount between \$250,000 and \$2,500,000, plus twelve percent (12%) of any amount over \$2,500,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Jewelry, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, email, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments

(see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$499	\$20	\$200,000 - \$499,999	\$20,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$25,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$1,999,999	\$50,000
\$2,000 - \$4,999	\$200	\$2,000,000 - \$9,999,999	\$100,000
\$5,000 - \$9,999	\$500	>= \$10,000,000	\$200,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the

"Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Should state sales tax become applicable in the state for delivery prior to delivery of the property on the invoice, the bidder agrees to pay all applicable state sales tax as required by the delivery state as of the shipping date. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.xx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
- Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: Auctioneer is neither an insurance company nor a common carrier of any type.
 - Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¾ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
 - Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**
35. It shall be the responsibility for the successful Bidder to arrange pick-up or shipping in a timely manner (within 10 days). Held Lots will be subject to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 20% Seller's Commission.
36. A. NOTICE OF CITES COMPLIANCE: The purchase of items made from protected species: Any property made of or incorporating endangered or protected species or wildlife may have import and/or export restrictions established by the Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES) in various countries and domestically. Plant and animal properties include (but are not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, alligator, lizard, or other wildlife. These items may not be available to ship internationally or, in some cases, domestically. Domestic bans and restrictions exist in these states: 1) California state law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California. 2) Fossil Ivory is currently banned or restricted in 5 U.S. states: New York, New Jersey, California, Hawaii, and New Mexico. By placing a bid, the bidder acknowledges that he or she is aware of any restriction in their country or place of residence and takes responsibility for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment or afford them the capacity to void their purchase or payment. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or failure to mark lots containing protected or regulated species. For further assistance, please contact client services at 1-800-872-6467.
36. B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.
36. C. Auctioneer shall not be liable for any loss caused by or resulting from:
- Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
 - Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles.
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties, and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person.

Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature* Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenwarranty.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgsc.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470. Third-party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the noncertified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions, call the Credit department at 877-HERITAGE (437-4824) or email: CreditDept@HA.com.

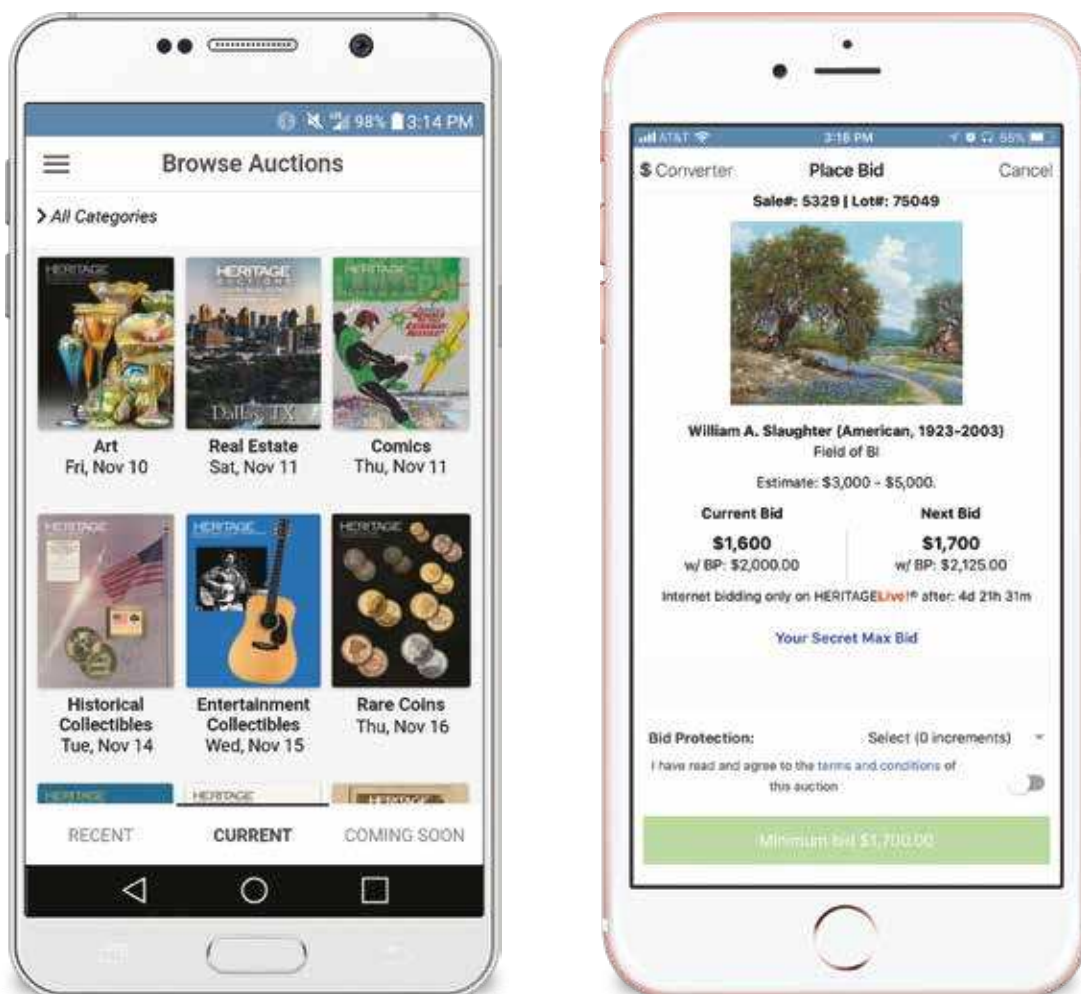

Notice as to an Auction in New York City:

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21, which states: The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

HERITAGE
AUCTIONS

WHY CHOOSE HERITAGE AUCTIONS?

LEADERS The world's largest collectibles auctioneer and the 3rd largest auction house in the world.

LOCATIONS Dallas, New York, Beverly Hills, San Francisco, Chicago, Palm Beach, Paris, Geneva, Amsterdam and Hong Kong.

TECHNOLOGY On average, HA.com receives 46,000+ worldwide visits per day, the highest web traffic of any auction house. (Source: SimilarWeb.com)

RESULTS 1+ million online bidder-members from 219 countries and \$815 million in 2017 sales.

TRUST Knowing that your treasures are being researched and valued by leading experts using current market reports.

INTEGRITY From your first phone call to our last handshake, your collection is handled with the utmost care and priority.

TRANSPARENCY No hidden reserves. No hidden fees.

QUALITY A commitment to exceptional customer service, attention to detail and first-class marketing efforts to bring a worldwide audience to your treasures.

TIMELY PAYMENT Each of our 45,000+ consignors have received their settlement checks in full and on time, without exception.

EXPERTISE Our success depends on providing clients with the best possible advice.

EFFICIENCY We focus on helping clients save valuable time and resources.

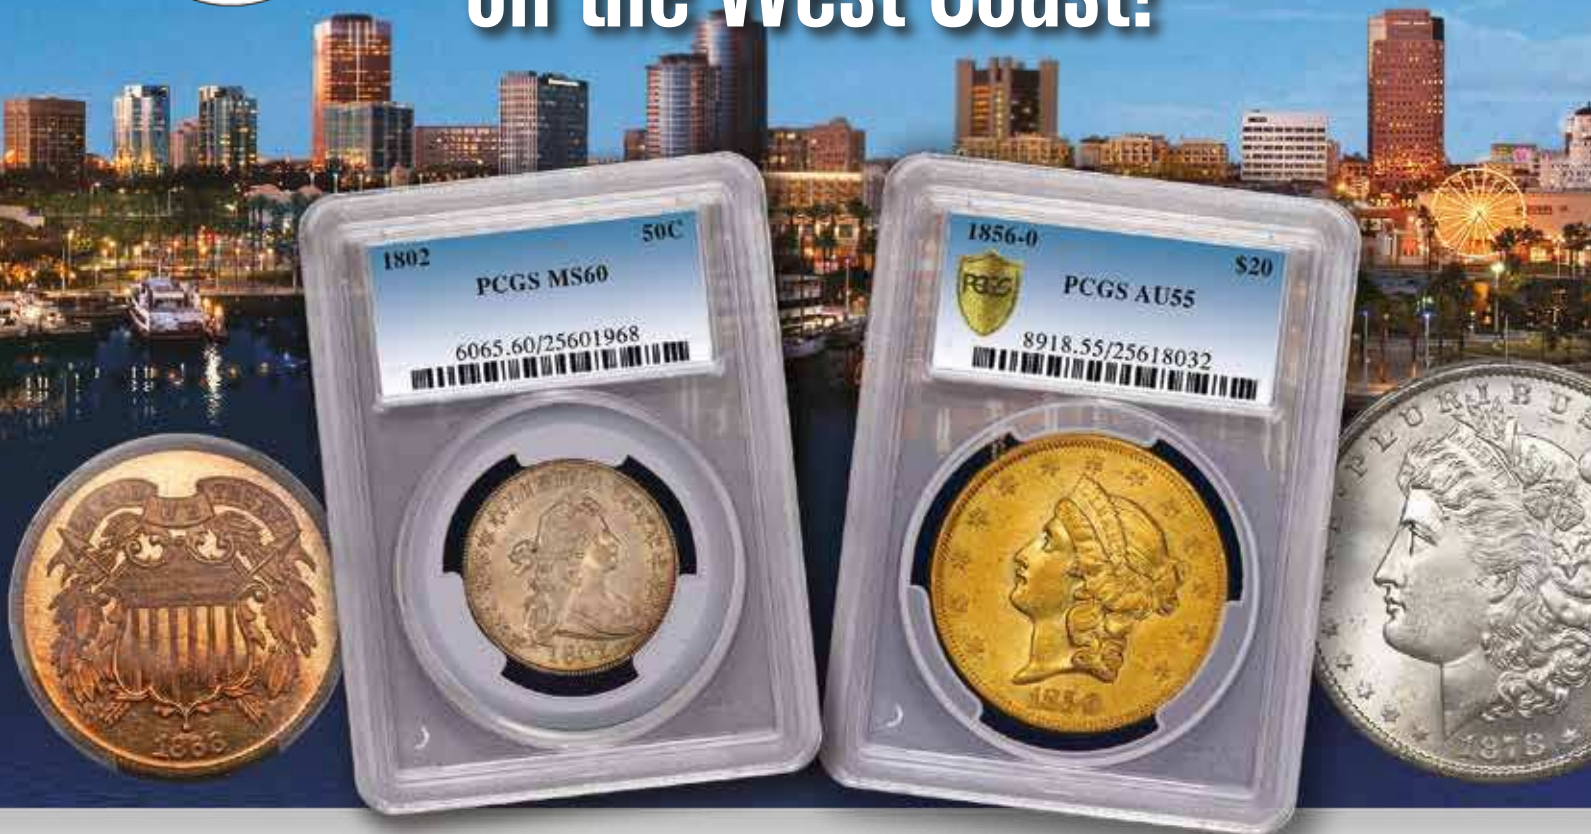

INNOVATION We continually make our services more accessible and useful.

LONG-TERM PERSPECTIVE We strive to carefully construct only sustainable, win-win agreements with clients and partners.

The Largest Coin Show on the West Coast!
